THE BUDGET

OF THE UNITED STATES GOVERNMENT

FISCAL YEAR ENDING JUNE 30 **1963**

APPENDIX

APPENDIX

THE BUDGET

OF THE

UNITED STATES GOVERNMENT

FOR THE FISCAL YEAR ENDING JUNE 30

1963

U.S. GOVERNMENT PRINTING OFFICE, WASHINGTON : 1962

FOREWORD

This volume is one of a group of three documents which together constitute the official budget of the United States Government. *The Budget of the United States Government, 1963*, is a more compact volume than previous budgets, in a page size similar to that of an ordinary book. It contains the Budget Message of the President, summary tables and statistical information, and various special analyses. *The Budget of the United States Government, 1963—Appendix* contains the text of appropriation estimates proposed for the consideration of the Congress together with specific reference materials on the various appropriations

and funds. The contents of this volume are further explained at the beginning of each of its four parts. *The Budget of the United States Government, 1963—The District of Columbia* is a volume which relates specifically to the estimates for the municipal government of the District of Columbia.

In addition, a pamphlet type of publication, *The Federal Budget in Brief, 1963*, is available for those who wish a much more brief presentation than any of the three official volumes.

NOTE.—Unless otherwise indicated, all references to years in this volume are to fiscal years ending June 30. Financial tables in Parts I and II are nearly always stated in thousands of dollars; details may not add to the totals because of rounding.

EXPLANATION OF ESTIMATES FOR FEDERAL FUNDS

Part I contains supporting details for Federal funds, including various types of tables and schedules, explanatory statements of the work to be performed and the money needed, and the text of the language proposed for

enactment by Congress on each item of authorization. Material is also included on a few trust funds which require congressional action. This part is arranged in chapters reflecting the organization of the Government.

TYPES OF FEDERAL FUNDS

Federal (Government-owned) funds are of four types, as follows:

The *general* fund is credited with receipts which are not earmarked by law for a specific purpose, and is charged with expenditures that are payable from appropriations (except appropriations of earmarked receipts) and those payable from borrowing. Both in number of items and in amounts, most of the Government's business is transacted through the general fund.

Special funds are those which are established to account for receipts that are earmarked by law for a specific purpose. They exclude the funds which carry on a cycle of operations for which there is continuing authority to use the receipts (as described in the next paragraph). Some special funds are subject to annual appropriation by Congress. Others are automatically available under the laws which created the funds.

Public enterprise (revolving) funds are those which fi-

nance a cycle of operations, in which the expenditures generate receipts coming primarily from the public and available for continuing use. They include nearly all of the Government-owned corporations, the postal fund, and various unincorporated enterprises.

Intragovernmental revolving and management funds (including *consolidated working* funds) are those which are created to facilitate financing operations within and between Government agencies. They consist of two types—*intragovernmental revolving* funds which finance a cycle of operations, like public enterprise funds but with receipts primarily from within the Government; and *management* funds which permit the pooling of advance payments from two or more appropriations to carry out certain activities.

Other funds, for which the Government serves in a fiduciary capacity, are of two types—*trust* funds and *deposit* funds. They are explained at the beginning of part II.

FORM OF DETAILED MATERIAL

For each appropriation, the budget includes certain detailed material, as follows: (1) appropriation language, if applicable; (2) a schedule of program and financing; (3) a narrative statement on program and performance; (4) a schedule of object classification. An exception occurs in the case of certain permanent appropriations and older appropriation accounts on which only a residual balance remains; such accounts of a bureau or independent agency are often combined into a single presentation instead of having separate schedules. Where the obligations fall in a single object class, the classification is identified in the program and financing schedule, rather than in a separate schedule.

For revolving funds, there are usually three additional schedules covering (5) a summary of sources and application of funds; (6) revenue, expense, and retained earnings; and (7) financial condition.

APPROPRIATION LANGUAGE

The language proposed for inclusion in the 1963 appropriation acts is printed at the head of each item requiring action by Congress, except for those items which are not formally recommended at this time but will be proposed for separate transmittal. The language of the 1962 appropriation acts is used as a base. Following the language are citations to relevant laws and the appropriation act from which the text is taken, as in this example:

SALARIES AND EXPENSES

For necessary expenses, including uniforms or allowances therefor, as authorized by law, (5 U.S.C. 2131), and services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a) at rates for individuals not to exceed \$100 per diem. [S11,000,000] \$12,800,000.

[For an additional amount for "Salaries and expenses", \$412,500.] (15 U.S.C. 77a 77bbbb, 78a-78jj, 79-79z-6, 80a1-80a52, 80b1-80b21; 11 U.S.C. 501-676; 5 U.S.C. 1001-1011; 60 Stat. 810, P.L. 87-196; Independent Offices Appropriation Act, 1962; Supplemental Appropriation Act, 1962.)

Roman type shows the text used in the 1962 appropriation acts. Italic type indicates proposed new language. Brackets enclose material which it is proposed to omit.

SCHEDULE OF PROGRAM AND FINANCING

This schedule consists of two parts. In the section for program by activities, costs or obligations are classified by purpose, program, or project.

Program and Financing (in thousands of dollars)

	1961 actual	1962 estimate	1963 estimate
Program by activities:			
1. Full disclosure provisions	\$2,466	\$3,169	\$3,742
2. Prevention and suppression of fraud	3,742	4,316	5,012
3. Supervision and regulation of securities markets	252	267	270
4. Regulation of investment and public utility holding companies	619	669	805
5. Corporate reorganizations	341	371	373
6. Operational and business statistics	241	245	264
7. Executive and staff functions	1,032	1,110	1,149
8. Administrative services	789	838	848
9. Special study and investigation of national securities exchanges and national se- curities associations		386	337
Total program costs ¹	9,482	11,371	12,800
Change in selected resources ²	26		
Total obligations	9,508	11,371	12,800
Financing:			
Unobligated balance lapsing	9		
New obligational authority	9,518	11,371	12,800
New obligational authority:			
Appropriation	9,518	11,412	12,800
Transferred to "Operating expenses, Public Buildings Service" General Services Ad- ministration (75 Stat. 353)		-41	
Appropriation (adjusted)	9,518	11,371	12,800

¹ Includes capital outlay as follows: 1961, \$63 thousand; 1962, \$80 thousand; 1963, \$77 thousand.

² Selected resources as of June 30 are as follows:

	1960	1961	1962	1963
Stores	6	8	8	8
Unpaid undelivered orders	35	59	59	59
Total selected resources	41	67	67	67

The financing section shows the appropriation provided and other means of financing the program, and the disposition of amounts not used during the year.

Where the data are available in the accounting system, cost-type budgets are presented, as in the preceding example. In such cases, figures opposite the activity entries are the value of goods and services consumed in carrying out the program, in the case of operating costs; and they are the value of capital assets received, in the case of capital outlay programs.

The relation of costs to obligations is summarized in an entry "Change in selected resources." For appropriation accounts, this entry is supported by a footnote identifying the amounts of the resources involved. For revolving funds, the items are identified on the statement of financial condition and the appended tabulation.

Obligations refer to orders placed, contracts awarded, loan agreements made, and services received during the year, regardless of the time of payment. Total obligations are always shown; activities are reflected on an obligation basis where cost data are not available. Appropriations or other obligational authority must be provided by the Congress before obligations can be incurred.

NARRATIVE STATEMENT OF PROGRAM AND PERFORMANCE

The work planned and services proposed to be carried out are described briefly in a narrative statement for each appropriation or fund. Where practicable the narrative statement indicates the expected accomplishment in relation to the financial estimates, and it gives some measures of program and performance.

SCHEDULE OF OBJECT CLASSIFICATION AND PERSONNEL SUMMARY

There is shown for each account a classification of obligations, costs, or accrued expenditures according to a uniform list of objects, as follows:

Object Classification (in thousands of dollars)			
	1961 actual	1962 estimate	1963 estimate
11 Personnel compensation:			
Permanent positions.....	7,914	9,486	10,719
Positions other than permanent.....	33	51	41
Other personnel compensation.....	59	40	40
Total personnel compensation.....	8,006	9,577	10,800
12 Personnel benefits.....	552	653	739
21 Travel and transportation of persons.....	317	430	482
22 Transportation of things.....	8	10	10
23 Rent, communications, and utilities.....	232	277	361
24 Printing and reproduction.....	39	44	45
25 Other services.....	159	190	162
26 Supplies and materials.....	106	110	124
31 Equipment.....	63	80	77
Total costs.....	9,482	11,371	12,800
Change in selected resources.....	26		
Total obligations.....	9,508	11,371	12,800

The object classes reflect the nature of the things or services purchased, regardless of the purpose or the nature of the program for which they are used.

The complete list of object classes is as follows:

- | | |
|---|---|
| 10 PERSONAL SERVICES AND BENEFITS | 30 ACQUISITION OF CAPITAL ASSETS |
| 11 Personnel compensation | 31 Equipment |
| 12 Personnel benefits | 32 Lands and structures |
| 13 Benefits for former personnel | 33 Investments and loans |
| 20 CONTRACTUAL SERVICES AND SUPPLIES | 40 GRANTS AND FIXED CHARGES |
| 21 Travel and transportation of persons | 41 Grants, subsidies, and contributions |
| 22 Transportation of things | 42 Insurance claims and indemnities |
| 23 Rent, communications, and utilities | 43 Interest and dividends |
| 24 Printing and reproduction | 44 Refunds |
| 25 Other services | |
| 26 Supplies and materials | |

A personnel summary is appended to the object classification schedule, as illustrated:

Personnel Summary			
Total number of permanent positions.....	1,095	1,320	1,475
Full-time equivalent of other positions.....	7	6	10
Average number of all employees.....	1,050	1,221	1,365
Number of employees at end of year.....	1,087	1,340	1,500
Average GS grade.....	8.9	9.2	9.3
Average GS salary.....	\$7,649	\$7,805	\$7,867

Permanent positions are those of a full-time nature which are of indefinite duration. Some are filled by persons with temporary appointments. The "number of employees at end of year" represents the number of (a) full-time and regularly scheduled part-time employees in pay status on the last workday in June, and (b) intermittent employees who work at any time during June. This is the basis for reports of the Civil Service Commission.

Average grades and salaries are computed arithmetically. Thus the average salary sometimes falls outside the salary range of the average grade.

STATEMENT OF SOURCES AND APPLICATION OF FUNDS

For all revolving funds, there is a summary statement of sources and application of funds. This statement shows total obligations adjusted to gross expenditures (on a cash basis), revenue and other receipts adjusted to applicable receipts (on a cash basis), and budget expenditures.

Summary of Sources and Application of Funds (in thousands of dollars)

Obligations (from program and financing).....	3,888	3,608	3,608
Increase (-) or decrease in gross unpaid obligations.....	-305	22	
Gross expenditures.....	3,582	3,630	3,608
Revenues and other receipts (from program and financing).....	3,779	3,600	3,600
Increase (-) or decrease in accounts receivable, net.....	-278	40	
Applicable receipts.....	3,501	3,640	3,600
Budget expenditures.....	81	-10	8

STATEMENT OF REVENUE, EXPENSE, AND RETAINED EARNINGS

For revolving funds there is also presented a statement of revenue and expense, computed on an accrual basis, and the resulting net income or loss for the year. This statement is usually on a full accrual basis, including sums for depreciation, provision for losses on receivables, etc. Where a fund consists of several programs, revenue and expense may be identified for each; otherwise they are shown only for the fund as a whole, as here illustrated:

Revenue, Expense, and Retained Earnings (in thousands of dollars)

Revenue.....	3,774	3,600	3,600
Expense.....	3,737	3,590	3,590
Net operating income.....	37	10	10
Nonoperating income:			
Proceeds from sale of equipment.....	5		
Net book value of assets sold (-).....	-5		
Net nonoperating income.....			
Net income for the year.....	37	10	10
Retained earnings, beginning of year.....	55	92	102
Retained earnings, end of year.....	92	102	112

¹ Balances of selected resources are identified on the statement of financial condition.

The statement includes an analysis of the retained earnings or the cumulative deficit. This analysis shows

any additions to earnings, other than net income for the year, any charges made against retained earnings, and the balance of profits kept in the enterprise as of the end of the year (whether in the form of cash, inventories, other current assets, or fixed assets).

STATEMENT OF FINANCIAL CONDITION

For each revolving fund there is presented a balance sheet of assets, liabilities, and investment of the Government at the close of the year, as in this example:

Financial Condition (in thousands of dollars)

	1960 actual	1961 actual	1962 estimate	1963 estimate
Assets:				
Treasury balance	470	389	399	391
Accounts receivable, net	262	540	500	500
Materials and supplies ¹	86	96	89	100
Equipment, net	230	244	251	258
Total assets	1,048	1,269	1,239	1,249
Liabilities:				
Current	441	616	576	576
Government equity:				
Non-interest-bearing capital:				
Start of year	530	552	561	561
Donated capital during year	22	9		
End of year	552	561	561	561
Retained earnings	55	92	102	112
Total Government equity	607	653	663	673

The balance sheet excludes balances of appropriations and borrowing authorizations which have not yet been paid into the revolving fund. The section on investment of the Government is divided into three subsections as appropriate: (a) interest-bearing capital, (b) non-interest-bearing capital, and (c) retained earnings.

Because the balance sheet is on an accrual basis, it does not reflect the obligations incurred which have not yet matured into liabilities, nor does it reflect unfilled customer orders received and available as a basis for obligation in the case of intragovernmental revolving funds. Therefore, there is normally appended to the balance sheet an "Analysis of Government Equity" which shows obligations other than liabilities, the unobligated balance, unfilled customers' orders on hand (where relevant), and invested capital and earnings, as in the following example:

Analysis of Government Equity (in thousands of dollars)

	1960 actual	1961 actual	1962 estimate	1963 estimate
Unpaid undelivered orders ¹	114	244	262	262
Unobligated balance	177	69	61	53
Invested capital and earnings	316	340	340	358
Total Government equity	607	653	663	673

¹ The changes in these items are reflected on the program and financing schedule.

TABLE ON UNEXPENDED BALANCES

A table at the end of each chapter shows the balances of budget authorizations carried forward at start and end of the past, current, and budget years. These balances are summarized in Table 17 of the Budget document.

Many budget authorizations are available for obligation for only 1 year, but some are available for longer periods of time or without time limit. In the case of those which are for a specific period of time, unobligated balances are written off at the end of that time, but obligated balances are carried forward indefinitely to pay outstanding obligations lawfully incurred.

In the case of salaries and wages, travel, and like items, the lag between obligations and expenditures is usually

no more than a few weeks or a few months. In the case of construction, major procurement, certain research contracts and similar items, the lag between obligations and expenditures may be 1 or 2 years or even longer.

The unobligated balance for each account represents the difference between the unexpended balance and the net obligations outstanding. Net obligations outstanding represent the unpaid obligations (both those which have accrued into liabilities and those which are undelivered or unperformed) less the accounts receivable and intragovernmental orders for services or material which have been accepted but have not yet become receivables.

LEGISLATIVE BRANCH

SENATE

Current authorizations:

SALARIES OF SENATORS, MILEAGE OF THE PRESIDENT OF THE SENATE AND OF SENATORS, EXPENSE ALLOWANCE OF THE MAJORITY AND MINORITY LEADERS OF THE SENATE, AND SALARY AND EXPENSE ALLOWANCE OF THE VICE PRESIDENT

COMPENSATION OF SENATORS

For compensation of Senators, \$2,433,370. (*Legislative Branch Appropriation Act, 1962.*)

MILEAGE OF PRESIDENT OF THE SENATE AND OF SENATORS

For mileage of the President of the Senate and of Senators, \$58,370. (*Legislative Branch Appropriation Act, 1962.*)

EXPENSE ALLOWANCE OF MAJORITY AND MINORITY LEADERS

For expense allowance of the Majority Leader and the Minority Leader of the Senate, \$2,000 each; in all, \$4,000. (*Legislative Branch Appropriation Act, 1962.*)

COMPENSATION OF THE VICE PRESIDENT OF THE UNITED STATES

For the compensation of the Vice President of the United States, \$37,775. (*Legislative Branch Appropriation Act, 1962.*)

EXPENSE ALLOWANCE OF THE VICE PRESIDENT

For expense allowance of the Vice President, \$10,000. (*Legislative Branch Appropriation Act, 1962.*)

SALARIES, OFFICERS AND EMPLOYEES

For compensation of officers, employees, clerks to Senators, and others as authorized by law, including agency contributions as authorized, which shall be paid from this appropriation without regard to the below limitations, as follows:

OFFICE OF THE VICE PRESIDENT

For clerical assistance to the Vice President, at rates of compensation to be fixed by him in basic multiples of \$5 per month, \$120,550. (*Legislative Branch Appropriation Act, 1962.*)

CHAPLAIN

Chaplain of the Senate, \$8,810. (*Legislative Branch Appropriation Act, 1962.*)

OFFICE OF THE SECRETARY

For office of the Secretary, \$708,400: *Provided*, That effective July 1, 1961, one additional clerk may be employed at \$2,520 basic per annum; and the basic amount available for clerical assistance and readjustment of salaries in the Disbursing Office is increased by \$3,240. (*Legislative Branch Appropriation Act, 1962.*)

COMMITTEE EMPLOYEES

For professional and clerical assistance to standing committees, and the Select Committee on Small Business, \$2,551,200. (*Legislative Branch Appropriation Act, 1962.*)

CONFERENCE COMMITTEES

For clerical assistance to the Conference of the Majority, at rates of compensation to be fixed by the chairman of said committee, \$47,325.

For clerical assistance to the Conference of the Minority, at rates of compensation to be fixed by the chairman of said committee, \$47,325. (*Legislative Branch Appropriation Act, 1962.*)

ADMINISTRATIVE AND CLERICAL ASSISTANCE TO SENATORS

For administrative and clerical assistants and messenger service for Senators, \$11,938,395: *Provided*, That effective July 1, 1961, the basic clerk hire allowances of the Senators from the State of Florida are increased to that allowed Senators from States having a population of five million, the population of said State having exceeded five million inhabitants. (*Legislative Branch Appropriation Act, 1962.*)

OFFICE OF SERGEANT AT ARMS AND DOORKEEPER

For office of Sergeant at Arms and Doorkeeper, \$2,519,525: *Provided*, That effective November 1, 1961, twelve additional laborers at \$1,680 basic per annum each; and two additional laborers at \$600 basic per annum each may be employed. \$2,540,135. (*Legislative Branch Appropriation Act, 1962.*)

OFFICES OF THE SECRETARIES FOR THE MAJORITY AND THE MINORITY

For the offices of the Secretary for the Majority and the Secretary for the Minority, \$126,350: *Provided*, That effective July 1, 1961, the respective Secretaries may fix the basic compensation of the assistant secretary for the majority and the assistant secretary for the minority at not to exceed \$8,160 per annum each. (*Legislative Branch Appropriation Act, 1962.*)

OFFICES OF THE MAJORITY AND MINORITY WHIPS

For two clerical assistants, one for the Majority Whip and one for the Minority Whip, at not to exceed \$6,900 basic per annum each, \$28,340. (*Legislative Branch Appropriation Act, 1962.*)

OFFICIAL REPORTERS OF DEBATES

For office of the Official Reporters of Debates, \$224,870. \$214,990. (*Legislative Branch Appropriation Act, 1962.*)

OFFICE OF THE LEGISLATIVE COUNSEL OF THE SENATE

For salaries and expenses of the Office of the Legislative Counsel of the Senate, \$232,240. (*Legislative Branch Appropriation Act 1962.*)

CONTINGENT EXPENSES OF THE SENATE

LEGISLATIVE REORGANIZATION

For salaries and expenses, legislative reorganization, \$125,940. (*Legislative Branch Appropriation Act, 1962.*)

SENATE POLICY COMMITTEES

For salaries and expenses of the Majority Policy Committee and the Minority Policy Committee, \$133,975 for each such committee; in all, \$267,950. (*Legislative Branch Appropriation Act, 1962.*)

JOINT ECONOMIC COMMITTEE

For salaries and expenses of the Joint Economic Committee, \$247,555, and in addition \$12,000 to be derived by transfer from the appropriation for fiscal year 1961 \$167,555. (*Legislative Branch Appropriation Act, 1962.*)

JOINT COMMITTEE ON ATOMIC ENERGY

For salaries and expenses of the Joint Committee on Atomic Energy, \$294,010. (*Legislative Branch Appropriation Act, 1962.*)

SENATE—Continued

Current authorizations—Continued

CONTINGENT EXPENSES OF THE SENATE—Continued

JOINT COMMITTEE ON PRINTING

For salaries and expenses of the Joint Committee on Printing, \$114,125; for expenses of compiling, preparing, and indexing the Congressional Directory, \$1,600; in all, \$115,725. (*Legislative Branch Appropriation Act, 1962.*)

VICE PRESIDENT'S AUTOMOBILE

For purchase, exchange, driving, maintenance, and operation of an automobile for the Vice President, \$8,710. (*Legislative Branch Appropriation Act, 1962.*)

AUTOMOBILE FOR THE PRESIDENT PRO TEMPORE

For purchase, exchange, driving, maintenance, and operation of an automobile for the President pro tempore of the Senate, \$8,960. (*Legislative Branch Appropriation Act, 1962.*)

AUTOMOBILES FOR MAJORITY AND MINORITY LEADERS

For purchase, exchange, driving, maintenance, and operation of two automobiles, one for the Majority Leader of the Senate, and one for the Minority Leader of the Senate, \$17,420. (*Legislative Branch Appropriation Act, 1962.*)

FURNITURE

For services and materials in cleaning and repairing furniture, and for the purchase of furniture, \$31,190: *Provided*, That the furniture purchased is not available from other agencies of the Government. (*Legislative Branch Appropriation Act, 1962.*)

INQUIRIES AND INVESTIGATIONS

For expenses of inquiries and investigations ordered by the Senate or conducted pursuant to section 134(a) of Public Law 601, Seventy-ninth Congress, including \$380,000 for the Committee on Appropriations, to be available also for the purposes mentioned in Senate Resolution Numbered 193, agreed to October 14, 1943, \$3,797,210. (*Legislative Branch Appropriation Act, 1962.*)

FOLDING DOCUMENTS

For the employment of personnel for folding speeches and pamphlets at a gross rate of not exceeding \$1.90 per hour per person, \$34,295. (*Legislative Branch Appropriation Act, 1962.*)

[SENATE RESTAURANTS]

[For repairs, improvements, equipment, and supplies for Senate kitchens and restaurants, Capitol Building and Senate Office Buildings, including personal and other services, to be expended under the supervision of the Committee on Rules and Administration, United States Senate, \$85,000.]

[For an additional amount for "Senate Restaurants", \$25,000.] (*Legislative Branch Appropriation Act, 1962; Supplemental Appropriation Act, 1962.*)

MAIL TRANSPORTATION

For maintaining, exchanging, and equipping motor vehicles for carrying the mails and for official use of the offices of the Secretary and Sergeant at Arms, \$16,560. (*Legislative Branch Appropriation Act, 1962.*)

MISCELLANEOUS ITEMS

For miscellaneous items, exclusive of labor, [\$2,008,345] \$2,104,565, including \$85,000 for payment to the Architect of the

Capitol in accordance with section 4 of Public Law 87-82, approved July 6, 1961. (*Legislative Branch Appropriation Act, 1962.*)

POSTAGE STAMPS

For postage stamps for the offices of the Secretaries for the Majority and Minority, \$140; and for airmail and special-delivery stamps for office of the Secretary, \$160; office of the Sergeant at Arms, \$125; Senators and the President of the Senate, as authorized by law, \$55,550; in all, \$55,975. (*Legislative Branch Appropriation Act, 1962.*)

STATIONERY (REVOLVING FUND)

For stationery for Senators and the President of the Senate, \$181,800; and for stationery for committees and officers of the Senate, \$13,200; in all, \$195,000, to remain available until expended. (*Legislative Branch Appropriation Act, 1962.*)

COMMUNICATIONS

For an amount for communications which may be expended interchangeably for payment, in accordance with such limitations and restrictions as may be prescribed by the Committee on Rules and Administration, of charges on official telegrams and long-distance telephone calls made by or on behalf of Senators or the President of the Senate, such telephone calls to be in addition to those authorized by the provisions of the Legislative Branch Appropriation Act, 1947 (60 Stat. 392; 2 U.S.C. 46c, 46d, 46e), as amended, and the First Deficiency Appropriation Act, 1949 (63 Stat. 77; 2 U.S.C. 46d-1). \$15,150. (*Legislative Branch Appropriation Act, 1962.*)

[ADMINISTRATIVE PROVISIONS]

[The second proviso in the paragraph relating to the authority of Senators to rearrange the basic salaries of employees in their respective offices, which appears in the Legislative Branch Appropriation Act, 1947, as amended (2 U.S.C. 60f) is amended to read as follows: "Provided further, That no salary shall be fixed in a Senator's office under this section at a basic rate of more than \$5,100 per annum, except that (1) the salary of one employee may be fixed at a basic rate of not more than \$6,540 per annum, (2) the salary of one employee may be fixed at a basic rate of not more than \$8,040 per annum, (3) the salary of one employee may be fixed at a basic rate of not more than \$8,460 per annum, and (4) the salary of one employee may be fixed at a basic rate of not more than \$8,880 per annum."]

The contingent fund of the Senate is hereafter made available for the payment of mileage, to be computed at 10 cents per mile by the nearest usual route, between Washington, District of Columbia, and a point in the home State of the Senator involved, for not to exceed four round trips originating and terminating in Washington, District of Columbia, made by employees in each Senator's office in any fiscal year, such payment to be made only upon vouchers approved by the Senator containing a certification by such Senator that such travel was performed in line of official duty, but the mileage allowed for any such trip shall not exceed the round trip mileage by the nearest usual route between Washington, District of Columbia, and the residence city of the Senator involved.] (*Legislative Branch Appropriation Act, 1962.*)

HOUSE OF REPRESENTATIVES

Current authorizations:

ADMINISTRATIVE PROVISION

Salaries or wages paid out of the items herein for the House of Representatives shall hereafter be computed at basic rates, plus increased and additional compensation, as authorized and provided by law. (*Legislative Branch Appropriation Act, 1962.*)

CAPITOL POLICE

GENERAL EXPENSES

For purchasing and supplying uniforms; the purchase, maintenance, and repair of police motor vehicles, including two-way police radio equipment; contingent expenses, including \$25 per month for extra services performed for the Capitol Police Board by such member of the staff of the Sergeant at Arms of the Senate or the House, as may be designated by the Chairman of the Board; \$36,700. (*Legislative Branch Appropriation Act, 1962.*)

CAPITOL POLICE BOARD

To enable the Capitol Police Board to provide additional protection for the Capitol Buildings and Grounds, including the Senate and House Office Buildings and the Capitol Power Plant, 【\$114,700】 \$142,810. Such sum shall be expended only for payment of salaries and other expenses of personnel detailed from the Metropolitan Police of the District of Columbia, and the Commissioners of the District of Columbia are authorized and directed to make such details upon the request of the Board. Personnel so detailed shall, during the period of such detail, serve under the direction and instructions of the Board and are authorized to exercise the same authority as members of such Metropolitan Police and members of the Capitol Police and to perform such other duties as may be assigned by the Board. Reimbursement for salaries and other expenses of such detail personnel shall be made to the government of the District of Columbia, and any sums so reimbursed shall be credited to the appropriation or appropriations from which such salaries and expenses are payable and shall be available for all the purposes thereof: *Provided*, That any person detailed under the authority of this paragraph or under similar authority in the Legislative Branch Appropriation Act, 1942, and the Second Deficiency Appropriation Act, 1940, from the Metropolitan Police of the District of Columbia shall be deemed a member of such Metropolitan Police during the period or periods of any such detail for all purposes of rank, pay, allowances, privileges, and benefits to the same extent as though such detail had not been made, and at the termination thereof any such person who was a member of such police on July 1, 1940, shall have a status with respect to rank, pay, allowances, privileges, and benefits which is not less than the status of such person in such police at the end of such detail: *Provided further*, That the Commissioners of the District of Columbia are directed to pay the captain and the lieutenant detailed under the authority of this paragraph the same salary as that paid the two lieutenants so detailed in fiscal year 1955 plus \$625 and such increase in basic compensation as may be subsequently provided by law so long as these positions are held by the present incumbents and that the Commissioners of the District of Columbia are directed to pay the deputy chief detailed under the authority of this paragraph the same salary as that paid in fiscal year 1961 plus \$1,025 and such increases in basic compensation as may be subsequently provided by law so long as this position is held by the present incumbent.

The foregoing amounts under "Capitol Police" shall be disbursed by the Clerk of the House. (*Legislative Branch Appropriation Act, 1962.*)

JOINT COMMITTEE ON REDUCTION OF NONESSENTIAL FEDERAL EXPENDITURES

For an amount to enable the Joint Committee on Reduction of Nonessential Federal Expenditures to carry out the duties imposed upon it by section 601 of the Revenue Act of 1941 (55 Stat. 726), to remain available during the existence of the committee, \$26,790, to be disbursed by the Secretary of the Senate. (Legislative Branch Appropriation Act, 1962.)

EDUCATION OF PAGES

For education of congressional pages and pages of the Supreme Court, pursuant to section 243 of the Legislative Reorganization Act, 1946, \$67,900 \$68,865, which amount shall be advanced and credited to the applicable appropriation of the District of Columbia, and the Board of Education of the District of Columbia is hereby authorized to employ such personnel for the education of pages as may be required and to pay compensation for such services in accordance with such rates of compensation as the Board of Education may prescribe. (Legislative Branch Appropriation Act, 1962.)

PENALTY MAIL COSTS

For expenses necessary under section 2 of Public Law 286, Eighty-third Congress, \$3,836,000 \$3,986,000, to be available immediately.

Funds available for expenses as authorized and necessary under section 2 of Public Law 286, Eighty-third Congress, shall be available for expenses, as now authorized by law, of delivery to postal patrons of mail matter under congressional frank. (Legislative Branch Appropriation Act, 1962; Supplemental Appropriation Act, 1962.)

COMPILING TESTIMONY IN CONTESTED ELECTION CASES

For services in compiling, arranging for the printer, reading proof, indexing testimony, stenography and typewriting, supervision of the work, and expenses incurred in the contested election cases as authorized by the Act entitled "An Act relating to contested elections", approved March 2, 1887 (2 U.S.C. 201-226), \$2,000.

STATEMENTS OF APPROPRIATIONS

For the preparation, under the direction of the Committees on Appropriations of the Senate and House of Representatives, of the statements for the first second session of the Eighty-seventh Congress, showing appropriations made, indefinite appropriations, and contracts authorized, together with a chronological history of the regular appropriation bills as required by law, \$8,000, to be paid to the persons designated by the chairmen of such committees to supervise the work. (Legislative Branch Appropriation Act, 1962.)

ARCHITECT OF THE CAPITOL

Current authorizations:

LIBRARY OF CONGRESS

The Library of Congress, established in 1800, is not only the library of the Congress itself, but is also the principal general library of the Government of the United States. Its collections are comprehensive and varied, and include outstanding collections of books, periodicals, newspapers, documents of the national governments of the world, literature in the Oriental languages, etc., and manuscripts, maps, music, motion picture films, sound recordings, prints, and photographs. In addition to maintenance of the collections and the rendering of the general and basic services connected therewith, including the Legislative Reference Service, certain specialized functions are performed: registration of copyrights, catalog card distribution, and the service of books in raised characters and talking books to the blind. In terms of these broad fields of activity comparative obligations (including only those chargeable to annual appropriations) for 1961 and estimated 1962 and 1963 are (in thousands of dollars):

	1961 actual	1962 estimate	1963 estimate
General and basic services:			
Acquisitions of library materials.....	1,335	1,419	1,642
Organization of the collections.....	2,992	3,137	3,237
Reader and reference services.....	2,139	2,274	2,504

Executive direction and general administrative services.....	963	1,018	1,064
Total general and basic services	8,552	9,201	9,942
Special service to the Congress:			
Legislative Reference Service.....	1,761	1,809	1,877
Revision of Annotated Constitution.....		25	
Total special service to Congress	1,761	1,834	1,877
Specialized services:			
Copyright.....	1,583	1,600	1,620
Catalog card distribution service.....	2,168	2,347	2,542
Books for the blind.....	1,719	1,786	1,885
Collection and distribution of library materials.....		400	770
Total specialized services	5,470	6,133	6,817
Total obligations	15,783	17,168	18,636

The Library's first obligation is to the Congress; the second, to other agencies of the Government; and the third, to other libraries, scholars, investigators, and the general public.

In addition to funds appropriated annually by Congress, there are also available a number of gift and trust funds, working funds, and allocations.

Estimates for the physical equipment, maintenance and operation of the Library buildings are carried under the request of the Architect of the Capitol.

LIBRARY OF CONGRESS—Continued

Current authorizations:

SALARIES AND EXPENSES

For necessary expenses of the Library of Congress, not otherwise provided for, including development and maintenance of the Union Catalogs; custody, care, and maintenance of the Library Buildings; special clothing; rental of buildings in the District of Columbia; and expenses of the Library of Congress Trust Fund Board not properly chargeable to the income of any trust fund held by the Board; [SS,455,000] \$9,032,600. (2 U.S.C. 131-166; 5 U.S.C. 150; 17 U.S.C. 1-215; 20 U.S.C. 91; Legislative Branch Appropriation Act, 1962.)

Program and Financing (in thousands of dollars)

	1961 actual	1962 estimate	1963 estimate
Program by activities:			
1. Acquisition of library materials.....	770	791	866
2. Organization of the collections.....	2,889	3,019	3,104
3. Reader and reference services.....	2,139	2,274	2,504

5. Executive direction and general administrative services.....	963	1,018	1,064
Total obligations.....	7,884	8,455	9,033
Financing:			
Unobligated balance lapsing.....	239		
New obligational authority (appropriation)	8,123	8,455	9,033

Personal services and incidental expenses for basic operations are financed from this appropriation.

1. *Acquisition of library materials.*—The Library's collections are developed in accordance with established acquisition policies: materials are procured by purchase, gift, exchange, copyright deposit, transfer and official deposit; and materials are selected for addition to the permanent collections. The objective for 1963 is: intensification of acquisitions activities and continued improvement in acquisition procedures and in exchange relations with institutions in the more important areas of the world. The collections totaled 41,283 thousand items as of June 30, 1961, and consisted of 12,330 thousand books and pamphlets; 17,731 thousand manuscript pieces and 11,222 thousand maps, pieces of music, reels of microfilm, photographs and other miscellaneous items. Of the items received, about 1 million are added to the permanent collections annually. Those received from various sources in 1961 and estimated for 1962 and 1963 are as follows (in thousands):

Description	1961 actual	1962 estimate	1963 estimate
Purchase.....	570	585	615
Deposit by virtue of law:			
Copyright.....	400	402	404
Other.....	720	720	725
Transfer from Federal agencies.....	1,806	1,850	1,900
Official donation from State and local agencies.....	126	130	135
Exchange.....	632	650	700
Gift from individual and unofficial sources.....	1,697	1,000	1,000
Total.....	5,950	5,337	5,479

2. *Organization of the collections.*—Library materials are cataloged, classified, marked, and arranged; Library of Congress catalogs and the main National Union Catalog (card catalog) are maintained; special collections are organized for use; and binding operations are controlled. The objectives for this activity in 1963 are the cataloging of a larger number of the materials received during the

year, improved cataloging methods and procedures to assure the usefulness of the collections; and the filing into and general maintenance of the card catalogs on a more current basis.

Selected performance data for 1961 and estimated for 1962 and 1963 (not including processing activities performed by the Reference Department and the Law Library) are as follows (in thousands):

Description	1961 actual	1962 estimate	1963 estimate
Volumes fully cataloged and added to the classified collections.....	134	140	145
Items otherwise organized for use (without full cataloging).....	28	32	32
Cards filed in catalogs.....	1,464	1,600	1,650
Volumes bound.....	102	115	115
Items repaired, cleaned, mounted, etc.....	229	230	230
Cards received by the National Union Catalog.....	1,219	1,225	1,250
Serial parts processed.....	1,735	1,800	1,850

3. *Reader and reference services.*—Books and other library materials are provided inside and outside of the Library, reference and bibliographic assistance is rendered, and custody of the collections is maintained. The objective of this activity for 1963 is to improve circulation, reference, and bibliographic services. The workload in all major activities is expected to increase in 1962 and 1963 as follows (in thousands):

Description	1961 actual	1962 estimate	1963 estimate
Reader and reference services:			
Materials served.....	1,772	1,800	1,810
Units issued on loan.....	202	220	225
Reference inquiries answered in person.....	327	330	335
Reference requests by telephone.....	184	195	200
Reference letters.....	89	90	95
Law library reader and reference services:			
Books and pamphlets served.....	275	300	325
Reference inquiries answered.....	52	55	58

4. *Maintenance and protective services.*—A staff of 200, including 82 part-time charwomen, preserves, cleans, and maintains the two Library buildings, collections, and grounds; operates telephone switchboards, elevators, check stands, and motor vehicles; procures and maintains furniture, office supplies, housekeeping materials, and miscellaneous equipment; assigns space; and operates the receiving and stock rooms. The guard force staff of 76 is necessary to prevent fire and theft, to maintain order, and to provide regular inspections of all areas in both buildings in which is assembled one of the greatest accumulations of national treasures in the world.

Financing:			
Unobligated balance lapsing.....	6		
New obligational authority (appropriation)	1,589	1,600	1,620

The Copyright Office is responsible for recording copyright claims, assignments, and renewals, for supplying copyright information to the public, for collecting and accounting for copyright fees, and for printing complete and indexed catalogs for each class of copyright entries. The office is conducted for the most part on a self-sustaining basis. The amount requested is substantially counterbalanced by fees received for services rendered and the value of books and other library materials deposited in accordance with the Copyright Act and transferred to the Library of Congress. The income and costs for 1961 and estimates for 1962 and 1963 are as follows (in thousands of dollars):

	1961 actual	1962 estimate	1963 estimate
Income:			
Fees applied.....	1,010	1,020	1,030
Estimated value of materials deposited.....	604	610	616
Total income.....	1,614	1,630	1,646
Costs:			
Salaries.....	1,390	1,414	1,434
Other costs.....	193	186	186
Total costs.....	1,583	1,600	1,620

The program and performance under each of the activities described are predicated on an estimated 252 thousand copyright registrations during 1963, an estimated 249 thousand during 1962, and an actual 247 thousand during 1961.

1. *Receiving and accounting for applications, fees and correspondence.*—Materials received by the Copyright Office are assembled and routed; accounts are maintained for all moneys received; records relating to the registration of copyrights are filed; and materials are deposited in accordance with the Copyright Act. Performance data for 1961 and estimates for 1962 and 1963 are as follows (in thousands):

	1961 actual	1962 estimate	1963 estimate
Registrations.....	247	249	252
Mail received and dispatched.....	540	546	551

2. *Examining copyright applications.*—All applications and deposits are examined before issuance of registration certificates or recording of documents to determine whether the provisions of the Copyright Act have been satisfied. Performance data are as follows (in thousands):

	1961 actual	1962 estimate	1963 estimate
Cases and documents examined.....	277	280	283
Registrations and recordation of documents.....	260	263	266
Letters written.....	35	35	35

3. *Indexing and cataloging materials received.*—The Register of Copyrights is required to print complete and indexed catalogs of all items registered. The catalog entries prepared by the Copyright Office are made available in part to the Library for its general operations. There were 247 thousand registrations cataloged in 1961 and estimates for 1962 and 1963 are 249 thousand and 252 thousand, respectively.

4. *Reference services.*—The Copyright Office makes available to the public information concerning the provisions of the Copyright Act, including procedures, policies, and rulings; information concerning registrations is furnished on a fee basis. Obtaining compliance with registration requirements is also part of this activity. Performance data are as follows (in thousands):

	1961 actual	1962 estimate	1963 estimate
Titles searched.....	71	72	73
Letters and search reports written.....	20	21	21

5. *Printing the catalog of copyright entries and bulletins of decisions.*—Catalogs for each class of copyright entries and bulletins of copyright decisions are printed and made available to the public.

6. *General supervision and legal services.*—The work of the Copyright Office includes legal services relating to the status and improvement of copyright law in its foreign as well as domestic aspects. For the next several years, a major effort of the Copyright Office will be directed toward the preparation, introduction, and enactment of legislation revising the entire copyright statute.

LEGISLATIVE REFERENCE SERVICE

SALARIES AND EXPENSES

For necessary expenses to carry out the provisions of section 203 of the Legislative Reorganization Act of 1946, as amended (2 U.S.C. 166), [S1,809,200] \$1,876,800: *Provided*, That no part of this appropriation may be used to pay any salary or expense in connection with any publication, or preparation of material therefor (except the Digest of Public General Bills), to be issued by the Library of Congress unless such publication has obtained prior approval of either the Committee on House Administration or the Senate Committee on Rules and Administration. (2 U.S.C. 166; *Legislative Branch Appropriation Act, 1962.*)

Program and Financing (in thousands of dollars)

	1961 actual	1962 estimate	1963 estimate
Program by activities:			
1. Research and analysis.....	1,494	1,532	1,584
2. Preparation of indexes and digests.....	81	84	86
3. Reference files, bibliographies, and congressional reader services.....	116	120	130

New obligational authority (appropriation)	1,780	1,809	1,877

The Legislative Reference Service prepares research reports, digests, etc., and supplies information in answer to inquiries from Members and committees of Congress.

1. *Research and analysis.*—The Legislative Reorganization Act of 1946 lists 19 specific fields of congressional concern in which top-level research by senior specialists is authorized. These fields correspond in general to the areas of committee responsibility. The following 13 fields are now covered by one or more senior specialists: International economics, international relations, taxation and fiscal policy, American government and public administration, conservation, American public law, labor, engineering and public works, agriculture, price economics, national defense, social welfare, and science and technology. The senior specialists provide authoritative research and consultative services. In addition, six subject matter divisions, upon request, furnish to Members and committees information on, or analysis of, public affairs problems in report form or otherwise, charts, translations, and bibliographies, and answers to spot reference questions. In 1961, 84 thousand congressional inquiries were answered, an increase of 3.9% over the number answered in 1960. The number of inquiries in 1962 is estimated at 88 thousand; and in 1963, 93 thousand.

2. *Preparation of indexes and digests.*—The Digest of Public General Bills covers all public bills and resolutions. It is expected that there will be about the same number of bills to be digested during the first session of the Eighty-eighth Congress as were digested for the first session of the Eighty-seventh Congress.

3. *Reference files, bibliographies, and congressional reader services.*—Reference files, containing clippings, pamphlets, and documents, are maintained as the basis for reply to a high percentage of inquiries; researchers are supplied with bibliographic and reference tools; selective and comprehensive bibliographies are prepared for Members and committees of Congress; and reader services are provided by the congressional reading room. During 1961, 106 thousand reference file items were processed, 14 thousand bibliographic citations prepared, 128 thousand published items acquired and processed, and 4 thousand readers served.

The card division sells copies of the Library's printed catalog cards and publications. It maintains a stock of over 140 million catalog cards representing some 3,475 thousand titles, and fills orders from over 14 thousand regular subscribers—mostly libraries—in the United States and abroad. In 1961, 111% of this appropriation was recovered in the form of receipts from card and publication sales. Receipts of \$2,410 thousand were deposited in miscellaneous receipts of the Treasury in 1961. The objectives for 1963 are: meeting the increased demand for catalog cards and maintaining a reasonable level of service and economy; providing older series of cards by electrostatic printing process thereby conserving space and providing fuller service; and the continued improvement of the National Union Catalog.

1. *Supplying cards for the Library of Congress.*—The number of cards supplied to the Library of Congress in 1961 was 4,560 thousand; estimated for 1962, 4,600 thousand; and for 1963, 4,650 thousand.

2. *Supplying cards for other libraries.*—The number of cards sold in 1961 was 35.7 million; estimated for 1962, 40 million; and for 1963, 45 million.

3. *Preparation, printing, and distribution of publications related to cataloging.*—These publications are an integral part of the cataloging activities of the Library of Congress and include the Classification Schedules, lists of Subject Headings, Rules for Descriptive Cataloging, Cataloging Service Bulletins, and similar publications.

4. *Preparation, printing, and distribution of the National Union Catalog.*—This catalog (a cumulative author list) is issued monthly and cumulated quarterly and annually. Subscribers also receive issues of Motion Pictures and Filmstrips (quarterlies with annual cumulation), and Music and Phonorecords (issued on a 6-month basis and annual cumulation). There were 1,165 paid subscriptions for all issues in calendar year 1960, and it is estimated that there will be 1,200 subscriptions for 1961 and 1,300 for 1962. Included under this activity is the National Library of Medicine Catalog.

5. *Preparation, printing, and distribution of the Subject Catalog.*—This catalog is issued in three quarterly volumes with an annual cumulation. There were 454 paid subscriptions for calendar year 1960. It is estimated that there will be 475 paid subscriptions in 1961 and about 500 in 1962.

This appropriation is used to acquire domestic and foreign trade publications, both current and noncurrent. The publications acquired by purchase constitute a very important part of the Library's acquisitions although they represent only a small portion of the material received annually. The objectives for 1963 are: to continue the procurement of important research materials to strengthen the Library's collections; to acquire selected important foreign newspapers and periodicals; to increase the acquisition of important materials from critical areas, particularly from Eastern Europe, Africa, and the Orient; to increase the acquisition of materials in the fields of science and technology; to continue the purchase of selected current titles on microfilm as an economy measure in lieu of binding; and to greatly expand the microfilming of deteriorating materials as a necessary preservative and space-saving measure.

BOOKS FOR THE LAW LIBRARY, LIBRARY OF CONGRESS—Continued

This appropriation constitutes the only means of acquiring law books published in the regular domestic trade (except for copyright deposits) and many foreign trade publications, both current and noncurrent. The legal publications acquired by purchase constitute a most important part of the law library's acquisitions representing approximately 50% of the number received annually. It is planned to continue the comprehensive coverage of the older jurisdictions, initiate similar programs for newly independent countries, and to acquire by photoduplication much-needed but hard-to-get materials from the Far and Near East. The purchase of microfilm copies of official legal gazettes is also planned not only to avoid the high cost of binding but also to insure the preservation of this perishable material.

The division for the blind is responsible for administering a national program to provide reading material for the blind of the United States, U.S. territories, and insular possessions. It has two closely related operations.

1. *Procurement and distribution.*—It provides books in embossed characters, and talking books with their associated reproducers. The books are distributed through

31 regional libraries which assume responsibility for their custody and circulation. The reproducers are distributed through 54 State agencies. The maintenance and procurement of these books are shown in the following table:

Description	1961 actual	1962 estimate	1963 estimate
Talking books purchased:			
(a) New titles.....	356	315	315
(b) Old titles re-recorded.....	5	30	30
Embossed books and magazines:			
(a) Press braille, made to order, titles.....	162	200	245
(b) Purchased from catalog, ready-made titles.....	101		
Talking book machines:			
Purchased.....	11,680	10,000	10,000
Repaired.....	13,070	10,000	11,000
Salvaged-scrapped.....	230	10,000	10,000
Records replaced.....	13,794	15,000	15,000

Objectives for 1963 are (1) the sustained procurement of braille and talking books, (2) procurement of more copies of popular titles, (3) procurement of a sufficient number of machines to equip newly registered blind readers and to replace single-speed machines, and (4) continued increased emphasis on research in sound reproduction.

2. *Cataloging, reference, circulation, and training services.*—Catalogs of talking and braille books are prepared and maintained, including a Union Catalog of Hand Copied Books in Braille which brings together a record of holdings of all libraries for the blind. The division also maintains a unique collection (about 28 thousand volumes) of books in braille not available elsewhere for loan in the United States. During the past 5-year period 1957-61 the number of readers throughout the country requiring catalogs from which to select reading matter has grown from 59 thousand to 71 thousand and circulation from 1,555 thousand units (volumes or containers) to about 2,288 thousand. The number of readers and circulation are expected to continue to increase in 1962 and 1963. Inquiries are received concerning library and related services available to the blind. Individuals throughout the Nation who are interested in transcribing or proofreading braille are trained and those qualified are certified. During 1961, 597 individuals were certified as compared to 544 in 1960, and it is anticipated that this level will continue during 1962 and 1963.

Public Law 85-147 (2 U.S.C. 131), approved August 16, 1957, authorizes an appropriation of \$720 thousand to remain available until expended to arrange, index, and microfilm the papers of the Presidents of the United States in the collections of the Library of Congress. The purpose is to preserve their contents and to make them more readily available for research. The program was started in 1959 with an appropriation of \$107 thousand. The objectives for the fifth year will be to provide negative and positive service copy on microfilm of material arranged and indexed, and to continue publishing indexes by photo-offset in editions of 1,000 copies each.

For 1961, \$61 thousand was appropriated to enable the Librarian of Congress to provide for the conversion to safety base film of the George Kleine collection of nitrate film, and the paper prints of early American motion pictures now in the custody of the Library.

With these funds, approximately 132 thousand feet of paper prints were converted.

It is anticipated that with the \$61 thousand appropriated for 1962, an additional 132 thousand feet of paper prints will be converted.

The \$61 thousand requested for 1963 will allow for the conversion of an additional 132 thousand feet of paper prints.

4. Program support (U.S. dollars).....		37	60
Total obligations.....		400	770
Financing:			
New obligational authority (appropriation).....		400	770

Section 104(n) of the Agricultural Trade Development and Assistance Act of 1954 (established by Public Law 85-931, approved Sept. 6, 1958) authorizes the Librarian of Congress to use foreign currencies accruing under this act to provide information of technical, scientific, cultural, or educational significance to the United States through the collection of foreign library materials and the distribution of copies thereof to libraries and research centers in the United States. The program is being initiated on a pilot project basis in three countries in 1962: India, Pakistan, and United Arab Republic. It is proposed to continue the program in 1963 on a somewhat expanded basis in the same countries. Of the total amount requested, \$710 thousand will be used to purchase foreign currencies, while \$60 thousand will provide U.S. dollar support.

1. *Acquisition of books and other library materials.*—Based upon the information received, during the pilot project stage concerning materials available in these countries and the requirements of other Federal agencies and certain research libraries in the United States, publications and other library materials will be purchased in multiple copies and distributed to selected libraries and

research centers in the United States, including the Library of Congress.

2. *Bibliographic listing.*—Lists of materials acquired in these three countries will be prepared and distributed to libraries and research centers in the United States to inform scholars of the range of books, serials, and other library materials available under this program.

3. *Operation of centers.*—Centers staffed with foreign nationals and a limited number of U.S. personnel will handle the acquisition, listing, microfilming, etc.

4. *Program support (U.S. dollars).*—U.S. dollars are required to pay certain expenses which cannot be paid by foreign currencies, such as salaries of U.S. personnel abroad, salaries of the coordinating staff of two persons at the Library of Congress, and travel in some instances.

Program by activities:			
Indexing and microfilming records of the Russian Orthodox Church in Alaska (total obligations) (object class 24).....			15
Financing:			
New obligational authority (appropriation).....			15

Public Law 87-113, approved July 31, 1961, authorizes an appropriation of \$15 thousand to arrange, transcribe into Latin characters, index, and microfilm the records of the Orthodox Greek Catholic Church in Alaska in the collections of the Library of Congress. Most of the microfilming work is contemplated for completion in 1963. When master films are completed, copies will be available through the Library's photoduplication service at cost.

ADMINISTRATIVE PROVISIONS

Appropriations in this Act available to the Library of Congress for salaries shall be available for expenses of investigating the loyalty of Library employees; special and temporary services (including employees engaged by the day or hour or in piecework); and services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a).

Not to exceed ten positions in the Library of Congress may be exempt from the provisions of appropriation Acts concerning the employment of aliens during the current fiscal year, but the Librarian shall not make any appointment to any such position until he has ascertained that he cannot secure for such appointments a person in any of the categories specified in such provisions who possesses the special qualifications for the particular position and also otherwise meets the general requirements for employment in the Library of Congress. (*Legislative Branch Appropriation Act, 1962.*)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedule of the parent appropriation as follows:
 "International Educational Exchange Activities, Department of State."
 "Operations, National Library of Medicine, Public Health Service, Department of Health, Education, and Welfare."

The Oliver Wendell Holmes devise fund was established by 69 Stat. 533 to (1) prepare a history of the Supreme Court of the United States, and, if deemed advisable, (2) finance an annual lecture or series of lectures, and (3) publish a memorial volume of Justice Holmes' writings. The principal and interest on the fund are available for these purposes. The current program is devoted primarily to the preparation of the history of the Supreme Court; annual lectures are also financed by this fund.

Advances and reimbursements from other accounts.....	-126	-65	-65
New obligational authority (appropriation)	4,044	4,724	4,684

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders 1960, \$0; 1961, \$5 thousand; 1962, \$10 thousand; 1963, \$5 thousand.

The work programs of the Office of the Superintendent of Documents are of a service nature, and hence there is no control over the volume of work which is required by law.

1. *Sales distribution.*—Government publications are purchased from the Public Printer to be placed on sale. Acquisition costs are paid from sales receipts; hence no appropriation is required for printing sales copies. By law, the sale price is set at the cost of manufacture plus 50%. At the end of each year, excess receipts from sales not required for purchasing additional publications are turned in to the Treasury Department as miscellaneous receipts. For 1961, earnings from the sale of publications

amounted to \$5,085 thousand. It is estimated that earnings for 1962 will be \$5,300 thousand and \$5,750 thousand for 1963. These earnings more than cover the appropriation required to finance the sales program.

The sale of Government publications has been steadily increasing, and in the last 10 years the sales volume has more than doubled. The current public interest in the Government's publishing program points to a continuing increase in the volume of sales.

2. *Distribution for other agencies and Members of Congress.*—The Superintendent of Documents maintains mailing lists, including the list for the Congressional Record, and performs mailing operations upon request of any Government agency. Mailing services for farmers' bulletins, soil surveys, and other publications which are allocated to Members of Congress on a quota basis are also provided.

3. *Depository library distribution.*—Upon request, 1 copy of every Government publication is supplied to more than 593 libraries which are designated depositories for Government publications.

4. *Cataloging and indexing.*—This activity covers the preparation and distribution of catalogs and indexes of all publications issued by the Federal Government, the principal series being the Monthly Catalog of the U.S. Government Publications and the Numerical List and Schedule of Volumes.

5. *Contingency fund.*—This fund to be used only with the approval of the Public Printer, and only to the extent necessary to provide for expenses (excluding permanent personal services) for workload increases not anticipated in the budget estimates and which cannot be provided for by normal budgetary adjustments.

The Government Printing Office executes orders for printing, binding, and blankbook work, placed by Congress and the various departments and independent establishments of the Federal Government, and furnishes on order, blank paper, inks, and similar supplies. Operations are subject to the authority of the Joint Committee on Printing (44 U.S.C.).

A separate appropriation has been established for authorized printing and binding for the Congress; for printing, binding, and distribution of the Federal Register; and printing and binding of Government publications authorized by law to be distributed without charge to the recipients (75 Stat. 334).

All work for Government agencies is done on a reimbursable basis and financed through the Government Printing Office revolving fund.

Receipts from sales of publications by the Superintendent of Documents are deposited to the revolving fund and cost of publications paid therefrom. All profits accruing from these transactions are deposited in the Treasury of the United States and credited to miscellaneous receipts (44 U.S.C. 63).

GENERAL PROVISIONS

Sec. 102. No part of the funds appropriated in this Act shall be used for the maintenance or care of private vehicles.

Sec. 103. Whenever any office or position not specifically established by the Legislative Pay Act of 1929 is appropriated for herein or whenever the rate of compensation or designation of any position appropriated for herein is different from that specifically established for such position by such Act, the rate of compensation and the designation of the position, or either, appropriated for or provided herein, shall be the permanent law with respect thereto: *Provided*, That the provisions herein for the various items of official expenses of Members, officers, and committees of the Senate and House, and clerk hire for Senators and Members shall be the permanent law with respect thereto: *Provided further*, That the provisions relating to positions and salaries thereof carried in [H. Res. 646 of the Eighty-sixth Congress and H. Res. 16, 138, 139, 219, and 225] *House resolutions* of the Eighty-seventh Congress shall be the permanent law with respect thereto.

Sec. 104. No part of any appropriation contained in this Act shall be paid as compensation to any person appointed after June 30, 1935, as an officer or member of the Capitol Police who does not meet the standards to be prescribed for such appointees by the Capitol Police Board: *Provided*, That the Capitol Police Board is hereby authorized to detail police from the House Office, Senate Office, and Capitol Buildings for police duty on the Capitol Grounds. (*Legislative Branch Appropriation Act, 1962.*)

1

The following table shows the results of the experiment. The data is presented in a table format with columns for 'Time (min)', 'Distance (m)', and 'Speed (m/s)'. The values are as follows:

Time (min)	Distance (m)	Speed (m/s)
0	0	0
10	100	10
20	200	20
30	300	30
40	400	40
50	500	50
60	600	60
70	700	70
80	800	80
90	900	90
100	1000	100

The data shows a linear relationship between time and distance, indicating constant acceleration. The speed increases linearly from 0 m/s at 0 minutes to 100 m/s at 100 minutes.

The U.S. Court of Customs and Patent Appeals has exclusive jurisdiction in appeals from judgments of the U.S. Customs Court in all cases involving the construction of the law and facts respecting the classification of merchandise and the rate of duty imposed thereunder and all appealable questions as to the laws and regulations governing the collection of customs revenues. Its decisions are final unless taken to the Supreme Court on writs of certiorari.

The court also has exclusive jurisdiction of appeals from the Tariff Commission on questions of law only and in the matter of unfair practices in import trade, and appellate jurisdiction from decisions of the Patent Office in patent and trademark cases, except those involving equity.

The U.S. Customs Court has exclusive jurisdiction over civil actions arising under the tariff laws, the internal revenue laws relating to imported merchandise, the several customs simplification acts, the proclamations of the President issued under reciprocal trade agreements, and other proclamations imposing taxes or quotas on imported goods. The court also has appellate jurisdiction of cases litigating the value of imported merchandise. It tries cases without a jury, making findings of fact and applying the law.

COURT OF CLAIMS—Continued

Current authorizations—Continued

SALARIES AND EXPENSES—Continued

The Court of Claims has jurisdiction over all cases involving claims against the United States (except in pension suits) instituted upon constitutional grounds or under Federal law or regulations, all claims arising out of any contract with the Federal Government and its agencies, and claims for the refund of taxes. It also has general jurisdiction to hear and determine claims for damages other than tort actions, provided the claimants would have the right to sue in law or equity if the United States were not immune to such suits. It has jurisdiction in suits against the United States by contractors dissatisfied with the findings and decisions of contracting agencies under terminated war contracts, and jurisdiction concurrent with that of the courts of appeals to review district court decisions in cases involving tort actions. It has exclusive jurisdiction to review the decisions of the Indian Claims Commission on appeal from the Commission. It also has jurisdiction in special act cases referred to the court by either or both Houses of Congress.

The statutory salaries and benefits of all active U.S. circuit and district judges, and all justices and judges who have retired or resigned in pursuance of law are payable from this appropriation. This item also includes the payment of annuities to surviving widows of Supreme Court Justices.

The Congress, by the Act of May 19, 1961 (Public Law 87-36), established 63 additional district judgeships and 10 courts of appeals judgeships. Funds were provided in a supplemental appropriation act for 1962 to compensate approximately 50 new judges for an average of 9 months. The estimate for 1963 includes the full-year cost of the new judgeships. The amount requested will be sufficient to pay on the average 452 circuit, district, senior, and resigned judges.

The primary and appellate jurisdiction of the courts of the United States are vested in the 91 district courts and 11 courts of appeals. Provision for the salaries of the administrative and legal aides required to assist the judges in the conduct of hearings, trials, and other judicial functions and to man the component offices of the courts

including the Federal Probation System, is made under this heading. The estimate for 1963 includes provision for the full-year cost of secretaries, law clerks and other personnel required to staff new judges appointed pursuant to the act of May 19, 1961 (Public Law 87-36).

Financing:			
Unobligated balance lapsing.....	37		
New obligational authority (appropriation)	4,635	4,500	4,500

This appropriation provides for the statutory fees and allowances of jurors, fees of jury commissioners, fees and related benefits of U.S. commissioners who serve primarily as committing magistrates, and compensation of voting referees appointed pursuant to the provisions of the Civil Rights Act of 1960.

The amount of service and the compensation of jurors depends largely on the number of jury trials requested by the parties to civil and criminal cases in the U.S. courts and to the administration of the jury system. A substantial reduction in fees paid jurors was accomplished during 1960 and 1961 through the efforts of the courts and the Administrative Office of the U.S. Courts in improving the jury system so as to provide for the greater utilization of jurors. An increase in the total cost of the services of jurors is expected as a result of the creation of 63 additional district judgeships, however, due to the uncertainty as to the amount that will be required, no increase in the appropriation has been requested.

The earnings of commissioners are directly related to the volume of cases presented by law-enforcement officials.

New obligational authority (appropriation)	3,835	5,328	4,700

Funds appropriated under this heading are for expenses of travel and subsistence incurred by judges and supporting personnel in attending sessions of court or transacting other official business; and for equipment, lawbooks, supplies, and other incidental expenses of operating the 11 courts of appeals and 91 district courts of the United States.

Seventy-three additional judgeships (10 circuit and 63 district) were authorized by the act of May 19, 1961 (Public Law 87-36). Funds were provided in the Supplemental Appropriation Act of 1962 to cover the cost of libraries, general office equipment, travel, and miscellaneous expenses of approximately 50 new judges and their staffs expected to serve for an average of only 9 months. The estimate for 1963 provides for the full-year cost of the new judgeships offset to the extent of the nonrecurring expenses authorized for 1962.

The estimate also includes additional funds for travel required to cover increased subsistence (per diem) allowance and parking fees authorized for judges and supporting personnel consistent with the provisions of the Travel Expense Act, as amended. The nonrecurring cost of furniture and furnishings required incident to the occupancy of new buildings, namely \$400 thousand has been deducted in establishing the budgetary requirements for 1963. The sum of \$370 thousand, which heretofore has been available for replacement furniture, is being transferred to the General Services Administration. The General Services Administration is to assume the budgetary responsibility for all furniture and furnishings required by the courts of appeals and district courts. A supplemental appropriation for 1962 is anticipated under proposed for separate transmittal.

The office pursuant to section 604 of title 28, United States Code, under the supervision and direction of the Judicial Conference of the United States, is responsible for the administration of the U.S. courts, including the probation and bankruptcy systems. The principal functions consist of providing staffs and services for the courts; conducting a continuous study of the Rules of Practice and Procedure in the Federal courts; examining the state of the dockets of the various courts; compiling and publishing statistical data concerning the business transacted by the courts; and administering the Judicial Survivors Annuity System under title 28, United States Code, section 376. The office also is responsible for the preparation and submission of the annual budget estimates as well as supplemental and deficiency estimates; the disbursement of and accounting for moneys appropriated for the operation of the courts; the audit and examination of accounts; the purchase and distribution of supplies, equipment and furniture; and for securing adequate space for occupancy by the courts and for such other matters as may be assigned by the Supreme Court and the Judicial Conference of the United States.

The estimate for 1963 provides for 21 additional clerical positions required incident to the creation of 73 additional judgeships by the act of May 19, 1961 (Public Law 87-36). In addition to providing the new judges and their supporting personnel with equipment and libraries, the office, on a continuing basis, will be engaged in handling an increased volume of clerical duties occasioned by the activities of the new judges. The estimate includes an additional sum required to finance the program and activities of the Judicial Conference Committee on Rules of Practice and Procedure. Provision has also been made for an increased subsistence (per diem) allowance and parking fees authorized pursuant to the Travel Expense Act, as amended.

COURTS OF APPEALS, DISTRICT COURTS, AND OTHER JUDICIAL SERVICES—Continued

Current authorizations—Continued

SALARIES OF REFEREES

(Special fund)

For salaries of referees as authorized by the Act of June 28, 1946, as amended (11 U.S.C. 68), not to exceed **[\$2,370,000]** \$2,750,000, to be derived from the Referees' salary and expense fund established in pursuance of said Act. (*Judiciary Appropriation Act, 1962.*)

Program and Financing (in thousands of dollars)

Financing:			
Unobligated balance lapsing-----	18		
New obligational authority (appropriation)	2,125	2,370	2,750

The district courts of the United States are constituted courts of bankruptcy, vested with original jurisdiction at law and in equity in proceedings brought under the bankruptcy statutes. This jurisdiction primarily is exercised through referees appointed by the several district courts. Their compensation and benefits are paid from this appropriation, which is derived from a special fund in the Treasury to which are deposited payments of fees and charges by parties to the proceedings. No appropriation from the general fund of the Treasury is required.

Additional full-time referees and the conversion of a number of part-time referees to full-time have been requested for 1963 to cope with rising caseloads forecast for the current and ensuing years.

CASELOAD

EXPENSES OF REFEREES

(Special fund)

For expenses of referees as authorized by the Act of June 28, 1946, as amended (11 U.S.C. 68, 102), not to exceed **[\$4,210,000]**

\$5,290,000, to be derived from the Referees' salary and expense fund established in pursuance of said Act. (*Judiciary Appropriation Act, 1962.*)

Program and Financing (in thousands of dollars)

	1961 actual	1962 estimate	1963 estimate
Program by activities:			
Clerk hire and miscellaneous expenses of referees (total obligations)-----	3,633	4,210	5,290
Financing:			
Unobligated balance lapsing-----	18		
New obligational authority (appropriation)	3,651	4,210	5,290

Office and other expenses of referees, including compensation and benefits of clerical employees, are payable upon authorization of the Director of the Administrative Office of the United States Courts. Caseload data appear under the account for Salaries of referees. This appropriation is derived from a special fund in the Treasury to which are deposited payments of fees and charges by parties to the proceedings. No appropriation from the general fund of the Treasury is required.

In order to handle the pending caseload and the anticipated increase in the volume of cases to be filed in 1962 and 1963, it is necessary to provide for expansion of the referees' staffs and their facilities. A supplemental estimate is anticipated for separate transmittal.

SPECIAL PROJECTS

Current authorizations:

SPECIAL PROJECTS

For expenses necessary to provide staff assistance for the President in connection with special projects, to be expended in his discretion and without regard to such provisions of law regarding the expenditure of Government funds or the compensation and employment of persons in the Government service as he may specify, \$1,500,000: *Provided*, That not to exceed 10 per centum of this appropriation may be used to reimburse the appropriation for "Salaries and expenses, The White House Office", for administrative services: *Provided further*, That not to exceed \$5,000 shall be available for allocation within the Executive Office of the President for official reception and representation expenses. (*General Government Matters Appropriation Act, 1962.*)

The Bureau assists the President in the discharge of his budgetary, management, and other executive responsibilities.

1. *Office of budget review.*—Budget instructions and procedures are developed, review of agency estimates is coordinated, and the budget document is prepared.

2. *Office of financial management.*—Direction is given to programs for improving accounting and financial management in the executive agencies, in collaboration with the General Accounting Office and the Treasury Department.

3. *Office of legislative reference.*—Proposed legislation and agency reports on pending legislation and enrolled bills are reviewed for the President.

4. *Office of management and organization.*—Programs and plans are developed for improved Government organization and procedures, and guidance is provided in the work of the Bureau to improve agency management and operations.

5. *Office of statistical standards.*—Proposed agency reporting plans and forms are reviewed, and the Government's statistical activities, coverage, and methods are coordinated and improved.

6. *Program divisions.*—Agency programs, budget requests, and management activities are examined, appropriations are apportioned, proposed changes in agency functions are studied, and agencies are assisted in the improvement of their administration. Responsibility for this work with respect to particular agencies is divided among five divisions: (a) commerce and finance, (b) international, (c) labor and welfare, (d) military, and (e) resources and civil works.

¹ Includes capital outlay as follows: 1962, \$10 thousand; 1963, \$12 thousand.
² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1961, \$0; 1962, \$25 thousand; 1963, \$20 thousand.

The National Aeronautics and Space Council is responsible for advising and assisting the President on policies, plans, and programs of the United States in aeronautical and space activities.

The Council is concerned with a wide variety of new and complex problems associated with the expanded national effort in space.

The Vice President is Chairman of the Council and membership includes the Secretaries of State and Defense, the Administrator of the National Aeronautics and Space Administration, and the Chairman of the Atomic Energy Commission. This appropriation provides salaries of the Council staff and expenses of Council operations.

OFFICE OF EMERGENCY PLANNING

On August 1, 1961, major civil defense functions of the Office of Civil and Defense Mobilization were transferred to the Department of Defense by Executive Order 10952. Shortly afterward by Executive Order 10958 emergency medical and food stockpiling responsibilities of the Office of Civil and Defense Mobilization were transferred to the Department of Health, Education, and Welfare and the Department of Agriculture. Responsibilities retained by Office of Civil and Defense Mobilization were principally investigation, advice, coordination, policy formulation, and preparedness. Appropriately, these responsibilities were reorganized under a successor office, the Office of Emergency Planning, by Public Law 87-296.

This Office will advise and assist the President in determining the policy for planning, directing, and coordinating the total nonmilitary defense program.

[OFFICE OF CIVIL AND DEFENSE MOBILIZATION]

OFFICE OF EMERGENCY PLANNING

Current authorizations:

SALARIES AND EXPENSES

For expenses necessary for the [Office of Civil and Defense Mobilization] Office of Emergency Planning, including services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a); reimbursement of the General Services Administration for security guard services; [purchase of one passenger motor vehicle at not to exceed \$6,000;] expenses of attendance of cooperating officials and individuals at meetings concerned with [civil defense and defense mobilization functions; not to exceed \$3,000 for emergency and extraordinary expenses to be expended under the direction of the Director for such purposes as he deems proper, and his deter-

mination thereon shall be final and conclusive; and not to exceed \$900,000 for expenses of travel; \$25,000,000 the work of the Office; \$8,000,000: *Provided*, [That the foregoing amount shall be available for not to exceed 310 positions in the District of Columbia area: *Provided further*,] That contracts for not to exceed two persons under this appropriation for temporary or intermittent services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), may be renewed annually, and one such contract, [for the services of an expert or consultant for telecommunications,] may provide for a per diem rate of not to exceed \$75: *Provided further*, That \$1,500,000 of the foregoing amount shall remain available until expended for studies and research to develop measures and plans for emergency preparedness. (Independent Offices Appropriation Act, 1962.)

Note.—Includes \$1.5 million for activities previously carried under "Research and development," Office of Emergency Planning. The amounts obligated in 1961 and 1962 are shown in the schedule as comparative transfers. Excludes amounts for activities transferred in the estimates to "Operation and maintenance, Civil defense," Defense, and "Civil defense medical activities," Department of Health, Education, and Welfare.

1. *Executive direction*.—This activity provides for staff assistance to the President in coordinating the nonmilitary program for the defense of the United States. Included also are area offices which work with Federal agencies and seek to mobilize State, local, and private participation in nonmilitary defense. In addition, the administrative services, advisory functions, and liaison activities are financed by the activity.

2. *Emergency planning*.—Federal, State, and local plans for an emergency are reviewed and evaluated under this activity. Emphasis in 1963 is given to strengthening the ability of government at all levels to operate in an emergency. Administrative costs related to the research program are covered in the activity as well.

3. *Resources and production planning*.—This activity develops operating plans to stabilize the economy and

manage the national resources under various emergency conditions. Plans are also developed for restoration and rehabilitation of essential physical facilities after attack. Assistance is furnished to the President in telecommunications management, including the assignment of radio frequencies to U.S. Government stations.

4. *Civil defense*.—Obligations reflected under this activity cover civil defense activity of the Office of Civil and Defense Mobilization through July 31, 1961.

5. *Research and development*.—This activity finances technical studies and the application of scientific and other knowledge to the nonmilitary defense of the Nation. Research is conducted by contract with Federal agencies, universities, industry, and private institutions. Research in 1963 is focused on the problems of postwar resource management and rehabilitation.

[CONSTRUCTION OF FACILITIES]—Continued

Underground centers.—In 1960, funds were appropriated for construction of an underground control center at Denton, Tex. In 1962, funds were provided to complete the Denton center and to construct a second center in the vicinity of Harvard, Mass. Construction of the Harvard center is being deferred temporarily pending further study of the Federal Government's policy governing construction of shelters.

² Selected resources as of June 30, are as follows: 1960, \$0; 1961, \$5 thousand; 1962, \$3 thousand; 1963, \$2 thousand.

The Federal Radiation Council was established by Executive Order 10831 and Public Law 86-373, to advise the President with respect to radiation matters affecting the public health, including guidance for all Federal agencies in the formulation of radiation protection standards. Members of the council are the heads of the agencies most significantly involved with radiation—the Secretaries of Health, Education, and Welfare; Defense; Commerce; and Labor; and the chairman of the Atomic Energy Commission. The council's activities are supported by financial contributions from the member agencies.

GENERAL PROVISIONS

DEPARTMENTS, AGENCIES, AND CORPORATIONS

SEC. 501. Unless otherwise specifically provided, the maximum amount allowable during the current fiscal year in accordance with section 16 of the Act of August 2, 1946 (5 U.S.C. 78), for the purchase of any passenger motor vehicle (exclusive of buses and ambulances), is hereby fixed at \$1,500 except station wagons for which the maximum shall be \$1,950.

SEC. 502. Unless otherwise specified and during the current fiscal year, no part of any appropriation contained in this or any other Act shall be used to pay the compensation of any officer or employee of the Government of the United States (including any agency the majority of the stock of which is owned by the Government of the United States) whose post of duty is in continental United States unless such person (1) is a citizen of the United States, (2) is a person in the service of the United States on the date of enactment of this Act who, being eligible for citizenship, had filed a declaration of intention to become a citizen of the United States prior to such date, (3) is a person who owes allegiance to the United States, or (4) is an alien from Poland or the Baltic countries lawfully admitted to the United States for permanent residence: *Provided*, That for the purpose of this section, an affidavit signed by any such person shall be considered prima facie evidence that the requirements of this section with respect to his status have been complied with: *Provided further*, That any person making a false affidavit shall be guilty of a felony and, upon conviction, shall be fined not more than \$4,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law: *Provided further*, That any payment made to any officer or employee contrary to the provisions of this section shall be recoverable in action by the Federal Government. This section shall not apply to citizens of the Republic of the Philippines or to nationals of those countries allied with the United States in the current defense effort, or to temporary employment of translators, or to temporary employment in the field service (not to exceed sixty days) as a result of emergencies.

SEC. 503. Appropriations of the executive departments and independent establishments for the current fiscal year, available for expenses of travel or for the expenses of the activity concerned, are hereby made available for quarters allowances and cost-of-living allowances, in accordance with title II of the Act of September 6, 1960 (74 Stat. 793).

SEC. 504. No part of any appropriation for the current fiscal year contained in this or any other Act shall be paid to any person for the filling of any position for which he or she has been nominated after the Senate has voted not to approve the nomination of said person.

SEC. 505. No part of any appropriation contained in this or any other Act for the current fiscal year shall be used to pay in excess of \$4 per volume for the current and future volumes of the United States Code Annotated, and such volumes shall be purchased on

condition and with the understanding that latest published cumulative annual pocket parts issued prior to the date of purchase shall be furnished free of charge, or in excess of \$4.25 per volume for the current or future volumes of the Lifetime Federal Digest, or in excess of \$6.50 per volume for the current or future volumes of the Modern Federal Practice Digest.

SEC. 506. Funds made available by this or any other Act for administrative expenses in the current fiscal year of the corporations and agencies subject to the Government Corporation Control Act, as amended (31 U.S.C. 841), shall be available, in addition to objects for which such funds are otherwise available, for rent in the District of Columbia; services in accordance with section 15 of the Act of August 2, 1946 (5 U.S.C. 55a); and the objects specified under this head, all the provisions of which shall be applicable to the expenditure of such funds unless otherwise specified in the Act by which they are made available: *Provided*, That in the event any functions budgeted as administrative expenses are subsequently transferred to or paid from other funds, the limitations on administrative expenses shall be correspondingly reduced.

SEC. 507. No part of any funds of or available to any wholly owned Government corporation shall be used for the purchase or construction, or in making loans for the purchase or construction of any office building, without specific authority in law therefor, primarily for occupancy by any department or agency of the United States Government or by any corporation owned by the United States Government.

SEC. 508. Pursuant to section 1415 of the Act of July 15, 1952 (66 Stat. 662), foreign credits (including currencies) owed to or owned by the United States may be used by Federal agencies for any purpose for which appropriations are made for the current fiscal year (including the carrying out of Acts requiring or authorizing the use of such credits), only when reimbursement therefor is made to the Treasury from applicable appropriations of the agency concerned: *Provided*, That such credits received as exchange allowances or proceeds of sales of personal property may be used in whole or part payment for acquisition of similar items, to the extent and in the manner authorized by law, without reimbursement to the Treasury: *Provided further*, That nothing in section 1415 of the Act of July 15, 1952, or in this section shall be construed to prevent the making of new or the carrying out of existing contracts, agreements, or executive agreements for periods in excess of one year, in any case where such contracts, agreements, or executive agreements for periods in excess of one year were permitted prior to the enactment of this Act under section 32(b)(2) of the Surplus Property Act of 1944, as amended (50 U.S.C. App. 1641(b)(2)), and the performance of all such contracts, agreements, or executive agreements shall be subject to the availability of appropriations for the purchase of credits as provided by law.

SEC. 509. No part of any appropriation contained in this or any other Act, or of the funds available for expenditure by any individual, corporation, or agency included in this or any other Act, shall be used for publicity or propaganda purposes designed to support or defeat legislation pending before Congress.

FUNDS APPROPRIATED TO THE PRESIDENT

DISASTER RELIEF

Current authorizations:

【DISASTER RELIEF】

【For expenses necessary to carry out the purposes of the Act of September 30, 1950, as amended (42 U.S.C. 1855-1855g), authorizing assistance to States and local governments in major disasters, \$6,000,000, to remain available until expended: *Provided*, That not to exceed 3 per centum of the foregoing amount shall be available for administrative expenses.】

【For an additional amount for "Disaster relief", \$15,000,000, to remain available until expended: *Provided*, That not to exceed 3 per centum of the foregoing amount shall be available for administrative expenses.】 (*Independent Offices Appropriation Act, 1962; Supplemental Appropriation Act, 1962.*)

Program and Financing (in thousands of dollars)

	1961 actual	1962 estimate	1963 estimate
Program by activities:			
1. Administration.....	92	557	639
2. Aid to disaster areas.....	12,952	18,560	15,361

Unobligated balance carried forward.....	8,117	12,000	-----
New obligational authority (appropriation).....	-----	21,000	-----

1. *Administration.*—Funds are provided to administer and coordinate disaster relief assistance for the States.

2. *Aid to disaster areas.*—This program provides for a coordinated effort by the Federal Government to assist States and their political subdivisions affected by major disaster when the States are unable to cope with the situation physically or financially.

Responsibility for administration of this program is delegated to the Office of Emergency Planning. Disaster relief operations of the entire Federal Government are coordinated and funds are made available to affected areas and to reimburse Federal agencies for disaster operations.

Appropriations presently available will finance disaster operations through 1962 with an unobligated balance of approximately \$12 million carrying forward into 1963. This amount, combined with an estimated \$4 million in recoveries of prior year obligations, should be adequate to cope with disasters in 1963.

During 1961 the President proclaimed major disasters in 12 States and allocated funds as follows (in thousands of dollars):

State	Type of disaster	Date allocated	Allocation
Alabama.....	Floods.....	May 16, 1961	675

Under the Defense Production Act of 1950, as amended, designated agencies are authorized with Presidential approval to incur obligations and make expenditures to secure expanded production of critical materials in

furtherance of the defense effort. The program is conducted primarily through a revolving fund financed by borrowings from the Treasury. The amount borrowed may not exceed \$2.1 billion outstanding at any one time, but the act permits contingent liabilities to be considered as obligations only to the extent of the probable ultimate net costs to the United States rather than in the full amount of the gross commitments outstanding. To the extent that money must be expended to fulfill commitments even though the expenditures are considered to be ultimately recoverable (through repayment of loans and sale of inventories, for example), portions of the borrowing authority are used for working capital on a current basis. Due to the imminent exhaustion of this borrowing authority, a direct appropriation of \$108 million was enacted for 1959, thus providing cumulative financing authority of \$2,208 million.

The following agencies have been designated to carry out programs to expand production capacity as follows:
General Services Administration.—Purchase and resale of metals, minerals, and machine tools, and research and pilot plant operations to develop new materials and new techniques for utilizing low-grade domestic ores.

Department of Agriculture.—Purchase and resale of agricultural commodities.

Department of the Interior.—Loans and grants to encourage exploration for strategic and critical minerals.

Treasury Department.—Loans to domestic private enterprises.

Export-Import Bank of Washington.—Loans to foreign private enterprises.

Programs must be certified as essential to the national defense by the Office of Emergency Planning, formerly the Office of Civil and Defense Mobilization.

Allocation of borrowing authority by the Office of Emergency Planning and net borrowing from the U.S. Treasury as of June 30, 1961, was as follows (in thousands of dollars):

Authorized agency	Borrowing authority allocated	Borrowing outstanding	Net avail- able for borrowing
General Services Administration.....	1,804,000	1,764,700	39,300
Treasury Department.....	156,600	92,600	64,000
Department of Agriculture.....	73,275	64,578	8,697
Department of the Interior.....	35,800	32,000	3,800
Export-Import Bank of Washington.....	20,500	10,227	10,227
Office of Emergency Planning Reserve....	9,825		9,825
Total.....	2,100,000	1,964,151	135,849

¹ In addition a direct appropriation of \$108 million for liquidation of borrowing from the Treasury was applied to General Services Administration borrowings, thus providing total financing of \$1,912 million to that agency.

As one of the inducements for expanding production most of the contracts provide a guaranteed market for the production from expanded facilities. Significant amounts of materials are being delivered to the Defense Production Act inventory under these contracts. Investment in inventory of \$1,452 million on June 30, 1960, and \$1,484 million on June 30, 1961, is expected to increase to \$1,516 million by June 30, 1963.

Every effort is made to dispose of Defense Production Act materials when sales will not disrupt markets. Progress in disposal is therefore limited by the capacity of the market to absorb the materials without undue effect. An increase in disposals will depend on an improvement of industrial demand.

Interest continues to accrue, payable by the fund to the Treasury, not only on the borrowings invested in loans and inventories, but also on the borrowings which have been used to cover expenses and losses. Since there

EXPANSION OF DEFENSE PRODUCTION—Con.

Public enterprise funds—Continued

REVOLVING FUND, DEFENSE PRODUCTION ACT—Continued

is no way for the fund to recover its realized losses or reduce inventories appreciably in a short period of time, the perpetuation of the interest-bearing arrangement on such expended capital merely makes the cumulative deficit even greater as the interest accrues.

The Defense Production Act will require provision for eventual liquidation of the borrowing authority provided under section 304(b). All the Defense Production Act programs of the Department of Agriculture and part of the programs of the General Services Administration and the Department of the Treasury have been completed. All the programs of the Department of the Interior and the Export-Import Bank are expected to be completed by June 30, 1962.

Legislation is therefore being proposed to provide for liquidation of the portion of the borrowing authority that is represented by completed programs and portions of programs on which the costs are known and susceptible to final settlement. The liquidation can be accomplished by canceling notes payable to the extent of the costs or losses realized and by canceling an equal amount of the aggregate borrowing authorized from the Treasury. By this means, indebtedness aggregating approximately one-fourth of the total amount of \$2.1 billion authorized under section 304(b) of the act can be liquidated, thereby eliminating unnecessary interest charges.

In addition, legislation is being proposed to direct the Secretary of the Treasury to accept non-interest-bearing notes for financing purchase commitments under section 303 of the act and to cancel outstanding accrued interest. Under this proposal, uses of the borrowing authority which do not result in earning interest will not be required to pay interest to the Treasury. Interest-bearing loans to industry under section 302, however, will continue to require concomitant interest payments.

These two amendments of the Defense Production Act are expected to provide sufficient financing to carry through to June 30, 1965, by which time all purchase commitments under section 303 will expire and provision can be made for liquidation of the accounts.

General Services Administration.—Financing of \$1,912 million has been authorized by the Office of Emergency Planning as of June 30, 1961, to cover the expansion of productive capacity for strategic metals, minerals, and machine tools. This amount includes \$1,804 million in borrowing authority and a direct appropriation of \$108 million made in 1959.

The bulk of the expansion programs have been completed, with the major problems being receipt, custody, and eventually disposition of the materials and facilities. The exercise of option rights by contractors has been carefully examined with a view to reducing deliveries to the Government as far as possible within the terms of the contracts whenever national stockpile objectives have been attained. Between July 1, 1957, and June 30, 1961, a reduction of \$338.4 million in gross commitments under the Defense Production Act was attained through renegotiation of contracts.

A summary of transactions involving strategic minerals and metals (including work-in-process inventory) under this fund follows (in millions of dollars):

	1961 actual	1962 estimate	1963 estimate
Opening inventory.....	1,452	1,484	1,510
Deliveries during year.....	72	66	34
Total available.....	1,524	1,550	1,544
Less cost of goods sold:			
Sales receipts.....	34	38	25
Profit (—) or loss on sales.....	6	—2	—1
Cost of goods sold.....	40	36	24
Less transfers for upgrading.....	—	—4	—4
Closing inventory.....	1,484	1,510	1,516

As of June 30, 1961, a total of \$7,481.3 million in gross value of contracts has been entered into by the General Services Administration under Defense Production Act authority. Of this amount a total of \$6,908.9 million has been completed as a result of expiration of contractors options to deliver materials to Government inventories from guaranteed production, completion of facilities, completion of research, etc. The balance of \$572.4 million includes a total of \$440.1 million of commodity contracts, of which probable deliveries are estimated at \$158.7 million.

Department of Agriculture.—The purchase, management, and resale of agricultural commodities, except forest products, were carried out by the Commodity Credit Corporation, which was reimbursed from this fund for the net costs involved. The Secretary of Agriculture has been allocated borrowing authority for this purpose.

During 1961, all programs certified to the Secretary of Agriculture under the Defense Production Act were completed.

Department of the Interior.—Department of the Interior operations to expand defense production under section 303 of the Defense Production Act of 1950 were limited to the encouragement of exploration for strategic and critical mineral commodities. The operations were administered by the Defense Minerals Exploration Administration until September 11, 1958, when the Office of Minerals Exploration was established under authority of Public Law 85-701. As successor agency, the Office of Minerals Exploration was empowered to use appropriated funds to administer the Defense Minerals Exploration Administration contracts and certified projects remaining in force as well as to conduct a similar exploration assistance program.

On June 30, 1961, borrowing authority certified by the Office of Emergency Planning to Interior amounted to \$35.8 million and \$32 million had been borrowed.

Of the 1,159 contracts executed under the Defense Minerals Exploration Administration program, only 3 remained in force on June 30, 1961. Undisbursed obligations on these contracts will be reduced by disbursements estimated at \$10 thousand and releases estimated at \$224 thousand completing all contract work during 1962.

By June 30, 1961, the Office of Minerals Exploration had certified discoveries on 396 Defense Minerals Exploration Administration projects. The total estimated cost of work authorized was \$29,554 thousand and maximum Government participation was \$18,238 thousand, of which \$14,774 thousand had been spent. If production results from any of these projects within the specified period (usually 10 years—a few of 31 years), part of the Government funds spent will be repaid according to royalty arrangements. Royalties on production from Defense

Minerals Exploration Administration projects total \$3,954 thousand and are estimated at \$400 thousand each for 1962 and 1963.

Treasury Department.—The function of making and administering loans to domestic private enterprises under the authority of section 302 of the Defense Production Act of 1950, as amended, was assigned to the Secretary of the Treasury by Executive Order 10489, dated September 26, 1953. Applications for loans are considered only upon certification of essentiality by the Office of Emergency Planning.

No new loans were authorized during 1961. It is anticipated that there will be no additional loans authorized in 1962 and 1963.

The changes in loans and deferred participation commitments estimated for 1962 and 1963 are as follows (in thousands of dollars):

	Loans	Deferred participation commitments
Outstanding June 30, 1961.....	121,586	13,637
Changes, 1962:		
Deferred participation purchased.....	11,781	-11,781
Repayments.....	-4,377	-366
Outstanding June 30, 1962.....	128,990	1,490
Changes, 1963:		
Repayments.....	-8,940	-820
Write-off of loans.....	-65	-----
Outstanding June 30, 1963.....	119,985	670

Export-Import Bank of Washington.—Pursuant to section 311 of Executive Order 10480 of August 14, 1953, which superseded Executive Order 10161, the Export-Import Bank, with funds provided under section 304 of the Defense Production Act of 1950, as amended, is responsible for making and administering all loans under section 302 of the act, upon receipt of certificates of essentiality issued by the Director of the Office of Emergency Planning or the General Services Administrator, where the expansion, development, or production so financed is carried on in foreign countries.

No certifications were received and no new loans were authorized by the Bank during 1961. It is contemplated that there will be no additional certifications to the Export-Import Bank in connection with these operations. No additional obligational authority will be required. It is estimated that net budget expenditures for 1962 will show a credit of \$15.2 million.

During 1961, borrowing authority allocated to Export-Import Bank under the Defense Production Act of 1950, was reduced from \$25.5 to \$20.5 million. As of June 30, 1961, the outstanding balance of notes due the U.S. Treasury was \$10.3 million.

One loan with an outstanding balance of \$31,922 will be charged off during 1962. Efforts to recover any part of the amount charged off will be continued.

Retained earnings derived from this operation amounted to \$4.8 million as of June 30, 1961.

Operating results.—The deficit of \$442,956 thousand as of June 30, 1961, results from a cumulative deficit (net) of \$550,956 thousand and \$108 million appropriated in 1959 for partial restoration of capital impairment.

FOREIGN ASSISTANCE—ECONOMIC

Economic assistance is provided to promote economic and social development in less developed areas of the world, to help the recipient countries to support military forces of importance to the free world, and to help maintain economic and political stability. Foreign assistance economic programs include development loans and development grants, supporting assistance, voluntary contributions to international organizations, support for the Alliance for Progress, an appropriation for contingencies, and other programs such as the investment survey and investment guarantee programs. Except for development loans, authorization is required for 1963 for economic assistance, with one minor exception. Information on the military assistance program appears in the chapter on Department of Defense—Military.

Current authorizations:

For expenses necessary to enable the President to carry out the provisions of the Foreign Assistance Act of 1961, as amended, to remain available until June 30, **[1962]** 1963, unless otherwise specified herein, as follows:

ECONOMIC ASSISTANCE

Development grants: For expenses authorized by section 212, [including \$2,800,000 for ocean freight, \$2,000,000 for Atoms for Peace, and \$22,600,000 for the malaria eradication program, \$296,500,000] \$335,000,000, to remain available until expended.

[Development grants, special authorization: For assistance authorized by section 214(b) at the discretion of the President for an American sponsored school in Poland, \$100,000, to be used to purchase foreign currencies which the Department of the Treasury may determine to be excess to the normal requirements of the United States.]

Surveys of investment opportunities: For expenses authorized by section 232, **[\$1,500,000]** \$5,000,000.

International organizations and programs: For expenses authorized by section 302, **[\$153,500,000]** \$148,900,000.

Supporting assistance: For expenses authorized by section 402, **[\$425,000,000, including \$15,000,000 for supporting assistance for Spain as authorized by section 402]** \$500,000,000.

Contingency fund: For expenses authorized by section 451(a), **[\$275,000,000]** \$400,000,000.

Administrative expenses: For expenses authorized by section 637(a), [including the purchase of not to exceed twenty-five passenger motor vehicles for use outside the United States, \$47,500,000] \$55,000,000.

[DEPARTMENT OF STATE]

Administrative and other expenses: For expenses authorized by section 637(b) of the Foreign Assistance Act of 1961 and by section 305 of the Mutual Defense Assistance Control Act of 1951, as amended, **[\$3,000,000]** \$3,100,000.

Unobligated balances [not to exceed \$69,533,000] as of June 30, **[1961]** 1962, of funds heretofore made available under the authority of the **[Mutual Security Act of 1954, as amended]** *Foreign Assistance Act of 1961*, are, except as otherwise provided by law, hereby continued available for the fiscal year **[1962]** 1963 for the same general purposes for which appropriated. (*Foreign Assistance and Related Agencies Appropriation Act, 1962; authorizing legislation to be proposed for 1963.*)

¹ Does not include funds for 267 positions previously financed from this appropriation. Cost of these positions in 1961, \$2.8 million; 1962, \$3 million.

1. *Development grants*—(a) *General*.—These grants are employed to (1) provide the advisers, teachers, and equipment needed for the transfer and improvement of educational, technical and professional skills, (2) assist in the control and eradication of major diseases, (3) establish and improve institutions which further economic and social development, (4) assist in planning and surveys, and (5) establish or improve basic physical facilities, such as communications and transport, in those economies which are unable to bear the obligations entailed by loans under development lending for such facilities.

A relatively small part of development grant funds is for expenses incident to training participants, furnishing technical assistance and services to overseas technicians, and training recruits for overseas assignments. Special programs authorized include (1) assistance to schools and libraries outside the United States founded or sponsored by U.S. citizens and serving as study and demonstration centers for ideas and practices of the United States, (2) payment of transportation charges from U.S. ports to ports of entry abroad on shipments of supplies by approved American nonprofit voluntary agencies and (3) programs to promote the peaceful uses of atomic energy outside the United States.

(b) *Development research*.—Research into the problems of economic development has been specifically authorized to be financed from any program funds to increase the effectiveness of foreign assistance programs. The basic research will be conducted primarily by Federal agencies and through contracts with universities, private foundations and private industry.

2. *Surveys of investment opportunities*.—To encourage private enterprise to undertake surveys of investment opportunities, other than surveys of extraction opportunities, these funds are used to finance up to 50% of the total cost of such surveys. The program is designed to promote private investment in less developed areas.

3. *International organizations and programs*.—Increases are anticipated for our contributions to the United Nations Expanded Program of Technical Assistance and Special Fund as larger contributions are received from other U.N. members, and for continued U.S. support of the Indus River Basin project under the auspices of the International Bank for Reconstruction and Develop-

ment. These increases will be more than offset by decreases due to funding of United Nation's military operations in the Congo and the Emergency Force in Palestine from a U.N. bond issue, U.S. support for which is proposed in the Department of State chapter, and the shifting of certain regional multilateral programs to other appropriations. A small decrease is also anticipated in the voluntary U.S. contribution to the World Health Organization for malaria eradication. This reflects a gradual shifting of this program (and U.S. support for it) from WHO's voluntary to its assessed budget.

4. *Migrant, refugee and escapee programs.*—The United States assists in moving surplus populations and refugees from Europe and helps recent escapees from the Soviet bloc through contributions to the Intergovernmental Committee for European Migration and the United Nations High Commissioner for Refugees, as well as the U.S. escapee program; in 1963 this program is to be financed by a Department of State appropriation. In addition, from foreign aid funds the Department of Health, Education, and Welfare has been aiding refugees who have escaped from Cuba after the recent revolution. The amount shown for Cuban refugees for 1962 represents allocations made through the middle of December 1961. In 1963 the Cuban refugee program is to be financed directly by the Department of Health, Education, and Welfare.

5. *Supporting assistance.*—Supporting assistance is provided mainly to countries which need help in supporting necessary defensive forces or in maintaining economic or political stability. This type of assistance is largely on a grant basis and is designed to promote urgent U.S. national security and foreign policy objectives. As recipient countries prepare and carry out sound programs for economic growth, they will be increasingly assisted by development loans and grants, and supporting assistance will be reduced or terminated. The major portion of these funds is used in countries on the immediate periphery of the Sino-Soviet empire.

Various worldwide (nonregional) programs in health and education which were financed under this activity in 1961 are now being funded from other economic assistance appropriations.

Loans.—Although the bulk of foreign assistance lending is now from development loans and under the Alliance for Progress, a small portion of the other foreign assistance funds is loaned each year rather than granted. These loans are almost all for economic development projects, and may be repayable in either dollars or foreign currency. The tables below show the current status of these loans. Information on loans extended under development loans under the Alliance for Progress, and under the authority of the Agricultural Trade Development and Assistance Act is shown in separate schedules.

The following table gives data on loans made from current obligational authority for both dollars and related foreign currencies in millions of dollars and dollar equivalents:

	1960 actual	1961 actual	1962 estimate	1963 estimate
Loan obligations incurred:				
U.S. currency	45	31	40	20
Foreign currency	5	45	—	—
Loan disbursements made:				
U.S. currency	69	16	28	25
Foreign currency	41	69	52	31
Loan principal repayments:				
U.S. currency	25	49	32	34
Foreign currency	1	1	3	6
Interest collections:				
U.S. currency	38	39	36	37
Foreign currency	11	12	21	27

The table below shows the status of loans in millions of dollars at the end of the respective years. The bulk of the loans outstanding was made to European countries in the early years of the European recovery program and is repayable in dollars:

End of year	1960 actual	1961 actual	1962 estimate	1963 estimate
Loans outstanding	2,415	2,450	2,495	2,511
Undisbursed loan obligations	172	160	120	84
Interest past due	1	2	1	1

6. *Contingencies.*—This is a special fund, rather than a separate category of aid, which is used to meet requirements which cannot be foreseen or which can only vaguely be foreseen at the time the budget is prepared. Consequently, no specific provision can be made for these requirements in the regular categories of assistance. As an illustration, the rapid increase in newly independent countries may pose problems to which response should be made in the interests of the United States—yet the dimensions of funding requirements cannot at this time be predicted with accuracy.

7. *Administrative expenses (AID).*—These funds will be used by the Agency for International Development in Washington and overseas for administering economic assistance programs and for conducting policy reviews of the entire foreign assistance program.

8. *Administrative expenses (State).*—Administrative expense funds are used by the Department of State for personnel involved in the conduct of the foreign assistance program.

Inter-American social and economic program.....	500,000	-----	-----
Total appropriation.....	600,000	-----	600,000

The act of September 8, 1960 (P.L. 86-735) authorized \$600 million for Latin America, of which \$100 million was for Chilean earthquake reconstruction, and \$500 million was to initiate a new cooperative approach in the development of Latin America. The latter, further implemented by the Act of Bogotá, emphasized the need for self-help, social justice, a strong production effort, expansion of foreign trade, creation and maintenance of internal financial stability, growth of free economic and social institutions, the development of economic cooperation and general social and economic progress.

1. *Social progress program.*—The major part of these funds, \$394 million, has been assigned in trust to the Inter-American Development Bank mainly for making loans for land settlement, improved land use, housing for low income groups, water supply and sanitation. Technical assistance may also be provided.

2. *Contribution to Organization of American States.*—\$6 million of these funds is to be used by the Inter-American Economic and Social Council of the Organization of American States for overall surveys, assistance to countries in formulating sound national programs for social and economic development, and for reviewing progress of member countries.

3. *Bilateral economic assistance.*—The remaining balance of the \$500 million authorized under the act of September 8, 1960, is being administered by the Agency for International Development mainly for grants for education and training, public health projects, and the strengthening of general governmental services in fields related to economic and social development. Some loans will be made for projects in dependent territories which are becoming independent but are not yet members of the Inter-American Development Bank and possibly in some other instances where appropriate.

For 1963, \$600 million is estimated to implement the program for the Alliance for Progress. This estimate represents a consolidation into one account of the financing of all AID developmental programs in Latin America, replacing what otherwise would have been financed in 1963 from development loan and development grant funds. It is estimated that about \$500 million of these funds will be used for development loans for such purposes as housing, agricultural development, education, industrial development, and others. The balance of approximately \$100 million will be devoted to technical assistance in these and other fields of activity, primarily in the form of grants.

4. *Chilean reconstruction program.*—\$100 million was appropriated for a loan to the Government of Chile to finance the reconstruction and rehabilitation of areas devastated by an earthquake which occurred in May 1960. This follows an earlier grant of \$20 million from mutual security program contingency funds for emergency reconstruction, pending the development of longer range rehabilitation plans.

Through 1961, a portion of the mutual security dollar appropriations was used to purchase surplus agricultural commodities which were then sold to friendly countries for their currencies. Sales of these commodities are now being made through the Food for Peace program. Local currencies accruing from the sales through 1961 under the mutual security program are deposited in a special account and are used for economic and military activities in furtherance of objectives of the U.S. foreign assistance program. These activities include the local costs of proj-

Under the Foreign Assistance Act of 1961, a five-year long-range program for development loans of \$7.2 billion was authorized to be administered by the new Agency for International Development (AID), and a total of \$1.1 billion was subsequently appropriated for loan reservations to be entered into during 1962. This revolving fund will take the place of the development loan fund which was abolished on November 3, 1961.

Development loans are repayable in U.S. dollars on such terms and conditions as may be determined by the President and a revolving fund was created into which all loan repayments and payments of interest are deposited. Such funds, together with all funds appropriated, continue available until expended although dollar receipts generated by loan reservations entered into prior to 1962 are deposited in the miscellaneous receipts account of the Treasury.

Development loans are being made to promote the economic development of less-developed friendly countries and areas, with emphasis upon assisting long-range plans and programs designed to develop the economic resources and to increase the productive capacities of the recipient countries. Criteria for development loans are delineated in the statutes, and criteria and standards are established by an inter-agency Development Loan Committee composed of officers designated by Executive Order and are guided by the foreign and financial policies of the United States. Development loans will not be made unless there is a finding of a reasonable prospect of repayment.

In making development loans the Agency for International Development must take into account (1) whether free-world financing is available on reasonable terms, (2) the economic and technical soundness of the activity to be financed, (3) whether the development of economic resources or the increase of productive capacities gives reasonable promise of being furthered, (4) consistency with other development activities or realizable long-range objectives, (5) the extent to which the recipient country

is demonstrating its determination to take effective self-help measures and (6) possible effects upon the economy of the United States.

A development loan program of \$1.2 billion is proposed for 1963 compared with \$1.1 billion in 1962, exclusive of the Alliance for Progress program for which a separate request is included in this year's budget. The increase, despite separate funding of loans for Latin America in 1963, reflects an increasing need for development assistance as a result of (1) an increase in effective development planning in many countries, (2) the emergence of additional countries in Africa with basic development plans, (3) the effectiveness of non-project loans in implementing U.S. economic assistance objectives, and (4) the continued shift in emphasis away from supporting assistance programs.

The Development Loan Fund (DLF) was established as a corporation by the Mutual Security Act of 1958 to extend loans, credits, and guaranties to American or foreign individuals, businesses, financial institutions, or foreign governments in order to provide capital for projects and programs contributing to the economic growth of less-developed free countries.

The Development Loan Fund financed activities in less-developed friendly countries where there was a reasonable prospect that the loan would be repaid. Considerations included (1) whether other free-world financing was available on reasonable terms, (2) the soundness of the activity, (3) its contribution to economic development, and (4) possible adverse effects upon the U.S. economy. The Development Loan Fund stressed assistance consistent with economic development in those countries willing to take effective self-help measures and was administered so

as to avoid competing with private investment capital or with international lending institutions.

As of November 3, 1961, when the Development Loan Fund corporation was abolished and its functions transferred to the new Agency for International Development under the Foreign Assistance Act of 1961, the Fund had approved 217 loans and allocations and three guaranties for development assistance in 50 countries amounting to \$2,088.1 million.

A total of 203 loan and guaranty agreements were signed totaling \$1,887.2 million of which \$629.3 million was actually disbursed. These agreements were in such fields as power, irrigation, transportation, and industry which contribute to basic economic development. Approximately 24 percent of all loans were repayable in dollars and 76 percent in foreign currencies.

A total of \$2 billion was appropriated for the Fund through June 30, 1961, in addition to which receipts from operations totaling approximately \$15.5 million were also available, including \$4.5 million realized from foreign currency receipts which were sold to the U.S. Treasury for dollars.

Pursuant to the Foreign Assistance Act of 1961, all assets of the Development Loan Fund which were unobligated as of November 3, 1961, other than funds reserved for liquidation of foreign currency repayable loans or for guaranteed loans, will be transferred to the new revolving fund for Development Loans to be administered by the Agency for International Development. Funds reserved for guaranteed loans will be transferred to the Foreign Investment Guaranty Fund. The Development Loan Fund account will continue in existence after November 3, 1961, only for liquidation of foreign currency repayable loans.

¹ Balances of selected resources are identified on the statement of financial condition.

The investment guarantee program encourages and facilitates private American investment in economically underdeveloped areas of the world. It provides guarantee protection against loss from the following specific risks: (a) inconvertibility of local currency receipts from the investment; (b) expropriation or confiscation of all or part of the investment; and (c) war damage including losses arising from revolution and insurrection. The guarantees, which have a maximum term of 20 years, are now available in any economically underdeveloped country where the President has agreed with its government to institute the program. A total of 53 countries and their overseas dependent territories have participated through December 1961. The authorization of Congress in the Foreign Assistance Act, as amended, for flexibility in the bilateral agreement and project approval requirements is expected to allow issuance of guarantee protection in a number of new underdeveloped countries.

The guarantee programs formerly administered by International Cooperation Administration and Development Loan Fund are now administered in one program under Agency for International Development. Additionally in the last Congress authority was given to issue \$90 million all-risk guarantees, not to exceed \$10 million in any one project, with emphasis to be on investments aiding small business, cooperatives, credit unions, etc. Also a special \$10 million guarantee authority was established to aid in the development of private Latin American housing.

Budget program.—Obligations for guarantees are based on a fractional reserve of 25% for the specific risks and the budget estimates have contemplated obligations of 50% for all-risk guarantees. Estimates for 1962 include \$205 million in the specific risk, \$35 million general all-risk, and \$10 million housing in Latin America categories. Obligations for these guarantees will total \$73.75 million, leaving \$6.3 million available for 1963.

Estimates for 1963 include \$250 million in the specific risk category, \$80 million in the general all-risk category, and \$20 million for housing in Latin America. Obligations for these guarantees total \$112.5 million.

Financing.—Funds available for obligations are derived from (1) fee collections, (2) recovery of prior year obligations due to termination, reduction or expiration of

guarantees, and (3) the public debt authorization granted by the Congress in 1956 and years prior thereto. The funds obligated by the Development Loan Fund (transferred to the Foreign Investment Guarantee Fund) for the three outstanding guarantees issued will be available to other new guarantees only if the U.S. liability thereunder is terminated, expired, or otherwise reduced.

The following authorizations are requested:

1. New obligational authority of \$100 million for 1963.

2. An increase in issuing authority ceilings as follows:

a. *Specific risks of inconvertibility, expropriation and war, revolution and rebellion*, \$300 million. This will allow \$1.3 billion in outstanding guarantees. (From \$1 billion now authorized to \$1.3 billion.)

b. *General all-risk*, \$90 million. This will allow \$180 million in outstanding guarantees. (From \$90 million now authorized to \$180 million.)

c. *All-risk for housing, Latin America*, \$50 million. This will allow up to \$60 million in outstanding guarantees. (From \$10 million now authorized to \$60 million.)

Although the latter two categories were new authorizations in the Foreign Assistance Act, as amended, they are expected to be important aspects of the foreign aid program for certain types of projects. With the adjustment of bilateral requirements and other authorizations granted by the Congress, a greater use of the specific risk guarantees is anticipated.

Operating results and administration.—The fund has sustained no loss. Two minor claims are pending. Fees collected through November 30, 1961 exceed \$8 million and are carried forward as retained earnings for use in payment of claims under guarantee contracts. The fund bears no expense other than those which may arise for managerial costs in connection with assets acquired when paying a claim. Administrative expenses are paid from funds appropriated for general administrative expenses of the economic assistance programs and allocated to the Agency for International Development.

Section 608 of the Foreign Assistance Act of 1961 creates a revolving fund to provide for more effective use of domestic or foreign excess property of the U.S. Government in foreign assistance programs by authorizing it to be acquired and renovated in advance of specifically known requirements for country programs. This includes many types of excess property, such as tractors, construction and roadbuilding equipment, machinery and machine tools, the general needs for which can be anticipated with a high degree of certainty. Costs of acquiring the property, transporting it to marshaling sites, renovating and temporarily storing it will be maintained and charged the user of such property. Proceeds from these charges will be deposited to the credit of the revolving fund. The law limits the value of domestic excess property which may be held at any one time to \$15 million in total original acquisition cost. There is no legal limit with respect to the value of foreign excess property which may be held at any one time.

Budget program.—It is contemplated that domestic operations will function through three marshaling sites, one in the East, one in the West, and one in the South. Foreign operations are expected to function through two marshaling sites, one of which is to be located in Europe, the other in the Far East. Under the domestic program, it is expected that excess property with an acquisition value of \$11 million will be accumulated by June 30, 1962 at a cost to the revolving fund of \$2 million. Dispositions of this property are estimated at \$3 million by June 30,

1962. For 1963 it is estimated that excess property valued at \$50.5 million will be acquired at a cost of \$9.1 million and that dispositions of such property will equal \$44.5 million, leaving the value of property on hand at \$14 million. The foreign program is expected to get underway late in the current fiscal year with \$2 million worth of excess property acquired. For 1963, it is estimated that acquisitions will have a total value of \$49.5 million, and a cost of \$8.8 million to the revolving fund. Dispositions under the foreign program in 1963 are estimated at \$37.5 million, leaving inventory on hand valued at \$14 million.

Financing.—Financing of this program will be accomplished in 1962 through a transfer of \$2 million from development grant funds and \$545 thousand in estimated reimbursements. For 1963 an additional \$3 million is estimated to be transferred into the revolving fund from development grant funds and reimbursements are estimated at \$14.7 million. Peak charges against the revolving fund are expected to occur in March 1963, after which time reimbursements are estimated to approximate costs.

Operating results.—Users of excess property will be charged the cost of accessorial and associated service. This is expected to maintain the solvency of the revolving fund without further transfer from development grant funds.

GENERAL PROVISIONS

SEC. 101. Amounts certified pursuant to section 1311 of the Supplemental Appropriation Act, 1955, as having been obligated against appropriations heretofore made under the authority of the Mutual Security Act of 1954, as amended, and the Foreign Assistance Act of 1961, for the same general purpose as any of the subparagraphs under "Economic Assistance" [except the subparagraph of this title for "Administrative expenses"], are hereby continued available for the same period as the respective appropriations in such subparagraphs for the same general purpose.

SEC. 102. None of the funds herein appropriated (other than funds appropriated under the authorization for "International organizations and programs") shall be used to finance the construction of any new flood control, reclamation, or other water or related land resource project or program which has not met the standards and criteria used in determining the feasibility of flood control, reclamation and other water and related land resource programs and projects proposed for construction within the United States of America as per circular A-47 of the Bureau of the Budget, dated December 31, 1952.]

SEC. 103. Obligations made from funds herein appropriated for engineering and architectural fees and services to any individual or group of engineering and architectural firms on any one project in excess of \$25,000 shall be reported to the Committees on Appropriations of the Senate and House of Representatives at least twice annually.]

SEC. 104. Except for the appropriations entitled "Contingency fund" and "Development loans", not more than 20 per centum of any appropriation item made available by this title shall be obligated and/or reserved during the last month of availability.]

SEC. 105. None of the funds herein appropriated nor any of the counterpart funds generated as a result of assistance hereunder or any prior Act shall be used to pay pensions, annuities, retirement pay or adjusted service compensation for any persons heretofore or hereafter serving in the armed forces of any recipient country.]

SEC. 106. None of the funds herein appropriated shall be used to finance any of the activities under the Investment Incentive Fund Program.]

SEC. 107. The Congress hereby reiterates its opposition to the seating in the United Nations of the Communist China regime as the representative of China, and it is hereby declared to be the continuing sense of the Congress that the Communist regime in China has not demonstrated its willingness to fulfill the obligations contained in the Charter of the United Nations and should not be recognized to represent China in the United Nations. In the event of the seating of representatives of the Chinese Communist regime in the Security Council or General Assembly of the United Nations, the President is requested to inform the Congress insofar as is compatible with the requirements of national security, of the implications of this action upon the foreign policy of the United States and our foreign relationships, including that created by membership in the United Nations, together with any recommendations which he may have with respect to the matter.]

SEC. 108. It is the sense of Congress that any attempt by foreign nations to create distinctions because of their race or religion among American citizens in the granting of personal or commercial access or any other rights otherwise available to United States citizens generally is repugnant to our principles; and in all negotiations

between the United States and any foreign state arising as a result of funds appropriated under this title these principles shall be applied as the President may determine.]

SEC. 109. None of the funds provided in this title shall be available for assistance to any country, the government of which sells arms, ammunition, or implements of war to the Castro regime, or which furnishes, by grant or loan, any military or economic aid to that regime, unless the President determines that the withholding of such assistance to such country would be contrary to the national interest.]

SEC. 110. Any obligation made from funds provided in this title for procurement outside the United States of any commodity in bulk and in excess of \$100,000 shall be reported to the Committees on Appropriations of the Senate and the House of Representatives at least twice annually: *Provided*, That each such report shall state the reasons for which the President determined, pursuant to criteria set forth in section 604(a) of the Foreign Assistance Act of 1961, that foreign procurement will not adversely affect the economy of the United States.]

SEC. 111. Public Law 87-195, approved September 4, 1961, is amended by inserting the following after the enacting clause: "That this Act may be cited as 'The Foreign Assistance Act of 1961' ".]

SEC. 112. It is the sense of Congress that in the administration of these funds great attention and consideration should be given to those nations which share the view of the United States on the world crisis.]

SEC. 601. No part of any appropriation contained in this Act shall be used for publicity or propaganda purposes within the United States not heretofore authorized by the Congress.]

SEC. 602. None of the funds herein appropriated shall be used for expenses of the Inspector General, Foreign Assistance, after the expiration of the thirty-five day period which begins on the date the General Accounting Office or any committee of the Congress, or any duly authorized subcommittee thereof, charged with considering foreign assistance legislation, appropriations, or expenditures, has delivered to the office of the Inspector General, Foreign Assistance, a written request that it be furnished any document, paper, communication, audit, review, finding, recommendation, report, or other material in the custody or control of the Inspector General, Foreign Assistance, relating to any review, inspection, or audit arranged for, directed, or conducted by him, unless and until there has been furnished to the General Accounting Office or to such committee or subcommittee, as the case may be, (A) the document, paper, communication, audit, review, finding, recommendation, report, or other material so requested or (B) a certification by the President, personally, that he has forbidden the furnishing thereof pursuant to such request and his reason for so doing.]

SEC. 603. This Act may be cited as the "Foreign Assistance and Related Agencies Appropriation Act, 1962."]

PEACE CORPS

Current authorizations:

FUNDS APPROPRIATED TO THE PRESIDENT

For expenses necessary to enable the President to carry out the provisions of the Peace Corps Act (75 Stat. 612), including purchase of not to exceed [sixteen] twenty passenger motor vehicles for use outside the United States, [\$30,000,000] \$63,750,000, (Foreign Assistance and Related Agencies Appropriation Act, 1962; additional authorizing legislation to be proposed.)

Program and Financing (in thousands of dollars)

	1961 actual	1962 estimate	1963 estimate
Program by activities:			
1. Peace Corps projects:			
Africa.....	210	5,500	12,271
Far East.....	44	5,900	10,454
Latin America.....	284	4,350	12,271

Financing:			
Comparative transfers from other accounts.....	-1,620	-----	-----
New obligational authority (appropriation).....	-----	30,000	63,750

The purpose of the Peace Corps is to bring together the large demand for skilled workers and technicians in developing countries with the supply of qualified Americans motivated to serve their country and advance the social and economic development of other countries. The Peace Corps is a volunteer corps, its members being selected from those applicants with developed skills ready to serve at a sacrifice if necessary and often under conditions of hardship. After several months of intensive skill, language, and area training, volunteers are placed in selected countries overseas as teachers, nurses, rural development workers, engineers, and similar skilled categories. The work and experience of Peace Corps volunteers also helps promote understanding between the citizens of the United States and the peoples served, and builds within our own country a reservoir of knowledge and appreciation for other countries of the world.

Peace Corps volunteers are placed on projects which have been requested by the host countries, and jointly planned by the country and Peace Corps staff. To the maximum extent possible, projects emphasize using relatively large numbers of volunteers—50 or more—of similar or complementary skills. Maximum contact with the people of the host country is insured by planning the placement of volunteers in small groups throughout a region or country, and by placing them in most cases within an indigenous national organization. For most purposes, volunteers are responsible to host country nationals in their jobs, although Peace Corps staff representatives in each country supervise the progress of each project closely.

In return for service, Peace Corps volunteers receive a living allowance designed to permit them to live at a level equivalent with their working counterparts, but with due regard for their health and safety, annual leave and a small leave allowance, comprehensive health and medical coverage, and other incidental allowances depending upon the country to which assigned. In addition, \$75 for each month of satisfactory service is retained in the United States to be paid upon termination of service, or if necessary, for family emergencies during service.

Since the Peace Corps was initiated on March 1, 1961, rapid progress has been made in developing projects and implementing them. However, it is not possible at this time to outline in specific detail the program planned for 1963. Based upon present plans, the 1963 program would bring on board 4,400 volunteers in that year, which added to 2,300 who were brought on board in 1962 would bring the Corps to a total of 6,700 volunteers by the end of 1963. Plans for each of the regions are as follows:

Africa, 1,825 volunteers.—Projects in Tanganyika, Ghana, Nigeria, and Sierra Leone are already underway, and requests indicate that Africa, along with Latin America, will be a primary focus for program development. Countries indicate a broad range of skills needed, but the proposed program will concentrate upon building up projects centered on primary and secondary education (Ghana, Nigeria, Sierra Leone, Liberia, Ethiopia), road construction and surveying (Tanganyika), vocational education (Ghana), and technical training (Tunisia). Additional projects in industrial management, nursing, community development and higher education have been requested and are now being planned in these and several other countries.

Far East, 1,525 volunteers.—Projects in Malaya, Philip, pines, and Thailand are already underway in education-

health, and rural development. Assistance to the educational system of the Philippines will continue to be the largest activity planned with up to 800 volunteers expected to be placed by the end of 1963. Additional projects are now being planned for other countries in this area.

Latin America, 1,825 volunteers.—In addition to the continuation and expansion of projects in rural development, agricultural extension, vocational education and housing planned in Chile, Colombia, Bolivia, and the British West Indies, new projects are being planned for Brazil, El Salvador and other Central and South American countries in these fields. In support of the Alliance for Progress, the Peace Corps plans to place particular emphasis on Latin America, especially in view of the substantial benefits in increasing international understanding that can be gained through Peace Corps volunteer projects.

Near East-South Asia, 1,525 volunteers.—The major Peace Corps effort will focus on agricultural extension. Volunteer projects in India and Pakistan already underway will be expanded. Further projects in education, health, and rural development are being planned for other countries in this area.

Program support is an indirect supporting activity such as educational testing service, medical examinations, the operations of the contract office, the medical staff, operations related to the recruitment, selection and training of Peace Corps volunteers and volunteer leaders, and similar indirect supporting functions which are administrative in nature, but exist solely for the purpose of facilitating the initiation or implementation of projects. Costs of this nature in the field will be charged directly to the project if there is only one project in the country; however, such indirect costs in the field relating to activities which support more than one project will be accounted for as a separate project rather than be prorated among the various projects.

Administrative expenses include the operation of U.S. Government employed personnel engaged in activities of primary United States interest, including: policy determination, program planning, development, and scheduling leading up to program approvals; program evaluation and control; financial and other control and reporting; and management activities incident to or supporting the above activities.

Investment (total program costs—obligations) (object class 33).....	73,667	61,656	61,656
Financing:			
New obligational authority (appropriation).....	73,667	61,656	61,656

Public Law 86-565 (74 Stat. 293), approved June 30, 1960, authorized membership of the United States in the International Development Association and authorized \$320,290 thousand to be appropriated for subscription to the Association.

The Association is an international organization affiliated with the International Bank to provide development financing on flexible terms for its less developed member countries. Most of its initial resources are being provided by countries other than the United States, including \$443 million from other economically strong countries. Total subscriptions, including those of the less developed countries, are scheduled at approximately \$1 billion; subscriptions are to be paid by the members in five annual installments, the third one being made in 1963.

The Association extended its first development credit in May 1961 and had made credits in four countries totaling slightly over \$100 million by June 30, 1961.

INVESTMENT IN INTER-AMERICAN DEVELOPMENT BANK

For payment of subscriptions to the Inter-American Development Bank, to remain available until expended, [\$110,000,000 of which] \$60,000,000 [is] for the [second] third installment on paid-in capital stock [and \$50,000,000 is for payment of the second installment of the subscription of the United States to the fund for special operations]. (73 Stat. 299; Foreign Assistance and Related Agencies Appropriation Act, 1962.)

Program and Financing (in thousands of dollars)

	1961 actual	1962 estimate	1963 estimate
Program by activities:			
Investment (total program costs—obligations) (object class 33).....		110,000	60,000
Financing:			
Unobligated balance brought forward.....	-200,000	-200,000	-200,000
Unobligated balance carried forward.....	200,000	200,000	200,000
New obligational authority (appropriation).....		110,000	60,000

Public Law 86-147 (73 Stat. 299), approved August 7, 1959, provided for membership of the United States in the Inter-American Development Bank, and authorized an appropriation of \$450 million to cover the U.S. subscription to the Bank. The Bank is an institution sponsored by 20 of the 21 nations of the Organization of American States and is designed to accelerate the economic development of the American republics by providing capital and technical assistance and by encouraging private investment in development projects.

The U.S. subscription falls into three categories. The first is a subscription of \$150 million for paid-in shares of capital stock, payable in three installments. The first installment of \$30 million was paid in June 1960; the second installment of \$60 million was paid in October 1961; and the third and final installment of \$60 million is to be paid not later than October 31, 1962. The second category is \$200 million of callable capital stock which can be called only to meet obligations of the Bank on securities which it may issue or guarantee in the private financial market. The third category is a subscription quota of \$100 million in the Fund for Special Operations of the Bank. Fifty million dollars was paid in June 1960, and \$50 million in October 1961.

As of June 30, 1961, loans totalling \$40,890 thousand out of the ordinary capital had been approved in nine countries and \$29,150 thousand out of the Fund for Special Operations had been approved in loans to five countries. Loans made out of the Fund for Special Operations may be repaid in whole, or in part, in the currency of the borrowing country.

INVESTMENT IN INTERNATIONAL BANK FOR RECONSTRUCTION AND DEVELOPMENT

Program and Financing (in thousands of dollars)

	1961 actual	1962 estimate	1963 estimate
Financing:			
Unobligated balance brought forward (authorization to expend from public debt receipts).....	-5,715,000	-5,715,000	-5,715,000
Unobligated balance carried forward (authorization to expend from public debt receipts).....	5,715,000	5,715,000	5,715,000

The Bretton Woods Agreements Act of July 31, 1945, authorized the acceptance of membership in the International Bank for Reconstruction and Development and, with the amendment of June 17, 1959 (73 Stat. 80), the subscription of \$6,350 million to its capital stock. The United States paid \$635 million of the original subscription in cash and non-interest-bearing nonnegotiable notes. The remaining balance of obligational authority (\$5,715 million) will not be called unless required to meet the Bank's obligations. Calls on unpaid subscriptions must be a uniform percentage of the amounts subscribed by each member country.

By the end of June 1961, the Bank had made net loans totaling \$5.7 billion in 57 member countries and territories. Current loans by the Bank are entirely financed through the sale of obligations and through drawing on subscriptions of other member countries.

Proposed for separate transmittal:

AUTHORITY TO LEND TO INTERNATIONAL MONETARY FUND

Program and Financing (in thousands of dollars)

	1961 actual	1962 estimate	1963 estimate
Financing:			
Unobligated balance brought forward.....			-2,000,000
Unobligated balance carried forward.....		2,000,000	2,000,000
New obligational authority (proposed supplemental authorization to expend from public debt receipts).....		2,000,000	

Under proposed legislation, 1962.—Legislation will be proposed authorizing the loan of \$2 billion to the International Monetary Fund if needed to enable the Fund to forestall or cope with an impairment of the international monetary system. This will enable the United States to fulfill its part in an agreement reached with other major industrial countries under which \$6 billion of supplementary resources would be available on a standby basis for lending to the Fund.

SPECIAL FOREIGN CURRENCY PROGRAMS

TRANSITIONAL GRANTS TO ALASKA

Current authorizations:

TRANSITIONAL GRANTS TO ALASKA

For grants to the State of Alaska to assist in accomplishing an orderly transition from Territorial status to statehood and to facilitate the assumption of responsibilities hitherto performed in Alaska by the Federal Government, and for expenses of providing Federal services or facilities in Alaska for an interim period, as authorized by law (73 Stat. 151), **[\$6,000,000] \$3,000,000.** (*General Government Matters Appropriation Act, 1962.*)

Program and Financing (in thousands of dollars)

	1961 actual	1962 estimate	1963 estimate

1. Grants to Alaska.....	5,451	5,363	3,000
2. Operation and maintenance of intermediate airports.....	547	637	
Total obligations.....	5,998	6,000	3,000
Financing:			
Unobligated balance lapsing.....	2		
New obligational authority (appropriation).....	6,000	6,000	3,000

Section 44 of the Alaska Omnibus Act (73 Stat. 151) authorizes grants to the State of Alaska for a 5-year period ending June 30, 1964, to facilitate assumption by the State of responsibilities hitherto performed in Alaska by the Federal Government.

These funds are to enable the President (a) to make grants to the State to assist in financing functions transferred from the Federal Government and (b) to finance continued Federal operations for an interim period when the State requests a delay in transfer of functions. In June 1959, the State requested that the Federal Government continue operation of 17 primary and intermediate airports, and allocations were made to the Federal Aviation Agency for this purpose.

The \$3 million requested for 1963 is the maximum authorized by law.

DEPARTMENT OF AGRICULTURE

AGRICULTURAL RESEARCH SERVICE

Current authorizations:

SALARIES AND EXPENSES

For expenses necessary to perform agricultural research relating to production, utilization, and home economics, to control and eradicate pests and plant and animal diseases, and to perform related inspection, quarantine and regulatory work, and meat inspection: *Provided*, That not to exceed \$75,000 of the appropriations hereunder shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (5 U.S.C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a): *Provided further*, That appropriations hereunder shall be available for the operation and maintenance of aircraft and the purchase of not to exceed two [, of which one shall be] for replacement only: *Provided further*, That appropriations hereunder shall be available pursuant to title 5, United States Code, section 565a, for the construction, alteration, and repair of buildings and improvements, and for acquisition of sites therefor by donation, exchange, or purchase at a nominal cost not to exceed \$100, but unless otherwise provided, the cost of constructing any one building (except headhouses connecting greenhouses) shall not exceed \$15,000, except for five buildings to be constructed or improved at a cost not to exceed \$30,000 each, and the cost of altering any one building during the fiscal year shall not exceed \$5,000 or 5 per centum of the cost of the building, whichever is greater: *Provided further*, That the limitations on alterations contained in this Act shall not apply to a total of \$100,000 for conversion of animal disease and parasite research facilities at Beltsville, Maryland:

Research: For research and demonstrations on the production and utilization of agricultural products, home economics, and related research and services, [including administration of payments to State agricultural experiment stations, \$77,311,000] \$77,982,000: *Provided*, That the limitations contained herein shall not apply to replacement of buildings needed to carry out the Act of April 21, 1948 (21 U.S.C. 113a) [: *Provided further*, That the Secretary of Agriculture may sell the Entomology Research Laboratory at Orlando, Florida, in such manner and upon such terms and conditions as he deems advantageous and the proceeds of such sale shall remain available until expended for the establishment of an entomology research laboratory: *Provided further*, That in the establishment of such laboratory the Secretary may acquire land therefor by donation or exchange: *Provided further*, That the Secretary may acquire approximately thirty-five acres of land at Kerrville, Texas, by donation, for research purposes]:

Plant and animal disease and pest control: For operations and measures, not otherwise provided for, to control and eradicate pests and plant and animal diseases and for carrying out assigned inspection, quarantine, and regulatory activities, as authorized by law, including expenses pursuant to the Act of February 28, 1947, as amended (21 U.S.C. 114b-e), [\$55,352,500] \$58,902,500, of which \$1,500,000 shall be apportioned for use pursuant to section 3679 of the Revised Statutes, as amended, for the control of outbreaks of insects and plant diseases to the extent necessary to meet emergency conditions: *Provided*, That [no funds shall be used to formulate or administer a brucellosis eradication program for fiscal year 1963 that does not require minimum matching by any State of at least 40 per centum: *Provided further*, That the Secretary is authorized to acquire land for the plant pest control activities presently located at Gulfport, Mississippi], in addition, in emergencies which threaten the livestock or poultry industries of the country, the Secretary may transfer from other appropriations or funds available to the agencies or corporations of the Department such sums as he may deem necessary, to be available only in such emergencies for the arrest and eradication of foot-and-mouth disease, rinderpest, contagious pleuropneumonia, or other contagious or infectious diseases of animals, or European foul pest and similar diseases in poultry, and for expenses in accordance with Act of February 28, 1947, as amended, and any unexpended balances of funds transferred under this head in the next preceding fiscal year shall be merged with such transferred amounts;

Meat inspection: For carrying out the provisions of laws relating to Federal inspection of meat, and meat-food products, and the applicable provisions of the laws relating to process or renovated butter, [\$24,216,000] \$25,241,000.

Special fund: To provide for additional labor to be employed under contracts and cooperative agreements to strengthen the work

at research installations in the field, not more than \$1,000,000 of the amount appropriated under this head for the fiscal year 1961 may be used by the Administrator of the Agricultural Research Service in departmental research programs in the fiscal year [1962] 1963, the amount so used to be transferred to and merged with the appropriation otherwise available under "Salaries and expenses, Research". (5 U.S.C. 511-512, 524, 541e-541e, 563-564, 565a, 576, 2131; 7 U.S.C. 135-135k, 145-148a, 148c-164a, 166-167, 281-283, 391, 394-396, 401-404, 421-422a, 424-425, 427, 427i, 428a, 429-431, 433-434, 436-437, 851-855, 1292, 1651-1656, 1704, 1901-1906; 15 U.S.C. 69c; 16 U.S.C. 581-581a, 581f, 590a-590b, 590f, 590k; 18 U.S.C. 287; 19 U.S.C. 1201, 1306; 20 U.S.C. 191-194; 21 U.S.C. 71-91, 94-96, 98, 101-105, 111-114e, 114e-128, 130-131, 151-158, 342a, 346-346a; 26 U.S.C. 4817, 7235c; 31 U.S.C. 725a; 42 U.S.C. 1891-1893; 45 U.S.C. 71-74; 46 U.S.C. 466a-466b; 48 U.S.C. 1409m-1409o; 49 U.S.C. 1474(a), 1509(d); 46 Stat. 67; 75 Stat. 188, 481, 527; Department of Agriculture and Related Agencies Appropriation Act, 1962.)

Note.—Excludes \$404 thousand for activities transferred in the estimates to Cooperative State Experiment Station Service and includes \$75 thousand for activities previously carried under Salaries and expenses, Farmers Home Administration. The amounts obligated in 1961 and 1962 are shown in the schedule as comparative transfers.

AGRICULTURAL RESEARCH SERVICE—Continued

Current authorizations—Continued

SALARIES AND EXPENSES—Continued

The Service conducts basic and applied research relating to the production and utilization of agricultural products, research on nutrition and consumer use, and carries out control and regulatory programs involving enforcement of plant and animal quarantines, meat inspection, and the control of diseases and insect pests of animals and plants.

1. *Research*—(a) *Farm research*.—Improved breeding, feeding, and management practices are developed for farm livestock, poultry, and domestic fur animals. Practical methods are sought for control of diseases and parasites affecting them.

Investigations are conducted to improve varieties of food, feed, fiber and other plants, and to develop new crops; to improve crop-production practices, including methods to control plant diseases and nematodes; and to improve chemical, biological, and other methods for control of harmful pests affecting farm production.

Research is conducted to improve fertilizers, soil management, irrigation, and conservation practices; to study hydrologic problems of agricultural watersheds; to determine the relation of soils to plant, animals, and human nutrition; and to apply engineering principles to improve efficiency and reduce costs of agricultural production.

Continuous review is maintained to emphasize work which will meet the problems of agricultural surpluses. The research is aimed at the profitable production of an adequate supply of food, feed, fiber, and other agricultural products of desired quality at minimum costs. Increased attention has been given to the production of agricultural products having industrial uses.

The proportion of farm research funds going into basic research to undergird the other research efforts has steadily increased, and is currently estimated at 36%.

The National Animal Disease Laboratory, and laboratories for research on cotton insects, northern grain insects, and southern grain insects were placed in operation in 1961 and will provide information of benefit to agriculture and to consumers. The 1963 estimates include increases for staffing laboratories recently authorized by Congress.

(b) *Utilization research and development*.—Chemical, physical, and biological research is conducted to develop increased industrial uses of farm products, and new and improved foods, feeds, and fabrics; and to develop improved methods for processing agricultural commodities.

(c) *Nutrition and consumer use research*.—Studies are made of nutrition, consumer use and food economics, and clothing and housing.

(d) *Contingencies*.—Beginning in 1962, \$1 million is available to meet urgent research needs that develop unexpectedly, when such needs cannot be met by redirection of resources from other projects.

A supplemental estimate for 1963 is anticipated for separate transmittal.

2. *Plant and animal disease and pest control*—(a) *Plant disease and pest control*.—Provision is made (1) through port-of-entry inspection to exclude from this country destructive insects, plant diseases, and nematodes that cause great damage to agricultural crops in other parts of the world; (2) to cooperate with States in eradicating or preventing spread of crop pests that become established

in this country; and (3) to assist States in suppressing incipient and emergency outbreaks of crop pests when and where they occur. An increase is proposed in 1963 for plant quarantine protection necessary because of increased travel and shipping. The volume of workload is indicated in the following table (in thousands):

	1959 actual	1960 actual	1961 actual
Inspections at ports of entry:			
Airplanes.....	134	139	130
Vessels.....	59	60	57
Vehicles from Mexico.....	21,120	22,657	24,250
Baggage, pieces of.....	21,331	22,025	22,637
Interceptions of unauthorized plant material.....	320	314	324

(b) *Animal disease and pest control*.—Programs are conducted to exclude communicable diseases of foreign origin from this country; to prevent the spread of diseases through interstate shipments of livestock or distribution of impure or impotent veterinary biologics; to control and eradicate livestock diseases; and to maintain, through a marketing agreement with manufacturers and handlers, adequate supplies of hog cholera virus and serum for protection of swine. The estimates for 1963 propose increases for more adequate animal inspection and quarantine at ports to reduce the hazard of introduction of foreign animal diseases, and for a hog cholera eradication program.

The volume of protective activities is indicated by selected examples in the following table (in thousands):

	1959 actual	1960 actual	1961 actual
Animal import inspection:			
All animals.....	1,150	783	741
Import animal byproducts:			
Wool, bone, glands, etc. (pounds)....	664,611	965,480	606,325
Hides and skins (pounds).....	364,489	360,043	257,121
Sheep inspected for scabies.....	10,849	10,837	12,031
Scabies-infected sheep found.....	69	86	70
Cattle inspected for scabies.....	5,855	6,927	7,661
Scabies-infected cattle found.....	9	30	36
Inspections and dippings for cattle fever ticks.....	2,097	1,685	2,594
Cattle tested for tuberculosis.....	8,187	9,440	9,788
Tuberculosis reactors found.....	19	14	15
Cattle tested for brucellosis:			
Blood tests.....	14,169	12,468	13,419
Ring tests.....	30,693	30,764	36,818
Brucellosis reactors found.....	214	148	140
Animals inspected at public stockyards....	62,813	65,500	60,265
Diseased animals received or found.....	435	446	391
Supervision of production of veterinary biologics:			
Hog-cholera virus and anti-hog-cholera serum (doses).....	44,232	41,645	37,970
Hog-cholera vaccine (doses).....	44,068	38,035	37,452
Other vaccines (doses).....	3,676,452	3,394,411	4,471,761
Total bacterins (doses).....	130,021	121,224	131,484
Diagnostic agents (doses).....	75,281	62,097	48,185
Other serums (doses).....	11,799	9,832	7,715

(c) *Pesticides regulation*.—This provides for administration of the Federal Insecticide, Fungicide, and Rodenticide Act and related provisions of the Federal Food, Drug, and Cosmetic Act. The 1963 estimates propose an increase to handle increased registration workload.

3. *Meat inspection*.—Federal meat inspection is required for all meat in interstate commerce and is conducted to assure a clean and wholesome meat supply for human consumption, free from adulteration, and truthfully labeled. The work includes inspection of animals, carcasses and meat, and meat-food products at various stages of handling and processing. Measures are enforced to insure

informative labeling, and meats imported or exported are inspected. The estimates for 1963 include a proposed increase principally for additional inspection staff to service the expanding demand for Federal meat inspection.

The volume of inspections and examinations is indicated by examples given in the following table:

	1959 actual	1960 actual	1961 actual
Number of establishments covered.....	1,334	1,396	1,451
Cities in which plants are located.....	546	572	599
Inspection of live animals.....	99,419,254	107,504,884	104,329,407
Post mortem inspections.....	99,414,897	107,499,826	104,324,593
Animals and carcasses condemned.....	242,329	255,632	285,161
Inspection of processed meat and meat-food products (million pounds).....	17,618	18,698	18,461

¹ Includes capital outlay as follows: 1961, \$12 thousand; 1962, \$8 thousand; 1963, \$1 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1960, \$4,018 thousand; 1961, \$7,177 thousand; 1962, \$21,303 thousand; and 1963, \$33,429 thousand.

Foreign currencies, generated by the sale of surplus agricultural commodities under title I of the Agricultural Trade Development and Assistance Act of 1954, are used by the Department for market development research under section 104(a) and for agricultural and forest research under section 104(k). Work is carried on through agreements, in both basic and applied fields, by research institutions and organizations in foreign countries. This research serves to develop new foreign markets and to expand existing markets for agricultural commodities, including cotton, dairy products, fats and oils, grain, feed, livestock and meat, poultry, fruits and vegetables, and tobacco. It also provides for supplementary research on farm, forest, marketing, utilization, agricultural economics, and human nutrition problems. In 1963 this appropriation will be used to purchase only those currencies determined to be excess to the normal requirements of the United States. Total estimated cost in U.S. dollars (charged to regular appropriations) for the initiation and supervision of projects in 1963 is \$300 thousand.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1960, \$0; 1961, \$311 thousand; 1962, \$4,971 thousand; and 1963, \$1,970 thousand.

Funds were appropriated in 1961 and 1962 for construction of facilities for research at a number of locations. In 1963, funds are requested for expansion of the facilities at the U.S. Regional Poultry Research Laboratory, East Lansing, Mich., for research on avian leukosis; soil and water conservation research facilities at Sidney, Mont.; construction of animal inspection and quarantine facilities at two ports of entry; and modernizing heating plant, providing new storage, shops, and service center, and

reconditioning electric power system at the Agricultural Research Center, Beltsville, Md.

[STATE EXPERIMENT STATIONS]

[Payments to States and Puerto Rico: For payments to agricultural experiment stations to carry into effect the provisions of the Hatch Act, approved March 2, 1887, as amended by the Act approved August 11, 1955 (7 U.S.C. 361a-361i), including administration by the United States Department of Agriculture, \$35,053,000; and payments authorized under section 204(b) of the Agricultural Marketing Act, the Act approved August 14, 1946 (7 U.S.C. 1623), \$500,000; in all, \$35,553,000.]

[Penalty mail: For penalty mail costs of agricultural experiment stations under section 6 of the Hatch Act of 1887, as amended, \$250,000.] (39 U.S.C. 321q; Department of Agriculture and Related Agencies Appropriation Act, 1962.)

Note.—Estimate of \$37,803 thousand for activities previously carried under this title has been transferred in the estimates to Cooperative State Experiment Station Service. The amounts obligated in 1961 and 1962 are shown in the schedule as comparative transfers.

In previous years, \$16.5 million had been provided for establishment of animal disease research and control laboratory facilities. Construction of the facilities at Ames, Iowa, was started in August 1958. The laboratory buildings were completed in 1961. Construction of needed hay storage and warehouse facilities in 1962 will complete this installation.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1960, \$4 thousand; 1961, \$0.

Under authority of the act of August 20, 1958 (72 Stat. 680), approximately 7 acres of land at the U.S. Animal Quarantine Station, Clifton, N.J., were conveyed to the city of Clifton. The Federal Government received \$83 thousand for this land, of which \$30 thousand was deposited on August 19, 1959, to a special account for alterations of buildings, facilities, and improvements on the remaining land at the station. This work is now completed.

ESTABLISHMENT OF AN ENTOMOLOGY RESEARCH LABORATORY

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1961, \$0; 1962, \$300 thousand; 1963, \$0.

The 1961 appropriation for Salaries and expenses, research, Agricultural Research Service, authorized the sale of the Department's Entomology Research Laboratory at Orlando, Fla., and application of the proceeds of sale to the construction of a new laboratory. An additional \$500 thousand was provided by the Supplemental Appropriation Act, 1961, under the appropriation Construction of facilities for the remainder of the total estimated cost of \$900 thousand for the new facilities. The Orlando property was sold in 1961 for \$400 thousand, which will be applied toward the construction of the new laboratory.

ALLOCATIONS AND ALLOTMENTS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations and allotments from other accounts are included in the schedules of the parent appropriations, as follows:
"Agency for International Development," funds appropriated to the President.
"Translation of publications and scientific cooperation," funds appropriated to the President.
"United States dollars advanced from foreign governments," United States educational exchange program, Department of State.

AGRICULTURAL RESEARCH SERVICE—Continued

Intragovernmental funds:

WORKING CAPITAL FUND, AGRICULTURAL RESEARCH CENTER

This fund finances, on a reimbursable basis, central facilities and services furnished to agencies at the Agricultural Research Center (64 Stat. 658). The capital consists of \$300 thousand appropriated in 1951 and donated assets of \$261 thousand as of June 30, 1961. Earnings are retained to furnish adequate working capital.

COOPERATIVE STATE EXPERIMENT STATION SERVICE

Current authorizations:

PAYMENTS AND EXPENSES

For payments to agricultural experiment stations and other expenses, and for grants for basic research, including \$36,053,000 to carry into effect the provisions of the Hatch Act, approved March 2, 1887, as amended by the Act approved August 11, 1955 (7 U.S.C. 361a-361i), including administration by the United States Department of Agriculture; \$500,000 for payments authorized under section 204(b) of the Agricultural Marketing Act of 1946 (7 U.S.C. 1623); \$950,000 for grants for support of basic scientific research under the Act approved September 6, 1958 (7 U.S.C. 1891-1893); \$250,000 for penalty mail costs of agricultural experiment stations under section 6 of the Hatch

Act of 1887, as amended; and \$454,000 for necessary expenses of the Cooperative State Experiment Station Service, including administration of payments to State agricultural experiment stations, of which not more than \$25,000 shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1914 (5 U.S.C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a); \$38,207,000.

Note.—Estimate is for activities previously carried under "State experiment stations," Agricultural Research Service, and also includes \$404,000 for activities previously carried under "Salaries and expenses," Agricultural Research Service. The amounts obligated in 1961 and 1962 are shown in the schedule as comparative transfers.

Program and Financing (in thousands of dollars)

New obligational authority (appropriation)			38,207

¹ Includes capital outlay as follows: 1961, \$5 thousand; 1962, \$8 thousand.

Grants are allocated to agricultural experiment stations of the land-grant colleges in the States and Puerto Rico for agricultural research, including investigations and experiments to promote a permanent and efficient agricultural industry and improvements in the rural home and rural life. The States are contributing \$3.74 for every \$1 paid by the Federal Government. This proposed new appropriation continues activities previously conducted under the Agricultural Research Service. In September 1961, the Cooperative State Experiment Station Service was created as a separate agency of the Department.

An increase of \$1 million is proposed in Payments to States and Puerto Rico to strengthen the cooperative research program at the agricultural experiment stations. In addition, \$1 million is requested to initiate a program of grants for support of basic scientific research in 1963.

The planned distribution of the payments to agricultural experiment stations and the grants to institutions for this research for 1963 is (in thousands of dollars):

The primary function of the nationwide system of cooperative extension work is out-of-school applied education in agriculture, home economics, and related subjects. This educational work takes research results, technological advancements, and situation and program facts of the Department of Agriculture, the State agricultural colleges and experiment stations, and incorporates them into a national educational program for action. Its objective is to provide farm people and others with information and assistance upon which they may make social and economic adjustments necessary for an efficient agricultural industry and improved rural homes and rural life.

1. *Payments to States and Puerto Rico.*—Funds appropriated under the Smith-Lever Act for payments to States and Puerto Rico are distributed primarily on the basis of farm and rural population and to a limited degree on the basis of special problems and needs. Funds appropriated under the Agricultural Marketing Act for educational work in marketing are distributed to the States and Puerto Rico on a matching basis under approved projects and on the basis of contracts. Funds are used primarily for the employment of State and county extension workers who work with rural families, marketing concerns, and others by providing advice and assistance in the application of improved methods involved in production, marketing, and family living. They assist local leadership to determine extension programs of work. Work with youth is accomplished largely through 4-H clubs.

The proposed increase in payments for cooperative agricultural extension work would be paid to the States on the basis of needs determined by the Department under section 3(d) of the Smith-Lever Act to provide more effectively for extension work in connection with the Rural Areas Development Program.

The scope of extension activities is reflected in the following selected statistics (in thousands):

	1958	1959	1960
Number of families assisted in adopting improved agricultural practices.....	7,947	8,040	8,437
Number of families assisted in adopting improved homemaking practices.....	7,475	8,453	10,381
Number of 4-H club members.....	2,254	2,302	2,297
Number of voluntary local leaders.....	1,281	1,277	1,276
Number of bulletins distributed.....	32,873	34,230	35,961

2. *Retirement costs for extension agents.*—The increase proposed is required to meet retirement costs of cooperative extension agents as authorized under Public Law 854, approved July 31, 1956. Cooperative extension agents are joint employees of the U.S. Department of Agriculture and the cooperating Land-Grant institutions. The employer's contribution to the Federal retirement fund, to match contributions of these agents, is provided by this Federal appropriation.

3. *Penalty mail.*—Funds to cover the cost of penalty mailings for State extension directors and cooperative extension agents in the States are provided under this appropriation.

4. *Federal Extension Service.*—The Federal Extension Service provides leadership, counsel, and assistance to the States and Puerto Rico in developing extension programs, improved teaching methods, efficient use of available resources, evaluation of programs, inservice training for extension personnel, and administrative services. The Federal Extension Service also coordinates the educational activities of other U.S. Department of Agriculture agencies. The proposed increase will permit the Federal staff of the Extension Service to more nearly meet increased responsibilities involved in an intensified extension program geared to needs of modern agriculture; to meet requests from the States for a greater amount of program leadership and assistance; and to provide educational coordination and assistance to the research, service, action programs, civil defense preparedness, and other authorized activities of the U.S. Department of Agriculture, in order that they may be promptly and appropriately applied.

FARMER COOPERATIVE SERVICE—Continued

Current authorizations—Continued

SALARIES AND EXPENSES—Continued

The Farmer Cooperative Service provides research, advisory, and educational assistance to farmers' marketing, purchasing, and service cooperatives. Problems of organization, financing, policies, management, merchandising, costs, efficiency, and membership are involved. Much of this work is carried on in cooperation with land-grant colleges, the Extension Service, and other Federal and State agencies. The 1963 increase will be used to provide additional assistance to farmers' cooperatives.

SOIL CONSERVATION SERVICE

The Service is responsible for various soil and water conservation activities to aid farmers and ranchers in making physical adjustments in land use to conserve soil, water, and plant resources, establish a permanent and balanced agriculture, and reduce the hazards of floods and sedimentation. These activities are carried out in cooperation with Federal and State agencies and local organizations. The Service also has responsibility for administering the Great Plains conservation program and provides technical services in connection with the agricultural conservation program, and soil and water conservation loans made by the Farmers Home Administration.

Current authorizations:

CONSERVATION OPERATIONS

For necessary expenses for carrying out the provisions of the Act of April 27, 1935 (16 U.S.C. 590a-590f), including preparation of conservation plans and establishment of measures to conserve soil and water (including farm irrigation and land drainage and such special measures as may be necessary to prevent floods and the siltation of reservoirs); operation of conservation nurseries; classification and mapping of soils; dissemination of information; purchase and erection or alteration of permanent buildings; and operation and maintenance of aircraft, **[\$89,725,000] \$90,725,000**; Provided, That the cost of any permanent building purchased, erected, or as improved, exclusive of the cost of constructing a water supply or sanitary system and connecting the same to any such building and

with the exception of buildings acquired in conjunction with land being purchased for other purposes, shall not exceed \$2,500, except for eight buildings to be constructed or improved at a cost not to exceed \$15,000 per building and except that alterations or improvements to other existing permanent buildings costing \$2,500 or more may be made in any fiscal year in an amount not to exceed \$500 per building; *Provided further*, That no part of this appropriation shall be available for the construction of any such building on land not owned by the Government; *Provided further*, That no part of this appropriation may be expended for soil and water conservation operations under the Act of April 27, 1935 (16 U.S.C. 590a-590f), in demonstration projects; *Provided further*, That not to exceed \$5,000 may be used for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (5 U.S.C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a); *Provided further*, That qualified local engineers may be temporarily employed at per diem rates to perform the technical planning work of the service. (5 U.S.C. 133t, 511-512, 565a; 7 U.S.C. 1387, 1807; 16 U.S.C. 590q-1; Department of Agriculture and Related Agencies Appropriation Act, 1962.)

Assistance furnished to soil conservation districts and other cooperators consists primarily of: (a) standard soil surveys and special soil investigations to provide physical land facts needed for farm and ranch conservation planning and application of practices, and for use by other Federal, State, and local agencies and the public;

MAIN WORKLOAD FACTORS

[In millions of acres]

	1959 actual	1960 actual	1961 actual	Total as of June 30, 1961	1962 estimate	1963 estimate
Soil surveys.....	48.0	50.1	55.7	700.6	58.0	62.0
Range site determinations.....	14.0	14.5	17.9	121.2	18.5	19.0

(b) technical assistance to farmers and ranchers in planning of individual conservation programs for orderly adjustments of the use and treatment of their land; (c) management consultation and other technical assistance with installation of those practices and combinations of practices provided for in their farm and ranch conservation plans;

MAIN WORKLOAD FACTORS

	1959 actual	1960 actual	1961 actual	1962 estimate	1963 estimate
Soil conservation districts.....	2,861	2,867	2,900	2,920	2,943
District cooperators.....	1,279,634	1,849,525	1,887,091	1,940,000	2,000,000
Basic conservation plans.....	1,279,634	1,301,450	1,358,290	1,430,000	1,500,000
Farms applying practices.....	647,107	644,832	690,006	705,000	720,000

(d) technical assistance to group enterprises with soil conserving water control problems that can best be solved through group action; (e) the granting of special equipment acquired from Federal Government surplus to soil conservation districts for use in the application of needed conservation practices (the original acquisition cost to the Government of such equipment in 1961 was \$2,396 thousand); (f) water supply forecasts developed from snow surveys in Western States which serve as a basis for planning for efficient seasonal use of water; (g) the selection, and testing of plant materials to determine their suitability for erosion control purposes; (h) technical assistance to agricultural conservation program participants in establishing specified conservation practices; (i) technical assistance to participants in Federal grain programs with planning and applying specified conservation practices and land use adjustments; (j) technical assistance in planning and applying the soil and water conservation practices for which loans are made by the Farmers Home Administration; (k) consultation and assistance to local rural areas development committees, and program planning in urban fringe areas; and (l) radiological monitoring and participation on USDA State and County Emergency Planning Committees and other cooperative activities as required.

The increase proposed would be used to expand snow survey operations (\$100 thousand), and to accelerate the rate of soil survey work (\$900 thousand).

The Department cooperates with the States and other agencies in planning and installing works of improvement in small watersheds to reduce damage from floodwater, sediment, and erosion and for the conservation, development, utilization, and disposal of water. It provides loans to local organizations to help them finance their share of the costs of certain works of improvement. The Department also cooperates with other agencies in making surveys and investigations of watersheds of rivers and other waterways as the basis for the development of coordinated programs.

1. *Investigations and planning.*—Surveys are made by the Department of proposed small watershed projects, and work plans are prepared in cooperation with the local sponsors. These plans outline the soil and water management problems in the watershed, the steps that have been or are authorized to be taken to alleviate these problems, the proposed works of improvement to be installed, the estimated benefits and costs, cost-sharing and operation and maintenance arrangements, and other facts necessary to justify Federal participation in project development.

2. *Installation of works of improvement.*—The Department provides technical and financial assistance to local organizations to install the watershed works of improve-

ment for watershed protection, flood prevention, agricultural water management, and fish and wildlife development features specified in the work plans.

(a) *Pilot demonstration watersheds.*—The following table shows the status of the pilot watershed projects which were initiated in 1954 to demonstrate and evaluate the effects

of works of improvement installed in small watersheds for watershed protection and flood prevention. The estimate for 1962 includes \$148 thousand for repair or modification of a few structures in three reactivated projects. This work was determined to be a Federal responsibility rather than a maintenance responsibility of local sponsors.

Explanation	[Dollars in thousands]					
	1961 actual		1962 estimate		1963 estimate	
	Number	Amount	Number	Amount	Number	Amount

4. Projects completed (cumulative) and total cost.....	38	15,535	45	24,185	51	31,081
5. Projects discontinued (cumulative) and total cost.....	8	330	8	330	8	330

¹ Includes obligations for project evaluation studies subsequent to the fiscal year 1959 on all projects on which these studies are being carried out.

(b) *Public Law 566 watersheds.*—After local sponsoring organizations have developed watershed work plans with the Department's assistance and the projects have been approved as suitable for Federal participation (projects involving an estimated Federal contribution in excess of \$250 thousand, or any single structure having a capacity in excess of 2,500 acre-feet require congressional approval), technical services and cost-sharing assistance are provided for specified works of improvement. On non-Federal lands local sponsoring organizations provide land easements and rights-of-way; contract for construction work; operate and maintain the projects; and in the case of multiple-purpose structures, bear a share of construction costs. Federal agencies do this work on Federal lands which they administer with appropriate contributions being made by the local people who receive benefits.

Advance engineering and technical assistance is furnished to all approved projects before they are advanced to the construction stage. During the advance engineering and technical assistance stage, surveys and investigations are made and detailed designs, specifications, and engineering cost estimates are prepared for construction of

structural works; areas are delineated where easements are required and technical assistance is furnished for accelerating planning and application of land treatment measures.

The project construction stage begins with execution of the first project agreement for construction of works of improvement, after required easements are obtained or assured and the local organization has met all other requirements. Under a project agreement the local sponsoring organization agrees to construct a segment of the project which may consist of an individual or an interrelated group of structures. The agreement obligates the Government to furnish its share of the construction cost. Payments are made to the local contracting organization in accordance with the project agreement as the work progresses. Engineering and other services are provided for the preparation of contracts and inspection of construction. Technical assistance in planning and installing land treatment measures is continued.

The following tabulation shows the status of Public Law 566 projects and amounts obligated or estimated to be obligated:

Explanation	[Dollars in thousands]

SOIL CONSERVATION SERVICE—Continued

Current authorizations—Continued

WATERSHED PROTECTION—Continued

The 1962 program contemplates initiation of construction in about 60 watershed projects, involving 1962 obligations of \$18.2 million and total Federal cost of \$56.2 million. The 1963 estimates likewise provide for starting about 60 projects, with 1963 obligations of \$18.2 million and total Federal cost of \$60 million.

3. *Loans and related expense.*—Loans are made to local organizations to finance the local share of the cost of planned works of improvement to be installed in approved watersheds. Repayment with interest is required within 50 years after the principal benefits of improvements first become available. Of the 1963 estimate for watershed protection, not to exceed \$3 million is to be available for such purpose together with unobligated balances of loan funds from prior years.

4. *Surveys and investigations of water resources programs.*—Current work includes participation with the Corps of Engineers in surveys in the Potomac River Basin, the Upper Mississippi River and Great Lakes drainage areas, and the Arkansas River multiple-purpose or navigation project in Arkansas and Oklahoma. In addition, studies are now being conducted under a cooperative arrangement with the Department of the Interior to reappraise the direct agricultural benefits anticipated from certain participating projects of the Upper Colorado River Storage Project. Surveys are also being made of the Tombigbee River area in cooperation with the Mississippi State Board of Water Commissioners and the Alabama Water Resources Study Commission; of the Humboldt River Basin with the Nevada Department of Conservation and Natural Resources; of the Central Willamette, Goose and Summer Lakes, Coose-Coquille, Umatilla and other river basins with the Oregon State Water Resources Board; of the Sevier River Basin with agencies of the State of Utah; and of the Gunnison River Basin with the Colorado Water Conservation Board. Some cooperative assistance is being provided to the river basin study commissions for the Southeast and the Texas River areas and may be provided to the State of Texas outside those river areas.

FLOOD PREVENTION

For expenses necessary, in accordance with the Flood Control Act, approved June 22, 1936 (33 U.S.C. 701-709, [74 Stat. 131] 16 U.S.C. 1006a), as amended and supplemented, and in accordance with the provisions of laws relating to the activities of the Department, to perform works of improvement, including not to exceed \$100,000 for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1941 (5 U.S.C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), to remain available until expended, [\$25,000,000] \$24,000,000, with which shall be merged the unexpended balances of funds heretofore appropriated or transferred to the Department for flood prevention purposes: *Provided*, That no part of such funds shall be used for the purchase of lands in the Yazoo and Little Tallahatchie watersheds without specific approval of the county board of supervisors of the county in which such lands are situated: *Provided further*, That not to exceed \$1,000,000, together with the unobligated balance of funds previously appropriated for loans and related expense, shall be available for such purposes. (5 U.S.C. 511-512; Department of Agriculture and Related Agencies Appropriation Act, 1962.)

Total selected resources.....	5,180	9,029	10,000	8,700

1. *Works of improvement.*—The Department cooperates with soil conservation districts and other local organizations in planning and installing works of improvement for flood prevention and for furthering the conservation, development, utilization, and disposal of water in the 11 watersheds authorized by the flood control act of 1944. The Federal Government shares in the cost of works of improvement for flood prevention, agricultural water management, and fish and wildlife development features.

The Department furnishes accelerated technical assistance and some financial assistance to landowners in the installation of land treatment measures for runoff retardation, sediment control, and water management. Local sponsoring organizations must furnish all land, easements and rights-of-way, water rights, and the entire cost of works of improvement for nonagricultural water management measures, except those for fish and wildlife development, and operate and maintain all completed works of improvement.

2. *Loans and related expense.*—Loans are made to local organizations to help finance their share of the costs of planned works of improvement. Repayment with interest is required within 50 years after the principal benefits of improvements first become available. Of the 1963 estimate for flood prevention, not to exceed \$1 million is to be available for such purpose, together with any unobligated balances of loan funds from prior years.

¹ Includes capital outlay as follows: 1961, \$24 thousand; 1962, \$39 thousand; 1963, \$42 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1960, \$14,227 thousand; 1961, \$15,788 thousand; 1962, \$15,900 thousand; 1963, \$17,200 thousand.

Cost-sharing contracts and technical assistance are offered by the Department to aid farmers and ranchers to develop and carry out long-range conservation plans designed to minimize climatic hazards and protect their lands from erosion and deterioration by natural causes. This is a voluntary program which supplements other conservation programs and activities in designated counties of the 10 Great Plains States. Cost-sharing contracts extend from 3 to 10 years and include a plan of operations for the farm and ranch and a time schedule for installing eligible conservation practices. December 31, 1971, is the final date for entering into contracts with cooperators. The maximum cost-share rate offered in any contract does not exceed 80% of the average cost of installing each eligible practice. Federal cost-sharing for constructing, enlarging, deepening or lining any individual dam, pit, or pond for irrigation water is limited to \$2,500. Furthermore, cost-sharing for conservation irrigation practices in any one contract must not exceed (1) \$2,500, or (2) approximately one-fourth of the total Federal obligation, whichever is the larger. Producers are also limited to a Federal cost-sharing ceiling of \$25 thousand for any one contract. The total cost-share that may be paid to producers is limited to \$25 million for any one program year and \$150 million for the total program.

The producer who signs a Great Plains program contract is responsible for accomplishing his plan of operations as scheduled, and is encouraged to use all available sources of assistance under other local, State, or Federal programs that contribute to achieving conservation land treatment and economic stability of the farm or ranch unit.

The Service has been developing irrigation farming units for sale on the Eden Valley project in Wyoming where the Bureau of Reclamation has constructed the water storage facility and the principal canals. Land development for irrigation has been completed in accordance with the project plan prepared cooperatively with the Bureau of Reclamation. The farms developed in the project have been sold with the exception of four. One of these is being operated by the State of Wyoming as a demonstration farm under a memorandum of agreement. The sale of the other three tracts of land has been deferred because of irrigation water shortage. The Eden Valley Project Office has been closed. A soil conservation district has been organized and staffed to furnish technical assistance in soil and water conservation to the project settlers. Sufficient funds are available from prior-year appropriations to provide a reserve in case of need to protect the investment of the Government in the unsold tracts until they are disposed of and no new appropriations will be required.

Agricultural economics research in the Department is administered by the Economic Research Service. The results of the research program are relied upon by producers, dealers, importers and exporters in planning the most profitable adjustments in their operations, by Government agencies in formulating and administering agricultural programs, and by Congress in considering agricultural legislation.

1. *Farm economics.*—This is a nationwide program of research dealing with the economic problems of agricultural production designed to analyze current and prospective changes and to indicate how farmers might adjust. The scope of the program includes such studies as: the economics of farm management; adjustments on farms to meet shifts in demands, conservation needs, and changing technologies; the problems of farm size, low incomes, and

depressed rural areas; capital and financing requirements of farm enterprises; the economic problems of land and water use; the appraisal of resource development potentials; and the appraisal of alternative agricultural production policies and programs.

The 1963 increase would provide for an expansion of studies in the economics of rural development, land and water use, farm size, and the prospective number of farms under alternative conditions.

2. *Marketing economics.*—This activity covers all the economic aspects of marketing farm products and includes such studies as the nature of farmers' bargaining power; potentials for new products and new uses; market structure, costs and margins; the economic effects of school lunch, special milk, food stamp, and direct food distribution programs.

3. *Domestic and foreign economic analysis.*—Domestic economic analysis is concerned with identifying, measuring and analyzing: (1) the factors affecting demand, supply, and price of agricultural commodities; (2) relationships between the agricultural sector and the national economy; (3) farm income and the income of the farm population; (4) demand and consumption of farm products; (5) long-term projections of economic growth and farm products demand; (6) farm population, manpower and levels of living; and (7) historical developments in the policies, programs, and organization of the Department.

Foreign economic analysis includes trade studies and the investigation of supply-demand relations. The trade and market studies focus on market development and the effect of economic development on agriculture. Supply and demand relations are being explored in more than 100 foreign countries, where the research is centered on the forces affecting supply, demand, and trade in farm products, and their impact on U.S. agricultural exports.

The 1963 increase would strengthen domestic economic analysis on farm population and income. It would also strengthen research on the economic development of foreign countries and their impact on demand for U.S. farm products.

Appropriation (adjusted).....		8,758	9,693

¹ Includes capital outlay as follows: 1961, \$176 thousand; 1962, \$170 thousand; 1963, \$170 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1960, \$190 thousand (1961 adjustments -\$10 thousand); 1961, \$312 thousand; 1962, \$312 thousand; 1963, \$312 thousand.

The Service provides statistical data on food and agriculture to assist farmers and handlers in making production and marketing decisions, and to assist legislators and administrators with developing and in administering agricultural programs.

1. *Crop and livestock estimates.*—This service provides the official estimates on agriculture, including acreage, yield, and production of crops, stocks and value of farm commodities, numbers and inventory value of livestock, and prices paid and received by farmers. These data also are basic to computation of parity prices. Data on approximately 150 crop and livestock products are covered in some 700 reports issued each year. The activity is conducted through 43 State offices serving 50 States, most of which are operated as joint State and Federal services. Cooperative arrangements with State agencies provide a considerable volume of additional data which would not be collected or made available from Federal funds. During 1961 cooperating States expended an estimated \$1.4 million of their own funds on these associated State programs. A comparison of activity data for 1960 and

STATISTICAL REPORTING SERVICE—Continued

Current authorizations—Continued

SALARIES AND EXPENSES—Continued

1961, including work performed under cooperative arrangements, is as follows:

	1960 actual	1961 preliminary
Separate mailings of inquiry forms, average per field office.....	348	361
Total questionnaires handled:		
Number distributed.....	9,500,000	9,600,000
Number of returns tabulated.....	2,967,000	3,002,000
Number of objective survey contacts (measurements and interviews).....	39,000	90,300
Number of official reports issued, all offices.....	9,200	9,300
Copies of reports distributed.....	13,500,000	13,400,000
Publications distributed:		
Federal (mainly Agricultural Situation).....	3,067,000	3,185,000
State: Statistical and other.....	328,000	360,000
Special requests for information answered by field offices.....	69,000	69,000

The increase for 1963 would be used to place the long-range program to improve the crop and livestock estimating service in operation in more States.

2. *Statistical research and service.*—This work includes review of all statistical forms, survey plans, and reporting and recordkeeping requirements originating in the Department and needing Bureau of the Budget approval; liaison for coordination of statistics within the Department and with other statistical agencies; development of new and improved statistical methods and techniques, and providing technical consulting services to the Department; conduct of special surveys relating to the marketing of agricultural products; and systems analysis, computer programming, and consultation on automatic data processing. A comparison of activity data for 1960 and 1961 is as follows:

	1960 actual	1961 actual
Statistical forms cleared for review by Budget Bureau.....	662	558
Research projects on crop and livestock estimating methods....	14	12
Research projects involving special surveys.....	15	14

The proposed increase for 1963 would provide for the development of advanced systems and programming techniques for automatic data processing and expanded research on statistical methods and techniques.

The domestic agricultural marketing and distribution functions of the Department are concentrated primarily in the Agricultural Marketing Service. The marketing job is increasing in complexity as the market structure is subjected to near revolutionary changes such as concentration in food retailing, trend toward direct buying, decentralization of processing, growth of interregional competition, and growing trend toward vertical integration and contract farming.

1. *Marketing research.*—This work is directed toward developing practical answers to problems encountered in moving products from the farm to the consumer. In cooperation with public and private agencies and trade groups, efforts are made to develop objective methods to determine quality, reduce losses from waste and spoilage, and improve efficiency in the physical handling of farm products as they move through marketing channels. The work includes research at each stage of marketing, such as assembly points, terminal or central markets, and retail markets.

Contracts for marketing research by pri- vate firms or other non-Federal agenc- ies:			
Number negotiated during year.....	16	11	18
Number in effect, end of year.....	29	24	32

2. *Market news service.*—This service provides current information on supply, movement, and prices at specific markets for practically all agricultural commodities. This day-to-day market information enables American farmers to determine where and when to sell and at what price. The information is collected and disseminated at year-round and seasonal offices maintained in more than 100 cities and towns, often with local and other support and cooperation generally from State departments of agriculture.

The proposed increase for 1963 would be used to strengthen and expand the over-all service by extending coverage of truck movement of fruits and vegetables, strengthening Federal-State relations and production area reporting, strengthening the leased teletype system and reinstating the midwest carlot meat report.

Names on mailing list.....	295,139	273,185	268,445

3. *Inspection, grading, classing, and standardization.*—Nationally uniform standards of quality for agricultural products are established and applied to specific lots of produce to promote confidence between buyers and sellers; reduce hazards in marketing due to misunderstandings and disputes arising from the use of nonstandard descriptions; encourage better preparation of uniform quality products for market; and furnish consumers with more definite information on the quality of products they buy. The standards are applied by or under the supervision of Federal employees at the request of any interested party, and generally for a fee. The mandatory inspection of poultry for wholesomeness is also carried on under this project. Approximately 61% of the total cost of inspection, grading, and classing work was offset by fees and other revenue in 1961, which are shown principally under Agricultural Marketing Service Trust Funds.

STANDARDIZATION ACTIVITIES

Sets of buyers..... number.....	238	238	238

The increase for 1963 would be used for (1) development and maintenance of more precise and objective quality standards for agricultural commodities; (2) strengthening Federal supervision of grain inspection; and (3) inspecting the increasing volume of poultry produced and supervising new and enlarged poultry processing facilities. A supplemental will be proposed to provide for the increasing poultry inspection workload in 1962.

4. *Regulatory activities.*—These include the administration of such laws as packers and stockyards, standard container, United States warehouse, and Federal seed, to assure fair play in the market place and protect producers and handlers of agricultural commodities from financial loss due to careless or fraudulent marketing practices and preserve free and open competition in the marketing of farm products. Assistance is also provided to farmers and others in obtaining and maintaining equitable and reasonable transportation rates and services on farm products and supplies.

The increase for 1963 would be used to provide for more effective administration of the Federal Seed, Packers and Stockyards, and the U.S. Warehouse Acts.

	1961 actual	1962 estimate	1963 estimate
Packers and Stockyards Act:

5. *Administration and coordination of State payments.*—This covers the Federal activity required in administering the marketing service work performed by the States and financed jointly by State and Federal funds provided by the appropriation "Payments to States and possessions." In 1962, this work will be carried on in 40 States with 117 work projects, and this program level is expected to be continued in 1963.

Financing:			
New obligational authority (appropriation).....	1,195	1,325	1,325

Payments are made on a matching fund basis to State marketing agencies for carrying out specifically approved marketing service programs designed to bring about improved marketing. Under this activity, marketing specialists work with farmers, marketing firms, and agencies in solving marketing problems and in putting to use marketing research results.

This program covers such projects as methods of maintaining and improving the quality of products; ways of reducing marketing costs; expanding outlets for surplus products; and the collection and dissemination of special State and local market information and statistics. Through this cooperative approach, the Federal Government's leadership and money are coupled with State resources and experience to aid in the solution of the most urgent local and area marketing problems.

In 1962, 41 States are conducting 118 projects under this program.

AGRICULTURAL MARKETING SERVICE—Con.

SPECIAL MILK PROGRAM

For necessary expenses to carry out the Special Milk Program, as authorized by the Act of August 8, 1961 (75 Stat. 319), \$105,000,000.

Program and Financing (in thousands of dollars)

	1961 actual	1962 estimate	1963 estimate
Program by activities:			
1. Cash payments to States.....			104,200
2. Operating expenses.....			800
Total program costs—obligations.....			105,000
Financing:			
New obligational authority (appropriation).....			105,000

Since its inception in 1955, the Special Milk Program has been financed through advances from Commodity Credit Corporation funds. The Agricultural Act of 1961 changes the financing to a direct appropriation beginning July 1, 1962. This appropriation will provide for continuing the program in 1963 at the same level of \$105 million authorized for 1962.

The program is designed to increase the consumption of fluid milk by children in nonprofit schools of high school grade and under, child-care centers, summer camps and similar nonprofit institutions.

1. *Cash payments to States.*—Funds are advanced to State agencies to reimburse eligible participants for a part of the cost of the fluid milk consumed. An initial reserve is established at the beginning of the fiscal year for each State based on the total amount of reimbursement payments made during the preceding fiscal year adjusted for average growth. In selected needy schools, reimbursement payments may be made for the full cost of the milk for children who are unable to pay.

In 1961 approximately 2.5 billion half pints of fluid milk were consumed by children—more than five times the quantity in 1955, the first year of operation of the program. This represents 2.5% of the total nonfarm consumption of fluid milk in the United States. Efforts are being made in 1962 to bring the benefits of this program to more needy schools and needy children in areas of high economic distress.

Program activities from 1960 through 1963 are as follows:

	1960 actual	1961 preliminary	1962 estimate	1963 estimate
Outlets participating.....	83,922	86,476	87,500	88,500
Half-pints of milk reimbursed (million).....	2,384.7	2,463.4	2,700.0	2,960.2
Average reimbursement rate per half-pint.....	3.37¢	3.42¢	3.52¢	3.52¢

2. *Operating expenses.*—Administrative and technical assistance is furnished to State agencies, participating schools, and child-care institutions. Policies, procedures, and standards are developed for administering the program and determining eligibility. The program is administered directly where the State agency is prohibited by law from disbursing funds to such participants.

¹ Includes capital outlay as follows: 1961, \$18 thousand; 1962, \$12 thousand; 1963, \$12 thousand; excludes downward adjustment of \$90 thousand in prior year costs.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1960, \$9 thousand; 1961, \$25 thousand; 1962, \$25 thousand; 1963, \$25 thousand.

1. *Food assistance*, in the form of both funds and food, is provided to the States and possessions in serving lunches to schoolchildren. Each State's portion of the funds available is determined by a statutory formula which takes into account the number of school-age children in the State and the relationship between the per capita income of the State and the average United States per capita income.

The program is operated under an agreement entered into by the State educational agency and the Department of Agriculture. Schools make application to the State agency and if accepted are reimbursed for a part of the food cost of each meal served.

In 1961 the States contributed to this program \$860 million, most of which came from payments by children. This was far in excess of the statutory matching requirement of \$3 for each Federal dollar of cash payment.

This appropriation is also used to purchase food for distribution to the schools according to their need. Transfers are made to this appropriation from the fund authorized for the removal of surplus agricultural commodities and other foods. Further, commodities acquired under price support and surplus removal programs, and assistance through the special milk program are available to the schools. The volume of surplus commodities distributed to schools, however, depends upon market conditions and the need for the Federal Government to remove surpluses.

The program during the peak month in 1961 provided lunches to over 31% of the approximately 42.2 million schoolchildren in the country. The number of lunches served, meeting nutritional requirements, increased approximately 5.49% over 1960. Participation in the program in December 1960 reached 13.5 million children in 63,960 schools and an appreciable increase is expected in 1962 and 1963.

Emphasis is being directed toward providing special assistance to needy schools. The budget proposes to provide this special assistance through cash payments instead of commodity distribution as authorized in 1962.

During 1961 about \$708 million worth of agricultural commodities were used in the program. About 19% of this amount represented commodities contributed under section 6 of the School Lunch Act and the Federal surplus removal and price support programs. Over 80% of the food used in the program was obtained through local suppliers.

A supplemental estimate for 1963 is anticipated for separate transmittal.

Participation in the program from 1960 through 1963 is as follows:

	1960 actual	1961 preliminary	1962 estimate	1963 estimate
No. of schools (month of peak participation).....	62,990	64,328	64,000	64,200
No. of schoolchildren (peak-thousands).....	12,839	13,453	14,300	15,100
No. of meals served (millions).....	2,153	2,270	2,386	2,520

Financing of the program in the last 3 years was as follows (in millions of dollars):

	1959	1960	1961
State and local contributions (total, including payments by children).....	708.8	775.8	824.7
Federal appropriation (National School Lunch Act):			
(a) Cash payments.....	93.8	93.7	93.7
(b) Commodity distribution.....	42.7	61.1	61.1
Surplus commodity distribution.....	66.8	70.9	71.6

SCHOOL LUNCH PROGRAM

Program and Financing (in thousands of dollars)

	1961 actual	1962 estimate	1963 estimate
Program by activities:			
Food Assistance: Cash payments to States (total program costs—obligations).....			20,000
Financing:			
New obligational authority (proposed supplemental appropriation).....			20,000

Under proposed legislation, 1963.—Legislation has been introduced in both Houses of Congress (H.R. 8962 and S. 2442) to amend the National School Lunch Act.

The principal change proposed would affect the formula for distributing cash payments to the States by introducing the factor of participation. Payments to the States would be based upon the number of complete meals served in the preceding year, with relatively higher per-meal payments to those States with per capita income below the national average. To prevent unnecessary disruptions in the program in those States that would receive a smaller share of the cash funds under the new formula, a one-year transition period has been provided. During the first year, 50% of the available funds would be apportioned to States under the old formula and 50% would be apportioned under the revised formula.

If the pending amendment to the basic law is effective for 1963, but the level of cash assistance available for distribution in 1963 is maintained at \$98.6 million, as in 1962, 28 States would lose funds the first year even though the transitional formula were in effect. The additional \$20 million would, therefore, permit a more orderly shift

to the new formula by minimizing the number of States which would experience any significant loss of funds because of the formula change.

ALLOTMENTS AND ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allotments and allocations from other accounts are included in the schedules of the parent appropriations as follows:

"Commodity Credit Corporation fund,"
"Commodity Credit Corporation, administrative expenses,"
"Agency for International Development," funds appropriated to the President,
"Civil defense and defense mobilization functions of Federal agencies," Office of Emergency Planning.

Unobligated balance carried forward.....	244	108	25
New obligational authority (appropriation).....	693	693	693

¹ Includes capital outlay as follows: 1961, \$4 thousand; 1962, \$4 thousand; 1963, \$4 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1960, \$1 thousand; 1961, \$2 thousand; 1962, \$2 thousand; 1963, \$2 thousand.

License fees are deposited in this special fund and are used to meet costs of administering the Perishable Agricultural Commodities, Produce Agency, and Export Apple and Pear Acts (7 U.S.C. 491–497, 499a–499s, 581–589).

These acts are intended to assure equitable treatment to farmers and others in the marketing of fresh and frozen fruits and vegetables. Commission merchants, dealers, and brokers handling these products in interstate and foreign commerce are licensed. Complaints of violations are investigated and violations dealt with by (a) informal settlements agreeable to both parties, (b) formal decisions involving payments of reparation awards between parties, and (c) suspension or revocation of license and/or publication of the facts. Approximately 25 thousand licenses were in effect on June 30, 1961, and it is expected that licenses will remain at that level through 1963. Complaints are expected to increase slightly in 1963 to more than 2,400. Legislation authorizing an increase in license fees has been proposed. However, unless the pending legislation is enacted in sufficient time to establish increased fees by July 1, 1962, funds available will not be adequate to handle the 1962 level of complaints, settlements, and misbranding investigations.

¹ Includes capital outlay as follows: 1961, \$54 thousand; 1962, \$55 thousand; 1963, \$40 thousand.

² Selected resources as of June 30 are as follows:

	1960	1961 adjustments	1961	1962	1963
Stores.....	9,443	-----	6,528	6,528	6,528
Unpaid undelivered orders.....	22,340	-815	67,100	67,100	67,100
Total selected resources.....	31,783	-815	73,628	73,628	73,628

Under section 32 of the act of August 24, 1935 (7 U.S.C. 612c), an amount equal to 30% of customs receipts during each calendar year (except for an amount equal to 30% of such receipts collected on fishery products transferred to the Department of Interior to encourage the distribution of fishery products), and unused balances up to \$300 million are available for expanding domestic and foreign market outlets for farm commodities. As provided in recent appropriation acts, transfers have been made from this fund to the school lunch program for the purchase and distribution of agricultural commodities and other foods pursuant to section 6 of the National School Lunch Act. Section 32 funds are also authorized for the administration of marketing agreements and orders, and the section 22 import-control programs. The basic legislation provides that funds devoted to any one commodity or product thereof must not exceed 25% of funds available. It also provides that the funds must be devoted principally to perishable agricultural commodities other than those receiving price support under title II of the Agricultural Act of 1949, as amended. It has been determined that this provision can be legally satisfied by reserving the principal portion of section 32 funds for the use of perishable nonbasic agricultural commodities when the occasion arises warranting their use for such purpose.

1. *Commodity program payments are of four types:* (a) Direct purchases are donated to the school lunch program, charitable institutions serving needy persons, and persons certified by welfare agencies as eligible for relief; (b) Diversion payments enable processors to purchase surplus commodities on the domestic market, divert them to by-products and new uses, and sell them at prices comparable to competing products, thus creating new markets for surplus commodities; (c) Export payments, none of which were made in 1961, enable exporters to purchase surplus commodities on the domestic market and sell them on the world market at competitive world prices; (d) Production payments help to reestablish farmers' purchasing power. During the past 2 years assistance under these programs was given to the following commodity groups (in millions of dollars):

Obligations	1960	1961
Dairy products.....	51.2	117.1
Eggs and poultry.....	24.1	37.7
Fruits.....	7.8	1.6
Grains.....	10.8	3.0
Livestock.....	8.0	78.2
Peanut butter.....	2.3	12.6
Vegetables.....	.2	3.2
Miscellaneous.....	.3	.8
Total.....	104.7	254.2

AGRICULTURAL MARKETING SERVICE—Con.

Permanent authorizations—Continued

REMOVAL OF SURPLUS AGRICULTURAL COMMODITIES—Continued

(Indefinite)—Continued

The use of section 32 program funds is contingent upon economic conditions. The estimates for both 1962 and 1963 reflect in total the requirements based on the situation as now foreseen. Distribution of the total in advance would be highly tentative since the type of program to be used is dependent upon a determination at the time of the kind of action which will best meet the particular need which had developed. If troublesome surpluses not now foreseen should develop, steps will be taken to use additional available funds for their removal or diversion as conditions might warrant.

2. *Food stamp program payments* aim to encourage increased domestic use of agricultural food commodities among low-income families through issuance of food coupons which may be used in retail stores for the purchase of commercial-brand foods. Based upon anticipated seasonal increase in the winter and early spring months, a peak of 200,000 needy persons are expected to participate in the pilot areas now in operation. To provide additional experience, the program will be continued on a slightly expanded pilot basis in 1963.

3. *Operating expenses* occur mainly in connection with purchasing, exporting, and diverting surplus commodities and in distributing section 32 and Commodity Credit Corporation commodities to eligible outlets. Distribution in 1961, including those under section 6 of the National School Lunch Act, is summarized below (in millions):

Distribution	Number of recipients (peak month)	Value of commodities distributed	Pounds of commodities distributed
By recipients:			
Schoolchildren.....	15.5	\$132.7	509.9
Needy persons.....	6.4	140.0	855.5
Persons in charitable institutions.....	1.4	34.0	155.4
Foreign countries: 104.....		208.2	2,358.6
Total.....		514.9	3,879.4
By program:			
Section 32.....		174.0	392.0
Donation by Commodity Credit Corporation under section 416.....		279.8	3,262.2
Section 6, National School Lunch Act.....		61.1	225.2
Total.....		514.9	3,879.4

Supervisory assistance is furnished local and State groups to encourage the preservation of surpluses for year-round use. In cooperation with the food trade, press and radio, greater consumption of abundant foods is encouraged. In 1961 the monthly plentiful foods list contained an average of 6 foods, and 7 national and 20 area, State, and local drives were conducted.

4. *Marketing agreements and orders* are put into effect upon request of producers or handlers after hearings and investigations, and approval by producers (and handlers in case of marketing agreements). They help to stabilize prices and benefit producers and consumers by establishing and maintaining orderly marketing conditions. Administration at the local level is financed by assessments upon handlers. On June 30, 1961, there were 80 orders in effect for milk and 43 covering tree fruits, tree nuts, and vegetables. Agreement and order programs pursuant to the Agricultural Act of 1961 are being financed under this project.

FOREIGN AGRICULTURAL SERVICE—Continued

Current authorizations—Continued

SALARIES AND EXPENSES—Continued

The Foreign Agricultural Service administers programs and policies relating to foreign agriculture. It provides information and assistance as guides in the planning of production and marketing of U.S. agricultural commodities and helps smooth the channels through which exports move.

1. *International agricultural affairs.*—The Service directs Department participation in the formulation of trade programs and agreements to stabilize and expand world trade in American agricultural products, and to reduce restrictive tariff and trade practices against import of American agricultural commodities. Recommendations for the departmental positions on trade agreements and international commodity agreements are formulated. Continuous review is made of the trade regulations of signatories to the General Agreement on Tariffs and Trade as these regulations affect the movement of American farm products in international trade. Policies, programs, positions, and standards of participation in public and private international organizations are developed. The Service administers a program of import controls.

2. *Agricultural attachés.*—Agricultural attachés located in 55 countries assist in the development of markets abroad for U.S. agricultural commodities. A comprehensive schedule of foreign agricultural market and trade reporting is maintained to meet the needs of the American agricultural industry.

3. *Market development programs.*—Maintenance and expansion of foreign markets for surplus agricultural products are promoted by (a) analyzing information on foreign market requirements and making such information available to farm and trade groups; (b) developing market programs for use by producers, exporters and Government officials; (c) assisting domestic trade representatives in negotiations with foreign government officials, importers, and consumers and bringing together American exporters and foreign importers under conditions favorable to trade; (d) developing agreements with foreign countries for sales of U.S. agricultural commodities under Public Law 480, and followup on the shipments of those commodities; and (e) directing and financing the operation of market development projects for agricultural products. In 1963, funds provided under market development programs include the dollars required in countries where the only foreign currencies available to the United States are needed, and may be used, to meet the normal requirements of other agencies. Funds for programs in countries where the United States has excess currencies are included in the appropriation Salaries and expenses (special foreign currency program).

SALARIES AND EXPENSES (SPECIAL FOREIGN CURRENCY PROGRAM)

For purchase of foreign currencies which [accrue under title I of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1704),] the Treasury Department determines to be excess to the normal requirements of the United States for the purposes of market development activities under section 104(a) of [that Act, \$3,444,000] the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1704(a)), \$4,000,000, to remain available until expended: *Provided*, That [the dollar value of the unexpended balances, as of June 30, 1960, of allocations of foreign currencies heretofore made available to the Foreign Agricultural Service for the foregoing purposes of section 104(a) is appropriated as of that date and shall be merged with this appropriation: *Provided further*, That funds appropriated herein shall be used to purchase such foreign currencies as the Department determines are needed and can be used most effectively to carry out the purposes of this paragraph, and such foreign currencies shall, pursuant to the provisions of section 104(a), be set aside for sale to the Department before foreign currencies which accrue under said title I are made available for other United States uses.] *this appropriation shall be available, in addition to other appropriations for such purposes, for the purchase of the foregoing currencies.* (Department of Agriculture and Related Agencies Appropriation Act, 1962.)

Note.—Excludes \$5,519 thousand for activities transferred in the 1963 estimates to "Salaries and expenses," Foreign Agricultural Service. The amounts obligated in 1961 and 1962 are shown in the schedule as comparative transfers.

Market development projects.—Foreign currencies generated by the sale of surplus agricultural commodities under title I of the Agricultural Trade Development and Assistance Act of 1954, as amended, as well as foreign currencies acquired by the United States from other sources, are used by the Foreign Agricultural Service to develop new foreign markets and expand existing markets for U.S. agricultural commodities, including cotton, dairy products, fats and oils, grain, feed, livestock and meat, poultry, fruits and vegetables, and tobacco. The type of market development projects being carried out include sales promotion campaigns, trade fairs and exhibits, nutrition demonstrations, and market analyses. In 1963 this appropriation will be limited to dollar funds to purchase only those currencies determined to be excess to the normal requirements of the United States. Dollar funds for use in other countries are included in the appropriation Salaries and expenses.

¹ Includes capital outlay as follows: June 30, 1961, \$7 thousand; 1962, \$3 thousand; 1963, \$3 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1960, \$4 thousand; 1961, \$3 thousand; 1962, \$3 thousand; 1963, \$3 thousand.

The major objectives of the Commodity Exchange Authority are to maintain fair and competitive pricing in the commodity futures markets by preventing manipulation and other abusive trading practices. Enforcement of the Commodity Exchange Act requires supervision over futures trading in 17 commodities on 16 exchanges currently designated as contract markets. Transactions on contract markets were estimated at \$11.5 million in 1961, compared with \$7.5 million in 1960. The value of trading was approximately \$52.3 billion in 1961 compared with \$26.4 billion in 1960, an increase of approximately 98 percent.

1. *Licensing and auditing of brokerage houses.*—This consists of (a) prevention of the misuse of customers' funds by the analysis of financial statements of futures commission merchants and the periodic audits of their books and records; and (b) annual registration of futures commission merchants and floor brokers.

AUDITS AND REGISTRATIONS

	1961 actual	1962 estimate	1963 estimate
Audit of customers' segregated funds.....	513	580	580

New obligational authority (appropriation)	43,598	44,098	44,181

¹ Excludes downward adjustment of prior year costs of \$23,014.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1960, \$14 thousand; 1961, \$54 thousand; 1962, \$54 thousand; 1963, \$54 thousand.

Acreege allotment and marketing quota programs are designed to keep the production and marketing of tobacco, peanuts, wheat, cotton, and rice in line with demand in order to give each farmer a fair share of the available market and the total production needed.

Acreege allotments, when necessary, are established at National, State, and county levels (only at State level in the case of tobacco). In general, the acreege allotted to any county is apportioned by farmer-elected county committeemen. National marketing quotas must be proclaimed whenever the total supply for the designated basic commodities, except corn, reaches a level specified in the Agricultural Adjustment Act of 1938, as amended. However, quotas do not become effective unless approved by at least two-thirds of those voting in a farmer referendum.

Acreege allotments and marketing quotas are in effect for the 1962 crop of wheat and the 1961 crops of tobacco, peanuts, cotton, and rice. It is assumed that acreege allotments and marketing quotas will be in effect on the 1962 crops of all designated basic commodities except corn.

The Agricultural Act of 1961 provides for a mandatory reduction of 10% in individual farm allotments for the 1962 crop of wheat. The act also provides for payments to producers who increase their soil-conserving uses by a definite minimum amount, as determined by the Secretary. In addition to the mandatory 10% reduction, producers may divert an additional 30% of the wheat allotment to soil-conserving uses.

A national acreege allotment of 18.1 million acres has been announced for the 1962 crop of cotton, which compares with 18.4 million acres for the 1961 crop.

Work in the fiscal years 1962 and 1963 will consist primarily of the following:

Job	Tobacco	Peanuts	Wheat	Cotton	Rice
Collecting, reviewing, and compiling basic data and reconstituting farms; reviewing, revising, processing, and recording basic farm data; determining, computing, compiling, and reviewing individual farm allotments; preparing and issuing allotment notices and marketing cards (estimated number of allotment farms).....	577,300	118,053	1,840,929	960,300	16,689

Fiscal year 1963.....	83	496	2,671	1,092	157

¹ Quotas have been approved through the 1962 marketing year.

In addition to the above, activities for which no workload data are readily available include holding meetings to discuss program provisions, schedules of work, instructions, forms, regulations, etc.; visiting farms to obtain additional data or to check production; making special reports on various phases of the programs; assisting farmers with any problems they may have; posting buyers'

reports and records; receiving, depositing, and refunding penalties and transferring penalties to the General Fund of the Treasury; preparing marketing card register showing type of card issued; closing out overplanted farm accounts and rechecking and investigating such accounts where necessary.

SUGAR ACT PROGRAM

For necessary expenses to carry into effect the provisions of the Sugar Act of 1948 (7 U.S.C. 1101-1161), **[\$78,000,000]** \$80,000,000, to remain available until June 30 of the next succeeding fiscal year: *Provided*, That expenditures (including transfers) from this appropriation for other than payments to sugar producers shall not exceed \$2,350,000. (75 Stat. 40-41; Department of Agriculture and Related Agencies Appropriation Act, 1962.)

Program and Financing (in thousands of dollars)

	1961 actual	1962 estimate	1963 estimate
Program by activities:			
1. Payments to sugar producers:			
(a) Continental beet area.....	40,399	41,616	44,247
(b) Continental cane area.....	8,168	10,068	10,718
(c) Offshore cane area.....	23,453	23,966	22,685
2. Operating expenses.....	2,480	2,350	2,350
Total program costs—obligations.....	74,500	78,000	80,000
Financing:			
New obligational authority (appropriation)....	74,500	78,000	80,000

Total U.S. requirements and quotas are determined to provide consumers with adequate supplies of sugar at reasonable prices, to protect the domestic sugar industry, and to promote the export trade of the United States. The quota for each domestic area is allotted to individual sellers when necessary to achieve orderly marketing, and restrictive farm acreege allotments are established for producers when necessary to avoid surpluses.

Continuation of the sugar program is contingent upon enactment of legislation prior to the expiration of the present act of June 30, 1962. A legislative recommendation will be submitted to the Congress early in 1962. The estimate of \$80 million is related to the terms of the present law. In the event new legislation varies materially from the present act with respect to the bases for payments to producers, or if later production estimates confirm current forecasts, consideration may need to be given to a budget amendment or supplemental estimate for 1963.

1. *Payments to sugar producers.*—Payments are made (a) to domestic producers of cane and beets who meet specified conditions of employment, production and price; and (b) for abandonment of planted acreege and crop deficiencies on harvested acreege due to natural calamities.

[COMMODITY STABILIZATION SERVICE]—Con.

AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE—Continued

SUGAR ACT PROGRAM—Continued

The increase of \$2 million as proposed for 1963 is due to increased conditional payments to sugar producers.

Estimated production by areas is shown in the following table:

THOUSANDS OF SHORT TONS, RAW VALUE

Area	1960 crop year	1961 crop year	1962 crop year
Continental beet area.....	2,474	2,525	2,800
Continental cane area.....	630	766	900
Hawaii.....	936	1,090	1,200
Puerto Rico.....	1,110	1,150	1,200
Virgin Islands.....	7	17	15
Total.....	5,157	5,548	6,115

2. *Operating expenses.*—This consists of the expenses of (a) the agricultural stabilization and conservation State and county offices in establishing farm production controls, determining compliance, and making payments to producers; and (b) the Service's departmental work in determining sugar consumption requirements, establishing quotas and allotments, making fair wage and price determinations, establishing area production controls, and formulating overall policies and procedures.

The program is designed to encourage conservation by sharing with farmers and ranchers the cost of carrying out approved soil-building and soil- and water-conserving practices, including related wildlife-conserving practices, which farmers generally would not perform to the needed extent with their own resources. The rate of cost-sharing which may be given in the form of conservation materials and services or a payment after completion of the practice, averages approximately 50% of the cost.

Conservation measures for which cost-sharing is offered include those which are primarily for (1) establishment of permanent protective cover, (2) improvement and protection of established vegetative cover, (3) conservation and disposal of water, (4) establishment of temporary vegetative cover, (5) temporary protection of soil from wind and water erosion, and (6) benefits to wildlife.

Under the 1960 program, new or additional practices were established on 1,029,279 farms and ranches. The acreage on these farms consisted of 32% of the cropland and 32% of all farmland in the United States. The following practices, along with others, were installed under the 1960 program:

	[In thousands]		
Dams and reservoirs.....		structures.....	52
Standard terraces.....		acres.....	703
Diversion and spreader terraces.....		miles.....	4
Permanent sod waterways.....		acres.....	43
Stripcropping.....		acres.....	455
Leveling land to conserve irrigation water and control erosion.....		acres.....	317
Drainage.....		acres.....	1,658
Tree planting.....		acres.....	358
Timber stand improvement.....		acres.....	256
Liming materials applied for soil conserving crops.....		tons.....	16,249
All vegetative cover.....		acres.....	11,478
Control of competitive shrubs on range or pasture.....		acres.....	1,921

Funds are distributed among the States on the basis of conservation needs. They are, in turn, distributed by the agricultural stabilization and conservation State committees to counties, and the agricultural stabilization and conservation county committees make commitments of conservation practice cost-sharing to eligible farmers and ranchers.

Loans from Commodity Credit Corporation are used to make advance payments to vendors for conservation materials and services furnished to farmers and ranchers

prior to the time funds are appropriated each year. Repayment is made from balances of prior appropriations or from new funds appropriated.

The status of the loan account is:

AMOUNTS REPAID OR ESTIMATED TO BE REPAID ON COMMODITY CREDIT CORPORATION LOANS

	[In thousands of dollars]			
	1961 actual	1962 estimate	1963 estimate	Total
Balance of 1960 loan.....	29,200			29,200
1961 loan.....	12,000	30,200		42,200

Total.....	41,200	35,700	36,700	113,600
Interest.....	(301)	(197)	(200)	(698)

A level of \$150 million for the 1963 program is proposed, a reduction of \$100 million below the 1962 program. Emphasis under such a reduced program would be on conservation practices with enduring benefits. Payments for the 1963 program will be made from the 1964 appropriation.

[EMERGENCY CONSERVATION MEASURES]

For an additional amount for "Emergency conservation measures" to be used for the same purposes and subject to the same conditions as funds appropriated under this head in the Third Supplemental Appropriation Act, 1957, and the Supplemental Appropriation Act, 1958, including necessary administrative expenses, \$5,000,000, to remain available until expended. (Supplemental Appropriation Act, 1962.)

Program and Financing (in thousands of dollars)

Program by activities:			
Emergency cost-sharing assistance to farmers (total program costs—obligations) (object class 41).....	4,703	16,738	-----
Financing:			
Unobligated balance brought forward.....	-15,330	-11,738	-----
Recovery of prior year obligations.....	-1,111	-----	-----
Unobligated balance carried forward.....	11,738	-----	-----
New obligational authority (appropriation)	-----	5,000	-----

¹ Excludes downward adjustment of prior year costs of \$1,111.

Cost-sharing assistance (up to 80% of the cost of carrying out approved practices) is offered to assist and encourage farmers to rehabilitate farmlands damaged by natural disasters.

Legislation provides that assistance will be made available only when, as a result of wind erosion, floods, hurricanes, or other natural disasters, new conservation problems are created which (1) if not treated, will impair or endanger the land, (2) materially affect the productive capacity of the land, (3) represent damage which is unusual in character and, except for wind erosion, is not the type which would recur frequently in the same area, and (4) will be so costly to rehabilitate that Federal assistance is

or will be required to return the land to productive agricultural use.

Funds for emergency cost-sharing assistance are distributed among States on the basis of needs for restoration of damaged lands.

CONSERVATION RESERVE PROGRAM

For necessary expenses to carry out a conservation reserve program as authorized by subtitles B and C of the Soil Bank Act (7 U.S.C. 1831-1837, 1802-1814, and 1816), and to carry out liquidation activities for the acreage reserve program, to remain available until expended, \$312,000,000 \$323,000,000, with which may be merged the unexpended balances of funds heretofore appropriated for soil bank programs: *Provided*, That not to exceed \$12,500,000 \$10,304,000 shall be available for administrative expenses, of which not less than \$10,625,000 \$8,000,000 may be transferred to the appropriation account "Local administration, section 388, Agricultural Adjustment Act of 1938": *Provided further*, That no part of these funds shall be paid on any contract which is illegal under the law due to the division of lands for the purpose of evading limits on annual payments to participants. (75 Stat. 129; Department of Agriculture and Related Agencies Appropriation Act, 1962.)

Advances.....	159	45	12	12
Total selected resources	273	107	47	47

This program, initiated in 1956, has as its objectives (1) the adjustment of total crop acreage more nearly in line with demand by withdrawing cropland from production, and (2) establishment and maintenance of sound conservation practices on the land withdrawn. The Secretary was authorized, through calendar year 1960, to enter into 3- to 15-year contracts with producers. In return for removing designated cropland from production and for establishing necessary conservation practices, the producer receives an annual rental payment each year of the contract period, and cost-sharing assistance for the establishment of the required practices. Total annual rental payments to a producer are limited to \$5 thousand.

Participation in the program is summarized below:

Number of contracts, 1961 program.....	301,543
Number of acres, 1961 program.....	28,389,695
Payments made in program year 1960, estimated.....	\$369,954,000

SPECIAL AGRICULTURAL CONSERVATION [PROGRAM] AND ADJUSTMENT PROGRAMS

For necessary administrative expenses to carry into effect a special agricultural conservation program pursuant to section 16[(c)](d) of the Soil Conservation and Domestic Allotment Act, as added by section [2] 132 of the Act of [March 22] August 8, 1961, (75 Stat. 302), and a special wheat program pursuant to section 124 of such Act, \$18,500,000. (75 Stat. 6-7, 296-303; Department of Agriculture and Related Agencies Appropriation Act, 1962.)

Program and Financing (in thousands of dollars)

	1961 actual	1962 estimate	1963 estimate
Program by activities:			
Administration of feed grain and wheat programs (total program costs—obligations).....		17,500	18,500
Financing:			
Unobligated balance lapsing.....		1,000	
New obligational authority (appropriation).....		18,500	18,500

The chief objectives of the special agricultural conservation and adjustment programs, authorized by the Agricultural Act of 1961, are to: (1) increase farm income, (2) prevent further buildup of surplus stocks and, if possible, to reduce such stocks, and (3) reduce program costs of price-support activities.

Participation in the feed grain program is voluntary but it is a condition of eligibility for price support. To participate in the program, a producer must divert a minimum of 20% of the farm's base acreage of corn, grain sorghums, or barley and may divert an additional 20%. The acreage diverted must be devoted to soil-conserving uses. For diverting 20% of the base acreage, payments will be made on half the normal yield, at the county support price, in cash or through the issuance of negotiable certificates for C.C.C. feed grains which may be marketed subsequently by C.C.C. on behalf of the producer. For an additional 20% diversion, payment will be the county support price on 60% of the normal yield, payable in feed grains only.

The special program for wheat calls for a mandatory reduction of 10% in all farm acreage allotments and provides for a voluntary reduction of an additional 30%. Price support will be available to producers in the commercial wheat-producing area who comply with their acreage allotments and increase their soil-conserving uses by a definite minimum amount as determined by the Secretary. For the mandatory minimum, payments, in cash or in wheat, will be made at the rate of 45% of the adjusted basic county support rate, multiplied by the number of diverted acres and by the farm productivity index. Payments on the additional diverted acreage will be made on the same basis, but at a rate of 60% of the adjusted basic county support rate.

Fifty percent of any payment to a participant may be made in advance of determining performance. Payments to participants are made from funds of the Commodity Credit Corporation. The expenses of administering the programs are financed from this appropriation and by advances from the Corporation. These advances are as follows: 1961, \$26,140 thousand, and 1962, \$28,845 thousand.

[FOREIGN ASSISTANCE] SPECIAL EXPORT PROGRAMS

A number of statutes provide for the facilities of the Commodity Credit Corporation to be used in carrying out programs for the exportation of surplus agricultural commodities thereunder and authorize appropriations to reimburse the Corporation for costs incurred in connection with such programs.

Prior to 1962, the Corporation has been reimbursed for the costs of these activities by direct appropriations subsequent to incurrence of the costs. Beginning in 1962, the Congress appropriated funds for these activities on a "pay-as-you-go" basis, appropriating funds for estimated costs for 1962. Advances will be made to the Corporation each month for estimated costs incurred. Subsequent requests will include funds for each ensuing year on the same basis as for other programs of the Department.

Although the appropriations are made in a specified amount for these programs, the Congress has recognized the fact that the appropriation is not fully controlling since authority under basic law permits the Department

**[FOREIGN ASSISTANCE] SPECIAL EXPORT
PROGRAMS—Continued**

to enter into agreements and commit the Government to expenditures which must be financed from subsequent appropriations. If the amounts appropriated prove to be inadequate, the Commodity Credit Corporation will still finance authorized costs which may be in excess of the appropriations provided and subsequent appropriations would include such additional amounts used. On the other hand, any unused amounts from the 1962 appropriations, which remain available until expended, would be applied to 1963 expenses and would be used to reduce the subsequent appropriation requests for these programs.

Activities are currently being carried out under these programs pursuant to the following specific authorizations:

Public Law 480:

Sale of surplus agricultural commodities for foreign currencies (title I)

Commodities disposed of for emergency famine relief to friendly peoples (title II)

Long-term supply contracts (title IV)

International Wheat Agreement Act

Bartered materials for supplemental stockpile (Agricultural Act of 1956, title II)

PUBLIC LAW 480

For expenses during fiscal year [1962] 1963, not otherwise recoverable, and unrecovered prior years' costs, including interest thereon, under the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1701-1709, 1721-1724, 1731-1736), to remain available until expended, as follows: (1) Sale of surplus agricultural commodities for foreign currencies pursuant to title I of said Act, [\$1,250,451,000] \$1,293,000,000; (2) commodities disposed of for emergency famine relief to friendly peoples pursuant to title II of said Act, [\$140,868,000] \$364,000,000; and (3) long-term supply contracts pursuant to title IV of said Act, [\$13,000,000] \$90,000,000: *Provided, That \$276,368,000 of this appropriation, representing estimated unrecovered costs incurred under Titles I and II of such Act prior to the fiscal year 1963, shall be available for the fiscal year 1962. (75 Stat. 306-307; Department of Agriculture and Related Agencies Appropriation Act, 1962.)*

1. *Sale of surplus agricultural commodities for foreign currencies.*—Under the Agricultural Trade Development and Assistance Act, as amended (7 U.S.C. 1701-1709), surplus agricultural commodities are sold for foreign currencies. These currencies may then be used within certain limitations by the United States Government for

agricultural market development, purchase of strategic materials, military equipment, facilities and services for the common defense, payment of U.S. obligations, military housing, and other specified purposes.

If regular appropriations are available for any unrestricted purpose for which foreign currencies are used, the agency must buy the currency for dollars which are credited to the Commodity Credit Corporation. Beginning with 1961, special appropriations have been made for uses of foreign currencies in excess of amounts needed for regular operations or where use of currencies is restricted by international agreement or understanding. As these currencies are used, the Corporation will receive reimbursement therefor from these appropriations.

The Department of Defense directly reimburses the Corporation for foreign currencies used for military family housing from quarters allowances and net rental receipts from such housing. Section 509 of Public Law 86-500, approved June 8, 1960 (74 Stat. 186), provides that at least 75% of the total cost of any family housing project or community facility thereafter constructed or acquired in any foreign country (with certain specific exceptions) by any military department shall be paid for from foreign currencies acquired by the Corporation under title I.

Through June 30, 1961, a total of 246 agreements had been signed with 39 countries for commodities representing an export market value of \$6,534.4 million including ocean transportation of \$722.8 million. The major commodities included were wheat, cotton, and fats and oils which together amounted to 72% of the total value of the agreements. Through that date commodities with an export market value of about \$4,562.7 million had been shipped. The total dollar equivalent of foreign currencies deposited in the Treasury through June 30, 1961, amounted to \$4,790.7 million.

Appropriations are authorized to reimburse the Corporation for its net costs in carrying out this program. Through December 31, 1961, a total of \$11.25 billion was so authorized.

Public Law 87-128, approved August 8, 1961, provides a limitation of \$4.5 billion for a 3-year period January 1, 1962, through December 31, 1964, and a proviso limiting to \$2.5 billion that amount that may be appropriated in any calendar year to reimburse the Commodity Credit Corporation.

The following reflects the composition of the appropriations for fiscal years 1961, 1962, and 1963. Activity through fiscal year 1961 is included under Commodity Credit Corporation.

2. *Commodities disposed of for emergency famine relief to friendly peoples.*—Under title II of the Agricultural Trade Development and Assistance Act of 1954, Public Law 480, as amended (7 U.S.C. 1703, 1721–1724), the Commodity Credit Corporation makes its surplus stocks of agricultural commodities available to the President for famine relief and other assistance to friendly nations and friendly peoples in meeting famine or other relief requirements and to pay ocean freight charges for the shipment of donated commodities.

Public Law 86–472, enacted May 14, 1960, authorized payment of transportation to point of entry of landlocked countries and general average contributions arising out of ocean transport of commodities transferred under title II. Public Law 87–92, approved July 20, 1961, continued the authority of the President under section 202, title II, to utilize surplus agricultural commodities to assist needy peoples and to promote economic development in underdeveloped areas of the world.

Appropriations are authorized to reimburse the Corporation for its costs in carrying out the program. Through December 31, 1959, a total of \$800 million was authorized. From January 1, 1960, \$300 million per calendar year is authorized through December 31, 1961, plus unused balances of the previous authorization, making a total of \$1.4 billion.

Public Law 87–128, approved August 8, 1961, amended section 203 of title II limiting to \$300 million plus any unused preceding year's authorization, the appropriations to reimburse Commodity Credit Corporation (including Commodity Credit Corporation's investment in commodities made available) which can be made in any calendar year beginning January 1, 1961, and ending December 31, 1964, and extending to December 31, 1964, the programs of assistance which may be undertaken under this title.

The following reflects the composition of the appropriations for 1961, 1962, and 1963. Activity through fiscal year 1961 is included in Commodity Credit Corporation.

(In thousands of dollars)			
	1961	1962	1963

Total new obligational authority.....		86,331	81,218

The International Wheat Agreement Act, as amended (7 U.S.C. 1641-1642), which was renewed for a period of 3 years effective August 1, 1959, operates to provide an assured market for wheat to exporting countries at stable and equitable prices. The maximum and minimum prices in the 1959 agreement are \$1.90 and \$1.50 per bushel, respectively, for the basic grade of wheat, No. 1, Manitoba Northern, at Fort William/Port Arthur, Canada, in terms of Canadian currency at the parity for the Canadian dollar determined for the purposes of the International Monetary Fund as at March 1949. The agreement total quantity represents about 36% of world trade in wheat, yet the nine exporting member countries export inside and outside the Agreement about 90% of all wheat moving in world trade.

The Commodity Credit Corporation makes available wheat or wheat flour to carry out the provisions of the Agreement, including the payment-in-kind to the exporter for the difference between the prevailing sales price of wheat under the Agreement and the market price. A cash payment for this differential is made for flour.

Legislation is being proposed to extend the agreement beyond the expiration date of July 31, 1962.

The following reflects the composition of the appropriations for 1961, 1962, and 1963. Activity through 1961 is included in Commodity Credit Corporation.

COMMODITY CREDIT CORPORATION

Current authorizations:

[RESTORATION OF CAPITAL IMPAIRMENT] REIMBURSEMENT FOR NET REALIZED LOSSES

To partially [restore the capital impairment of] reimburse the Commodity Credit Corporation [determined by the appraisal of June 30, 1960, pursuant to section 1 of the Act of March 8, 1938, as amended (15 U.S.C. 713a-1), \$1,017,610,000] for net realized losses sustained during the fiscal year ending June 30, 1961, pursuant to the Act of August 17, 1961 (75 Stat. 391), \$2,489,955,000. (Department of Agriculture and Related Agencies Appropriation Act, 1962.)

[REIMBURSEMENT TO COMMODITY CREDIT CORPORATION FOR COSTS OF FOREIGN ASSISTANCE AND OTHER SPECIAL ACTIVITIES]

[To reimburse the Commodity Credit Corporation for authorized unrecovered costs through June 30, 1961 (including interest through date of recovery), as follows: (1) \$88,790,000 under the International Wheat Agreement Act of 1949, as amended (7 U.S.C. 1641-1642); (2) \$255,685,000 for commodities disposed of for emergency famine relief to friendly peoples pursuant to title II of the Act of July 10, 1954, as amended (7 U.S.C. 1703, 1721-1724); (3) \$1,353,000,000 for the sale of surplus agricultural commodities for foreign currencies pursuant to title I of the Act of July 10, 1954, as amended (7 U.S.C. 1701-1709); (4) \$13,000 for grain made available to the Secretary of the Interior to prevent crop damage by migratory waterfowl pursuant to the Act of July 3, 1956 (7 U.S.C. 442-445); (5) \$163,163,000 for strategic and other materials acquired by the Commodity Credit Corporation as a result of barter or exchange of agricultural commodities or products and transferred to the supplemental stockpile pursuant to Public Law 540, Eighty-fourth Congress (7 U.S.C. 1856); (6) \$1,264,000 for transfers to the appropriation "Marketing research and service" pursuant to the Act of August 31, 1951 (7 U.S.C. 414a), for grading tobacco and classing cotton without charge to

producers, as authorized by law (7 U.S.C. 473a, 511d): *Provided*, That the appropriations provided in this paragraph shall be immediately available: *Provided further*, That the unexpended balances of funds heretofore provided for the various purposes under this head may remain available until expended for the purposes for which appropriated and may be merged with the funds provided in this paragraph. (Department of Agriculture and Related Agencies Appropriation Act, 1962.)

REIMBURSEMENT TO COMMODITY CREDIT CORPORATION FOR COSTS OF SPECIAL MILK PROGRAM

To reimburse the Commodity Credit Corporation for amounts advanced for the fiscal year beginning July 1, [1960] 1961, for the special milk program for children pursuant to the Act of July 1, 1958, as amended ([72 Stat. 276; 74 Stat. 84-85), \$90,000,000] 7 U.S.C. 1446; 75 Stat. 147-148, 319), \$105,000,000, to be available for the fiscal year 1962. (Department of Agriculture and Related Agencies Appropriation Act, 1962.)

Permanent authorizations:

REIMBURSEMENT TO COMMODITY CREDIT CORPORATION, NATIONAL WOOL ACT

Public enterprise funds:

Note.—Expenditures from the following fund for 1962 are subject to the first paragraph of title III of the Department of Agriculture and Related Agencies Appropriation Act, 1962. For 1963 this paragraph is shown in the Department of Agriculture chapter, p. 138, preceding Federal Crop Insurance Corporation fund.

Note.—In addition to obligations other than liabilities the Corporation does not reflect in its accounts claims by the Corporation on which adequate proof has not been established.

² Statutory obligations against borrowing authority include only borrowings from Treasury and obligations to purchase notes or other obligations evidencing loans held by banks. Other obligations, contingent liabilities, and commitments do not become charges against the statutory borrowing authority until they result in borrowings from Treasury or in notes or other obligations evidencing loans held by banks.

Under its corporate charter (15 U.S.C. 714-714p), and in accordance with specific statutes where applicable, the Commodity Credit Corporation engages in buying, selling, lending, and other activities with respect to agricultural commodities, their products, food, feeds, and fibers, for the purpose of stabilizing, supporting, and protecting farm income and prices; assisting in the maintenance of balanced and adequate supplies of such commodities; and facilitating their orderly distribution. The Corporation also makes available materials and facilities required in connection with the production and marketing of such commodities.

The Corporation has an authorized capital stock of \$100 million held by the United States and authority to borrow up to \$14.5 billion.

Programs.—The budget is based on the following types of programs: (1) price support, (2) commodity export, (3) storage facilities, (4) supply and foreign purchase, (5) special agricultural conservation program for feed grains, (6) wheat stabilization program, (7) special milk program, and (8) special activities.

Obligations and expenditures for these programs include primarily loans, purchases, purchase agreements, carrying charges, incentive and other payments, operating and interest expenses, and advances and current obligations incident to special activities as authorized by specific legislation.

Budget assumptions.—The following general assumptions form the basis for the Corporation's 1962 and 1963 budget estimates: (a) Employment, production, and national income will rise moderately both in 1962 and 1963 from the present level; (b) on the average, the general level of prices will be the same as or increase slightly over the present level; (c) developments in international relations will not be such as to affect Government civilian programs generally; (d) exports of agricultural commodities in the fiscal year 1962 will be at about the fiscal 1961 level with some increase in 1963; (e) yields will show a decrease for corn, grain sorghums, dry edible beans, and soybeans and a moderate increase for other commodities (1962 crop); and (f) acreage allotments and marketing quotas will be in effect for the 1962 crops of peanuts, rice, wheat, cotton, and certain kinds of tobacco. Compliance with provisions of the Agricultural Act of 1961, the provisions of the 1961 and 1962 special agricultural conservation program for feed grains and the 1962 wheat stabilization program should result in substantial acreage reductions in those commodities. The estimates for the feed grain and wheat stabilization programs assume diverted acreage based on probable signups by cooperators. However, the full impact of these programs cannot be accurately predicted until the final returns of actual participation are received for these crops.

In considering these estimates, it should be recognized that it is difficult to estimate requirements for the year ending June 30, 1963. They are dependent upon weather conditions and all other factors affecting volume of production of crops not yet planted in this country and abroad, economic conditions generally, food needs in this country and abroad, availability of dollar exchange, and other complex and unpredictable factors.

PRICE SUPPORT, SUPPLY, AND RELATED PROGRAMS AND SPECIAL MILK

1. *Price-support program.*—Price-support operations are carried out under the Corporation's charter powers (15 U.S.C. 714) and in conformity with the Agricultural Act of 1949, as amended (7 U.S.C. 1421), and section 125 of

the Agricultural Act of 1956 (7 U.S.C. 1813), and other applicable legislation. Under the Agricultural Act of 1949, as amended, price support is mandatory for the basic commodities—corn, cotton, wheat, rice, peanuts, and tobacco—and specific nonbasic commodities; namely, tung nuts, honey, milk, butterfat, and the products of milk and butterfat, barley, oats, rye, and grain sorghums. Price support for wool and mohair is mandatory under the National Wool Act of 1954, as amended (7 U.S.C. 1781-1787), through the marketing year ending March 31, 1966. Price support for other nonbasic agricultural commodities is discretionary except that whenever the price of either cottonseed or soybeans is supported, the price of the other must be supported at such level as the Secretary determines will cause them to compete on equal terms on the market. This program may also include operations to remove and dispose of or aid in the removal or disposition of surplus agricultural commodities for the purpose of stabilizing prices at levels not in excess of permissible price-support levels.

Price support is made available through loans, purchase agreements, purchases, and other operations, and, in the case of wool and mohair, through incentive payments based on marketings. Producers' commodities serve as collateral for price-support loans. With limited exceptions, price-support loans are nonrecourse and the Corporation looks only to the pledged or mortgaged collateral for satisfaction of the loan. Purchase agreements generally are available during the same period that loans are available. By signing a purchase agreement, a producer receives an option to sell to the Corporation any quantity of the commodity he may elect within the maximum specified in the agreement. Direct purchases are made from producers and processors depending on the commodities involved. Under section 308 of the Agricultural Trade Development and Assistance Act of 1954, as amended, purchases of animal fats and edible oils and products thereof are authorized as will tend to maintain the support level for cottonseed and soybeans without requiring the acquisition of such commodities under the price-support program. The incentive payment program on wool and mohair is described under Special activities.

In all its price-support operations, the Corporation utilizes normal trade facilities to the maximum extent practicable. In its lending activities the Corporation uses local banks, cooperatives, and other financial institutions. Commercial storage facilities are used to a great extent in the storage of loan collateral and of stocks acquired by the Corporation.

Disposition of commodities acquired by the Corporation in its price-support operations is made in compliance with sections 202, 407, and 416 of the Agricultural Act of 1949, as amended, and other applicable legislation, particularly the Agricultural Trade Development and Assistance Act of 1954, Public Law 480, 83d Congress, as amended (7 U.S.C. 1691), title I of the Agricultural Act of 1954, as amended, title II of the Agricultural Act of 1956, as amended, the Agricultural Act of 1961, the act of August 19, 1958, in the case of cornmeal and wheat flour and Public Law 86-299 (7 U.S.C. 1427 note) along with Public Law 87-127, with respect to sale of livestock feed in emergency areas. The Agricultural Act of 1961 extends the provisions of section 202 of the Agricultural Act of 1949 with respect to furnishing dairy products to the armed services and veterans' facilities to December 31, 1964.

To the extent that price-support commodities are disposed of through the commodity export program, redemption of payment-in-kind certificates, and special activities

COMMODITY CREDIT CORPORATION—Continued

2. *Commodity export program.*—The Corporation promotes the export of agricultural commodities and products through sales, barter, payments, and other operations. Other than in barter for stockpiling purposes, such commodities and products may be those held in private trade channels as well as those acquired by the Corporation in its price-support operations. This program is carried out under the authority contained in the Corporation's charter, particularly sections 5(d) and 5(l), and in accordance with specific statutes where applicable, such as sections 407 and 416 of the Agricultural Act of 1949, as amended, the International Wheat Agreement Act of 1949, as amended (7 U.S.C. 1641), the Agricultural Trade Development and Assistance Act of 1954, as amended, title I of the Agricultural Act of 1954, title II of the Agricultural Act of 1956, as amended, and section 9 of the act of September 6, 1958. In general, transactions involving foreign currencies are conducted pursuant to the Agricultural Trade Development and Assistance Act of 1954, as amended. However, other such transactions may be conducted under the charter authority.

To the extent that appropriations are not provided under Special export programs, obligations under the International Wheat Agreement, and titles I, II, and IV of the Agricultural Trade Development and Assistance Act of 1954, as amended, are paid by the Corporation subject to reimbursement from appropriations authorized for such purpose. These programs are further described under Special activities and Special export programs. The International Wheat Agreement will expire on July 31, 1962. Legislation will be proposed to extend the agreement.

In addition to the exports under the International Wheat Agreement, Corporation-owned wheat is available for export under barter programs of the Corporation at competitive world prices and under the Corporation's export credit sales program. It is also made available to exporters in payment of the price differential between the prevailing world export sales price and the domestic market price which is earned on exports of free-market wheat outside the International Wheat Agreement and under this agreement. Cash payments are made on all exports of wheat flour either under the International

Wheat Agreement or outside the agreement. Wheat and flour payments outside the agreement are made on exports to countries not participating in the agreement.

In order to encourage movement of cotton, corn, barley, grain sorghums, oats, rye, and rice from free-market supplies into export channels, export payments are made in the form of these commodities from the Corporation's stocks. Cotton held in the Corporation's inventory is also sold for unrestricted use on a competitive price basis.

The Corporation conducts a cotton products export program designed to protect the competitive position of the domestic cotton industry in relation to sales of cotton products manufactured abroad from American cotton purchased at export prices. Equalization payments, based on the raw cotton content in the products exported, are made to exporters on cotton products of upland cotton grown and wholly processed in the United States.

The Corporation also purchases wheat and other products from processors or processes its own stocks of such commodities for foreign and domestic distribution. In certain cases, payments for such products or processing costs are made in payment-in-kind export certificates.

Also, the Corporation furnishes agricultural commodities and products for distribution or exhibition at international trade fairs to aid in the development of foreign markets for such commodities.

3. *Storage facilities program.*—This program is carried out under the authority contained in the Corporation's charter, particularly sections 4(h), 4(m), and 5(a) and (b). The Corporation may (a) purchase and maintain (in storage-deficient areas) granaries and equipment for care and storage of grain owned or controlled by the Corporation; (b) make loans for the construction or expansion of farm-storage facilities; (c) provide storage-use guarantees to encourage the construction of commercial storage facilities; and (d) undertake other operations necessary to provide storage adequate to carry out the Corporation's programs.

4. *Supply and foreign purchase program.*—This program is carried out under the authority contained in the Corporation's charter, particularly sections 5 (b) and (c) thereof. The Corporation procures foods, agricultural commodities, their products, and related materials to supply the requirements of Government agencies, foreign governments, and relief and rehabilitation agencies, and to meet domestic requirements. Foods, agricultural commodities and their products are procured or aid is given in their procurement to facilitate distribution or to meet anticipated requirements during periods of short supply. The Corporation may also, through purchases, loans, sales or other means, make available materials and facilities required in connection with the production and marketing of agricultural commodities.

Operations involving procurement for other Government agencies are conducted in accordance with section 4 of the act of July 16, 1943 (15 U.S.C. 713a-9), which requires that the Corporation be fully reimbursed for services performed, losses sustained, operating costs incurred, or commodities purchased or delivered to or on behalf of any other Government agency from the appropriate funds of such agency. Operations not subject to section 4 of the act may involve losses if such are necessary to the accomplishment of the objectives of the particular operation.

The main activities now carried on are procurement for other Government agencies of specialized commodities not in the Corporation's price-support inventory.

5. *Special agricultural conservation program for feed grains.*—Pursuant to Public Law 87-5, approved March 22, 1961, and Subtitle C of the Agricultural Act of 1961, Public Law 87-128, approved Aug. 8, 1961, the Secretary of Agriculture utilizes Commodity Credit Corporation funds, facilities, and stocks of feed grains in redeeming or marketing certificates issued to producers who divert acreage from the production of 1961 crops of corn and grain sorghums and 1962 crops of corn, grain sorghums, and barley under this program. The Corporation is also authorized to use its capital funds to pay administrative expenses necessary to carry out this program through June 30, 1962. (See Agricultural Stabilization and Conservation Service.)

6. *Wheat stabilization program.*—Under title I, subtitle B, of the Agricultural Act of 1961, Public Law 87-128, approved Aug. 8, 1961, the Commodity Credit Corporation is authorized to utilize its capital funds and other assets for the purpose of making payments to producers who divert acreage from the production of 1962 crop wheat under this program. Payments are made by issuance of Commodity Credit Corporation sight drafts which may be cashed or used for the acquisition of wheat from Commodity Credit Corporation stocks. The Corporation is also authorized to use its capital funds to pay administrative expenses necessary to carry out this program through June 30, 1962. (See Agricultural Stabilization and Conservation Service.)

COMMODITY CREDIT CORPORATION—Continued**Public enterprise funds—Continued****COMMODITY CREDIT CORPORATION FUND—Continued**

7. *Special milk program.*—Public Law 85-478 (7 U.S.C. 1446 note), as amended by Public Law 87-67, approved June 30, 1961, authorized the use of not to exceed \$95 million for 1961 and \$105 million for 1962 of Commodity Credit Corporation funds to increase the consumption of fluid milk by children in nonprofit schools of high school grade and under and in nonprofit institutions devoted to the care and training of children. The act further provides that amounts spent shall not be considered expended for the purpose of carrying out the price-support program. A separate appropriation of \$105 million to reimburse the Corporation for 1962 costs is reflected in the 1963 estimates. The Agricultural Act of 1961 authorizes appropriations for the fiscal year beginning July 1, 1962, and for each of the four fiscal years thereafter to enable the Secretary of Agriculture to carry out this program. (See Agricultural Marketing Service.)

8. *Undistributed expenses.*—There are a number of expenses which are not allocated to a specific program. These include interest on: (a) the capital stock of the Corporation, (b) borrowings from the Treasury, and (c) other obligations evidencing loans made by lending agencies; administrative expenses; and other miscellaneous costs, including expenses of the agricultural stabilization and conservation county committees and Federal Reserve banks in connection with the Corporation's programs.

Administrative expenses are for the operating staff, including the services of employees of the Agricultural Stabilization and Conservation Service engaged in the Corporation's activities, services performed by other agencies of the Department, costs of audit, and payments to the General Services Administration for space in the District of Columbia and rent of field office space. Estimates for 1963 include a limitation of \$48 million for costs of administration including a reserve of not less than 7% for contingencies. The requested authorization excludes administrative expenses in connection with the supply and foreign purchase program, the wool and mohair program under the National Wool Act of 1954, the International Wheat Agreement, and the sale of long-staple cotton transferred from the national stockpile, since it is contemplated that full reimbursement will be received for these expenses. Such reimbursement will be obtained and used in 1963 in the same manner as in previous years.

Expenses in connection with the acquisition, operation, maintenance, improvement, or disposition of property which the Corporation owns or in which it has an interest have been treated as program rather than administrative expenses. Such expenses include inspection, classing and grading work performed on a fee basis by Federal employees or Federal- or State-licensed inspectors and work performed on a contract basis by agricultural stabilization and conservation county committees. Similarly, expenses of other Federal agencies whose services are utilized in the handling of Commodity Credit Corporation property are treated as program expenses. These include the fleet storage operation of the Maritime Administration conducted intermittently since 1949 and the services of the General Services Administration in connection with the strategic, critical, and other materials acquired by the Corporation.

Under the special agricultural conservation programs for feed grains and the wheat stabilization program,

capital funds of the Corporation are authorized to pay administrative expenses of these programs through June 30, 1962.

9. *Special activities.*—These activities are carried out under authority of section 5(g) of the Corporation's charter and specific statutory authorizations or directives with respect thereto which are currently in effect or which may subsequently be enacted. A summary of current activities will be found on p. 136

The Corporation receives reimbursement for costs of these activities as described under each.

Activities currently being carried out are as follows:

(See Special Export Programs for details of items (1)-(5).)

(1) *Sale of surplus agricultural commodities for foreign currencies.*—Under the Agricultural Trade Development and Assistance Act, as amended (7 U.S.C. 1701-1709), surplus agricultural commodities are sold for foreign currencies. These currencies may then be used within certain limitations by the United States Government for agricultural market development, purchase of strategic materials, military equipment facilities and services for the common defense, payment of U.S. obligations, military family housing, and other specified purposes.

(2) *Commodities disposed of for emergency famine relief to friendly peoples.*—The Commodity Credit Corporation, through December 31, 1964, is directed, under title II of Public Law 480, 83d Congress, as amended (7 U.S.C. 1703, 1721-1724), to make its stocks of agricultural commodities available for emergency assistance to friendly peoples in meeting famine or other urgent relief requirements and to pay ocean freight charges for the shipment of donated commodities.

(3) *Long-term supply contracts.*—Under title IV of the Agricultural Trade Development and Assistance Act (7 U.S.C., supp. 1, 1731-1736), the President is authorized to make agreements with friendly nations under which the United States would deliver surplus agricultural commodities over periods of up to 10 years and accept payment in dollars with interest over periods of up to 20 years.

(4) *International Wheat Agreement (7 U.S.C. 1641-1642).*—This agreement, which was renewed for a period of 3 years effective August 1, 1959, operates to provide an assured market for wheat to exporting countries and assured supplies of wheat to importing countries at stable and equitable prices.

(5) *Bartered materials for supplemental stockpile.*—The Commodity Credit Corporation is directed under title II of the Agricultural Act of 1956 (7 U.S.C. 1856) to transfer strategic and other materials acquired as a result of barter and exchange of agricultural commodities, other than those acquired for the national stockpile or for other purposes, to the supplemental stockpile.

(6) *Military housing (barter and exchange).*—During 1957 a contract was completed for the disposition of Commodity Credit Corporation-owned commodities valued at \$50 million for the construction of military housing in France with foreign currencies obtained from this transaction. Proceeds from rental and quarters allowances will be paid by the Department of Defense over a long period of years to reimburse the Corporation pursuant to the act of September 1, 1954 (5 U.S.C. 171z-1).

(7) *National Wool Act.*—Under the provisions of the National Wool Act of 1954, as amended, incentive payments are being used to encourage the annual domestic production of approximately 300 million pounds of shorn wool. Support of prices of wool and mohair is mandatory. Incentive payments are made to eligible producers on a

percentage basis, reflecting the amount required to bring the national average received by all producers up to the announced incentive level. The incentive level shall not exceed 110% of parity. In a referendum conducted in September 1959, wool and lamb producers voted to continue the deduction from their incentive payment of an amount not to exceed 1 cent per pound of wool and 5 cents per hundredweight of unshorn lambs marketed. These funds financed promotional advertising, and related market-development activities by the American Sheep Producers' Council, Inc., under an agreement with the Secretary of Agriculture.

COST OF THE NATIONAL WOOL ACT

[Dollars in thousands]

	Fiscal year 1961 1959 marketing year (actual)	Fiscal year 1962 1960 marketing year (estimate)	Fiscal year 1963 1961 marketing year (estimate)
Volume of marketings:			
Shorn wool, thousand pounds...	242,870	267,000	264,000
Unshorn lambs, thousand cwt...	11,264	10,000	10,100
Incentive payments:			
Per pound, shorn wool			
cents...	18.7	20.0	21.0
Per hundredweight, unshorn lambs.....cents...	75.0	80.0	84.0
Incentive payments:			
Shorn wool.....	\$45,417	\$53,400	\$55,440
Unshorn lambs.....	8,448	8,000	8,484
Promotional and advertising programs ¹	(3,018)	(3,170)	(3,145)
Total payments.....	53,865	61,400	63,924
Administrative expenses.....	2,994	3,300	3,300
Interest expense.....	4,029	2,701	3,100
Prior year adjustment (recov- eries).....	-1	-----	-----
Total.....	60,887	67,401	70,324

¹ Deduction from producer payments.

Total payments made under the National Wool Act cannot at any time exceed an amount equal to 70% of the accumulated totals, as of the same date, of the gross receipts from import duties collected on and after January 1, 1953, on wool and wool manufactures. Actual and estimated payments compared with this limitation are as follows (in thousands of dollars):

	1961 actual	1962 estimate	1963 estimate
70% of customs receipts on wool and wool manufactures cumulative from January 1, 1953, to end of preceding calendar year (estimate).....	433,502	498,502	563,502
Cumulative incentive payments on 2d pre- ceding marketing year (fiscal years)...	264,648	326,048	389,972
Balance of limitation available for payments on succeeding mar- keting years.....	168,854	172,454	173,530

Funds of the Commodity Credit Corporation are used to carry on the wool incentive program. A permanent appropriation is provided to reimburse the Corporation, but the yearly amount is limited to 70% of all duties collected on wool and wool manufactures during the preceding calendar year.

Estimated costs and reimbursements to Commodity Credit Corporation during 1961, 1962, and 1963 are indicated in the following table (in thousands of dollars):

	1961 actual	1962 estimate	1963 estimate
Due at beginning of year.....	126,979	120,676	112,799
Costs for year:			
Program.....	56,858	64,700	67,224
Interest.....	4,029	2,701	3,100
Total.....	60,887	67,401	70,324
Total due.....	187,866	188,077	183,123
Reimbursement to Commodity Credit Cor- poration.....	67,190	75,278	65,000
Due Commodity Credit Corpora- tion at end of year.....	120,676	112,799	118,123
Less balance due Commodity Credit Cor- poration recoverable from subsequent years' customs receipts.....	45,398	47,799	53,123
Appropriation 1962, 1963, and 1964.....	75,278	65,000	65,000

(8) *Grain for migratory waterfowl feed.*—The Commodity Credit Corporation is directed to make available to the Secretary of the Interior (7 U.S.C. 442-445), such grain acquired through price-support operations and certified by the Commodity Credit Corporation to be available for such purposes or in such condition as to be undesirable for human consumption, as the Secretary of the Interior shall requisition. This appropriation item is now included under that Department.

(9) *Surplus grain for game birds.*—The Secretary of the Interior (Public Law 87-152, approved August 17, 1961, (75 Stat. 389)), is authorized to requisition Commodity Credit Corporation grain for feeding starving migratory birds. Activities are estimated at about \$5 thousand for each of the fiscal years 1962 and 1963. The estimates assume that the Department of the Interior will include about \$5 thousand in its budget for fiscal year 1963 to reimburse the Corporation for 1962 costs.

Any State, under Public Law 87-152 cited above, upon the finding of the Secretary of the Interior that resident game birds and other resident wildlife are threatened with starvation, may also requisition grain from Corporation stocks. Activities are estimated at about \$100 thousand for each of the fiscal years 1962 and 1963, based on advice from the Department of the Interior. Appropriations will be requested in subsequent budgets to cover costs incurred.

(10) *Grading and classing activities.*—The Commodity Credit Corporation is authorized to make advances to the Agricultural Marketing Service for classing and grading of agricultural commodities without charge to producers (7 U.S.C. 414a). Such advances used for classing cotton and grading tobacco not placed under price-support loan are financed by appropriations. This appropriation item is now included under the Agricultural Marketing Service.

(11) *Soil bank program.*—Pursuant to section 120 of the Agricultural Act of 1956 (7 U.S.C. 1808) the Secretary of Agriculture utilizes the facilities of the Corporation for making payments to farmers under this program. (See Agricultural Stabilization and Conservation Service.)

(12) *Transfer of long-staple cotton from national stockpile for sale by Commodity Credit Corporation.*—The act of July 10, 1957 (71 Stat. 290), authorizes the transfer of 50 thousand bales of domestically grown extra long-staple cotton from the national stockpile to the Corporation for sale. Proceeds less costs incurred, including administra-

COMMODITY CREDIT CORPORATION—Continued

Public enterprise funds—Continued

COMMODITY CREDIT CORPORATION FUND—Continued

tive expenses, are covered into the Treasury as miscellaneous receipts.

(13) *Loans to Secretary of Agriculture for conservation purposes.*—Under section 391(c) of the Agricultural Adjustment Act of 1938, as amended (7 U.S.C. 1391), the Corporation advances funds to the Secretary in amounts not to exceed \$50 million annually to purchase conservation materials and services. Repayments of the loans plus interest are made as soon as practicable in the succeeding fiscal year from funds appropriated for the agricultural conservation program. (See Agricultural Stabilization and Conservation Service.)

Financing.—The programs of the Commodity Credit Corporation are financed by capital stock, borrowings, guarantees to purchase notes or other obligations evidencing loans made by lending agencies, issuance of certificates of interest in loans held by the Corporation, appropriations to reimburse Commodity Credit Corporation for net realized losses, appropriations to reimburse the Corporation for costs of special activities, advances and reimbursements from Special export program appropriations, and receipts from operations.

Borrowing authority.—The Corporation has an authorized capital stock of \$100 million held by the United States and authority to borrow up to \$14.5 billion.

Funds are borrowed from Treasury and may also be borrowed from private lending agencies. In connection with loan guarantees, the Corporation reserves a sufficient amount of its borrowing authority to purchase at any time all notes and other obligations evidencing loans made by lending agencies or certificates of interest issued in connection with the financing of price-support operations. All bonds, notes, debentures, and similar obligations issued by the Corporation are subject to approval by the Secretary of the Treasury as required by the act of March 8, 1938 (15 U.S.C. 713a-4).

Interest on borrowings from the Treasury (and on capital stock) is paid in accordance with a policy of the Treasury that the rate shall be based upon the average interest rate on all outstanding marketable obligations (of comparable maturity date) of the United States as of the preceding month. Interest is also paid on certificates of interest and lending agency obligations for the period the agencies have their funds invested.

On the basis of the budgetary assumptions heretofore described, the consequent estimated program requirements currently indicate no need for an increase in borrowing authority. Since there are so many uncontrollable factors affecting the programs of the Corporation involving crops which have not even been planted, it must be recognized that estimates of the use of borrowing authority are highly tentative. Should program developments occur which would indicate a need for funds in excess of those contained in these estimates, additional new obligational authority would be requested.

POSITION WITH RESPECT TO BORROWING AUTHORITY AS OF JUNE 30

[In millions of dollars]

Item	1961 actual	1962 estimate	1963 estimate
Statutory borrowing authority.....	14,500	14,500	14,500
Deduct borrowings from Treasury.....	13,396	13,024	13,266
Obligations to purchase loans or certificates held by lending agencies (guaranteed by Commodity Credit Corporation).....	606	1,124	1,045
Total statutory borrowing authority outstanding.....	14,002	14,148	14,311
Net statutory borrowing authority available.....	498	352	189

Note.—This table does not reflect the following charges: accounts payable, accrued liabilities, and obligations outstanding other than obligations to purchase notes and certificates held by banks. These do not become charges against the statutory borrowing authority until they result in borrowings from Treasury or loans or certificates held by banks.

¹ Does not reflect the effect of "Food and Agricultural Program for the 1960's." Borrowing authority available would be \$200 million including these programs, representing \$434 million less obligations and \$423 million less appropriations required or a net increase of \$11 million in availability of borrowing authority.

Reimbursement for net realized losses.—Pursuant to Public Law 87-155 (75 Stat. 391), annual appropriations are authorized for each fiscal year commencing with fiscal year ending June 30, 1961, to reimburse the Commodity Credit Corporation for net realized losses sustained as reflected in its accounts and shown in its report of financial condition as of the close of each fiscal year. This law repealed sections 1 and 2 of the Act of March 8, 1938, as amended (15 U.S.C. 713a-1), which provided for an appraisal by the Secretary of the Treasury of the assets and liabilities of the Corporation and authorized restoration of capital impairment or surplus payments to Treasury based on such appraisal.

An appropriation of \$1,017.6 million was received in fiscal year 1962 to partially restore capital impairment as determined by the appraisal of June 30, 1960. The realized losses reflected in the accounts of the Corporation and in its report of financial condition as of June 30, 1961, were \$3,335.5 million, consisting of realized losses on price support and related programs of \$2,067.0 million and \$1,268.5 million applicable to inventory revaluation as of June 30, 1961, explained below. The estimate for 1963 of \$2,490 million represents realized losses on fiscal year 1961 activity, and the Department proposes to request reimbursement of losses occasioned in the inventory revaluation of June 30, 1961, over a period of three years—\$423 million each in fiscal years 1963 and 1964 and the remainder in fiscal year 1965—in order to minimize the impact of this item on the total Government new obligational authority. The amortization of these losses over a three-year period does not affect the over-all net expenditures of the Government since the expenditures have already been made. The partial reimbursements, however, will result in some additional interest costs to the Corporation.

Inventory revaluation and accounting for carrying charges.—It has been the Corporation's practice for a number of years to treat as additions to the book value of commodity inventories the costs incurred for storage, handling, and transportation of such inventories. After approval

by the General Accounting Office, the Department of the Treasury, the Bureau of the Budget, and applicable congressional committees, the Corporation, in order to report inventory values on a more realistic basis, revalued its inventory as of June 30, 1961, by removing all accumulated storage, handling, and transportation costs incurred subsequent to acquisition of inventories and recording them as current operating expenses. In this connection, resale loan storage costs are similarly handled.

The net realized losses of the Corporation have previously been reimbursed as follows (in thousands of dollars):

PRICE SUPPORT, SUPPLY, AND RELATED PROGRAMS AND SPECIAL MILK	
Realized losses 1933 to 1961, inclusive.....	15,447,916

Note.—In addition to obligations other than liabilities the Corporation does not reflect in its accounts claims by the Corporation on which adequate proof has not been established and the outstanding guarantee and occupancy agreements for storage space.

¹ The changes in these items are reflected on the program and financing schedule.

² Statutory obligations against borrowing authority include only borrowings from Treasury and obligations to purchase notes or other obligations evidencing loans held by banks. Other obligations, contingent liabilities, and commitments do not become charges against the statutory borrowing authority until they result in borrowings from Treasury or in notes or other obligations evidencing loans held by banks.

² The estimated appropriation of \$65,000,000 for 1963 to reimburse the Corporation represents an amount equal to 70% of the preceding calendar year's customs receipts on wool and wool products to which reimbursement is limited in each fiscal year. The amounts due will be reimbursed from subsequent years' customs receipts.

³ Less than \$500.

⁴ Amounts bracketed are contained in "Soil bank program" under Agricultural Stabilization and Conservation Service.

⁵ Total appropriations available amounted to \$1,536,246,137, including reappropriations of \$25,422,228, of which \$20,308 was returned to the Treasury in 1961 and \$9,666 was returned in 1960.

Proposed for separate transmittal:

COMMODITY CREDIT CORPORATION

Under proposed legislation, 1963.—Legislation is being proposed to implement a food and agriculture program for the 1960's for feed grains, wheat, and dairy products. If these proposals are enacted they would result in reductions of \$423 million in new obligational authority and \$434 million in net budgetary expenditures.

LIMITATION ON ADMINISTRATIVE EXPENSES

Nothing in this Act shall be so construed as to prevent the Commodity Credit Corporation from carrying out any activity or any program authorized by law: *Provided*, That not to exceed **[\$47,916,000]** \$48,000,000 shall be available for administrative expenses of the Corporation: *Provided further*, That \$1,000,000 of

this authorization shall be available only to expand and strengthen the sales program of the Corporation pursuant to authority contained in the Corporation's charter: *Provided further*, That not less than 7 per centum of this authorization shall be placed in reserve to be apportioned pursuant to section 3679 of the Revised Statutes, as amended, for use only in such amounts and at such time as may become necessary to carry out program operations: *Provided further*, That all necessary expenses (including legal and special services performed on a contract or fee basis, but not including other personal services) in connection with the acquisition, operation, maintenance, improvement, or disposition of any real or personal property belonging to the Corporation or in which it has an interest, including expenses of collections of pledged collateral, shall be considered as nonadministrative expenses for the purposes hereof. (7 U.S.C. 442-445, 624, 1282, 1301, 1385, 1391c, 1421-1432, 1441-1449, 1691-1697, 1701-1709, 1721-1724, 1731-1736, 1741-1747, 1808, 1813, 1851-1854, 1856-1857, 1859-1860; 15 U.S.C. 712a, 713a-10, 714-714p; 22 U.S.C. 1922; 31 U.S.C. 841, 846-852, 866-868c, 869; 50 U.S.C. Purpose and financial organization.—The Federal Crop Insurance Corporation, a wholly owned Government Corporation, was created on February 16, 1938 (7 U.S.C. 1501-1519), to carry out the provisions of the Federal Crop Insurance Act. The purpose of this act is to promote the national welfare by improving the economic stability of agriculture through a sound system of crop insurance and providing the means for the research and experience helpful in devising and establishing such insurance. The Corporation provides all-risk insurance protection to farmers against loss from unavoidable causes. Since 1948, the crop insurance program has been conducted on a limited basis in selected counties and on selected crops to obtain adequate actuarial data for the expansion of the program to a national basis. Beginning with the 1962 crop year the policy of the Corporation is to expand the program to additional counties and to insure additional commodities at a more rapid rate. The past 13 years experience provides a sound basis for a more rapid expansion than has been made during past years.

Capital stock of \$100 million is authorized to be subscribed by the United States. As of June 30, 1961, the Secretary of the Treasury held receipts for \$40 million of the authorized stock, leaving \$60 million unissued.

Funds from the issuance of capital stock provide working capital for the Corporation. Receipts which

FEDERAL CROP INSURANCE CORPORATION— Continued

Public enterprise funds—Continued

FEDERAL CROP INSURANCE CORPORATION FUND—Continued

are for deposit to this fund come mainly from premiums for insurance protection afforded farmers on their investment in the production of insured crops. The principal payments from this fund are for indemnities to insured farmers who suffer crop losses arising from causes against which crop insurance provides protection, the direct cost of adjusting losses, and part of the operating and administrative expenses. The annual appropriation for the major portion of the operating and administrative expenses of the Corporation is presented earlier in the budget.

Budget program.—The Corporation plans to accelerate the expansion of the program to additional crops and counties. For the 1962 crop year (fiscal year 1963) the crop insurance program will be extended to 100 new counties. The following table indicates the scope of the insurance program planned for 1961, 1962, and 1963. Amounts in the 1961 column are actual and pertain to the 1960 crop year. The 1962 column pertains to the 1961 crop year and reflects the current favorable growing conditions for the 1961 insured crops. Heavy losses have occurred in a few States, however, these will be offset by premiums from States where crop losses will be light. North Dakota, with a loss ratio of 2.58, has had the worst year since 1954, because of drought and grasshoppers. Indemnities shown in the 1963 column are estimated at 90% of the premium.

	1961 fiscal year (1960 crop year) actual	1962 fiscal year (1961 crop year) estimate	1963 fiscal year (1962 crop year) estimate
Number of States.....	38	38	38
Number of counties.....	869	896	1,999
Estimated insurance outstanding (in thousands), beginning of fiscal year.....	\$265,929	\$271,347	\$343,000
Number of crops insured.....	330,448	320,292	370,000
Premiums (in thousands).....	\$17,804	\$18,181	\$24,000
Indemnities (in thousands).....	\$10,347	\$15,690	\$21,600
Loss ratio.....	0.58	0.86	0.90

¹ Includes 3 counties where insurance was offered in local producing areas in 1961. These counties are being counted as separate counties in 1962, but are not new counties.

Financing.—Income from operations for the past 4 years will provide adequate operating funds for 1963, unless unforeseen losses should occur on the 1961 crop between now and the time of harvest. Therefore, no additional capital funds are being requested for program operations. There follows a table of premiums and indemnities for 1957, 1958, 1959, and 1960.

[In thousands of dollars]

	Premiums	Indemnities	Excess of premiums
1957.....	17,407	12,004	5,403
1958.....	17,617	4,505	13,112
1959.....	18,462	14,138	4,324
1960.....	17,804	10,347	7,457
Total.....	71,290	40,994	30,296

Operating results and financial condition.—Preliminary estimates for crop year 1961, fiscal year 1962, indicate a favorable loss ratio for the fifth consecutive year. Premiums of \$18.2 million are estimated to exceed indemnities by \$2.5 million. For the crop years 1948 through 1960, premium income of \$244.3 million exceeded indemnity costs of \$230.5 million by \$13.8 million. Premium income exceeded indemnity costs in 7 years of the 13-year period.

As of June 30, 1961, the Corporation's surplus was \$8 million. The favorable loss experience which occurred

the past four years is responsible for the current favorable financial condition of the Corporation.

The following table summarizes the insurance operations by commodities for 1961, 1962, and 1963.

New obligational authority (authorization to expend from public debt receipts).....	310,000	407,500	480,000

¹ Selected resources as of June 30 are as follows: Undisbursed loan obligations, 1960, \$750,390 thousand; (1961 adjustments, -\$6,424 thousand); 1961, \$869,390 thousand; (1962 adjustments, -\$5,000 thousand); 1962, \$911,390 thousand; 1963, \$1,031,390 thousand.

The Administration conducts two capital investment programs: (a) the rural electrification program to provide electric service to farms and other rural establishments; and (b) the rural telephone program to furnish and improve telephone service in rural areas. Funds for making repayable loans are borrowed from the Secretary of the Treasury.

1. *Rural electrification.*—This capital investment program is financed through loans which bear 2% interest and must be repaid within a period not to exceed 35 years. Loans are also made for shorter periods at 2% interest to electrification borrowers to be reloaned to their consumers for the purpose of financing the wiring of premises and the acquisition and installation of electrical and plumbing appliances and equipment, including machinery.

LOAN AUTHORIZATIONS—Continued

2. *Rural telephone.*—This capital investment program is financed through loans which are made for the purpose of financing the improvement, expansion, construction, acquisition, and operation of the telephone lines and facilities or systems to furnish and improve telephone service in rural areas. The loans bear 2% interest and must be repaid within a period not to exceed 35 years.

In 1950, when the telephone program started, the Census of Agriculture showed 38.2% of all farms with telephone service, fewer in both number and percentage than in 1920. Approximately 70% of the farms now have telephone service. Cumulative Rural Electrification Administration loans through June 30, 1961, will eventually provide initial or improved service to an estimated 1,604 thousand rural subscribers.

Proposed for separate transmittal:

LOAN AUTHORIZATIONS

Legislation will be proposed for the establishment of a "Rural Electrification Administration Loan Account" which will reflect the net cost of the loan programs by showing it as the excess of the aggregate of the loans to be made over the current receipts on loans previously made. The account will be budgeted on a net expenditure basis. Loan receipts are estimated to be \$136 million in 1963, adjusting new obligational authority as follows:

	[In thousands of dollars]
Currently requested.....	480,000
Proposed revised estimate.....	-344,174
Reduction in new obligational authority.....	135,826

SALARIES AND EXPENSES

For administrative expenses, including not to exceed \$500 for financial and credit reports, and not to exceed \$150,000 for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (5 U.S.C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), [**\$10,024,000**] \$10,324,000. (5 U.S.C. 511-512; 7 U.S.C. 901-924; Department of Agriculture and Related Agencies Appropriation Act, 1962.)

¹ Selected resources as of June 30, are as follows: Unpaid undelivered orders, 1960, \$1,862 thousand (1961 adjustments - \$491 thousand); 1961, \$14,061 thousand; 1962, \$8,061 thousand; 1963, \$4,061 thousand.

1. *Rural housing loans and grants.*—Rural housing direct loans are authorized by title V of the Housing Act of 1949, as amended, to be made to farm and non-farm owners of real estate in rural areas and to long-term farm leaseholders unable to obtain credit from other sources at reasonable rates. Grants are made for minor building repair. In addition to the direct loans, insured loans are made to provide housing for domestic farm labor.

2. *Building loans.*—Direct building loans are made to farm owners and to owners of other real estate in rural areas to construct, improve, alter, repair, or replace dwellings and essential farm service buildings. Loans are

repayable in not more than 33 years and bear interest at 4%.

3. *Enlargement and development loans.*—Direct farm enlargement and development loans, along with building loans, are also made to farmowners on potentially adequate farms who need to develop their farms so as to increase their income sufficiently to repay the loans. Loans are repayable in not more than 33 years and bear interest at 4%.

4. *Repair and improvements grants.*—Grants are made to farmowners, to owners of other real estate and leaseholders in rural areas for such minor items as repairing roofs, providing toilet facilities, providing a convenient and sanitary water supply, and supplying screens. In some cases, combination building loans and grants are made not in excess of \$1 thousand. A grant, whether or not combined with a building loan, cannot exceed \$500.

5. *Insured farm labor housing loans.*—Insured loans are made to farmowners or to organizations to provide modest living quarters and related facilities for domestic farm labor. These loans, made with funds advanced by private lenders, are repayable in not more than 33 years and bear interest not in excess of 5%. Annual payments of principal and interest to lenders are fully guaranteed. Lenders can receive up to 4½% interest of the 5% paid by the borrower. The Government retains at least one-half of one percent of the interest as an insurance premium. The Administration services these insured loans, makes collections, and pays the lender.

Direct loan account.—This account was established on October 16, 1961, pursuant to section 338(c) of the Consolidated Farmers Home Administration Act of 1961. Loans are made under the authorities of subtitles A and B of the Act to farmers unable to obtain credit from other sources at reasonable rates. Loans made under these and similar prior authorities are reported and accounted for in this account. In 1962, the total Treasury borrowing authorization available for loans is \$288.5 million plus a contingency authorization of \$37.5 million available for operating loans. The latter amount plus \$12.5 million of the regular operating loan authorization is reserved pending determination of need. In 1963, it is proposed to carry out the entire estimated loan program of \$325 million through utilization of receipts to the Direct loan account representing collections during 1962 and 1963 on loans outstanding. No new borrowing authorization is estimated for 1963.

In addition to the direct loans, farm ownership and soil and water conservation loans advanced by private lenders will be insured within the annual statutory insurance authority of \$150 million for these purposes. Contingent liabilities for these insured loans are reflected in the Agricultural credit insurance fund schedules.

4. *Real estate loans*—a. *Farm ownership loans.*—Direct and insured loans are made to farmers and ranchers for acquiring, enlarging, or improving farms, including farm buildings, land development, use and conservation, refinancing indebtedness, and for loan closing costs. Loans are confined to farms which are not larger than family farms. A loan cannot exceed \$60 thousand in any case. In addition, the indebtedness against a farm or other security, including the amount of the loan, cannot exceed \$60 thousand or the normal value of the farm and any additional security. Loans are repayable in not more than 40 years and bear interest not in excess of 5%. Insured loans are made with funds advanced by private lenders. Annual payments of principal and interest to lenders are fully guaranteed. Lenders can receive up to 4½% interest of the 5% paid by the borrower. The Government retains at least one-half of one percent of the interest as an insurance premium. The Administration services these insured loans, makes collections, and pays the lender.

FARM OWNERSHIP LOANS

[Dollars in thousands]

Direct loans.....	2,153	\$31,900	2,620	\$40,000	2,620	\$40,000
Insured loans.....	1,818	25,329	4,550	65,000	4,550	65,000

b. *Soil and water conservation loans.*—Direct and insured loans are made to farmers and ranchers and to associations for the effective development and utilization of water supplies and for the improvement of farmland by soil and water conserving facilities and practices. Farms of any size may be improved with loans to individual farmers. For loans to individuals, a loan cannot exceed \$60 thousand in any case; in addition the indebtedness against a farm or other security, including the amount of the loan, cannot exceed \$60 thousand or the normal value of the farm and any additional security. For loans to associations, the unpaid principal indebtedness is limited to \$500 thousand in the case of a direct loan and \$1 million in the case of an insured loan. Loans are repayable in not more than 40 years and bear interest not in excess of 5%. Insured loans are made with funds advanced by private lenders. Annual payments of principal and interest to lenders are fully guaranteed. Lenders can receive up to 4½% interest of the 5% paid by the borrower. The Government retains at least one-half of one percent of the interest as an insurance premium. The Administration services these insured loans, makes collections, and pays the lender.

SOIL AND WATER CONSERVATION LOANS

To associations.....	17	556	45	9,000	45	9,000

5. *Operating loans.*—Direct loans are made to farmers and ranchers for paying costs incident to reorganizing a farming system for more profitable operations; for a variety of essential farm operating expenses such as the purchase of livestock, farm equipment, feed, seed, fertilizer and farm supplies; for financing land and water development, use and conservation; for refinancing indebtedness; for other farm and home needs; and for loan closing costs. Loans are confined to operators of not larger than family farms. The outstanding principal loan balance for operating loans is limited to \$35 thousand. Loans bear interest at 5% and may be made for periods up to 7 years, but may be renewed for not more than 5 additional years. Loans are secured by crop and chattel liens and, when necessary, by real estate mortgages.

Purpose and financial organization.—The Consolidated Farmers Home Administration Act of 1961 (title III of Public Law 87-128) changed the name of the Disaster Loan Revolving Fund to the Emergency Credit Revolving Fund and repealed the previous legislation. The new legislation continues the same principles of extending emergency credit to farmers and ranchers in the event of natural disasters in areas where agricultural credit is not readily available. Authority for economic emergency loans and for emergency assistance in furnishing feed and seed have been discontinued. Loans may be made to previously indebted borrowers to permit orderly repayment of such indebtedness.

Budget program—Loan commitments.—(a) *Emergency loans.*—Loans are made at 3% interest to farmers and ranchers and to domestic corporations or partnerships engaged primarily in farming in any designated emergency area or to persons or corporations outside such areas who have suffered severe production losses not general to the area.

(b) *Special livestock loans.*—Until December 31, 1961, loans were authorized to be made at 5% interest to established livestock producers who have a reasonable chance of working out their difficulties with such financing (Public Law 87-106).

(c) *Other loans.*—Where necessary to protect the Government's investment, obligations are incurred in con-

nection with outstanding loans to provide for payment of such costs as taxes and insurance. Such advances are charged to the borrowers' accounts.

Administrative expenses.—The principal administrative expenses are related to the loan programs of the Farmers Home Administration. These expenses are estimated at \$2.5 million in each of the years 1962 and 1963. Administrative expenses for the Office of the General Counsel are estimated at \$29 thousand in each of the years 1962 and 1963. Administrative expenses for the Agricultural Stabilization and Conservation Service are estimated at \$9 thousand for 1962; none is authorized in 1963.

Financing the budget program.—No new budgetary authorization is required for 1963. A net loss of \$2.7 million is estimated on an accrual basis. Net expenditures of \$15.1 million are anticipated on a cash basis due primarily to excess loan advances over loan repayments during the year. During 1963, the program will be wholly financed by receipts from operations.

Operating results and financial condition.—Revenue for 1963, consisting principally of interest on loans, is estimated at \$2 million, compared to expenses of \$4.7 million, resulting in an estimated loss of \$2.7 million. A net loss of \$2.9 million is estimated for 1962, and a net gain of \$295 thousand resulted in 1961.

Loans receivable, after allowance for losses, are expected to amount to \$66 million on June 30, 1963, as compared to \$53.3 million at June 30, 1962, and \$39.5 million on June 30, 1961.

The Government investment at June 30, 1963 is expected to be \$117.5 million consisting of \$205.9 million appropriated and donated, less a deficit of \$88.4 million.

FARMERS HOME ADMINISTRATION—Continued

Public enterprise funds—Continued

AGRICULTURAL CREDIT INSURANCE FUND—Continued

Purpose and financial organization.—This fund (formerly the Farm-Tenant Mortgage Insurance Fund) is used to insure farm ownership loans, soil and water conservation loans, and farm labor housing loans as authorized by subtitle A of the Consolidated Farmers Home Administration Act of 1961 and section 514 of title V of the Housing Act of 1949, as amended. The insurance endorsement on each insured loan includes an agreement by the Government to purchase the loan after a specified period of not less than 3 years, at the holder's option. The initial fund of \$1 million is supplemented by charges collected from insured loan borrowers. Receipts are available for administrative expenses and to cover losses. Up to \$10 million may be borrowed from the Secretary of the Treasury to facilitate the blocking of farm ownership and soil and water conservation loans for sale to investors. Interest paid the Secretary of the Treasury on borrowings is based on the current average market yield of outstanding marketable obligations of the United States having maturities comparable to the notes issued for operation of the fund.

Budget program.—Loan advances and purchases are estimated at \$66.1 million in 1963, a decrease of \$700 thousand from 1962 and an increase of \$50.1 million over 1961. Included is \$45 million in 1962 and \$45 million in 1963 for making loans from the fund which will later be sold on an insured basis. The increase in 1962 and 1963 in sale of loans from the fund is expected to result from the new authority to offer investors an interest return of 4½% instead of the previous maximum of 4%, and to offer them minimum 3-year repurchase contracts compared to the previous minimum 5-year contracts. Insured loans outstanding which are contingent liabilities against the insurance fund are expected to increase from \$182.2 million on June 30, 1961, to \$253 million at June 30, 1962, and to \$309 million by June 30, 1963.

Financing.—To finance operations, it is estimated that it will be necessary to utilize the statutory authorization to borrow from the Treasury in the net amount of \$240 thousand in 1963. Net repayments to the Treasury of \$15.2 million are anticipated in 1962.

Operating results and retained earnings.—Total income, consisting principally of insurance premiums is estimated at \$3.5 million in 1963, an increase of about \$100 thousand from 1962.

Outstanding loans receivable of \$23.6 million are estimated at June 30, 1963. Retained earnings, available to cover future losses, are estimated to be \$12.1 million at the end of 1963. These earnings, when added to the \$1 million appropriation and estimated borrowings of \$14.4 million from the Treasury, represent a \$27.5 million Government investment.

¹ Includes capital outlay as follows: 1961, \$37 thousand; 1962, \$29 thousand; 1963, \$29 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1960, \$5 thousand (1961 adjustments -\$5 thousand); 1961, \$24 thousand; 1962, \$24 thousand; 1963, \$24 thousand.

The Office serves as legal counsel for the Secretary of Agriculture and performs all legal work for the Department. It represents the Department in administrative proceedings for the promulgation of rules and regulations having the force and effect of law and in quasi-judicial hearings held in connection with the administration of Department programs. The Office also represents the Secretary in proceedings before the Interstate Commerce Commission dealing with rates and practices relating to the transportation of agricultural commodities and in appeals to the courts from the decisions of the Commission. It examines titles to lands to be acquired by the Department or accepted as security for loans, and disposes of claims arising out of the Department's activities.

Increases in 1963 are to meet the increased legal workload connected with forest service activities, watershed protection and flood prevention and marketing and regulatory activities.

The Office has responsibility for the information work of the entire Department. Its major objective is to report to farmers, agricultural and closely related groups, and to the public the Department's research, action, regulatory, and other programs, using all information media. This work is carried on in close cooperation with the land-grant colleges and with private industries which serve agriculture. Workload depends upon Department program demands, direct requests, and legislative requirements.

1. *Publications review and distribution.*—The Department publications, both printed and processed, are reviewed for policy clearance and control. Publications include farmers' bulletins, leaflets, periodicals, scientific, research, and marketing publications, and agricultural statistics.

2. *Review and distribution of current agricultural information.*—The Department's activities require the issuance of about 3,600 periodic crop, price, and market reports and press releases annually. Special information is furnished to national magazines, encyclopedic annuals, and trade publications. Digests, newsletters, and other services are made available to press associations, daily newspapers, and farm publications. Part 2 of the Secretary's annual report, known as the Yearbook of Agriculture, is published by the Office and distributed by Members of Congress. Radio is used to reach farmers locally and to broadcast regular weekly programs on major networks. Television package programs are prepared for use of land-grant colleges and television farm broadcasters.

3. *Review, preparation, and distribution of visual agricultural information.*—Motion pictures for the Department and private industries which serve agriculture, produced on a reimbursable basis under the Department's Working capital fund, are distributed through nearly 75 cooperating State film libraries. Still photographs, illustrations, and graphics are similarly produced. News and general-type photographs of Department programs and activities are available from a centralized library. Exhibits are produced and supplied to State extension workers for their use in State exhibit showings.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1961, \$0; 1962, \$5 thousand; 1963, \$0.

This nonrecurring appropriation provides for planning and carrying out activities related to the centennial observance of the establishment of the Department of Agriculture and the founding of the land-grant colleges in 1862.

1. *Coordination with trade, industry, and commodity groups.* A program for the participation by agricultural trade, industry, and commodity groups in the centennial observance is being developed and coordinated by the Department of Agriculture. This part of the centennial observance is in addition to, and coordinated with, centennial activities being carried out directly by the Department, the land-grant institutions, and other governmental agencies. The trade, industry, and com-

[CENTENNIAL OBSERVANCE OF AGRICULTURE]—Continued

modity groups are financing the costs of the activities in which they participate.

2. *Additional printing costs of the 1962 Yearbook of Agriculture.*—The 1962 Yearbook of Agriculture commemorates the centennial year since the establishment of the Department of Agriculture. In dealing with the Department's role in agriculture over the past century, the higher costs of the yearbook, above those provided under Salaries and expenses, Office of Information, will be paid from this item.

¹ Includes capital outlay as follows: 1961, \$8 thousand; 1962, \$5 thousand; 1963, \$5 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1960, \$17 thousand (1961 adjustments—\$1 thousand); 1961, \$19 thousand; 1962, \$19 thousand; 1963, \$19 thousand.

The National Agricultural Library, cooperating jointly with the two other national libraries—the Library of Congress and the National Library of Medicine—provides coverage and servicing of world-wide publications in the agricultural, chemical, and biological sciences. It serves the research, extension, regulatory, and other programs of the Department and State agricultural agencies. It contains approximately 1,186 thousand volumes, probably the most extensive agricultural collection in existence. Since the Library's primary purpose is to provide for research needs, substantive publications in the animal sciences, plant sciences, agricultural chemistry, agricultural engineering, soils, forestry, agricultural products, home economics, world sociology, agricultural economics, and agricultural statistics are acquired and preserved. Publications are regularly acquired from more than fifty countries on subjects ranging from apiculture to zootomy. In addition, printed information of agricultural societies, organizations, cooperatives, and general material in the field of agriculture are collected and made available for use.

Information contained in the agricultural literature is disseminated through bibliographies, loans, photocopies and reference services to agricultural colleges and universities, research institutions, Government agencies, agricultural associations, industry, individual scientists, farmers, and the general public in every part of the world.

During 1961, 15,672 volumes and 221,275 separate issues of periodicals were added to the collection by purchase, gift, and exchange. During the same period 227,635 loans of books and periodicals were made and 86,392 reference questions answered.

The increase proposed for 1963 would be used to improve specialized library-documentation services to agricultural scientists.

General administration covers the overall planning, coordination and administration of the Department's programs. Also included are certain services on a department-wide basis. Increases are provided in the budget to strengthen the staffs of the Office of the Secretary, and several of the service functions, as well as to operate the newly established Office of Rural Areas Development and Office of Management Appraisal and Systems Development.

2. *Rural areas development.*—This covers leadership of Department agencies and the coordination of other agencies of the executive branch with public and private organizations in the rural areas development program to improve economic conditions in rural areas.

3. *Personnel administration and service.*—Departmental policies and procedures are promulgated for the personnel management program. The operational phases of this program have been substantially delegated to the agencies. A systematic review is conducted to insure unification thereof and to measure its effectiveness in serving the agencies' personnel management requirements.

4. *Budgetary and financial administration and service.*—This covers departmental budgetary and financial management, including internal audit and related activities; policies and procedures are promulgated, and programs and legislative proposals are evaluated for budgetary, financial, and related implications.

5. *General operations.*—These embrace departmental policies and procedures for real and personal property, and supply management, paperwork activities and administrative issuances. Administrative services are provided for the Office of the Secretary and staff offices, and central services of post office, telephone, telegraph, reproduction, and supply are furnished.

6. *Management appraisal and systems development.*—This covers the coordination and direction of the develop-

ment of improved management techniques, utilization of data processing equipment, development of methods of measuring the effectiveness of program operations, and the application of operations research techniques to the administrative and program activities of the Department.

7. *Regulatory hearings and decisions.*—The hearing examiners hold hearings in connection with the prescribing of new regulations and orders and on disciplinary complaints filed by the Department or on petitions filed by private parties asking relief from some action of the Department. Final administrative decisions in regulatory proceedings are rendered by the judicial officer. "Agriculture Decisions" is published monthly.

8. *National Agricultural Advisory Commission.*—Provision is made for the payment of necessary expenses incident to periodic meetings of the National Agricultural Advisory Commission.

FOREST SERVICE

The Service carries on three primary functions: (a) protection, development, and use of about 186 million acres of land in national forests and national grasslands in the United States and Puerto Rico; (b) research for all public and private forest lands and related ranges to improve protection from fire, insects, and diseases; to increase production of timber, forage, water and other products; to improve methods for developing and managing recreation resources; to develop better utilization and marketing of forest products; and to maintain a current inventory of forest resources through a nationwide forest survey; and (c) cooperation with States and private forest landowners to obtain better fire protection on approximately 435 million acres of forest lands and better forest practices on about 345 million acres of privately owned commercial timberlands, to encourage reforestation and stimulate development and management of State, county, and community forests. These primary functions include construction and maintenance of roads and trails,

control of forest pests, protection against floods, land acquisition and exchange, and a number of cooperative projects.

Current authorizations:

FOREST PROTECTION AND UTILIZATION

For expenses necessary for forest protection and utilization, as follows:

Forest land management: For necessary expenses of the Forest Service, not otherwise provided for, including the administration, improvement, development, and management of lands under Forest Service administration, fighting and preventing forest fires on or threatening such lands and for liquidation of obligations incurred in the preceding fiscal year for such purposes, control of white pine blister rust and other forest diseases and insects on Federal and non-Federal lands; **[\$128,000,000] \$140,740,000**, of which \$5,000,000 for fighting and preventing forest fires and \$1,910,000 for insect and disease control shall be apportioned for use, pursuant to section 3679 of the Revised Statutes, as amended, to the extent necessary under the then existing conditions: *Provided*, That not more than **[\$300,000] \$500,000** may be used for acquisition of land under the Act of March 1, 1911, as amended (16 U.S.C. 513-519): *Provided further*, That funds appropriated for "Cooperative range improvements", pursuant to section 12 of the Act of April 24, 1950 (16 U.S.C. 580h), may be advanced to this appropriation.

Forest research: For forest research at forest and range experiment stations, the Forest Products Laboratory, or elsewhere, as authorized by law; **[\$26,368,000] \$23,150,000**.

State and private forestry cooperation: For cooperation with States in forest-fire prevention and suppression, in forest tree planting on non-Federal public and private lands, and in forest management and processing, and for advising timberland owners, associations, wood-using industries, and others in the application of forest management principles and processing of forest products, as authorized by law; **\$15,800,000**. (5 U.S.C. 511-512, 524, 565a; 7 U.S.C. 428a, 1010-1012, 1621-1627; 16 U.S.C. 471-583i, 594-1-594-5, 594a; 30 U.S.C. 601-604, 611-615; 31 U.S.C. 534; 43 U.S.C. 1181h-1181j; 36 Stat. 557; 75 Stat. 319; Department of Interior and Related Agencies Appropriation Act, 1962.)

1. *Forest land management*—(a) *National forest protection and management*.—The 155 national forests and 18 units of national grasslands are managed under multiple use and sustained yield principles. The natural resources of outdoor recreation, range, timber, watershed, and wildlife are utilized in a planned combination that will best meet the needs of the Nation without impairing productivity of the land. These management and utilization principles were recognized in the Multiple Use-Sustained Yield Act of June 12, 1960 (Public Law 86-517, 74 Stat. 215). Work programs and budget estimates are related to the Development Program for the National Forests, a plan to meet the increasing demands for specific national forest resource needs during the next 10 years and for long-term objectives to the year 2000. Increases are provided in the budget to further attainment of these program objectives. Construction funds of \$18.4 million in 1962 and \$22.5 million in 1963 are budgeted, compared with \$10.3 million used in 1961, for construction or rehabilitation of campground and picnic facilities and other recreation improvements, the construction of dwellings or barracks for employee housing, fire lookouts, service and storage buildings, communication facilities, and other improvements. Funds appropriated under Cooperative range improvements are merged with this appropriation for obligational purposes.

MAIN WORKLOAD FACTORS

Description	1961 actual	1962 estimate	1963 estimate
Area administered and protected:			
(a) National forest lands (acres)....	182,173,441	182,225,000	182,300,000
(b) National grasslands (acres)....	3,818,862	3,820,000	3,825,000
(c) Land utilization projects (acres).....	392,607	392,000	392,000
Timber managed and protected (saw-timber—billion board feet).....	880	880	880
Timber sales (number).....	50,164	54,000	58,000
Timber harvested (billion board feet)....	8.4	9.5	9.7
Grazing use permits (calendar year)....	35,763	35,763	35,763
Estimated number of livestock on national forest ranges (including calves and lambs).....	6,000,000	6,000,000	6,000,000

MAIN WORKLOAD FACTORS—Continued

	1961 actual	1962 estimate	1963 estimate
Special use permits, excluding recreation (number).....	37,069	38,180	39,430
Recreation special use permits (number).....	22,787	23,930	25,120
Estimated number of visitors to national forests (calendar year).....	92,594,000	102,000,000	115,000,000
Tree planting and seeding (acres)....	57,484	102,500	122,500
Timber stand improvement ¹ (acres treated).....	75,881	276,000	347,500
Range reseeding and removal of competing vegetation (acres).....	148,011	213,000	223,000
Receipts (thousands of dollars):			
Timber sales.....	98,425	114,000	121,000
Grazing.....	3,268	3,300	3,300
Land uses.....	2,729	2,900	3,000
National grasslands.....	1,678	1,700	1,700
Total receipts.....	106,100	121,900	129,000

(b) *Fighting forest fires*.—This provides for employment of additional manpower and other facilities for forest fire emergencies which cannot be met by the fire control organization provided under national forest protection and management. Costs above the amounts estimated for the current and budget years are authorized to be met from advances from other Forest Service appropriations (repayments of such advances were made in 1961 and 1962 to Expenses, brush disposal). In addition, a supplemental appropriation for fighting forest fires is anticipated for separate transmittal.

	1961 actual	1962 estimate	1963 estimate
Forest fires controlled (number).....	13,736	14,750	13,500
Area burned (acres).....	430,092	262,900	254,600

(c) *Insect and disease control*.—Activities to suppress and control destructive insects and diseases that threaten timber areas include two types of work carried on jointly by Federal, State, and private agencies: (1) Surveys on forest lands to detect and evaluate infestations of forest insects and infections of tree diseases and determination of protective measures to be taken, and (2) control operations to suppress or eradicate forest insects and diseases, including white pine blister rust. In addition, a supplemental appropriation for insect and disease control is anticipated for separate transmittal.

(d) *Acquisition of lands*.—Lands are purchased to protect the watersheds of navigable streams and to increase the production of timber with the approval of the National Forest Reservation Commission. The present program is only for purchase of small tracts within the 55 approved purchase areas.

2. *Forest research*.—Research is conducted at ten regional forest experiment stations, the Forest Products Laboratory, and elsewhere.

(a) *Forest and range management*.—This research provides private and public land managers and owners with a sound basis for management of timber, forage, and watershed lands. Studies are conducted to maintain a sustained yield of products at the lowest possible costs; increase forage for domestic livestock and improve habitat for wildlife without damage to soil, watershed, or other values; assure maximum regular flow of usable water, and reduce floods and sedimentation; and improve methods for developing and managing recreation resources.

(b) *Forest protection*.—Research is conducted to develop sound measures for the protection of forests from damage by fire, insects, and diseases. Forest fire research provides

FOREST SERVICE—Continued

Current authorizations—Continued

FOREST PROTECTION AND UTILIZATION—Continued

improved methods of predicting fire danger, and preparing for and combating fire by combinations of ground and aerial methods. Insect and disease research develops direct controls, silvicultural measures, and biological agents to combat forest pests.

(c) *Forest products and engineering.*—Studies are conducted to develop new and improved forest products, reduction and utilization of waste, and use of low-quality wood and less-desirable species. They include studies to reduce costs of logging and wood utilization, and to develop basic knowledge of wood and disseminate this to forest owners, manufacturers, fabricators, and consumers. Research is also conducted to advance the mechanization and efficiency of forestry operations, and to develop and evaluate machines and similar equipment for such operations as logging, planting, timber-stand improvement, and protection of forests.

(d) *Forest resources.*—These investigations are conducted to inventory and appraise the condition of forest lands, volume and quality of standing timber, ownership of timber resources, annual growth and depletion, and the potential need for timber products. Studies of the economics of forest crop production and of marketing of forest products are also included.

MAIN WORKLOAD FACTORS

[Acres in millions]

Resurveys (annual).....	40	35	35

¹ Includes all of Alaska and Hawaii.

(e) *Forest research construction.*—Auxiliary facilities and scientific research equipment are provided for research laboratories.

3. *State and private forestry cooperation.*—This program, carried on in cooperation with the States, encourages private timber management. Privately owned forest lands comprise three-fourths of the Nation's commercial forest area and produce about 85% of all timber cut.

(a) *Forest fire control.*—Assistance is furnished 49 States in preventing and suppressing forest fires on private and State owned lands by financial aid, training, procurement of equipment, and a nationwide fire prevention campaign. About 92% of the 435 million acres of non-Federal ownership is now partially covered. During 1960 the acreage burned on protected areas was 0.47% as against an estimated 6.08% on unprotected lands. Of the total expenditures under this program, 81% is contributed by States and counties, 3% by private owners, and 16% by the Federal Government.

(b) *Forest tree planting.*—To encourage woodland owners to reforest unproductive portions of their holdings, and farmers to plant wind barriers around their fields and farmsteads—a total of more than 46 million acres altogether—the States provide planting stock at less than cost. The Federal Government shares the cost of producing the stock with the State and private landowners.

(c) *Forest management and processing.*—In cooperation with State foresters, 483 projects in 2,197 counties are operated to aid small woodlaud owners in applying good management to their timber holdings. In 1961 these projects served some 89,255 owners and 4.6 million acres.

(d) *General forestry assistance.*—Technical forest management assistance is provided to State, community, private, and other Federal agencies, forest industries, colleges, and landowners.

Roads and trails are essential to protection and management of national forests and the utilization of them for timber harvest, recreation, and other resources. The system consists of approximately 162,400 miles of earth- or gravel-surfaced roads and 106,500 miles of supplemental trails.

The Federal Highway Act of 1960, approved July 14, 1960, Public Law 86-657, provides authorizations of \$35 million for 1962 and \$40 million for 1963. These authorizations are available for obligation a year in advance of the year for which authorized; \$2.5 million of the 1963 authorization was approved for obligation in 1962. Only \$37.5 million contract authorization remains available for use in 1963. At this level the 1963 program will involve the construction and reconstruction of about 129 miles of general purpose roads and about 489 miles of timber access roads to harvest national forest timber, a total of approximately 618 miles. This compares with 694 miles built in 1961 and 526 being built in 1962.

Of the amounts received annually from national forest activities 10% is available under the permanent appropriation Roads and trails for States, for construction and maintenance within the State from which such proceeds are derived. Such amounts are merged with this appropriation for obligational purposes.

The budget contemplates that the authorization of \$40 million for 1963 in the Federal Highway Act will be increased to \$50 million to enable the Forest roads and trails program to be accelerated in balance with the attendant implementation of the Development program for the national forests. If this increase is enacted, a supplemental estimate for 1963 is anticipated for separate transmittal.

New obligational authority (appropriation).....	750	250	2,000

¹ Includes capital outlay as follows: 1961, \$27 thousand; 1962, \$855 thousand; 1963, \$1,964 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1960, \$36 thousand; 1961, \$110 thousand; 1962, \$110 thousand; 1963, \$110 thousand.

As of June 30, 1961, approximately 40 thousand acres of land have been acquired to preserve the wilderness conditions of part of the Superior National Forest in Minnesota. The authorization for the purchase of land within this forest was increased to \$4.5 million by Public Law S7-351, approved October 4, 1961. The appropriation proposed will complete the authorization and permit acquisition of the remaining tracts.

FOREST SERVICE—Continued

Current authorizations—Continued

CACHE NATIONAL FOREST—Continued

Lands are acquired within the Cache National Forest, Utah, to enable control and minimization of soil erosion and flood damage.

COOPERATIVE RANGE IMPROVEMENTS

(Special fund)

For artificial revegetation, construction, and maintenance of range improvements, control of rodents, and eradication of poisonous and noxious plants on national forests in accordance with section 12 of the Act of April 24, 1950 (16 U.S.C. 580h), to be derived from grazing fees as authorized by said section, \$700,000, to remain available until expended. (*Department of Interior and Related Agencies Appropriation Act, 1962.*)

Program and Financing (in thousands of dollars)

ADMINISTRATIVE PROVISIONS, FOREST SERVICE

Appropriations available to the Forest Service for the current fiscal year shall be available for: (a) purchase of not to exceed one hundred and [fifty] *seventy-nine* passenger motor vehicles, of which one hundred and thirty-[five] *seven* shall be for replacement only, and hire of such vehicles; operation and maintenance of aircraft and the purchase of not to exceed [two] *three* of which one shall be for replacement only; (b) employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (5 U.S.C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), in an amount not to exceed \$25,000; (c) uniforms, or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131); (d) purchase, erection, and alteration of buildings and other public improvements (5 U.S.C. 565a); (e) expenses of the National Forest Reservation Commission as authorized by section 14 of the Act of March 1, 1911 (16 U.S.C. 514); and (f) acquisition of land and interests therein for sites for administrative purposes, pursuant to the Act of August 3, 1956 (7 U.S.C. 428a).

Except to provide materials required in or incident to research or experimental work where no suitable domestic product is available, no part of the funds appropriated to the Forest Service shall be expended in the purchase of twine manufactured from commodities or materials produced outside of the United States.

Funds appropriated under this Act shall not be used for acquisition of forest lands under the provisions of the Act approved March 1, 1911, as amended (16 U.S.C. 513-519, 521), where such land is not within the boundaries of a national forest nor shall these lands or lands authorized for purchase in Sanders County, Montana, be acquired without approval of the local government concerned. (*Department of Interior and Related Agencies Appropriation Act, 1962.*)

ALLOCATIONS AND ALLOTMENTS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations or allotments from other accounts are included in the schedule of the parent appropriation as follows:
 "Watershed protection," Soil Conservation Service.
 "Flood prevention," Soil Conservation Service.
 "Agricultural conservation program," Agricultural Stabilization and Conservation Service.
 "Great Plains conservation program," Soil Conservation Service.
 "Conservation reserve program," Agricultural Stabilization and Conservation Service.
 "Agency for International Development," funds appropriated to the President.
 "Oregon and California Grant Lands," Bureau of Land Management.

FOREST SERVICE—Continued

Permanent authorizations—Continued

OTHER FOREST SERVICE PERMANENT APPROPRIATIONS—Con.

(Indefinite special fund unless otherwise indicated)—Continued

1. *Forest fire prevention.*—Fees for the use of the character "Smokey Bear" by private enterprises are collected under regulations promulgated by the Secretary and are available for furthering the nationwide forest fire prevention campaign (18 U.S.C. 711).

2. *Restoration of forest lands and improvements.*—Funds received from settlement of claims involving damage to lands or improvements and from forfeiture of deposits and bonds by permittees and timber purchasers are used for the restoration made necessary by the action which led to the settlement or forfeiture (16 U.S.C. 556c).

3. *Payment to Minnesota.*—At the close of each fiscal year the State of Minnesota is paid 0.75% of the appraised value of certain Superior National Forest lands in the Counties of Cook, Lake, and St. Louis for distribution to these counties (16 U.S.C. 577g).

4. *Payments to counties, national grasslands.*—Of the revenues received from the use of national grasslands, 25% is paid to the counties in which such land is situated for school and road purposes (7 U.S.C. 1012).

5. *Payments to school funds, Arizona and New Mexico.*—The States of Arizona and New Mexico are paid a share of the national forest receipts for school purposes (36 Stat. 562, 573).

6. *Payments to States, national forests fund.*—With minor exceptions, 25% of the money received from the national forests is paid to the States for public schools and roads of the county in which such forests are situated (16 U.S.C. 500).

Intragovernmental funds:

WORKING CAPITAL FUND, FOREST SERVICE

This fund finances on a reimbursable basis various services such as repairing and replacing equipment, in-

cluding aircraft, stocking and issuing supplies, operation of subsistence camps, operation of photographic and reproduction facilities, and tree nurseries in support of programs of the Forest Service (16 U.S.C. 579b). These service operations serve programs of fire protection, timber utilization, construction and maintenance of roads and other improvements, reforestation, grazing, watershed, forest and forest products research, and kindred conservation activities of the Forest Service, including cooperative assistance with other Federal agencies, States, counties, and individuals engaged in the same objectives.

Operating results and financial condition.—Government investment in the fund as of June 30, 1961, including donated assets at its inception and retained earnings for 1961, is \$23,862 thousand. By the end of 1963 the investment is anticipated to be \$30,576 thousand, an increase of \$6,714 thousand which represents estimated earnings and donations during 1962 and 1963.

Receipts, non-operating income, and retained earnings include an estimated \$1.5 million for 1963 identified as Income provision for increased cost of equipment replacements to be used only for financing the increased cost of equipment replacement, i.e., the difference between the cost of the replacement unit and the cost at time of acquisition of the unit being replaced. This increased cost is due to inflation and model improvement, and must be financed if the fleet strength is to be maintained and not depleted through the gradual attrition of price increases for replacements. The earnings for the provision for increased cost of replacements are derived from a factor which is included for this purpose in rental rates charged to program appropriations for equipment use and credited to the working capital fund.

Retained earnings as of June 30, 1963 will total an estimated \$5,800 thousand which will consist of \$1,874 thousand gain on sale of equipment, \$2,426 thousand profit from operations, and \$1,500 thousand for provision for increased cost of replacement of equipment. It is planned to utilize the full amount of \$1,500 thousand for increased cost of replacement of equipment during 1963. The gain on sale of equipment and part of the profit from operations have been applied toward increased cost of equipment replacements and purchase of fleet additions. The balance of the operating profit is being retained to furnish adequate working capital.

GENERAL PROVISIONS

SEC. 501. Within the unit limit of cost fixed by law, appropriations and authorizations made for the Department under this Act shall be available for the purchase, in addition to those specifically provided for, of not to exceed [three hundred and ninety-eight] four hundred and sixty passenger motor vehicles, of which [three hundred and eighty-five] four hundred and forty-three shall be for replacement only, and for the hire of such vehicles.

SEC. 502. Provisions of law prohibiting or restricting the employment of aliens shall not apply to employment under the appropriation for the Foreign Agricultural Service.

SEC. 503. Funds available to the Department of Agriculture shall be available for uniforms or allowances therefor as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131).

SEC. 504. No part of the funds appropriated by this Act shall be used for the payment of any officer or employee of the Department who, as such officer or employee, or on behalf of the Department or any division, commission, or bureau thereof, issues, or causes to be issued, any prediction, oral or written, or forecast, except as to damage threatened or caused by insects and pests, with respect to future prices of cotton or the trend of same.

SEC. 505. Except to provide materials required in or incident to research or experimental work where no suitable domestic product is available, no part of the funds appropriated by this Act shall be expended in the purchase of twine manufactured from commodities or materials produced outside of the United States.

SEC. 506. Not less than \$1,500,000 of the appropriations of the Department for research and service work authorized by the Acts of August 14, 1916, July 28, 1954, and September 6, 1958 (7 U.S.C. 427, 1621-1629; 42 U.S.C. 1891-1893), shall be available for contracting in accordance with said Acts. (*Department of Agriculture and Related Agencies Appropriation Act, 1962.*)

AREA REDEVELOPMENT ADMINISTRATION

The Area Redevelopment Administration was established by law (75 Stat. 47) on May 1, 1961. The purpose of the enabling legislation was to establish an effective program to alleviate conditions of substantial and persistent unemployment and underemployment in certain economically distressed areas. The Federal Government, in cooperation with States, will assist such areas to plan and finance their economic development, thereby creating stable and diversified economies, as well as developing new job opportunities. The Secretary of Commerce is responsible for administering the act and the Secretary has delegated appropriate functions to six departments and agencies (Agriculture, Health, Education, and Welfare, Interior, Labor, Housing and Home Finance Agency, Small Business Administration).

Two basic types of redevelopment areas are recognized: (1) urban areas and (2) nonurban areas consisting of small towns, Indian and rural areas (both farm and nonfarm). There are three broad types of assistance available under the Area Redevelopment Act: (a) financial assistance; (b) redevelopment guidance; (c) training (funds for this function are provided by the Department of Labor).

Current authorizations:

OPERATIONS

For necessary expenses, not otherwise provided for, of the Area Redevelopment Administration, including not to exceed \$4,000,000 for technical assistance, as authorized by section 11 of the Area Redevelopment Act (75 Stat. 47), and hire of passenger motor vehicles, \$13,600,000: Provided, That funds made available for administrative expenses of carrying out the functions of the Area Redevelopment Administration may be consolidated into a single expense fund account.

Transferred from "Area redevelopment assistance".....		8,154	
Appropriation (adjusted).....		8,154	13,500

¹ Includes capital outlay as follows: 1961, \$10 thousand; 1962, \$81 thousand; 1963, \$79 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1960, \$0; 1961, \$1 thousand; 1962, \$5 thousand; 1963, \$5 thousand.

1. *Operations.*—Organizational and educational leadership is provided for the stimulation of local initiative. Locally prepared economic development programs are reviewed and project proposals for assistance to carry out such programs are evaluated and approved. Redevelopment guidance is provided in the form of surveys, technical data, procurement information and consultation on special community problems. A program of long-term research into causes and possible cures for unemployment and underemployment will be initiated in 1963.

2. *Technical assistance.*—Communities are aided in preparing economic development plans by providing basic information on natural resources, manpower, and the uses to which these can be put to establish stable and diversified local economies. Investigations are also made of State and regional economic development opportunities and of new or improved uses of resources in specific areas. An increase is requested to permit examining new techniques (for example, improved methods of extracting iron from low grade ores) which may be useful in meeting the communities' most serious economic difficulties.

GRANTS FOR PUBLIC FACILITIES

For grants in accordance with the provisions of section 8 of the Area Redevelopment Act (75 Stat. 53), \$35,000,000, to remain available until expended: Provided, That the unobligated balance remaining under the limitation on public facility grants, in the appropriation for "Area redevelopment assistance," may be transferred to and merged with this appropriation.

Program and Financing (in thousands of dollars)

	1961 actual	1962 estimate	1963 estimate
Program by activities:			
Reservation: Grants		35,000	50,000
Reservations outstanding at end of year		-10,000	-10,000

Transferred from "Area redevelopment assistance"		40,000	
Appropriation (adjusted)		40,000	35,000
Reappropriation			15,000

Grants are made to States and their political subdivisions, Indian tribes, and private or public nonprofit associations representing a development area, to assist in the construction or improvement of public facilities, when the public facility project will improve opportunities for the location or expansion of industrial plants and facilities providing more than temporary alleviation of unemployment or underemployment. Grants are only awarded when the area has an approved overall economic development program, the grant is necessary in order for the project to be undertaken, and the entity requesting the grant is contributing in proportion to its ability. The 1963 request will exhaust the \$75 million authorized for this purpose by the enabling legislation.

The Area Redevelopment Act provides for long-term loans at low interest rates to aid in the construction or

expansion of commercial or industrial facilities and of related public facilities for the purpose of alleviating unemployment and underemployment within designated areas. Interest rate on commercial facilities are set by law and will be 4% for 1962 for industrial and commercial loans. Interest rates on public facility loans will be 3 $\frac{3}{8}$ % in 1962. Industrial and commercial loans may run for 25 years and public facility loans up to 40 years. Loans may be made to States, localities, and public or private nonprofit organizations representing redevelopment areas when (a) the area is designated as a redevelopment area, (b) the project is consistent with an approved overall economic development program; (c) the project will provide more than temporary alleviation of unemployment or underemployment; (d) assistance will not be given to establishments that in relocating would cause unemployment in the originating area; (e) financial assistance is not otherwise available from private lenders or Federal agencies on reasonable terms; and (f) applicants have been approved by a State and local agency directly concerned with problems of economic development in the area.

The Act authorized outstanding loans of not to exceed \$100 million each for (a) industrial or commercial projects in urban areas of substantial and persistent unemployment designated within specific criteria, (b) industrial or commercial projects in nonurban areas which are among the highest in number and percentages of low income families and where substantial underemployment exists; and (c) public facilities necessary for improving the opportunities for employment.

Budget program.—Reservations for industrial and commercial loans are estimated during the current and budget years at \$60 million and \$72.5 million, and for public facility loans at \$39 million and \$45 million. The following table shows the relationship of reservations to the authorized amounts (in millions of dollars):

	1962 reservations	1963 reservations	Cumulative reservations	Unreserved authorization
Industrial and commercial loans:				
Urban.....	37.0	45.0	82.0	18.0
Nonurban.....	23.0	27.5	50.5	49.5
Public facility loans.....	39.0	45.0	84.0	16.0
Total.....	99.0	117.5	216.5	83.5

Fund reservations are made on approval of applications filed to determine eligibility and feasibility of the project. Reservations are converted into loan approvals after filing a full loan application and review by the Small Business Administration for commercial loans or the Housing and Home Finance Agency for public facility loans.

Principal workload stages are as follows:

	1962 estimate			1963 estimate		
	Urban	Non-urban	Public facilities	Urban	Non-urban	Public facilities
Preliminary applications:						
Received.....	104	140	183	130	170	216

AREA REDEVELOPMENT ADMINISTRATION— Continued

Public enterprise funds—Continued

AREA REDEVELOPMENT FUND—Continued

The relationship between reservations and obligations is set forth in the following table (in millions of dollars):

	Industrial and commercial loans		Public facility loans
	Urban	Nonurban	
1962 program:			
Reservations.....	37.0	23.0	39.0
Less reservations carried forward.....	-10.0	-6.5	-11.0
Loans approved (obligations).....	27.0	16.5	28.0
1963 program:			
Reservations.....	45.0	27.5	45.0
Reservations brought forward.....	10.0	6.5	11.0
Less reservations carried forward.....	-12.0	-7.0	-12.0
Loans approved (obligations).....	43.0	27.0	44.0

Financing.—The program is financed by a direct appropriation of \$122.5 million in 1962 and by a treasury borrowing authorization of \$300 million. In 1963, \$37 million will be drawn against the authorization. Disbursements are made as projects near completion, based on the following projected construction schedule (in millions of dollars):

	1962 estimate			1963 estimate		
	Urban	Non-urban	Public facility loans	Urban	Non-urban	Public facility loans
Construction starts.....	17.5	10.0	17.0	41.0	26.5	44.0
Substantial completions.....	6.5	5.6	8.4	26.0	20.0	33.0

Operating results.—During the initial stages of the program revenues are expected to lag behind expenses. The deficit results primarily from the allowance for losses, which is established at the rate of 2%.

BUSINESS ACTIVITIES**Current authorizations:****SALARIES AND EXPENSES**

For necessary expenses of business service activities, including operation and maintenance of field offices for the collection and dissemination of information useful in the development and improvement of commerce throughout the United States and its possessions; promotion of foreign commerce, including trade centers, trade missions, and trade and industrial exhibits, abroad, without regard to the provisions of law set forth in 41 U.S.C. 5 and 13; 44 U.S.C. 111, 322, and 324; carrying out the provisions of the International Travel Act of 1961 (75 Stat. 129); purchase of commercial and trade reports; hire of aircraft; employment of aliens by contract for services abroad; rental of space abroad, for periods not exceeding five years, and expenses of alteration, repair, or improvement; advance of funds under contracts; payment of tort claims, in the manner authorized in the first paragraph of section 2672 of Title 28 of the United States Code, when such claims arise in foreign countries; and not to exceed \$69,300 for official reception and representation expenses; \$26,110,000, of which \$3,000,000 shall remain available until expended for trade and industrial exhibits: Provided, That the provisions of sections 105(f) and 108(e) of the Mutual Educational and Cultural Exchange Act of 1961 (Public Law 87-256) shall apply in carrying out the activities concerned with trade and industrial exhibits, and trade missions: Provided further, That \$1,570,000 for salaries and expenses of commercial specialists may be transferred from this appropriation to any applicable current appropriations of the Department of State, to be expended in accordance with the provisions of such appropriations: Provided further, That the unexpended balance, as of June 30, 1962, of funds allocated to Department of Commerce for trade mission activities from appropriations granted under the heading "Special international program," United States Information Agency shall be merged with this appropriation. (5 U.S.C. 591, 596-7; 15 U.S.C. 171, 175, 1151-7; 50 U.S.C. app. 2061-2166; Reorganization Plan No. 5 of 1950, Sec. 4, 64 Stat. 1263; 75 Stat. 129-30; General Government Matters, Department of Commerce, and Related Agencies Appropriation Act 1962.)

Note.—Estimate is for activities previously carried under "Salaries and expenses," Business and Defense Services Administration; "Salaries and expenses," Bureau of Foreign Commerce; "Salaries and expenses," Office of Field Services; and "Salaries and expenses, promotion of international travel." Includes \$1,000,000 for activities carried under "Special international exhibitions," U.S. Information Agency. The amounts obligated in 1961 and 1962 are shown in the schedule as comparative transfers.

Program and Financing (in thousands of dollars)

	1961 actual	1962 estimate	1963 estimate
Program by activities:			
1. Industrial development and mobilization.....	4,074	4,212	6,900
2. Promotion of international commerce.....	3,675	5,549	8,460
3. Trade and industrial exhibits.....			2,200
4. Promotion of international travel.....	93	2,616	4,200
5. Field office operations.....	2,797	3,152	3,550
Total program costs ¹	10,639	15,529	25,310
Change in selected resources ²	221	-99	800
Total obligations	10,860	15,430	26,110
Financing:			
Comparative transfers from other accounts.....	-10,860	-15,430	
New obligational authority (appropriation)			26,110

¹ Includes capital outlay as follows: 1961, \$119 thousand; 1962, \$338 thousand; 1963, \$302 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1960, \$271 thousand (1961 adjustments \$4 thousand); 1961, \$496 thousand; 1962, \$397 thousand; 1963, \$1,197 thousand.

This new appropriation is to provide for functions which have heretofore been appropriated for under Office of Field Services, Business and Defense Services Administration, Bureau of Foreign Commerce, U.S. Travel Service, and the trade mission activity under the special international exhibitions of the United States Information Agency.

1. *Industrial development and mobilization.*—The Business and Defense Services Administration conducts

economic and industry studies on production and distribution, prepares commodity studies including both domestic and foreign data, acts as a clearinghouse for foreign and domestic information, and plans for the mobilization of industrial production and the establishment and decentralization of controls. The fact that this last function was funded by the Office of Emergency Planning in 1961 and 1962 accounts for \$1,900 thousand of the increase. Augmentation of funds for domestic business services will permit economic analysis to be made which will help U.S. industry meet changing conditions in international competition and technical advances.

2. *Promotion of international commerce.*—To provide more adequate services in the promotion of export trade the former Bureau of Foreign Commerce has been reorganized. To further strengthen U.S. trade promotion an agreement has been concluded by the Departments of State and Commerce to provide for additional commercial specialists in foreign countries in this appropriation. Funds requested for 1963 permit expansion of the trade mission program.

3. *Trade and industrial exhibits.*—A program of trade and industrial exhibits abroad will assist U.S. business to participate in trade and industrial exhibits in areas of high sale potential. This program will supplement the continuing United States Information Agency financed trade exhibit program.

4. *Promotion of international travel.*—The International Travel Act of 1961 established the U.S. Travel Service to strengthen the domestic and foreign commerce of the United States, and promote friendly understanding and appreciation of the United States by encouraging foreign residents to visit America.

5. *Field office operations.*—Field office operations are conducted in 34 locations, principal industrial and commercial centers of the United States, and these offices serve as local outlets for the information and services of the Department. These offices also gather information on local and regional trends for the use of the Department of Commerce and other agencies. In 1963 funds are provided to open five new offices.

EXPORT CONTROL

For expenses necessary for carrying out the provisions of the Export Control Act of 1949, as amended, relating to export controls, including awards of compensation to informers under said Act and as authorized by the Act of August 13, 1953 (22 U.S.C. 401), \$3,480,000 of which not to exceed \$1,237,000 may be advanced to the Bureau of Customs, Treasury Department, for enforcement of the export control program, and of which not to exceed \$80,400 may be advanced to the appropriation for "Salaries and expenses" under "General administration". (1950 Reorganization Plan No. 5, sec. 4, 64 Stat. 1263; General Government Matters, Department of Commerce, and Related Agencies Appropriation Act, 1962; authorizing legislation to be proposed for 1963.)

New obligational authority (appropriation).....	3,025	3,480	3,480

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1960, \$12 thousand (1961 adjustments, \$7 thousand); 1961, \$22 thousand; 1962, \$20 thousand; 1963, \$20 thousand.

Export controls are necessary to protect the domestic economy from excessive drain of scarce commodities, to safeguard the national security by regulating exports of strategic commodities, and to implement U.S. foreign policy. In the absence of improvement in relations with certain countries, these controls must be continued and, as necessary, extended to other areas to guard against transshipment. The Bureau of Customs is responsible for the policing of shipments at points of export. (The Export Control Act of 1949, as amended, expires June 30, 1962. This estimate for 1963 is being submitted subject to the extension of said act.)

¹ Includes capital outlay as follows: 1961, \$25 thousand; 1962, \$7 thousand; 1963, \$15 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1960, \$43 thousand (1961 adjustments -\$12 thousand); 1961, \$34 thousand; 1962, \$34 thousand; 1963, \$34 thousand.

Basic indicators of the condition of the national economy and current analyses of business trends are prepared and distributed to the public.

1. *Preparation of national income and product data.*—Calculations are made of the national income and gross national product, consumption, expenditures, and other subsidiary measures of the Nation's economic well-being.

2. *Analysis of business trends.*—Business developments are assessed monthly, and the results of continuing analysis of the major underlying factors and long-range business trends are published regularly for business use.

3. *Computation of the balance of international payments.*—The U.S. balance of international payments is determined and the official statistics of foreign expenditures by the U.S. Government are maintained.

The Bureau is the principal fact-finding and statistical agency of the Federal Government.

1. *Retail, wholesale, and service trade statistics.*—Estimates of sales and inventory trends are computed monthly for the retail and wholesale trades, with data presented for major business areas and broad geographic regions. Accounts receivable data are collected for the retail trades. Estimates of total retail sales and of the subtotal consisting of businesses in the general merchandise-apparel-furniture-appliance groups are provided weekly, and monthly estimates are provided for 20 large metro-

politan centers. Data on service trade receipts are compiled on an annual basis. In 1963 a survey will be developed to estimate the physical and dollar value of retail inventories for specific groups of large durable goods items, and the service trade survey will be expanded to provide monthly data.

2. *Manufacturing and industrial statistics.*—Periodic surveys are made of production, shipments, orders, and materials consumed for important commodities. Data on manufacturers' sales, orders, and inventories for total industry and major industry groups are provided monthly. An annual survey of manufactures produces data on manufacturing establishments and measures of factory operations. In 1963, additional periodic surveys will be undertaken for important new products, data on manufacturers' sales and orders will be compiled weekly, and the improved textile program initiated in fiscal 1960 by Business and Defense Services Administration will be continued as a regular Census program.

3. *Agriculture statistics.*—Information is compiled on cotton ginned at 11 dates during the ginning season.

4. *Foreign trade and shipping statistics.*—Monthly, quarterly, and annual reports are published on the kind, quantity, shipping weight, dollar value of imports and exports, and mode of shipping. In 1963, the commodity classifications used in export statistics will be revised to agree with the standard industrial classifications used in measuring production, and the publication of the annual reports, Foreign Commerce and Navigation of the United States, will be resumed.

5. *Population statistics.*—Current estimates are maintained of the number of households, the farm population, school enrollment, personal income, population mobility, and other characteristics of the population, as well as annual estimates and projections of future population of the United States and of each of the States. In 1963, the methods of estimating population for States and metropolitan areas will be improved, work initiated on a register of addresses of dwelling units to facilitate censuses and surveys, and quarterly surveys of consumer buying anticipation will be established as a regular Census program.

6. *Construction and housing statistics.*—Monthly reports are published for housing starts, the number of dwelling units and the value of residential construction authorized by building permits, and on construction costs. Quarterly data on housing vacancies and expenditures for residential alterations and repairs are published and development work has begun on construction price indices. In 1963, a quarterly survey of non-Federal public construction and a quarterly index of changes in house prices will be initiated.

7. *State and local government statistics.*—Reports are published annually providing national estimates of total governmental finances, employment, and payrolls, and comparative statistics for State governments and larger cities. In 1963, quarterly estimates of revenues and expenditures will be provided.

8. *Statistical abstract and special reports.*—Seasonally adjusted business cycle indicators are published monthly. The Statistical Abstract, issued annually, summarizes government and private statistics on the industrial, social, political, and economic activities of the United States. A report showing for each county in the United States the number and kind of all business establishments, and their employment and payrolls is published on a biennial basis. In 1963, presentation of Statistical Abstract data will be improved and a regular program of supplements to the Abstract will be initiated.

The 1964 Census of Agriculture will provide by State and county an enumeration of farms by selected characteristics and a similar geographic tabulation of that portion of the population employed in agriculture. Records of land, produce, livestock and poultry, farm machinery, cash expenditures, etc., will be established for each area. During 1963 all work will be preparatory involving chiefly detailed geographic subdivision, review of questionnaires, listing and up-dating special farm records, planning and pretesting field enumeration, and programming for computer processing of the data.

COAST AND GEODETIC SURVEY

Current authorizations:

SALARIES AND EXPENSES

For expenses necessary to carry out the provisions of the Act of August 6, 1947, as amended (33 U.S.C. 883a-883i), including [uniforms or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131); lease of sites and the erection of temporary buildings for tide, magnetic or seismological observations;] hire of aircraft; operation, maintenance, and repair of an

airplane; pay, allowances, gratuities, transportation of dependents and household effects, and payment of funeral expenses, as authorized by law, for [not to exceed an annual average of 185] an authorized strength of 200 commissioned officers on the active list; [payments under the Uniform Services Contingency Option Act of 1953;] and pay of commissioned officers retired in accordance with law; [\$18,725,000] \$22,500,000, of which [\$809,000] \$840,000 shall be available for retirement pay of commissioned officers and payments under the Retired Serviceman's Family Protection Plan: Provided, That during the current fiscal year, this appropriation shall be reimbursed for at least press costs and costs of paper for charts published by the Coast and Geodetic Survey and furnished for the official use of the military departments of the Department of Defense: Provided further, That this appropriation shall be available for construction of a seismological vault and a recorder building on private property, on a long term lease basis. (5 U.S.C. 591, 597; 33 U.S.C. 851, 852, 853a-853r, 854-858, 860-870, 873, 874, 883a-883i; General Government Matters, Department of Commerce, and Related Agencies Appropriation Act, 1962.)

Undelivered orders.....	981	423	1,225	865	810
Total.....	2,198	423	3,066	2,972	2,878

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1960, \$146 thousand (1961 adjustments, \$11 thousand); 1961, \$2,572 thousand; 1962, \$813 thousand; 1963, \$345 thousand.

The survey makes oceanographic, geodetic, and magnetic surveys to obtain a better understanding of the ocean and to provide cartographic data for the production of aeronautical, nautical, and special-purpose charts; disseminates seismological and astronomical data; and conducts basic and applied research and development in fields within the competence of the bureau. The scope of operations is worldwide.

Increases for 1963 are primarily to support an expanded agency role in oceanography, increased requirements for aeronautical charts, geodetic and geophysical surveys, improvement of ship base facilities, and expansion of the research and development program.

Direct program—1. *Oceanography*.—Oceanographic, hydrographic, circulatory, tide and current surveys including the observation, recording, processing, analysis and publication of the resulting data needed for the understanding and utilization of the world's oceans for economic as well as navigational purposes. A supplemental appropriation for 1962 is anticipated for separate transmittal.

[In thousands]

	1961 actual	1962 estimate	1963 estimate
Square nautical miles surveyed.....	113	134	237
Lineal miles of hydrography.....	82	109	115

2. *Physical sciences*.—Geodetic, geophysical and cartographic data are provided for charting and scientific purposes and for defense needs. Surveys are made in the United States and its possessions to determine the horizontal and vertical positions of a network of control points which are permanently marked on the ground for topographic, geologic, and other types of mapping, and for planning large scale engineering projects. Field data produced in connection with the topographic survey activities of other agencies also are adjusted and computed so as to be suitable for introduction into the national network of second order geodetic control.

[In thousands]

	1961 actual	1962 estimate	1963 estimate
Horizontal control: Area (square miles) surveyed.....	36	37	42
Vertical control: Linear miles of leveling..	4	5	5

Through a cooperative effort with universities and other governments, earthquakes are investigated to determine their severity and to obtain engineering data for the design of earthquake-resistant structures and information concerning ground movements. Fourteen seismograph stations are operated by the Bureau. A seismic seawave warning service also is provided.

3. *Navigational chart production*.—Nautical and aeronautical charts are compiled from field survey data, and distributed to civil and military users for safe navigation of ships and aircraft. A supplemental estimate for 1962 is anticipated for separate transmittal.

Miscellaneous receipts returned to the Treasury for the sale of charts and related publications were \$834 thousand in 1961 and are estimated to be \$875 thousand during 1962 and \$925 thousand in 1963.

[In thousands of charts printed for civil use]

Airport, radio facility, etc.....	13,798	25,000	30,000
Coast pilots, tide and current tables....	81	85	85

4. *Research and development*.—This activity includes basic and applied research and development to oceanography, geodesy, geomagnetism, seismology, cartography, photogrammetry, gravimetry, astronautics, and related supporting fields.

Reimbursable program.—Special hydrographic and geodetic surveys and seismographic investigations are undertaken, and the resulting data processed for use by other Federal agencies. Nautical, aeronautical, and airport obstruction charts of the United States and its possessions are provided to user agencies when required. Reimbursements from non-Federal sources are primarily for special hydrographic services for the AT&T and geodetic surveys conducted for the States under the Interstate Highway Program.

The Inland Waterways Corporation, in liquidation, is engaged in the collection of debt and policing the operations of the purchasing carrier, Federal Barge Lines, Inc.

Under the repayment schedule, the debt owed the Federal Government will be fully repaid by June 30, 1969. The United States is earning interest at the rate of 4% until June 30, 1964, with the remaining years at 5%.

Budget program.—Administrative costs cover policing and incidental expenses. Reserves are established at the estimated liability for suits against the Corporation.

Operating results.—Net income of \$193 thousand is expected in 1962, representing excess of interest income over expenses.

SHIP CONSTRUCTION

For construction-differential subsidy and cost of national-defense features incident to construction of ships for operation in foreign commerce (46 U.S.C. 1152, 1154); for construction-differential subsidy and cost of national-defense features incident to the reconstruction and reconditioning of ships under title V of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1154); and for acquisition of used ships pursuant to section 510 of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1160); [\$98,000,000,] to remain available until expended, \$50,000,000, and, in addition, not to exceed \$2,800,000 may be transferred to this appropriation from the appropriation for "Shipbuilding and conversion, Navy," for the cost of national-defense features: Provided, That transfers may be made to the appropriation for the current fiscal year for "Salaries and expenses" for administrative and warehouse expenses (not to exceed \$3,150,000) and for reserve fleet expenses (not to exceed \$500,000), and any such transfers shall be without regard to the limitations under that appropriation on the amounts available for such expenses. (75 Stat. 273; General Government Matters, Department of Commerce, and Related Agencies Appropriation Act, 1962.)

This program covered all post-war construction activity prior to 1955. Final costs have been determined and all obligations completely liquidated. During 1961, \$100 thousand was transferred to Maritime training as authorized by 62 Stat. 172. The remaining unrequired balance of \$21 thousand is in the process of being paid over to the Treasury.

OPERATING-DIFFERENTIAL SUBSIDIES (LIQUIDATION OF CONTRACT AUTHORIZATION)

For the payment of obligations incurred for operating-differential subsidies granted on or after January 1, 1947, as authorized by the Merchant Marine Act, 1936, as amended, and in appropriations heretofore made to the United States Maritime Commission, [\$182,000,000,] \$225,000,000 to remain available until expended: *Provided*, That no contracts shall be executed during the current fiscal year by the [Federal Maritime Board] Secretary of Commerce which will obligate the Government to pay operating-differential subsidy on more than two thousand four hundred voyages in any one calendar year, including voyages covered by contracts in effect at the beginning of the current fiscal year. (75 Stat. 273; General Government Matters, Department of Commerce, and Related Agencies Appropriation Act, 1962.)

This appropriation provides for the payment of subsidies to ship operators in order to maintain a United States flag merchant marine in support of U.S. foreign commerce and with the capability of serving as a naval auxiliary in time of war or national emergency. To be eligible for subsidy, an operator must provide regular services on an essential trade route, show that Government aid is necessary to place the operation on a parity with its foreign competition, and employ vessels constructed in the United States and manned by U.S. citizens. The operations for

which subsidy support is projected are detailed in the following table:

	Maximum voyages under contract	Voyages undertaken	Estimated obligation
Past years:			
Calendar year 1947-1958.....		16,323	\$876,555
Calendar year 1959.....	1,996	1,718	155,737
January to June 1960.....	¹ 1,994	847	80,727
Fiscal year 1961.....	1,984	1,709	166,000
Budget estimate, existing contracts, and pending applications:			
Fiscal year 1962.....	2,000	1,724	177,000
Fiscal year 1963.....	2,000	1,735	180,000

¹ Annual.

The budget estimate reflects contract authority for conduct of 1,735 voyages.

During calendar year 1960 the 15 subsidized operators incurred business expenses totalling \$769.3 million in the operation of 300 ships. The items of expense for which subsidies are paid and amount thereof prior to recapture are detailed in the following table for calendar year 1960 voyages (in millions of dollars):

	Wages	Subsistence	Maintenance and repair	Insurance	Other vessel operating expense
Total expense.....	194.3	12.1	29.1	35.8	109.9
Subsidy accrual.....	139.0	2.9	9.5	16.2	-----
Average subsidy rate.....	71.55	23.81	32.68	45.41	-----
Percent of each item to total.....	82.9	1.7	5.7	9.7	-----

Passenger and freight services.—During calendar year 1960, 30 passenger or passenger/cargo ships and 270 cargo ships were engaged in subsidized voyages over routes detailed in the following table:

	From parts on—			
	Atlantic	Gulf	Pacific	Great Lakes
To: Northern Europe.....	46	15	-----	-----
Mediterranean.....	22	9	-----	4
Indian Ocean.....	8	-----	-----	-----
Far East.....	14	15	41	-----
Australia and Oceania.....	8	-----	5	-----
South America.....	27	14	14	-----
Africa.....	24	11	-----	-----
Caribbean.....	8	6	-----	-----
Round-the-world.....	9	-----	-----	-----

Recapture of excess profits.—All contracts for operating subsidy provide that 50% of the net profits earned from the contractors' subsidized operations and services incident thereto which over a 10-year period exceed 10% of capital necessarily employed shall be withheld from payments

made by the Government. This recapture is effected annually based upon the cumulative profits earned since the beginning of the recapture period. The estimate for the current and budget years, shown in the Program and financing schedule, assumes that the past year profit experience of each operator will be continued.

Status of unfunded contract authorization.—The computation and approval of final subsidy rates and audit of annual accountings will make it possible to make payments of 100% of subsidy payable on account of operations prior to December 31, 1959. The \$85,253 thousand unpaid subsidy, as of June 30, 1963, represents amounts withheld pending final rate and audit determinations for operations subsequent to 1959, plus estimated amounts earned in the final quarter of 1963 for which bills will not be presented or paid during the year. A supplemental estimate to liquidate contract authorization for 1962 is anticipated for separate transmittal.

Proposed for separate transmittal:

OPERATING-DIFFERENTIAL SUBSIDIES (LIQUIDATION OF CONTRACT AUTHORIZATION)

Status of Unfunded Contract Authorization (in thousands of dollars)

1. *Transportation systems analyses.*—Conduct of transportation systems analyses to provide a sound basis for relating trade requirements to specific ship types and to ports and terminals, and to measure expected return of research efforts in development of new techniques, facilities, and equipment.

2. *Mechanized ship development.*—Concentrated effort leading to an orderly transition from conventional to mechanized ship operation through engineering studies, detailed design, fabrication, installation and testing of components and integrated automated systems.

3. *Advanced ship design and development.*—Research and development in the areas of advanced ship design; advanced concepts such as the hydrofoil and ground effects principle; improved nuclear ship propulsion; and supporting research.

4. *Labor and management problems.*—Studies of labor and management problems arising from increased mechanization of ship operations and cargo handling.

5. *Vessel supporting services.*—Servicing and maintaining the NS *Savannah*, and for development and conduct of supporting functions related to operation of the ship.

6. *Experimental ship operations.*—Operation of the NS *Savannah*. Funds for operations in 1962 were supplied from the Vessel operations revolving fund. In 1963 an amount will be transferred from this appropriation to the fund to cover the loss incurred by the fund because of experimental ship operations.

1. *Administrative expenses.*—Shown here are the expenses of administering most of the functions of the Maritime Administration, including operating-differential subsidy contracts, ship construction activities, ship operations and chartering, auditing, and property management. Administrative expenses in connection with maritime training, general agency ship operation, and new ship construction are provided in other funds. Under the provisions of Reorganization Plan No. 7, functions funded from this appropriation for the Federal Maritime Board

have been transferred to the Federal Maritime Commission.

2. *Maintenance of shipyard facilities.*—One Government-owned reserve shipyard will be maintained in a partial state of readiness for defense purposes.

3. *Operation of warehouses.*—Three warehouses store materials and equipment for vessel operations, repair and outfitting of reserve fleet ships, and reserve shipyards. In addition, such materials will be retained in two port storage warehouses on the east coast.

4. *Reserve fleet expenses.*—Provision is made for the preservation and security of 928 merchant vessels maintained for national defense purposes and limited preservation of 400 Liberty ships as a commercial shipping reserve.

This program provides for the training of officers for service in the maritime industry.

1. *Merchant marine cadet training.*—The Merchant Marine Academy at Kings Point, N.Y., is a permanent institution (70 Stat. 25). A 4-year course of training is provided, including 1 year of sea duty, designed to qualify graduates for licenses as merchant marine officers. The Academy provides subsistence, quarters, tuition, uniform and textbook allowances and medical care for the cadets.

2. *Cadet training office.*—This office provides staff assistance to the Maritime Administrator on training matters, assists in the selection and appointment of cadets, and maintains liaison with the State marine schools.

MARITIME [ACTIVITIES] ADMINISTRATION— Continued

Current authorizations—Continued

STATE MARINE SCHOOLS—Continued

The States of Maine, Massachusetts, New York, and California maintain schools for the training of merchant marine officers, with Federal assistance given in the form of (a) direct grants of \$75 thousand, if matched by State appropriations and if out-of-State students are enrolled; (b) allowance to cadets for uniforms, textbooks, and subsistence; and (c) repairs to Federal training vessels loaned to the schools.

The Maritime Academy Act of 1958 (72 Stat. 622) provides contract authority for the Secretary of Commerce to enter into agreements with States to provide these grants and allowances over a 4-year period. This act provides contract authority without limit as to amount or fiscal year. For purposes of the program and financing schedule, the new obligational authority includes the estimated obligations to be incurred under this existing authority. Maintenance and repair of training vessels will continue to be accomplished through annual appropriations.

Program by activities:			
Payments of claims (total program costs—obligations) (object class 25).....		18	
Financing:			
New obligational authority (appropriation).....		18	

During 1962 \$18 thousand was authorized under this head to permit payment of four claims arising out of vessel operations activities of the War Shipping Administration. No requirement is anticipated for 1963.

GENERAL PROVISIONS—MARITIME ADMINISTRATION

No additional vessel shall be allocated under charter, nor shall any vessel be continued under charter by reason of any extension of chartering authority beyond June 30, 1949, unless the charterer shall agree that the Maritime Administration shall have no obligation upon redelivery to accept or pay for consumable stores, bunkers, and slopchest items, except with respect to such minimum amounts of bunkers as the Maritime Administration considers advisable to be retained on the vessel and that prior to such redelivery all consumable stores, slopchest items, and bunkers over and above such minimums shall be removed from the vessel by the charterer at his own expense.

Notwithstanding any other provision of this Act, the Maritime Administration is authorized to furnish utilities and services and make necessary repairs in connection with any lease, contract, or occupancy involving Government property under control of the Maritime Administration, and payments received by the Maritime Administration for utilities, services, and repairs so furnished or made shall be credited to the appropriation charged with the cost thereof: *Provided*, That rental payments under any such lease, contract, or occupancy on account of items other than such utilities, services, or repairs shall be covered into the Treasury as miscellaneous receipts.

No obligations shall be incurred during the current fiscal year from the construction fund established by the Merchant Marine Act, 1936, or otherwise, in excess of the appropriations and limitations contained in this Act, or in any prior appropriation Act, and all receipts which otherwise would be deposited to the credit of said fund shall be covered into the Treasury as miscellaneous receipts. (75 Stat. 274; General Government Matters, Department of Commerce, and Related Agencies Appropriation Act, 1962.)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedule of the parent appropriations as follows:
 "Commodity Credit Corporation fund," Department of Agriculture.
 "Construction of surveying ships," Coast and Geodetic Survey.
 "Plant acquisition and construction," Atomic Energy Commission.
 "Operating expenses," Atomic Energy Commission.
 "Mutual security—economic," funds appropriated to the President.
 "Civil Defense and Defense Functions of Federal Agencies," Office of Emergency Planning.

Under Title XI, Merchant Marine Act, 1936, as amended, the Maritime Administration received authority to insure construction loans and mortgages, with aggregate outstanding balances of up to \$1 billion, on certain types of cargo and passenger-carrying vessels and other watercraft. Pursuant to Public Law 84-1024 (70 Stat. 1119), the Fish and Wildlife Act of 1956 (16 U.S.C. 742e), authority to insure mortgages on fishing vessels, with amounts of loans outstanding at any one time limited to \$10 million, has been transferred to the Department of the Interior.

Budget program.—In 1961, custody of the SS *Coast Progress* was taken pursuant to foreclosure proceedings and two defaulted mortgages with a combined balance, including accrued interest, of \$1.0 million were assumed. A liability of \$0.5 million to the general fund was established to reflect the amount still due the U.S. Government under the first mortgage, which was acquired by this fund upon default without cash outlay. A payment of \$0.5 million was also made for acquisition of the second mortgage, guaranteed by the Maritime Administration. No new mortgage defaults are reflected in these estimates for 1962 and 1963.

Operating results and financial condition.—As of June 1961, balances outstanding plus commitments for additional ship mortgages total \$464 million. The outstanding balances for loans and mortgages at the end of 1962 and 1963 are projected at \$550 and \$650 million, respectively.

During 1961 nine advances totaling \$1,002 thousand were made to mortgagors, with depleted working capital, to meet mortgage installments. Through June 30, 1961, a total of \$1,131 thousand had been advanced, of which \$222 thousand had been repaid, leaving a balance of \$909 thousand. No advances are estimated for 1962 or 1963.

In the event of new mortgage defaults the fund is authorized to borrow from the Treasury. Earnings, resulting from premium and interest receipts, are retained to meet possible additional requirements for advances or defaults. The 1962 estimate reflects (a) liquidation of \$2,659 thousand of the fund's liability to the general fund, and (b) repayment of a \$1.4 million loan from Treasury. The estimate for 1963 reflects the liquidation of the \$552 thousand liability to the general fund.

This fund, created in 1951, finances direct operation and charter of cargo vessels for transport of military and national interest cargo. It is also used for the operation of Government-owned experimental vessels (70 Stat. 531). The initial appropriation to the fund of \$20 million has been repaid to the Treasury.

Budget program—1. Vessel operation.—Cargo vessels are operated by private operators acting as agents of the Maritime Administration to carry shipments for the Military Sea Transportation Service.

2. Charter operations.—As of June 30, 1961, there were three Government-owned vessels under charter to private operators.

3. Experimental ship operations.—The world's first nuclear-powered cargo/passenger ship, the *NS Savannah*, will go into service in 1962 under general agency agreement. During the period covered by these estimates the *Savannah* will be operated jointly by the Atomic Energy Commission and the Maritime Administration. During the experimental period the vessel will carry no revenue producing cargo. The estimate provides for the cost associated with actual operation and maintenance of the *Savannah* and covers the period extending from startup test and trials into a period of experimental operation through June 30, 1963. During this period the ship will visit major U.S. and foreign ports as a part of the experimental operating program.

Operating results and financial conditions—1. Vessel operation.—Rates charged the Military Sea Transportation Service cover full costs arising under general agency agreement for ship operations. During 1961 the fund was charged with a loss of \$1,240 thousand as a result of inventory adjustments resulting from the sales of surplus warehouse stock and a loss by fire at the Kearny, N.J. warehouse.

2. Charter operations.—The net loss of \$38 thousand in 1961 and \$2 thousand in 1962 is the result of the fund absorbing the cost of bunker fuel purchases from deactivated chartered vessels. A net income of \$53 thousand is anticipated in 1963 after meeting \$26 thousand in costs for bunker fuel.

3. Experimental ship operations.—The full costs of the *NS Savannah* program is charged to the fund; however, costs for maintaining and operating the nuclear propulsion plant and related costs, including service contracts, test and trials, associated crew salaries, etc., and procurement of spare parts are reimbursed to the fund from Atomic Energy Commission. During 1963 the fund will also be reimbursed for losses incurred in operation of the *Savannah* from the appropriation Research and development. Over the 3-year period revenue totaling \$8,916 thousand represents reimbursements from Atomic Energy Commission and Research and development appropriations; the net loss of \$301 thousand in 1961 and \$1,401 thousand in 1962 is the result of the fund absorbing certain costs such as agent's compensation, maintenance and operation of the servicing vessel, *Atomic Servant*, as well as 3 months operating costs of the *NS Savannah* during 1962.

This fund was established to provide war risk insurance in the event that commercial insurance is not available at reasonable terms and conditions (46 U.S.C. 1281, 1283). Commercial war risk insurance policies are at present subject to an automatic termination clause upon the outbreak of war (whether there be a declaration of war or not) between any of the following countries: United States of America, United Kingdom (or any other member of the British Commonwealth), France, the Union of Soviet Socialist Republics, the People's Republic of China, and exclude any claim for loss, damage or expense arising out of any prior hostile act or acts by any of the said countries resulting in such outbreak of war and occurring within a period of 90 days preceding such outbreak of war.

As of June 30, 1961, interim binders for war risk hull, protection and indemnity, and second seamen's insurance which become effective upon the outbreak of war, had been issued covering approximately \$5 billion of insurance. War risk insurance was also in effect on 34 American vessels under construction in shipyards in the United States, covering the prelaunching period, totaling approximately \$132 million of insurance.

MARITIME [ACTIVITIES] ADMINISTRATION— Continued

Public enterprise funds—Continued

WAR RISK INSURANCE REVOLVING FUND—Continued

Budget program.—At the request of the Secretary of the Navy, second seamen's war risk insurance is provided without premium, as authorized under sections 1205-6 of title XII of the Merchant Marine Act of 1936, on tankers operated for the account of the Military Sea Transportation Service. On June 30, 1961 a total of 19 tankers were covered under this program. All losses on such insurance paid through this fund are reimbursed to the fund by the Secretary of the Navy. Expenses of the fund therefore consist only of fees paid to underwriting agents and for contract appraisal costs.

Financing.—Transfer of \$10 million is authorized from the Vessel operations revolving fund if necessary as an emergency measure (65 Stat. 747). To date no transfers have been made and none are anticipated in 1962 or 1963. In addition, revenue is provided by insurance premiums and fees paid for the issuance of interim binders and builder's risk insurance.

Operating results.—The Government's investment consists entirely of retained earnings totaling \$2,347 thousand on June 30, 1961. Retention of these earnings is necessary for this program to get underway immediately upon the outbreak of a national emergency.

Total financing.....	6,248	7,233	6,202

Note.—Reimbursements from non-Federal sources include payments for repairs, services, and utilities furnished lessees of Maritime-controlled property, donations to the Merchant Marine Academy at Kings Point, N.Y. (50 U.S.C. 1154), proceeds from turn-in of personal property (40 U.S.C. 481(c)), provision of statistical services (15 U.S.C. 189(a), 192), refund of terminal leave payments (5 U.S.C. 61b), and jury fees (5 U.S.C. 30p).

The Maritime Administration will receive in 1962 and 1963 reimbursements from the Department of Agriculture for storage of grain in reserve fleet vessels and for partici-

pation in the surplus dairy products program; Department of State for maintenance of a record of ship characteristics of vessels belonging to NATO nations; the Atomic Energy Commission for its share of the administrative cost relating to testing and operation of the *NS Savannah*; the Department of Commerce for administrative expenses incurred in connection with construction of vessels for account of the Coast and Geodetic Survey; in 1962 only, the General Services Administration for custody of the Alameda, Calif., reserve training station and reserve shipyard; and Department of Defense for work in connection with preservation and maintenance of surplus merchant-type Navy vessels.

Reimbursements are made to the appropriation for salaries and expenses from the appropriations for ship construction and research and development to cover administrative and other expenses incurred in connection therewith.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1960, \$716 thousand (1961 adjustments -\$60 thousand); 1961, \$629 thousand; 1962, \$629 thousand; 1963, \$629 thousand.

The Office administers laws governing the granting of patents for invention and the registration of trademarks. In 1963 a start will be made toward modernization of the Office's methods of handling applications and its role in stimulating technological development. In addition to augmenting resources to deal with increasing patent application growth and complexity, funds are provided for an improved system of training professional patent personnel and for modernization of both management and operational techniques. Receipts from fees were \$7.6 million in 1961, and are estimated to be \$7.7 million in 1962 and \$7.9 million in 1963 under existing legislation. Legislation is proposed which would increase fees to eventually recover approximately 75% of the cost of Patent Office operations.

1. *Examination and adjudication of patent applications.*—Applications are examined to determine the patentability of claimed inventions; and quasi-judicial functions are performed in appeal or interference proceedings within the Office. Specifications and drawings of successful applications are printed and the issuance of patents is regularly published.

BUREAU OF PUBLIC ROADS

Current authorizations:

LIMITATION ON GENERAL ADMINISTRATIVE EXPENSES

(Trust fund)

Necessary expenses of administration and research (not to exceed \$33,400,000 \$37,600,000), including maintenance of a National Register of Revoked Motor Vehicle Operators' Licenses, as authorized by law (74 Stat. 526), and purchase of forty-seven passenger motor vehicles of which [thirty] forty-four shall be for replacement only, shall be paid, in accordance with law, from appropriations made available by this Act to the Bureau of Public Roads and from advances and reimbursements received by the Bureau of Public Roads.

Of the total amount available from appropriations of the Bureau of Public Roads for general administrative and research expenses pursuant to the provisions of title 23, United States Code, section 104(a), \$100,000 shall be available for carrying out the provisions of title 23, United States Code, section 309. (23 U.S.C. 303, 307, 313; General Government Matters, Department of Commerce, and Related Agencies Appropriation Act, 1962.)

Program and Financing (in thousands of dollars)

Financing:			
Unobligated balance lapsing.....	175		
Limitation.....	31,470	33,400	37,600

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1960, \$791 thousand; 1961, \$648 thousand; 1962, \$648 thousand; 1963, \$648 thousand.

Expenses for administration of the Federal-aid highway programs and for carrying on highway research are met by deductions from Federal-aid authorizations. Administrative services for other programs of the Bureau of Public Roads and for road construction programs of

other Federal agencies are initially financed from this activity and reimbursements of their pro rata share of administrative costs are collected periodically from these programs. Increases provide additional staff to permit more adequate field review of project actions in the conduct of the Federal-aid highway program and to strengthen research, planning and safety activities of the Bureau. Additional support is provided for direct and cooperative research projects.

1. *Engineering and administration.*—Provides for direct management of field operations, long-range planning and development of policies and procedures to implement highway legislation, and control of Federal-aid funds authorized for use by the States. The field operations of the Bureau are organized in 10 regions with division offices in each of the States, the District of Columbia, and Puerto Rico. These offices are responsible for administering the Federal-aid highway programs within the States; assisting in the development of adequate State programs for highway planning, research, engineering, construction and maintenance; and carrying out direct Federal highway projects.

2. *Highway research.*—Provides for direct and cooperative research projects. Supervision is exercised in coordinating research carried out with 1½% grant funds provided the States under 23 U.S.C. 307(b).

3. *Training program.*—Provides for recruitment of civil engineering graduates and developmental training for engineer and administrative trainees, including their placement throughout the organization.

4. *Promotion of highway safety.*—Provides leadership and support for highway safety activities designed to assist in reducing the large human and economic loss to the Nation through highway accidents. Support of the National Driver Register Service and the President's Committee on Traffic Safety is provided under this activity.

Transfer from "Highway trust fund" to liquidate contract authorization.....	2,688,692	2,990,600	3,250,000

Grants are made to States for construction and improvement of Federal-aid highways. Authorizations are provided in the Federal-Aid Highway Act of 1956 to cover 90% of the costs of completing the 41,000-mile National System of Interstate and Defense Highways, and to match State funds on a 50-50 basis for the primary, secondary and urban programs. The Federal share of the cost is increased in those States with large areas of public domain. Payments to the States are made out of transfers from the Highway trust fund into which are deposited certain percentages of tax receipts on motor fuel, tires and tubes, tread rubber, trucks, buses, trailers, and truck use.

The Federal-Aid Highway Act of 1961 authorized additional appropriations for the Interstate program which, based upon the latest cost to complete the system, will insure the orderly prosecution of the program and completion by 1972 as was intended by the Congress in the 1956 Highway Act. The 1961 Act also provided increased revenues to finance these increased authorizations. Additional annual authorizations of \$950 million are anticipated for 1964 to provide for continuation of the Federal-aid primary, secondary, and urban programs and is available for use in the year prior to the year for which authorized.

As of October 1, 1961, more than 11,250 miles on the 41,000-mile Interstate System were open to traffic. Over half (6,719 miles) was built or improved under the Federal-aid Interstate program, most of it under the 90 percent Federal, 10 percent State matching program launched in 1956. Toll roads, bridges and tunnels incorporated in the system totaled 2,270 miles. In addition to the sections open to traffic, 4,774 miles were under construction with Interstate funds, and engineering and right-of-way acquisition was in progress on another 10,336 miles. Thus on October 1, 1961, some form of work was underway or completed on 26,362 miles of the 41,000-mile system—about 65% of the total system mileage.

Construction projects involving 125,333 miles in the regular Federal-aid programs (primary, secondary, and urban) have been completed since July 1, 1956, at a total cost of \$8.0 billion, and contracts involving 24,771 miles at a cost of \$2.9 billion were authorized or underway as of October 1, 1961. In addition, \$551 million of engineering work and right-of-way acquisition had been completed and \$407 million was underway.

Actual and estimated progress of Federal-aid programs are summarized in the following tables (dollars in thousands):

PAYMENTS UNDER CONTRACT AUTHORIZATION

(In thousands of dollars)

Fiscal year:	Contract authorization ¹	Unobligated contract authorization end of year	Federal payments	Projects opened		
				Number	Total cost	Federal share
1956.....	2,000,000	1,939,236	740,343	6,650	1,695,808	885,000

FEDERAL-AID HIGHWAYS (TRUST FUND)

Under proposed legislation, 1963.—Legislation will be proposed to authorize \$950 million for each of the years 1964 and 1965 for the ABC Federal-aid highway programs (primary, secondary, and urban).

IMPROVEMENT OF THE PENTAGON ROAD NETWORK (TRUST FUND)

For expenses necessary for the improvement of routes on the Pentagon Road Network, to be conveyed to the Commonwealth of Virginia, as authorized by the Act of September 26, 1961 (75 Stat. 670), to remain available until expended, \$2,500,000, to be derived from the Highway Trust Fund.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, \$0; 1963, \$394 thousand.

Public Law 87-307 approved September 26, 1961 (75 Stat. 670), authorizes an appropriation for improvement of certain roadways on the Pentagon road network. This appropriation item will implement the authorization and enable the Bureau of Public Roads to improve these roadways to meet current traffic needs and convey title and maintenance responsibility to the Commonwealth of Virginia. These funds are to be used for this purpose only at such time as the Commonwealth of Virginia has agreed to accept conveyance of these roadways and they have been designated as part of a Federal-aid highway system.

Appropriation to liquidate contract authorization.....	27,000	27,400	35,000

1. *Construction.*—Main highways within or adjacent to the national forests are constructed and improved. Projects are jointly selected by the States, the Forest Service, and the Bureau of Public Roads on the basis of their contribution to meeting traffic requirements within the national forests. Authorizations are apportioned by States on the basis of a formula which uses as factors the national forest area and value in each State. Contract authorizations of \$33 million are available for 1961, 1962, and 1963. The 1963 estimate finances the balance of the 1961 authorization provided by the Federal-Aid Highway Act of 1958, and \$27.2 million, a portion of the 1962 authorization provided by the Federal-Aid Highway Act of 1960. Contract authorization of \$33 million is anticipated for 1964 to continue this program and is available for use in the year prior to the year for which authorized.

Actual and estimated progress of the program are summarized in the following table (dollars in thousands):

Fiscal year	Annual authori- zation ¹	Miles completed	Unobligated balance, end of year	Obliga- tions for projects	Expendi- tures
1957.....	\$30,000	497	\$27,997	\$23,424	\$21,502
1958.....	35,000	352	38,632	23,621	22,676
1959.....	33,000	429	38,490	32,250	27,798
1960.....	33,000	481	43,733	26,879	27,812
1961.....	33,000	469	43,478	31,949	30,900
1962.....	33,000	550	41,016	34,000	32,993
1963.....	² 33,000	550	38,471	34,000	35,000

¹ Each fiscal year authorization becomes available for obligation not later than January 1 in the preceding fiscal year.

² Under proposed legislation.

2. *Administration.*—In addition to administration this covers the costs of engineering supervision of the program.

3. *Forest Service Administration.*—Payments to the Forest Service are made to cover its administrative and engineering costs in connection with the Forest highway program.

The Central American section of the Inter-American Highway comprising approximately 1,550 miles is being constructed in cooperation with the Republics of Guatemala, El Salvador, Honduras, Nicaragua, Costa Rica, and Panama. These republics pay one-third of the cost of highways through their countries and have assumed responsibility for their future maintenance. Available appropriations will be fully utilized during 1962 and approximately \$32 million will be required in future years to complete construction to adequate standards. A supplemental is anticipated for 1963 to partially fund its completion.

Total transfers and balances.....	3,044,480	3,435,063	3,657,284

The Highway Revenue Act of 1956 (70 Stat. 374) provides for the transfer from the general fund of sums equal to certain percentages of taxes received on gasoline, diesel fuel, trucks, buses, tires, etc. The Secretary of the Treasury estimates the amounts to be so transferred. In turn annual appropriations are authorized from this trust fund to Federal-aid highways (trust fund). Amounts in the fund not currently required are invested in U.S. securities, and interest thereon is added to the fund.

In order to provide revenues which will permit completion of the Interstate System by 1972 and continue the Federal-aid primary, secondary and urban highway programs at authorized levels anticipated during that period, the Federal-Aid Highway Act of 1961 increased the rates on certain taxes deposited into the Highway trust fund and extended the fund to September 30, 1972. The Act continued gasoline and diesel fuel taxes at 4 cents a gallon; increased taxes on tires and inner tubes from 8 and 9 cents per pound, respectively, to 10 cents per pound; increased the tax on tread rubber from 3 cents to 5 cents per pound; increased the use tax on highway vehicles of more than 26,000 pounds gross weight, from \$1.50 to \$3 per thousand pounds per year; and provided for transfer of all revenues from the 10% excise tax on trucks, buses, and trailers to the trust fund after June 30, 1962. The Act also repealed the provision which would have transferred on July 1, 1961, to the Highway trust fund, the revenue from five-eighths of the 8% excise tax on automotive parts and accessories, and half of the 10% excise tax on passenger automobiles.

The above schedules also reflect action being proposed in 1963 to retain the revenues from aviation gasoline taxes in the general fund after December 31, 1962 instead of depositing them in the Highway trust fund.

The status of the fund is as follows (in thousands of dollars):

	1961 actual	1962 estimate	1963 estimate

NATIONAL BUREAU OF STANDARDS

The National Bureau of Standards is the agency of the Federal Government responsible for the national standards of physical measurement. Against these standards, all the working standards of the Nation—those used by scientists and engineers in research and development, those used by industry in the measurement and production of interchangeable parts, and those used by other Government and State agencies to ascertain conformity—are calibrated. Closely associated with the standards activity, the Bureau serves science, industry, and Government as a national laboratory conducting research and development on methods of measurement and instrumentation; determining fundamental physical constants and basic properties of materials; developing improved methods for testing materials and equipment; developing codes and specifications; and assisting other Government agencies through advisory services on technical problems and by invention and development of devices to meet special needs.

Current authorizations:

RESEARCH AND TECHNICAL SERVICES

For expenses necessary in performing the functions authorized by the Act of March 3, 1901, as amended (15 U.S.C. 271-278e), including general administration; operation, maintenance, alteration, and protection of grounds and facilities; and improvement and construction of facilities as authorized by the Act of September 2, 1958 (15

NATIONAL BUREAU OF STANDARDS—Continued

Financing:			
Unobligated balance lapsing.....	175		
New obligational authority (appropriation)	19,753	23,500	30,000

¹ Includes capital outlay as follows: 1961, \$36 thousand; 1962, \$40 thousand; 1963, \$70 thousand.

² Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1960, \$562 thousand; 1961, \$410 thousand; 1962, \$472 thousand; 1963, \$771 thousand.

This will provide for an important expansion of research programs and increased procurement of scientific equipment. The Bureau's programs of basic and applied research, development of instruments and methods of measurement, and general technical services are classified under six major activities.

1. *Physics and electronics*.—This includes the work of the metrology, heat, atomic physics, radiation physics, electricity, radio standards, instrumentation and data processing systems divisions. These divisions are primarily responsible for the Bureau's research underlying the national standards of physical measurement needed for our advancing technology and broadening range of scientific exploration. Particular emphasis will be given to standards for radio and microwave quantities, measurement and standards problems in plasma physics and astrophysics, and high-temperature standards and measurement methods.

2. *Chemistry and metallurgy*.—This includes the work of the analytical and inorganic chemistry, organic and fibrous materials, metallurgy, physical chemistry and mineral products divisions. These divisions will continue their emphasis on research on the fundamental properties of materials under varying environmental conditions and on the preparation and analysis of high-purity substances.

3. *Mechanics and engineering*.—This includes the work of the mechanics, building research, and cryogenic

engineering divisions. These divisions will contribute to the Bureau's high-temperature and high-pressure standards programs and will conduct studies of the engineering properties of materials at extremely high and low temperatures.

4. *Radio propagation*.—This includes the work conducted by the divisions comprising the Central Radio Propagation Laboratory at Boulder, Colo., and supplementary field stations. The program for 1963 includes basic research on upper atmosphere physics, tropospheric physics, and theoretical and experimental research in plasma physics and astrophysics.

5. *General services*.—This includes those technical programs of the Bureau that are primarily directed toward supporting other activities of the Bureau as well as the calibration and standard samples services provided to the States. Included are the applied mathematics division, the office of weights and measures, the reactor group, and certain special research programs.

6. *Payment to Working capital fund*.—Additional equipment required in support of the research programs will be procured by the Bureau's Working capital fund and added to the depreciable equipment inventory of that fund. It is estimated that in 1963 payments of \$1.5 million will be made from the Research and technical services appropriation to the Working capital fund to finance these capital outlays.

RESEARCH AND TECHNICAL SERVICES (SPECIAL FOREIGN CURRENCY PROGRAM)

For purchase of foreign currencies which accrue under title I of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1704), for the purposes authorized by section 104(k) of that Act, to remain available until expended, \$1,000,000, which shall be available to purchase currencies which the Treasury Department shall determine to be excess to the normal requirements of the United States; *the Treasury Department determines to be excess to the normal requirements of the United States, for necessary expenses of the National Bureau of Standards, as authorized by law, \$1,000,000, to remain available until expended; Provided, That this appropriation shall be available, in addition to other appropriations to the Bureau, for the purchase of the foregoing currencies.* (7 U.S.C. 1701, 1704; 15 U.S.C. 271-278e; 5 U.S.C. 596a; General Government Matters, Department of Commerce, and Related Agencies Appropriation Act, 1962.)

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1961 \$0; 1962, \$940 thousand; 1963, \$1,429 thousand.

National Bureau of Standards responsibilities for basic and applied research, improvement of standards, and

dissemination of information on properties of materials, measurement techniques, and radio propagation are of sufficient breadth to permit utilization of research capabilities in other countries. The foreign currency program supplements the Bureau's existing program, allows an acceleration of research effort in selected areas, and results in economies to the Bureau's regular appropriations.

The 1962 program, authorized by section 104(k) of the Agricultural Trade Development and Assistance Act of 1954, will be continued in 1963. It will utilize foreign currencies determined by the Treasury Department to be excess to normal requirements of the United States to secure the services of scientific talent of three countries in which these currencies are available. A cost of \$17 thousand U.S. dollars, charged to the appropriation for Research and technical services, will be required for the administration and technical supervision of the program.

PLANT AND FACILITIES

For expenses incurred, as authorized by section 1 of the Act of September 2, 1958 (15 U.S.C. 278c-278e), in the acquisition, construction, improvement, alteration, or emergency repair of buildings, grounds, and other facilities including a [nuclear research reactor and associated laboratories; a warehouse and an addition to the cryogenics laboratory and equipment for the main laboratory building, Boulder, Colorado; a standard frequency broadcast station (including land and equipment); land for an access road to a radio field station; a building and seawall at Maui, Hawaii] plasma physics building, a radio warning service building, and a paint shop; design of a radio standards laboratory; and procurement and installation of special research equipment and facilities, therefor; [\$10,000,000] \$2,100,000, to remain available until expended[: Provided, That the limitation under this head in the Department of Commerce and Related Agencies Appropriation Act, 1960, on the full cost of additions to the radio laboratory building is increased from "\$1,215,000" to "\$1,450,000"]. (15 U.S.C. 271-278e; 40 U.S.C. 14a; 5 U.S.C. 596a; General Government Matters, Department of Commerce and Related Agencies Appropriation Act, 1962.)

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1960, \$167 thousand; 1961, \$1,159 thousand; 1962, \$5,995 thousand; 1963, \$2,925 thousand.

This will provide for construction and improvements to the plant and facilities of the National Bureau of Standards and procurement of major special facilities. The Bureau's laboratories and administrative offices occupy 86 buildings on a 68-acre tract in Washington, D.C. The Bureau also has a large laboratory on a 217-acre site at Boulder, Colo., and several small radio field stations, some of which are outside the continental limits. In addition, the Bureau has a new site near Gaithersburg, Md., on which facilities are being built to replace those in Washington, D.C.

Operating costs—1. *Improvements and modifications*.—Noncapitalized maintenance and repair projects are charged to operating costs.

3. *Special Facilities*.—Noncapitalized facilities projects are charged to operating costs. No new programs are anticipated in 1963.

Capital outlay—1. *Improvements and modifications*.—The budget includes \$160 thousand for minor capital improvements of a general nature required for the Bureau's laboratories and field stations. Other minor im-

NATIONAL BUREAU OF STANDARDS—Continued

Current authorizations—Continued

PLANT AND FACILITIES—Continued

provements, when of a special, project-related character, are charged to the appropriation for Research and technical services. Noncapital alterations are charged to the operating costs of this appropriation.

2. *General Construction.*—The budget includes \$720 thousand for the construction of a plasma physics building, \$137 thousand for the construction of a radio warning service building, \$730 thousand for the design of a radio standards laboratory, and \$53 thousand for the construction and equipping of a paint shop. Anticipated costs in 1963 include \$465 thousand for additional facilities at the Boulder laboratories financed in prior years as well as \$1,075 thousand associated with the budget year projects.

3. *Special facilities.*—This activity includes the acquisition of large equipment items and any building construction and land acquisition associated with them. The budget includes \$150 thousand for the purchase and installation of a grazing incidence vacuum spectrograph, and \$150 thousand for the acquisition of a mobile very low frequency receiving facility. Anticipated costs in 1963 include \$82 thousand for the development of an atomic frequency standard and \$3,330 thousand for the construction of a nuclear research reactor, both financed in prior years, and \$300 thousand for the two projects in 1963.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1960, \$1,765 thousand; 1961, \$10,999 thousand; 1962, \$48,365 thousand; 1963, \$43,453 thousand.

This appropriation finances the construction, equipping, and occupancy of new laboratory, administrative, and service buildings now being constructed on a site near Gaithersburg, Md., to house the activities of the National Bureau of Standards now conducted in Washington, D.C. The new facilities are replacements for present facilities and do not provide for new programs, although they will house certain equipment for radiation physics research and large force measurements not heretofore available.

The first of the construction program was provided in the 1961 budget. The 1962 budget provided for an addi-

tional increment of the program, including construction of four general-purpose laboratory buildings and administration, shops, and warehousing buildings. The 1963 budget provides for the final increment of the program, including construction of three general-purpose laboratory buildings and three special-purpose laboratory buildings, completion of site development and utilities work, and financing of equipment purchases and moving and occupancy costs.

1. *Design and engineering.*—Detailed planning and preparation of architectural designs and engineering drawings will be virtually completed by the end of 1962 except

for some of the special-purpose facilities. Estimated costs for 1963 cover principally preparation of invitations to bid, bid analysis and awarding of construction contracts, and construction supervision. The proposed appropriation will complete the financing of the construction supervision costs.

2. *Site acquisition.*—It is anticipated that court action in the condemnation proceedings for the Gaithersburg site will be completed during the current year. No further costs are estimated under this activity after 1962.

3. *Construction.*—This activity includes the construction of laboratories and other buildings, including mechanical and electrical equipment, special laboratory services, site development, and utilities. Costs estimated for 1963 reflect continued activity on the items included in the first and second construction increments as well as initial activities under new contracts.

4. *Equipment.*—Estimated costs for major scientific facilities are primarily for the linear electron accelerator and the large force measurement equipment financed by the 1961 appropriation. These facilities will be donated to the Bureau's Working capital fund and no depreciation charged against their use.

The budget for 1963 provides funds for the remaining large items of equipment. It includes also funds for many smaller items, the replacement or acquisition of which is necessitated by the relocation program. These items will be purchased through investment of working capital and the cost will be recovered by depreciation charges made during the expected useful life of the respective items. Payment of not more than \$3 million from the Construction of facilities appropriation to the Working capital fund to provide the necessary capital has been authorized. Authorization for the payment of an additional \$6,250 thousand from the appropriation to the fund is proposed in 1963.

5. *Moving and occupancy.*—This activity includes the costs of moving and installing scientific apparatus as well as certain semifixed furnishings for laboratory, library, cafeteria, and other areas. Estimated costs for 1963 are for furnishings for the buildings under construction and for moving of equipment into the first completed buildings. The proposed appropriation will finance the balance of the cost of furnishings and all of the moving costs.

The fund finances from advances and reimbursements all operations of the National Bureau of Standards except major construction projects. The principal of the fund, as of June 30, 1961, consisted of \$5 million in appropriations, \$1.8 million in capital provided by appropriations of the Bureau, and \$43 million in net donated assets. The Government investment is estimated to grow through donation of cash and other assets financed by National Bureau of Standards' appropriations to \$109 million by June 30, 1963.

Operating costs.—1. *Technical program.*—Research and technical services are conducted by the National Bureau of Standards on the request of other Government agencies and the public, as well as in support of the Bureau's own research program. The total research and development program conducted on contract with other agencies is expected to decline as the Bureau's own appropriation increases, although in certain of the Bureau's divisions the demands of the missile and space programs are expected to result in increases in other agency programs. The provision of mathematical computation services to other agencies and the provision of calibration services to the public and other agencies are also expected to increase.

2. *Plant improvement and special equipment.*—This activity includes the costs of the Working capital fund which are reimbursed from the Bureau's capital outlay appropriations. The plant improvements and special equipment procured are donated to the fund upon completion and carried as assets of the fund at cost.

Capital outlay.—Working capital of the fund is invested in equipment which is subject to depreciation charges. In 1963 the equipment requirements of the expanded Bureau research program will require an augmentation of working capital, which will be accomplished through payments to the fund for additional capital from the National Bureau of Standards' appropriation for Research and technical services. Some of the equipment for the new laboratories of the Bureau will be purchased as investments of the fund, the additional capital being provided by payments from the appropriation for Construction of facilities. All other equipment and facilities financed by Bureau appropriations are shown as donated assets of the fund.

Operating results.—Retained earnings at the end of each year are transferred to Treasury the year following. This amounted to \$228 thousand in 1961 and is estimated at \$39 thousand and \$110 thousand in 1962 and 1963, respectively.

Total selected resources	4,532	4,496	4,450	4,434

The Weather Bureau measures, records, reports, forecasts, and distributes information on weather conditions and river stages for the benefit of U.S. commerce, industry, agriculture, and the general public.

1. *Weather measurements and forecasts.*—Regularly scheduled forecasts are issued for U.S. territory and waters with special emphasis on severe storms. Special forecast and advisory services are provided for international and domestic aviation; fire-weather forecasts are furnished to assist in conservation of timber resources; and fruit-frost forecasts and warnings are prepared for areas where such crops form a major economic interest. Surface and upper-air weather measurements are taken at several hundred locations to serve forecasting requirements. Current weather information is disseminated widely for the benefit of aviation and other interests.

Expansion of the Bureau's observation and service facilities is designed to keep pace with more exacting air-traffic control requirements as well as to advance general weather services. Augmentation of upper air observations over the oceans will assist the national oceanographic effort as well as the Bureau's forecast programs.

2. *River and flood forecasts and warnings.*—The hydrologic service furnishes flood warnings and public forecasts of river height and flow on the country's principal rivers and their tributaries. The estimate provides for a modernized river forecast center in California.

3. *Climatology.*—The climatological service seeks to determine and record the various types of climate, to explain the causes of these climates, their variation, trends, geographical locations, and the effect climate has on the economy of the Nation, and to communicate this intelligence in such a manner as to insure the fullest realization of its potential benefits. The increase for 1963 provides for the decennial climatological census, and the State Climatologist Program.

WEATHER BUREAU—Continued

Current authorizations—Continued

SALARIES AND EXPENSES—Continued

4. *Administration.*—This activity provides executive direction and administrative support to the Salaries and expenses, Research and development, and Establishment of meteorological facilities appropriations.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1960, \$0; 1961, \$1,549 thousand; 1962, \$1,406 thousand; 1963, \$1,406 thousand.

Research is conducted to increase fundamental knowledge of the science of meteorology and in order to improve the accuracy and timeliness of weather forecasts; the development program is concerned with new instrumentation and procedures, including related activities of test and evaluation.

1. *Meteorological.*—(a) *Hurricane, tornado and other severe storms.*—To discover why and where these storms will form, when they will intensify, and how they will move so as to provide improved warnings to the public. (b) *Atmospheric processes and forecasting methods.*—Research on fundamental meteorological problems such as the physical basis for the global circulation of the atmosphere, the physics of clouds and precipitation, and short and long range weather forecasting. (c) *Aviation.*—A program of research and development to improve terminal and enroute weather forecasts and warnings for civil and military aviation operations. (d) *Satellite.*—Development of instrumentation for meteorological satellites and conduct of basic and applied research using data from meteorological satellites. (e) *Instrumental.*—The development and testing of improved instrumentation and automation methods.

The increase in 1963 provides for purchase of two research aircraft, rental of an ultra high speed electronic computer, and expanded level of ocean-atmosphere studies.

2. *Hydrologic.*—Efforts are concerned with improving techniques for forecasting river heights and with the utilization of weather radar to permit issuance of flash flood warnings. The increase for 1963 provides for increased water resources studies.

3. *Climatic.*—Methods of analysis and presentation of climatic information are developed for application to operational and planning aspects of business, industry, commerce, and agriculture.

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1960, \$1,511 thousand; 1961, \$1,610 thousand; 1962, \$3,542 thousand; 1963, \$3,835 thousand.

The accuracy of weather measurements, forecasts, and warnings is being improved by the procurement and installation of new instrumental equipment and by the modernization of existing facilities. The 1963 estimate is to carry forward the modernization program begun in 1956 to make possible a more accurate aviation weather system and more timely hurricane and tornado warnings. The cost of operating and maintaining equipment in-

stalled under this appropriation is covered by the appropriation Salaries and expenses.

1. *Upper-air observational facilities.*—Consists of ground installations to continuously track radio transmitters carried to altitudes of 100,000 feet by sounding balloons. It also includes shelters for the equipment and miniaturized equipment for use on shipboard to obtain measurements of high altitude weather conditions over the oceans.

2. *Weather surveillance radar.*—Provides a continuous picture of changing weather conditions up to 250 miles from the stations, facilitating the preparation of forecasts and increasing the advance-warning time.

3. *Surface observational facilities.*—Modern electronic instruments that provide continuous automatic measurements of cloud height, visibility, temperature, humidity, wind direction and velocity, including computers to convert these data for use in controlling air traffic.

4. *Construction of facilities.*—Covers construction of office and housing units at places where these facilities are not available from any other source and construction of office space at airports where rent-free space is no longer available.

5. *Engineering and technical support.*—Provides staff for planning, site surveys, actual installation, and initial calibration of equipment.

The following table lists the major facilities already funded and those budgeted in 1963:

	Funded through 1962	Proposed 1963

WEATHER BUREAU—Continued

Current authorizations—Continued

METEOROLOGICAL SATELLITE OPERATIONS

For expenses necessary to establish and operate a system for the continuous observation of worldwide meteorological conditions from space satellites and for the reporting and processing of the data obtained for use in weather forecasting, [including services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), \$48,000,000] \$45,000,000 to remain available until expended: *Provided*, That payments of [(a)] not to exceed \$285,000 may be made to the appropriation for the Weather Bureau for the current fiscal year for "Salaries and [expenses," and (b) not to exceed \$600,000 may be made to the General Services Administration for construction of additional office space] *expenses*"; *Provided further*, That this appropriation shall be available for payment to the National Aeronautics and Space Administration for procurement, in accordance with the authority available to that Administration, of such equipment or facilities as may be necessary to establish and operate the aforesaid system. (15 U.S.C. 311-313, 325-328; 72 Stat. 783; Supplemental Appropriation Act, 1962.)

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1961, \$0; 1962, \$37,163 thousand; 1963, \$38,725 thousand.

The Weather Bureau will establish and operate a system for continuously observing worldwide meteorological conditions by space satellites and for the reporting and processing of the data thus obtained for use in weather forecasting.

1. *Spacecraft and launching.*—This activity involves the procurement of spacecraft and launch vehicles and launching of spacecraft.

2. *Data acquisition and communications.*—This activity involves the construction of stations for command of spacecraft and acquisition of data, processing of the data so that it is in a form suitable for transmission, and actual transmission of the data from the satellite readout facilities to the National Meteorological Center at Suitland, Md.

3. *Central data processing, analysis, and technical management.*—Data received from the data acquisition stations are converted into form suitable for analysis and use in daily weather forecasting and meteorological services and are processed for archival use. This activity also provides technical and administrative support for the operational meteorological satellite program.

GENERAL PROVISIONS—DEPARTMENT OF COMMERCE

SEC. 202. During the current fiscal year applicable appropriations and funds available to the Department of Commerce shall be available for the activities specified in the Act of October 26, 1949 (5 U.S.C. 596a), to the extent and in the manner prescribed by said Act.

SEC. 203. Appropriations in this title available for salaries and expenses shall be available for hire of passenger motor vehicles; services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), but, unless otherwise specified, at rates for individuals not to exceed \$75 per diem; and uniforms, or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131).

DEPARTMENT OF DEFENSE—MILITARY

MILITARY PERSONNEL

ACTIVE FORCES

The following narrative statement covers the active duty appropriations for the Army, Navy, Marine Corps, and Air Force.

1. *Pay and allowances.*—This provides for the pay and allowances of military personnel on active duty, including cadets and midshipmen at the three Service academies, aviation cadets, and other officer candidates. It also provides for the Government's contribution to the Federal old-age and survivors insurance trust fund under the Servicemen's and Veterans' Survivor Benefits Act, purchase of individual clothing for initial issue to enlisted personnel, replacement clothing issues in Korea, and payment of clothing maintenance allowances.

The number of active duty military personnel provided for is shown in the following table. These estimates are subject to adjustment for changes in the international situation.

Additional amounts required in 1962 by the Army to support the numbers of personnel in the above table are shown under proposed for separate transmittal.

Provision is made for amounts otherwise available as quarters allowances to be paid (a) to the revolving fund for Wherry Act housing, in cases where such housing is assigned as public quarters, (b) as mortgage payments on Capehart housing, (c) to the Commodity Credit Corporation in payment for foreign currencies used to construct family housing, (d) to the operation and maintenance appropriations to maintain and operate surplus commodity housing, and (e) for payment to an appropriate account for construction of military family housing.

Selected enlisted personnel in critical skill areas and a limited number possessing special proficiency in other military skills are provided additional pay in the amount of \$30 per month for the P-1 rating and \$60 per month for the P-2 rating. The numbers provided for in the estimates, as of the end of each fiscal year, are as follows:

	1961 actual	1962 estimate	1963 estimate
Defense total.....	206,010	234,338	253,665

MILITARY PERSONNEL—Continued

ACTIVE FORCES—Continued

2. *Subsistence in kind.*—This provides for the purchase of food supplies for issue as rations to enlisted personnel, including emergency and operational rations.

3. *Permanent change of station travel.*—This provides for permanent change of station travel for individuals and groups of military personnel and their dependents, including dislocation and separation travel allowances, storage of household goods in commercial facilities, and transportation of personal property. Payment for services furnished by the Military Sea Transportation Service and Military Air Transport Service for transportation to and from overseas of military personnel, their dependents, household goods, and automobiles is also included.

4. *Other costs.*—This provides for expenses of apprehension of deserters and escaped military prisoners, payment of interest on money deposited by enlisted personnel, payment of death gratuities to beneficiaries of military personnel, and payment of premiums on servicemen's mortgage insurance.

Current authorizations:

MILITARY PERSONNEL, ARMY

For pay, allowances, individual clothing, subsistence, interest on deposits, gratuities, permanent change of station travel (including all expenses thereof for organizational movements), expenses of temporary duty travel between permanent duty stations, for members of the Army on active duty (except those undergoing reserve training), expenses of apprehension and delivery of deserters, prisoners, and members absent without leave, including payment of rewards of not to exceed \$25 in any one case, [\$3,697,000,000] \$3,733,000,000, and, in addition [\$340,000,000, of] \$350,000,000 which [\$240,000,000] shall be derived by transfer from the Army stock fund, and [\$100,000,000 shall be derived by transfer from the Army industrial fund] the *Defense stock fund.* (10 U.S.C. 1035, 1475, 3536, 3687, 4561, 4562, 4741; 37 U.S.C. 31a-36, 231-238, 251, 253, 305; 38 U.S.C. 691a-g; 50 U.S.C. Under existing legislation, 1962.—Additional funds are anticipated due to the increase in the active duty strength of the Army from 1,008,000 to 1,081,100 determined to be necessary after enactment of the 1962 appropriation. Pursuant to the provisions of Executive Order 10957, two Army National Guard divisions and supporting units of the National Guard and Army Reserve were ordered to active duty, effective October 15, 1961. Continuation of the 73,100 increase through the end of fiscal year 1962 is estimated to add 52,000 man-years to the average strength.

MILITARY PERSONNEL, NAVY

For pay, allowances, individual clothing, subsistence, interest on deposits, gratuities, permanent change of station travel (including all expenses thereof for organizational movements), expenses of temporary duty travel between permanent duty stations, for members of the Navy on active duty (except those undergoing reserve training), midshipmen and aviation cadets, and expenses of apprehension and delivery of deserters, prisoners, and members absent without leave, including payment of rewards of not to exceed \$25 in any one case, [\$2,692,000,000] \$2,764,700,000, and, in addition, [\$55,000,000, of] \$25,000,000 which [\$35,000,000] shall be derived by transfer from the Navy stock fund, and [\$20,000,000 shall be derived by transfer from the Navy industrial fund] the *Defense stock*

RESERVE FORCES

The following narrative statement covers the appropriations for the reserve components of the Army, Navy, Marine Corps, and Air Force.

1. *Reserve and National Guard personnel.*—This program provides funds for training members of the Ready Reserve required for early mobilization needs of the active forces. Most of the paid reserve component personnel perform forty-eight or twenty-four drills and attend two weeks of active duty for training each year. Other personnel not requiring as intensive training receive only a period of active duty for training (usually two weeks) during the year. Active duty for basic training is provided for personnel enlisting in a reserve component who have not previously received military training. Service schools and special tours of active duty training provide additional training for limited numbers of the Ready Reserve.

The paid personnel strengths are summarized in the following table.

	YEAR-END NUMBER

¹ Number receiving training at any time during year.

Personnel for the reserve components are obtained from individuals with prior military service who have an interest or an obligation to train actively in the Ready Reserve or from those without prior service who are required to participate in an active duty training program of from 3 to 6 months or of 2 years. Enlisted personnel in paid drill status obtained each year from these sources are summarized below.

2. *Reserve officer candidates.*—The Reserve Officers' Training Corps program provides training for reserve officer candidates who have enrolled in the course while attending a collegiate institution at which an ROTC unit has been established. The curriculum includes instruction in military and academic subjects together with a summer active duty training period with the active forces. College graduates who satisfactorily complete the 4-year program are commissioned and are either ordered to active duty for a minimum period of 2 years or to a 4- to 6-month period of active duty training.

The Navy also provides training for candidates for commissions as regular officers who are selected on a nationwide competitive basis, appointed as midshipmen and required to complete a 4-year military training program while attending at government expense one of the 53 collegiate institutions at which Naval ROTC units have been established. Successful candidates, commissioned in the Regular Navy or Marine Corps, become career officers who are required to serve at least 4 years on active duty.

Students attending other colleges or universities may also enroll in a Naval or Marine Corps officer candidate program, attend prescribed summer military training programs, and receive a commission after graduation. They are then required to serve at least 3 years on active duty.

In addition, the Army and Air Force provide 2 years of basic military training for college students who elect, or are required by the college, to enroll in the course for the first 2 years but who are not required to be candidates for officer commissions. The Army also provides training for students who elect to enroll at 289 high schools in a junior program.

Average annual enrollments in these programs are summarized below.

4. Fleet reserve.....	81,852	108,216	126,012
5. Survivors' benefits.....	3,003	3,635	4,341
Total obligations (object class 13).....	787,806	920,000	1,029,000
Financing:			
Unobligated balance lapsing.....	1,694		
New obligational authority (appropriation)	789,500	920,000	1,029,000

This estimate includes funds for the pay of all military personnel on the retired lists of the Department of Defense. The estimate represents the consolidated requirements of the military departments for (a) payments to retired officers and enlisted personnel of the Army, Navy, Marine Corps and Air Force, (b) the retainer pay of regular enlisted personnel of the Fleet Reserve of the Navy and Fleet Marine Corps Reserve, and (c) survivors' benefits. The substantial gains to the retired rolls can be directly attributed to the greater number of individuals attaining eligibility for retirement after 20 or more years of active military service. The following tabulation shows the average number of personnel on the rolls during 1961 compared with the estimated numbers for 1962 and 1963:

AVERAGE NUMBER

Type of retirement	1961 actual	1962 estimate	1963 estimate
1. Nondisability.....	146,445	171,283	204,265
2. Temporary disability.....	14,765	15,608	16,523
3. Permanent disability.....	71,992	74,135	77,084
4. Fleet reserve.....	40,154	49,948	60,977
5. Survivors' benefits.....	2,558	3,062	3,598
Total.....	275,914	314,036	362,447

Under the provisions of the Uniformed Services Contingency Option Act of 1953, as amended, retired service personnel who elect to receive reduced amounts of retired pay are able to provide for monthly payments to be continued to their survivors. The reductions are determined on a basis designed to establish an actuarially sound sys-

tem. Current appropriations provide only for the net payments to be made each year, and the liability for future payments of survivor benefits is unfunded. Administrative expenses of this family protection plan are provided as operation and maintenance costs of the military services. The accumulated difference between reductions in retired pay and actual payments of survivor benefits is indicated in the following table:

[In thousands of dollars]

	1961 actual	1962 estimate	1963 estimate
Accumulated difference, prior years.....	29,018	34,948	41,081
Plus: Current reductions in retired pay....	8,933	9,768	11,233
Less: Payment of survivors' benefits.....	3,003	3,635	4,341
Accumulated difference, year end..	34,948	41,081	47,973

MILITARY PERSONNEL

Proposed for separate transmittal:

Program and Financing (in thousands of dollars)

	1961 actual	1962 estimate	1963 estimate
Program by activities:			
1. Basic allowance for quarters for military personnel.....			150,000
2. Retired pay.....			30,000
Total obligations.....			180,000
Financing:			
New obligational authority (proposed supplemental appropriation).....			180,000

Legislation will be proposed to provide that:

1. Basic allowances for quarters for military personnel will be increased to compensate for the increase in the costs of procuring such quarters since the last increase in 1952. It is estimated that the average increase will be 18½%.

2. The retired pay, retirement pay, retainer pay or equivalent pay of members or former members of the uniformed services entitled to such pay on May 31, 1958, shall be based on the pay scales which became effective on June 1, 1958, under the provisions of Public Law 85-422.

OPERATION AND MAINTENANCE

Current authorizations:

OPERATION AND MAINTENANCE, ARMY

For expenses, not otherwise provided for, necessary for the operation and maintenance of the Army, including administration; medical and dental care of personnel entitled thereto by law or regulation (including charges of private facilities for care of military personnel on duty or leave, except elective private treatment), and other measures necessary to protect the health of the Army; care of the dead; chaplains' activities; awards and medals; welfare and recreation; [information and educational services for the Armed Forces;] recruiting expenses; [meals furnished under contract for selective service registrants called for induction and applicants for enlistment while held under observation; subsistence of prisoners at disciplinary barracks, and of civilian employees as authorized by law; expenses of apprehension and delivery of prisoners escaped from disciplinary barracks, including payment of rewards not exceeding \$25 in any one case, and expenses of confinement of such prisoners in nonmilitary facilities; donations of not to exceed \$25 to each prisoner upon each release from confinement in a disciplinary barracks; military courts, boards, and commissions; authorized

Appropriation (adjusted).....	3,209,772	3,734,131	3,402,000

Note: Reimbursements from non-Federal sources are principally sales of surplus U.S. Government property, sales of goods and services to individuals, including laundry services, subsistence of hospital patients, surcharge on commissary sales and unofficial telephone service, and mutual security sales to foreign governments (10 U.S.C. 4621, 4624, 4625, 4626, and 4627; 22 U.S.C. 1816).

This appropriation provides for the day-to-day operations and activities of a 960 thousand-man Active Army and the Army Reserve. This includes the direct operational support of the Army forces deployed within United States and oversea commands; the maintenance and operation of facilities used for the recruitment, training, administration, and logistical support of these forces; and the maintenance of a mobilization base for the expansion of Army forces in the event of emergencies or war. The Active Army Forces include Army units assigned to the unified and specified commands in Europe, the Pacific, the United States and the Caribbean; and air defense units in the United States. They also provide for other combat forces and the substantial support and training forces associated with the combat units.

The 1962 and 1963 estimates support major improvements in the Army's readiness for both limited and non-nuclear general war. Major changes include an increase of two active Army divisions, the elevation of three training divisions to combat-ready status, and an expanded field exercise program, including strategic mobility exercises. This reorganization will materially increase the flexibility, mobility, and firepower of the divisions and will result in major increases in the amount of equipment in the hands of troops. Four regular infantry divisions will be mechanized.

Other major changes in 1963 are: the transfer of aircraft and missile parts inventories to the Army stock fund; the transfer of responsibility for funding communications equipment and major components, such as aircraft and tank engines, to the Army's procurement appropriation; the transfer of certain departmentwide activities to the new Operation and maintenance, Defense Agencies appropriation; and the transfers related to the establishment of the new Defense Communications and Defense Supply Agencies.

To accomplish the missions and activities, funds are required for the logistics system, which procures, stores, distributes, and maintains materiel; for expenses of the departmental and other major command headquarters; and local support costs. This latter category includes maintenance and repair of facilities, essential welfare and recreational activities, the maintenance of equipment, and local headquarters and administration.

This appropriation also provides for the expenses of administration and training of the Army Reserve Forces and for 4 to 6 months active duty training of Army Reserve and National Guard personnel at basic training centers, Army schools, and with Army units.

A 1962 supplemental appropriation of \$139.5 million is anticipated for separate transmittal to provide funds to finance the additional costs resulting from the call-up, on October 15, 1961, of two Army National Guard divisions and supporting units. The impact of these additional forces is reflected in the workload data below.

1. *Operating forces.*—This provides for the training and support of Army combat and combat support forces. These costs include the operation and maintenance of the installations where these units are stationed; and the operation and local maintenance of the weapons, aircraft, vehicles and other equipment assigned to the units. One-time costs related to the expansion of the Army in 1962 will not be required in 1963, but the readiness measures discussed above, including an increase in the number of divisions and the size of the Regular Army, and support of additional new equipment, will offset any savings to this budget program in 1963. Funds are also included in 1963 to improve the field maintenance of combat equipment and to initiate consumer purchase of aircraft and missile parts.

2. *Training activities.*—This provides for the training of individual officers and enlisted men as contrasted to the training of combat units. It includes two general types of training: training of career personnel with accent on doctrine, strategy, and tactics; and training in specific military skills such as missile maintenance, counter mortar radar operation, aircraft mechanics, electronic repair, financial management, languages, and the operation of complex and intricate weapons and equipment of the modern Army. Most individual training is conducted through the Army service schools and colleges which conduct resident courses of instruction for Army personnel, reserve forces trainees, personnel from other services, and foreign military personnel; prepare and administer nonresident training, such as extension courses; develop doctrine and techniques; and prepare Army training texts and publications.

In addition, this activity finances the U.S. Military Academy at West Point which provides instruction for approximately 2,400 cadets annually for careers as Army officers; tuition costs for officers and enlisted men in training at non-military institutions; and the production

of training devices, simulators, training films, and other visual training aids.

3. *Central supply activities.*—This program finances the worldwide Army supply system which is controlled through commodity managers at 21 national inventory control points. Here up-to-date inventory records are kept on the quantity, location, and condition of Army stocks worldwide; and requirements are determined as a basis for materiel maintenance and procurement. In support of commodity management, current catalogs and data are maintained on about 710 thousand items, cyclical supply control studies are made, and requisitions are processed. In 1963 the Army will operate 84 depots which will receive, store, and care for the multibillion dollar inventory, and ship an average of 12,700 tons of supplies each workday.

This program also provides for the execution of the central procurement program of about \$4.8 billion, including contracting, contract administration, inspection, preparation of specifications, standardization, real estate administration, and industrial support measures for current procurement and mobilization. Provision is made for the expense of transportation of supplies between depots and from depots to the points of use, and the operation of the Army ports in the United States and overseas. In doing this the Army ships approximately 6 million short tons by inland line haul and approximately 4 million measurement tons by ocean transport annually. Included also is the maintenance and protection of standby production facilities for use in the event of mobilization.

The major change in this program in 1963 is the transfer to the new Defense Supply Agency of the Military Traffic Management Agency, the Military Clothing and Textile Supply Agency, the Military Subsistence Supply Agency, the Military General Supply Agency, the Military Construction Supply Agency, and the Military Automotive Supply Agency, and 3 installations. However, in 1963 this program is funded to continue to provide significant support to the Defense Supply Agency in materiel storage and distribution.

A summary of total workload data specifically related to the central supply activities program follows (including reimbursable workload):

	1961 actual	1962 estimate	1963 estimate
Supply depots	87	85	84
National inventory control points.....	26	26	21
Line items processed	52,648,000	65,300,000	35,000,000
Short tons received	2,376,000	3,491,000	2,641,000
Short tons shipped	2,830,000	3,100,000	2,837,000
Short tons in storage ¹	9,599,000	9,506,000	9,763,000

¹ Excludes strategic and critical materials which are General Services Administration owned.

4. *Major overhaul and maintenance of materiel.*—This activity assures that Army equipment is maintained in a ready-for-action condition. To meet this objective, world-wide maintenance management and assistance is provided to field commanders through maintenance publications, maintenance engineering services and technical assistance in the introduction and use of complex modern equipment; and the overhaul and modification of equipment and the renovation of ammunition and special weapons are provided as needed. This program also provides for the major overhaul of materiel for the Mutual Aid Program and for other Defense Agencies on a reimbursable basis.

Cost reduction is continually emphasized. Improved maintenance techniques, standards of performance, active product improvement programs, and improved manage-

OPERATION AND MAINTENANCE—Continued

Current authorizations—Continued

OPERATION AND MAINTENANCE, ARMY—Continued

ment practices are developed through maintenance engineering services and are implemented under the direction and guidance of national maintenance points. Personnel involved at all levels of maintenance are made aware of improved techniques and standards through the technical manuals and publications developed under this program.

Of the total funds (direct and reimbursable) available for this program, approximately 50% will be used for overhaul, modification, and ammunition renovation; and approximately 50% for maintenance assistance, engineering services and the procurement of basic issue list items, modification kits, and capital equipment.

Primary consideration has been given to those activities which support the readiness of equipment in the hands of the combat ready divisions, their supporting units, and the U.S. Army Air Defense Command. Since recent studies have shown that complete rebuild of $\frac{3}{4}$ ton, $2\frac{1}{2}$ ton, and 5 ton general purpose vehicles is uneconomical this rebuild is being discontinued.

5. *Medical activities.*—This activity covers the cost of medical care of Army active duty and reserve personnel, the dependents of active duty personnel, and, on a space available basis, retired personnel and their families. It includes the operation and maintenance of Army hospitals and certain other medical facilities, the costs of medical training for Army personnel, and operation of the Surgeon General's Office. It cost the Army \$15.4 million in 1961 for care of dependents of its military personnel in civilian hospitals and these costs are estimated at \$25.3 million in 1962 and \$21.4 million in 1963.

MEDICAL FACILITIES AND PATIENTS

	1961 actual	1962 estimate	1963 estimate
Army hospitals.....	84	85	85
Patients (average daily load):			
In Army hospitals:			
Active duty.....	6,825	8,082	7,663
Dependents.....	3,504	3,599	3,609
Others.....	2,027	1,981	1,996
In non-Army facilities:			
Active duty.....	1,205	1,207	1,207
Dependents:			
In Federal hospitals.....	593	609	609
In civilian hospitals.....	944	1,428	1,167
Others.....	262	277	282

6. *Armywide activities.*—This includes the management and direction of the Army and finances the headquarters in Washington, D.C., and the major field commands. In 1963 headquarters costs under this program will be reduced by the transfer of personnel and functions to the new Defense Supply Agency. Funds are provided for the operation and maintenance of those portions of the defense communication system assigned to the Department of the Army as well as certain strategic communication facilities required for the operation and security of Army forces worldwide. The Army Intelligence program operates the attaché system and the Army Intelligence Center, and covers counterintelligence, and technical and field intelligence. Communication and intelligence costs are decreased in 1963 due to the transfer of the procurement of major items of communications and intelligence equipment to the Army's procurement appropriation. Mapping and geodesy are accomplished to fulfill

the Army's assigned responsibility for ground mapping throughout the world, with added emphasis being placed on the more precise maps and geodesy required in the missile age. Miscellaneous administrative services are also provided for the entire Army, ranging from records centers and processing of military personnel to the education of dependents in oversea areas and financial accounting and auditing. Some of the workload indicators for this activity are:

	1961 actual	1962 estimate	1963 estimate
Records and publications centers.....	9	9	9
Personnel centers.....	16	14	14
Message groups handled (in millions).....	29,221	33,694	34,000
Students in dependent schools.....	70,910	81,000	91,000

7. *Army Reserve and Reserve Officers' Training Corps.*—This activity provides support for training and administering the Army Reserve and includes the cost of reserve training performed at local training sites and at summer camps. An average of 168 thousand Reserve Officers' Training Corps students at colleges and universities will be supported in 1963. Operation and maintenance of facilities in this program is limited to Corps headquarters, reserve training centers, and inactive installations used solely for summer training.

8. *Joint projects.*—This program collects under one heading those interdefense projects for which the Army has been assigned administrative or executive agent responsibility. Included herein are the necessary resources to provide: (a) joint educational facilities which enhance the preparation of selected personnel of the Armed Forces for the exercise of joint and combined high-level policy, command and staff functions and for the planning of national strategy; (b) international activities supporting national policy, principally in the field of inter-American relations; (c) unified command headquarters in Europe and Caribbean; and (d) classified activities. The 1963 funding decrease results from the transfer of activities from this program to the new Operation and maintenance, Defense Agencies appropriation.

Appropriation (adjusted).....	2,597,626	2,888,898	2,840,000

The primary objective of this appropriation is to operate and maintain naval forces in a high state of combat readiness. These include carrier striking forces, submarine forces, antisubmarine forces, amphibious forces and antiair warfare forces, whose major mission is to protect the sea lanes vital to the free world's survival and to project American power to the trouble spots of the world. Most of these forces are assigned to unified and specified commands. The routine operating and maintenance costs of the naval shore establishment which provides supply, overhaul, modernization, repair, training and other support services to the naval operating forces, are also financed from this appropriation.

In 1962, as a part of the increased defense measures ordered by the President, naval forces were increased by an additional attack carrier and associated air group, an antisubmarine carrier and associated air group, recall to active duty of 18 patrol and warning naval air reserve squadrons and 40 naval reserve training ships, and by the activation of other fleet support ships. Most of these additional units will not be retained in active service throughout 1963 although the average number of ships and planes will remain approximately level with 1962.

Funds are included for the operation of 12 Polaris submarines, an increase of three over the current year, and a further increase in our national deterrent power. The continued addition to the fleet of missile firing ships, modern, high performance jet aircraft such as the A2F attack aircraft and the F4H all-weather fighter will further augment combat capability.

In keeping with the increase in the number of missile-firing ships and aircraft, inventories of missiles and other ordnance continue to build up in 1963, requiring increased funds for the maintenance and checkout of Terrier, Tartar, Talos, Sidewinder and Polaris missiles, the Mk. 37 torpedo, and other ordnance.

The fleet maintains its readiness for combat through continued training and exercises. Ship steaming hours and aircraft flying hours, measures of the tempo of operational training, are programed at approximately the 1962 level of operations. In addition to fleet training, naval personnel receive individual training in the Navy's shore-based training establishment consisting of many forms of advanced technical and professional training. In 1963 a total of approximately 110,000 recruits will be given initial military training.

Navywide supply, communications, medical, Construction Battalion and family housing functions support the above operations. The navy supply system will manage over 1 million stock items and process 22 million separate supply actions. The worldwide naval communications system will transmit over 7 million messages at improved reliability, security and speed. Approximately 70,000 units of family housing are planned at end 1963. The Navy, as executive agent for the Defense Department, will continue to provide logistic support to the National Antarctic program. This support will include operation of the first nuclear powerplant, installation of modern equipment, and construction of more permanent facilities, at a cost of \$19.9 million in 1963.¹

Several important changes are reflected in the estimates for 1963. Functions and personnel have been transferred to the new Department of Defense agencies—the Defense Supply Agency and the Defense Intelligence Agency. New facilities will be operated in 1963, including communication stations at critical locations and the Fleet Computer Programming Center at Dam Neck, Va.

The funds proposed for this appropriation in 1963 will support a slightly higher force level (active and reserve) than was programed during 1962. Steps have been taken to increase combat capability within this force structure, while limiting expansion of programs not directly related to fleet readiness. Departmental administration, travel, furniture procurement, industrial mobilization, and similar supporting programs have been continued at current levels, or reduced.

1. *General expenses, Navy personnel.*—Modern naval operations dictate the recruiting and training of highly adaptable and capable personnel. The program includes training for 110,000 recruits, and technical, scientific, and professional training and education of officers and enlisted men. Reserve training activities provide for the training of over 140,000 reservists annually and support for about 13,000 NROTC midshipmen in civilian colleges. In addition, the Naval Academy annually prepares 3,900 midshipmen for officer careers. In 1963 this activity will fund for the first time the support costs

¹ Direct charges to this appropriation, \$11 million; other appropriations, \$2.2 million; these charges do not include an additional \$6.7 million estimated statistical costs.

of residual functions and activities remaining at the Naval Weapons Plant after termination of industrial operations, and those at the Naval Air Station, Anacostia, upon cessation of flight operations. These costs, estimated at \$8.9 million, represent the administrative overhead and buildings maintenance previously funded in other activities and other appropriations.

	1961 actual	1962 estimate	1963 estimate
Average training load.....	66,633	70,480	74,134

Naval schools.....	144	144	144
Reserve training activities.....	462	453	453

2. *Weapons and facilities.*—Naval and Marine Corps aircraft operations in support of the military missions assigned to the Navy include the principal combat type operating forces, such as attack and antisubmarine carrier air groups, Marine Corps air wings, and land-based patrol squadrons, and supporting utility, transport, and base aircraft and units. Extensive flight training is programed to provide the skilled pilots and crews to perform these complex and diversified missions. Flight operations in 1963 for the Regular Navy are below the 1962 level due to the decrease in numbers of aircraft and units as a result of the return to the reserve forces of squadrons that were called to active duty in 1962. Additional aircraft and flying hours have been programed for the reserve forces in 1963. The growing inventories of missiles and other ordnance result in further increases in funds for their maintenance, while the costs of operating and maintaining high performance aircraft continue to rise as greater numbers are added each year. The shore establishment providing logistic support for these weapons systems includes air stations, ammunition depots and magazines, ordnance plants and other activities.

	1961 actual	1962 estimate	1963 estimate
Average operating aircraft:			
Regular.....	6,005	6,485	6,392
Reserves.....	727	700	836
Flying hours:			
Regular (in millions).....	3.12	3.38	3.25
Reserves (in millions).....	.37	.37	.38
Aircraft reworks.....	4,311	5,101	4,346
Aviation training:			
Pilots completing training.....	1,479	1,430	1,700
Technical (average load).....	9,608	10,625	12,107
Tons of ammunition received, stored and issued (in thousands).....	1,061	1,056	1,140

3. *Ships and facilities.*—The Navy plans to operate 862 active fleet ships and 88 Naval Reserve training ships in 1963. These provide the multipurpose attack, amphibious, antisubmarine, and antiair warfare forces, continually deployed in the major trouble spots of the world to assist in carrying out American policy. As part of the buildup in strength in 1962, the active fleet was increased by 79 ships, of which 40 are Naval Reserve training ships that will return to their former status by the end of 1963. During 1963, combatant ships scheduled for overhaul will have installed new equipment that is expected to result in significantly improved capability, particularly in the areas of communications, sonar, radar, and aviation. Cost increases in 1963 relate primarily to this alteration and improvement program, as well as the greater numbers of larger, more expensive ships under-

going overhaul, but are more than offset by decreases due to the reduced fleet rehabilitation and modernization program and the non-recurring costs in 1962 of activating 33 ships. Maintenance and support program levels are consistent with past years, with certain specific adjustments to meet new system requirements such as for Polaris, guided missile and nuclear propulsion systems.

	1961 actual	1962 estimate	1963 estimate
Ships (end of year).....	819	898	862
Steaming hours.....	1,974,000	2,164,000	2,133,000
Ship overhauls.....	319	330	374
Fleet rehabilitation and modernization program (number of ships modernized).....	27	31	10
Naval Reserve training ships.....	88	48	88

4. *Medical care.*—Medical care and hospitalization of Navy and Marine Corps personnel and their dependents is provided by operating naval hospitals, dispensaries, dental clinics, and other specialized medical facilities. Obligations for care of dependents in civilian hospitals in 1961 were \$22.8 million and obligations are estimated at \$24.8 million in 1962 and \$25.9 million in 1963. Measures of the level of operations at these activities are shown in the following table:

	1961 actual	1962 estimate	1963 estimate
Navy hospitals.....	25	25	25
Patients (average daily load):			
In Navy hospitals:

Dependents.....	1,781	1,869	1,929
Other.....	1,183	1,295	1,369
In other hospitals:			
Active duty.....	1,189	1,233	1,252
Dependents:			
In Federal hospitals.....	548	580	603
In non-Federal hospitals.....	1,135	1,173	1,204
Other.....	157	162	180

5. *Civil engineering.*—Civil engineering services for the naval establishment include plant maintenance, utilities, transportation, long-range construction planning, and contract administration of repair and utility contracts. Much of this work is accomplished at six public works centers operated in areas where several naval facilities are located, to provide central services common to the several facilities. The Seabee forces, comprised of 14 construction battalions, are also supported under this activity. These units are maintained in readiness to support the operating forces and also operate and perform construction at four bases from which Antarctic operations are conducted.

	[Dollars in thousands]		
	1961 actual	1962 estimate	1963 estimate
Number of Seabee battalions.....	15	14	14
Number of active duty Seabees.....	7,318	7,318	7,318
Value of contracts administered.....	\$68,000	\$70,000	\$74,000

6. *Service-wide supply.*—The workload of this activity is directly responsive to fleet, air, and shore station operations, including major procurement actions. This activity encompasses the major active forces logistical support, both continental and overseas, at shipyards, and at 15 major supply depots and centers. Planning and programing for this support, including procurement and requirements determinations, is accomplished by 10 supply demand control points of which the Aviation Supply Office at Philadelphia is the largest. The supply program and costs have been reduced as a result of the transfer of certain supply management functions to the Defense Supply Agency. Transportation costs of intra-Navy movement of material directed by these supply demand control

OPERATION AND MAINTENANCE—Continued

7. *Servicewide operations.*—Facilities and programs under the management control of the Chief of Naval Operations, including his headquarters staff, are the principal activities financed under this budget activity. Among these are naval stations, naval district headquarters, the naval communication system, the Naval Security Group, the Hydrographic Office, the Naval Observatory, naval intelligence and programing services for command and control systems. This activity also finances the operations of (1) the Offices of the Secretary of the Navy and his civilian executive assistants and the offices and field programs that provide him with servicewide staff assistance, (2) the Office of the Judge Advocate General of the Navy and (3) the Office of the Chief of Naval Research in administering the naval research program, the navy-wide patents program and the installation, maintenance and repair of training devices and aids for the Department of the Navy. Significant cost increases occur in communications, and command and control systems.

General.—The objective of the Marine Corps is to train and maintain the Fleet Marine Forces in a high state of

combat readiness for service with the Fleet in amphibious operations or for such duties as the President may direct. The Fleet Marine Forces, composed of three reinforced Marine divisions—aircraft wing teams and related support units, are assigned to the Atlantic and Pacific Fleets, which are naval components of unified commands. In 1963, the deployment of these forces will remain substantially unchanged, and there will be a continuation of the improved readiness position attained in 1962, as a result of the increase of Marine Corps strength to 190,000.

This appropriation principally supports the ground elements of the Fleet Marine Forces; the operations of the three Marine aircraft wings are financed primarily by the Operation and maintenance, Navy appropriation. Other units supported by this appropriation include Marine detachments aboard naval vessels, landing force training units, Marine Reserve ground forces, and the security forces that guard naval bases, U.S. embassies, and certain classified facilities. The major installations supported by this appropriation are:

	1961 actual	1962 estimate	1963 estimate
Operational and training bases	7	7	7
Supply activities	4	3	3
Security detachments	4	4	4
Administrative installations	2	2	2
Total	17	16	16

1. *Training and operations.*—Operational deployments of Fleet Marine Force units with the Atlantic and Pacific Fleets will continue in 1963 at the present tempo of activity. The Fleet Marine Forces training objectives stress the vertical envelopment doctrine in amphibious operations through major exercises by combined air and ground units. To support training objectives, the Corps recruits and trains military personnel and operates five major combat-unit support bases, two recruit training depots and one school.

Significant workload data for this activity are:

	1961 actual	1962 estimate	1963 estimate
Fleet Marine Forces (average number of military personnel)	94,905	105,754	111,445
Security forces (average number of military personnel)	11,765	12,025	11,923
Major field training exercises	9	7	8
Recruit training (average load)	9,675	10,807	10,926
Other training (average load):			
Officer	1,927	1,866	1,866
Enlisted	9,851	7,358	7,250

2. *Depot supply system.*—This activity includes the overhaul and preservation of major equipment and materiel and the receipt, issue and storage of materiel to support combat forces. Major equipment repair is programmed on the basis of balancing items repaired with new procurements to meet a maximum materiel readiness requirement within fund resources available. Supply activity workload is more directly related to the level of manning and operations of combat forces. Programing and planning for this logistic support is accomplished at the Marine Corps Supply Activity, Philadelphia; storage and issue functions are accomplished primarily at two major supply centers. In 1963, the Corps will continue a 4-year program of overhaul and modernization of amphibious landing vehicles commenced in 1962.

3. *Transportation of things.*—This activity provides funds for the movement of Marine Corps supplies within the continental United States and overseas, including stevedoring and port handling charges.

OPERATION AND MAINTENANCE—Continued

Current authorizations—Continued

OPERATION AND MAINTENANCE, MARINE CORPS—Continued

4. *Marine Corps Reserve training.*—The objective of this program is to provide a strong Reserve organization capable of rapid assimilation into the operating forces when needed. This activity finances the annual field training of Reserve units, maintenance and operation of Reserve training centers, and Marine Corps furnished supplies and equipment for ground and aviation units.

5. *Cataloging.*—This activity provides support for Federal stock numbering in accordance with the requirements of the Federal catalog system, cataloging, and publication and distribution of materiel lists.

6. *Military family housing.*—This activity finances the operation and maintenance of all Marine Corps family housing. Included are funds for the operation and maintenance of rental housing, public quarters, appropriated fund housing and Capehart and Wherry housing. Program costs increase in direct relation to the increased numbers of housing units.

	1961 actual	1962 estimate	1963 estimate
Average number of units.....	7,071	7,758	10,087
Number of units at end of year.....	7,327	8,561	10,051

7. *Departmental administration.*—The staff agencies of the headquarters, Marine Corps, which provide for the administration of the missions, functions, and world wide operations of the Marine Corps are funded in this activity. Included in the funding are the pay of civilian employees, costs of electronic data processing, printing and reproduction, and other expenses incident to the operation of staff offices of the Commandant.

Transferred from "Operation and maintenance, Navy" (5 U.S.C. 172f(a)).....		396	
Transferred to—			
"Operating expenses, National Archives and Records Services, General Services Administration" (41 U.S.C. 217(b)).....	-811		
"Operation and maintenance, Army" (5 U.S.C. 172f(a)).....	-5,200		
"Emergency fund, Department of Defense" (74 Stat. 355).....	-10,000		
"Operating expenses, Public Buildings Service, General Services Administration" (75 Stat. 353).....		-492	
Appropriation (adjusted).....	4,299,387	4,486,644	4,371,000

Note.—Reimbursements from non-Federal sources are principally sales of surplus U.S. Government property; and sales to individuals of goods and services, including subsistence of hospital patients, surcharges on commissary sales and unofficial telephone services.

This appropriation finances the daily operating expenses required for Air Force combat forces as well as for supporting forces. It provides the financial resources to transform the military personnel, facilities and equipment financed by other appropriations into combat ready strategic, tactical and defense forces. Inherent in maintaining the superiority of our military posture are significant changes in the composition of the forces with parallel changes occurring in the support forces. These changes are brought about by the introduction of strategic, tactical, and defense missiles of improved performance accompanied by the phase out of older weapons systems and numerical reductions in the manned aircraft inventory.

These forces and their related training, logistic, and administrative support components will be manned in 1963 by an average active duty military personnel strength of 867,000 and 271,989 civilian personnel.

The 1962 appropriation includes funds for Air Reserve and Air National Guard units called to active duty status during the recent buildup of forces. No provision is made for the continuance of these units as active forces during 1963, although some of the aircraft will be retained by the active forces.

Examples of the changes occurring in the force structure of the Air Force are found in the strategic field. During 1963 a reduction in the B-47 medium bomber force will be accompanied by an increased number of combat ready B-52 heavy bombers and intercontinental ballistic missiles. Additional squadrons of Atlas and Titan will become operational as will the first Minuteman squadrons. A greater poststrike capability is being developed through the increased dispersal of forces and modernization of weapon systems entering the active inventory. Provision has also been made for increased "low level" training in the strategic bomber force.

The Air Defense area reflects a relatively level program in 1963. Air Force elements of the North American Air Defense Command will have improved interceptor missiles and an improved radar network. Concurrently there will be a reduction of one squadron in manned air defense aircraft units. The current objective of 22 SAGE direction centers has been attained. Two ballistic missile early warning sites will operate the full year, and a third site in the United Kingdom will begin operations in the last quarter of the fiscal year.

An overall improved posture is programed for the tactical forces. Manned aircraft units will receive the more modern F-105 aircraft as replacements for F-100's. Overseas, improved tactical missiles will be introduced. Further, F-84 aircraft used by the Air National Guard and called to active service in 1962 will remain in the inventory to provide additional close support for the ground forces.

1. *Aircraft fuel and oil.*—This program provides for aviation fuel and oil to support the operation of all Air Force and Air Force Reserve aircraft except those assigned to research and development activities and that portion of the airlift services of the Military Air Transport Service which is financed by the Air Force industrial fund. While there is an overall reduction in flying hours from 1962 to 1963 there are numerous variations in the aircraft type and model composition of the total activity. Generally, the types of aircraft which will have increased usage, such as the B-52, KC-135, F-105, F-106, T-38, and T-39, are more expensive to operate than the aircraft which will phase out, such as the B-47, KC-97, and T-33.

The following table reflects the comparison of the principal program elements supported by these funds:

	1961 actual	1962 estimate	1963 estimate
Total active aircraft, end of year:			
Regular Air Force.....	12,871	13,143	11,791
Air Force Reserve.....	802	752	733
Aircraft flying hours:			
Regular Air Force.....	5,478,139	5,702,750	5,236,356
Air Force Reserve.....	163,411	183,643	205,865

These flying hours provide for the training of strategic, tactical, and defense units and for the flying training of individuals for subsequent assignment to flying units.

2. *Logistical support.*—This activity finances the operation of the Air Force depot system, including the costs related to procurement, storage, distribution, and main-

OPERATION AND MAINTENANCE—Continued

Current authorizations—Continued

OPERATION AND MAINTENANCE, AIR FORCE—Continued

tenance of Air Force materiel. The changing composition of the Air Force in 1963 with greater emphasis on missiles, sophistication of the warning network, and a greater proportion of higher performance planes in the aircraft inventory all affect the logistic support workload. The introduction of additional operational missile squadrons and increased utilization of higher performance manned aircraft will increase the maintenance program under this activity. The current concept provides for performing depot maintenance on missiles at the operational site, with only the components of the missile being returned to overhaul facilities. Depot level maintenance will be accomplished primarily by dispatching teams from central points to the missile sites.

The following table shows workload in the logistic support program:

	1961 actual	1962 estimate	1963 estimate
Inventory control points.....	11	11	11
Number of prime stocked items.....	1,927,597	1,950,000	1,670,000
Tons received and shipped (U.S. depots).....	2,004,170	2,010,264	1,900,000

The 1963 estimate reflects the transfer to the new Defense Supply Agency of certain supply functions previously performed by the Air Force.

3. *Training support.*—This provides for the basic, technical and professional training of airmen, cadets, and officers as contrasted with the training of combat units financed under Operational support. Operating costs of the Air Force Reserve program are also included.

Technical training loads will remain relatively stable overall. Courses of instruction providing skills for new weapons systems and the need to replace personnel losses in specific skill areas offset the phaseout of courses no longer required. The reduction in flying training is related to the anticipated decrease in manned aircraft occurring with the advent of missile systems.

Major elements of the Air Force training program are tabulated below:

	1961 actual	1962 estimate	1963 estimate
Basic military and technical training (average training load).....	47,900	48,740	51,130
Service schools:			
Advanced technical training (average training load).....	5,855	6,455	6,212
Air University (average training load).....	2,525	2,398	2,557
Undergraduate flying training (average training load):			
Pilot training.....	1,927	1,939	1,837
Navigator training.....	1,920	1,176	1,184
Other flying training (average training load).....	1,869	1,598	1,454
Air Force Academy (average cadet load).....	1,829	2,149	2,365
Civilian institutions (input).....	1,306	1,639	1,639
Language training (average training load).....	1,198	1,200	1,200
Factory training (average training load).....	1,135	1,126	854
(Missile training input included in various training above).....	14,582	19,056	15,835
Reserve training:			
Reservists in pay status (average strengths).....	66,901	70,477	72,092
AFROTC graduates.....	3,451	3,401	3,442

4. *Operational support.*—This activity provides for the operating requirements at air base level of all the combat forces, the several operational support commands, SAGE, DEWLINE, BMEWS, and ballistic missile squadrons.

This includes on-the-line maintenance of aircraft and weapons, upkeep of the airfields, operation of the control towers, maintenance of troop and family housing, and all other expenses customary at base level to keep the forces operationally ready.

The following table shows comparative numbers of major installations supported under this program detailed by category of forces:

Type	1961 actual	1962 estimate	1963 estimate
Strategic.....	64	61	61
Air defense.....	25	32	31
Tactical.....	59	61	53
Other.....	20	20	20
Total.....	168	174	165

Cost reductions resulting from the decreased number of installations are partially offset by the operating costs of additional ballistic missile sites. The number of these squadrons will increase from 26 in 1962 to 38 in 1963. The above table includes those regular Air Force installations which are utilized to provide support for the various types of missile squadrons, but does not reflect the support impact of the increased number of sites which will be operated in 1963. With variations depending upon the particular weapon system involved, missile sites generally consist of a number of launch stations dispersed at varying distances from a launch control center. Each launch complex is self-sufficient with respect to electrical power and communications to assure that the highly complex equipment installed is in a state of constant readiness.

This program also finances that portion of the Military Air Transport Service airlift not financed under industrial fund tariffs. This airlift includes medical evacuation, special air mission, and joint Army airborne training.

5. *Medical support.*—This activity covers the cost of medical care of Air Force personnel, active and retired, and their families, and includes the operation and maintenance of hospitals and other medical treatment facilities. It cost the Air Force \$21.6 million in 1961 for the care of dependents of military personnel in civilian hospitals, and these costs are estimated at \$26.3 million in 1962 and \$27.0 million in 1963.

Selected major workload items are shown in the following table:

	1961 actual	1962 estimate	1963 estimate
Hospitals.....	134	131	129
Patients (average daily load):			
In Air Force hospitals:			
Active duty.....	4,690	4,933	4,881
Dependents.....	3,436	3,581	3,645
Other.....	466	533	575
In other hospitals:			
Active duty.....	968	941	960
Dependents:			
In Federal hospitals.....	823	824	829
In non-Federal hospitals.....	1,160	1,360	1,357
Other.....	100	106	123

6. *Service-wide support.*—This program provides for the operations of Air Force and major command headquarters, air attaché and mission offices, intelligence activities, and for the leasing of commercial communication systems and networks. Communications programs in 1963 increase for air defense warning systems, and for command and control systems used by various major commands.

7. *Contingencies.*—These are extraordinary expenses approved and certified by the Secretary of the Air Force.

Financing:			
Advances and reimbursements from—			
Other accounts			-4,285
Non-Federal sources			-13,217
New obligational authority (appropriation)			354,145

Note.—Reimbursements from non-Federal sources are principally sales of surplus U.S. Government property; sale of goods and services to individuals, including laundry services, surcharges on commissary sales and unofficial telephone service; and revenues from private carriers for use of Department of Defense owned rail cars.

This appropriation provides a means of presenting program and funding information on several Defense activities which operate directly under the control of the Secretary of Defense. While in the past, some of these activities were supported from funds appropriated to the military departments and some by separate appropriations, beginning in 1963, management and budget responsibility will be synchronized.

1. *Supply operations.*—The Defense Supply Agency, a new single supply agency under the Secretary of Defense, will perform common supply and service functions for the military departments in the continental United States. It will manage inventories for nine materiel categories: fuel, food, clothing, medical, general, industrial, construction, automotive, and electrical-electronic. This management involves inventory control, including maintenance of catalogs and technical data on about 850,000 items representing \$2.6 billion of inventory and \$1.9 billion of annual sales, and central procurement, including preparation of specifications, contracting and contract adminis-

OPERATION AND MAINTENANCE, DEFENSE AGENCIES—Continued

tration, inspection, standardization, and industrial support measures for current procurement and mobilization. Other agency functions will include the operation of three supply depots, the Armed Forces Supply Support Center, the Surplus Sales Offices, the Bidders Registration and Sales Information Office, and the Military Traffic Management Agency. In addition, the Defense Supply agency will be responsible for the administration and supervision of the Department of Defense Coordinated Procurement Programs, the Federal Catalog Program, the Defense Standardization Program, the Defense Materiel Utilization Program, and the Defense Surplus Personal Property Disposal Program.

2. *Field operations.*—This activity includes: (a) the Defense Communications Agency which is responsible for the control of worldwide strategic and administrative long lines communications of the Department of Defense; (b) various classified activities, such as the Defense Intelligence Agency and the Defense Atomic Support Agency which is responsible for joint atomic weapons technical operations; and (c) the Armed Forces Information and Education activity.

3. *Interdepartmental activities.*—Provision is made for the Department of Defense participation in and support of various interdepartmental activities, including the President's Committee on Equal Employment Opportunity, the Interdepartmental Committee on Nutrition for National Defense, the President's Council on Youth Fitness and several classified activities.

4. *Intradepartmental activities.*—Special studies and projects applicable to the entire Department of Defense include: (a) management information control systems; (b) logistics management systems and a system for evaluation of contractor performance; (c) Department of Defense systems related to programing and forces alternatives; (d) a variety of departmentwide projects, such as the Industrial Security Education programs, the United States Antarctic Projects Office, and the Electronics Production Resources Agency.

5. *Management.*—This covers the civilian salaries and other expenses of the Office of the Secretary of Defense and of the Joint Chiefs of Staff.

Note.—Reimbursements from non-Federal sources are derived from commercial carriers for loss of property damaged in transit (31 U.S.C. 489a).

This appropriation provides for the operation of Army National Guard installations. The 1963 program provides support for nineteen and one-half Nike missile battalions in the air defense program, one less than in 1962. Four battalions will be converted from Ajax to Hercules equipment during the year. The operating expenses of these battalions include the costs of 4,325 State civilian employees who are members of these units and who maintain Nike missile sites in a state of operational readiness which will permit their immediate use in the event of an emergency.

The program provides for employment of 193 civilians in the National Guard Bureau, and 17,604 other State civilian employees for the administration of the units, maintenance and repair of equipment, and operation of State and Federal field training camps.

Funds have been included in 1963 in the amount of \$2.8 million for payment of employer's contributions to States which authorize civilian employees paid from this appropriation to participate in State retirement systems, as authorized by Public Law 87-224.

NATIONAL BOARD FOR THE PROMOTION OF RIFLE PRACTICE, ARMY

For the necessary expenses of construction, equipment, and maintenance of rifle ranges, the instruction of citizens in marksmanship, and promotion of rifle practice, in accordance with law, including travel of rifle teams, military personnel, and individuals attending regional, national, and international competitions, and not to exceed \$21,000 for incidental expenses of the National Board, \$500,000: *Provided*, That travel expenses of civilian members of the National Board shall be paid in accordance with the Standardized Government Travel Regulations, as amended. (10 U.S.C. 4307-13, 4652; 32 U.S.C. 316; Department of Defense Appropriation Act, 1962.)

The National Board for the Promotion of Rifle Practice, in conjunction with the Office of Director of Civilian Marksmanship, continues to promote civilian interest in small arms marksmanship. Assistance is provided to approximately 4,700 clubs and schools with a total membership of approximately 310 thousand, enrolled with the Director of Civilian Marksmanship, by the loan of rifles and equipment; the free issue of targets and supplies for use in marksmanship practice; and the free issue of trophies, medals and badges for marksmanship.

The National Board for the Promotion of Rifle Practice plans and supervises local, regional and State rifle and pistol matches in addition to the national rifle and pistol matches held annually at Camp Perry, Ohio.

Funds are provided to partially defray the travel expenses of State civilian shooting teams to the national matches. Funds are included for payment to the State of Ohio for the lease of Camp Perry, Ohio, as a permanent site of the national matches.

The program is augmented by the free issue of ammunition, purchased with funds provided under other appropriations, to members of rifle clubs and to competitors at national, regional and State competitions.

The Alaska Communication System provides telegraph and long-distance telephone service in Alaska for Department of Defense activities, other agencies of the Government, and the general public.

Legislation to authorize sale of the system has been proposed to the Congress. Pending sale and transfer of facilities to private ownership, no significant expansion of the system is planned.

The amount appropriated provides for all expenses incident to normal equipment replacement, and maintenance and operation of the system, except costs of compensation of military personnel assigned.

Revenue from commercial customers was \$5.5 million in 1961 and is estimated at \$6 million for 1962 and \$6.6 million for 1963. This revenue is deposited to miscellaneous receipts of the Treasury.

New obligational authority (appropriation)	425	445	455

The United States Court of Military Appeals serves as the court of last resort for all of the more serious court-martial convictions of military personnel. The number of cases docketed in 1961 totaled 979, with approximately 1,000 cases anticipated in 1962 and 1963. The court released 155 opinions in 1961 and expects to publish a similar number during 1962 and 1963.

In compliance with the Uniform Code of Military Justice, the court is maintaining a current docket with the review completed, as of Nov. 24, 1961, in 15,671 cases out of 15,812 cases filed since the court's establishment in 1951, leaving a balance of 141 under review.

The Secretary of Defense serves as the principal assistant to the President on all matters relating to the Department of Defense, which operates under his direction, authority and control. He is assisted in his immediate office by the Deputy Secretary of Defense, the Director of Defense Research and Engineering, seven assistant secretaries of Defense, the General Counsel, and such special assistants as are required to advise him in specialized fields. Military advice and assistance is provided by the Joint Chiefs of Staff organization. Beginning in 1963, these costs will be provided for in the appropriation Operation and maintenance, Defense agencies.

ALLOCATIONS RECEIVED BY DEPARTMENT OF DEFENSE FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are shown in the schedules of the parent appropriations, as follows:
 "Salaries and expenses," Office of Emergency Planning.
 "Research and development," Office of Emergency Planning.
 "Mutual security," funds appropriated to the President.
 "Operating expenses," Atomic Energy Commission.
 "Plant acquisition and construction," Atomic Energy Commission.
 "Research and development," Federal Aviation Agency.
 "Construction of facilities," National Aeronautics and Space Administration.
 "Salaries and expenses," National Science Foundation.
 "International Geophysical Year," National Science Foundation.
 "Acquisition and construction of radio facilities," United States Information Agency.
 "Acquisition, construction, and improvements," Coast Guard, Treasury Department.
 "Refunds, transfers, and expenses of operation, Puerto Rico," Bureau of Customs, Treasury Department.

PROCUREMENT

The procurement appropriations of the Department of Defense finance the acquisition of capital equipment, such as aircraft, missiles, ships, combat vehicles, weapons, and communications; major items for support of the capital equipment when it is in service; the industrial facilities necessary to produce that equipment; and major modification of older equipment where modernization can be provided without buying new equipment. The capital equipment financed by these appropriations is either procured from private contractors or produced in Government arsenals, shipyards, and plants.

The separate appropriation for Airlift modernization, Air Force, has been combined with Aircraft procurement, Air Force, in order to improve management of the program. In addition, all remaining development, test, and evaluation programs have been transferred to the applicable 1963 Research, development, test and evaluation appropriations. For 1961 and 1962 corresponding amounts

are shown as comparative transfers in the appropriations affected.

The 1963 procurement program of the Department of Defense continues large scale production of new weapons in support of the basic military missions of the armed services. Special emphasis has been placed upon improving the military capability to meet conventional and limited war threats wherever they may occur. This program provides increased mobility and firepower for ground forces as well as larger quantities of conventional munitions for tactical air support of ground operations. The nuclear deterrent force will be further improved by the construction of 6 additional Polaris submarines and a new attack aircraft carrier, as well as by the procurement of additional intercontinental ballistic missiles to supplement the long-range bomber force. Direct budget programs are estimated as follows (in millions of dollars):

	1961 actual	1962 estimate	1963 estimate
Aircraft.....	5,978	6,282	6,658
Missiles.....	2,887	3,647	4,074
Ships.....	2,281	2,938	2,982
Other.....	3,092	4,170	4,214
Total.....	14,238	17,037	17,928

PROCUREMENT OF EQUIPMENT AND MISSILES, ARMY

For expenses necessary for the procurement, manufacture, and modification of missiles, armament, ammunition, equipment, vehicles, vessels, and aircraft for the Army and the Reserve Officers' Training Corps; purchase of not to exceed [three] eight thousand [one] seven hundred and [fifty-nine] sixty-nine passenger motor vehicles for replacement only (including [thirty]-two medium sedans at not to exceed [\$2,900] \$3,000 each); expenses which in the discretion of the Secretary of the Army are necessary in providing facilities for production of equipment and supplies for national defense purposes, including construction, and the furnishing of Government-owned facilities and equipment at privately owned plants; and ammunition for military salutes at institutions to which issue of weapons for salutes is authorized; [\$2,532,602,000] \$2,555,000,000, to remain available until expended. (5 U.S.C. 78; 10 U.S.C. 2353, 3012, 4386, 4531, 4532, 4683; Department of Defense Appropriation Act, 1962; authorizing legislation to be proposed.)

This appropriation provides the major items of combat and support equipment for approved Army forces in performing their assigned mission to meet successfully both atomic and nonatomic requirements of limited and general war. In addition, this appropriation provides for production engineering, tooling, and facilities in support of current procurement, arsenal modernization, and production facilities.

In 1963, the Army's direct budget plan totals \$2,674 million as compared to \$2,633 million and \$1,755 million for 1962 and 1961 respectively. This program will enable the Army to continue the accelerated modernization program begun in 1962 and to further augment its inventories of combat and support equipment. The 1963 budget plan will be financed from new appropriations, unobligated balances and reprogramming of previous appropriations and budget plans, and anticipated reimbursements.

Sales of equipment from Army inventories, in accordance with orders placed by customer appropriations (reimbursable budget plans) provide a means of financing the procurement of new equipment which assists in modernizing Army inventories. While this turnover does not augment the dollar value of the total inventory, it continues to improve the balance among inventory levels for specific items.

Firepower.—The 1963 program reflects continued emphasis on increasing the combat capability of Army forces with both atomic and nonatomic weapons and munitions. Provision is made for continued procurement of the M-60 medium tank to provide greater firepower, range, and crew protection; the M-14 lightweight rifle, and M-60 machine gun using NATO standard ammunition; the Davy Crockett system to be used by combat infantry units for close atomic support; conventional ammunition in support of other weapons programs; and atomic, chemical, and antipersonnel munitions for further improving the combat capability of tactical forces. Additionally, provision is made for the continued procurement of the self-propelled mortar and the 105-mm., 155-mm., and 8-inch self-propelled howitzers, which will provide combat forces with increased firepower, range, and mobility.

The surface-to-air missile program continues to support the air defense mission assigned to the Army and to increase the capability in the Nike-Hercules missile system. Production of the Hawk missile system will continue, providing an effective defense against low and medium altitude supersonic enemy aircraft. The procurement of the Redeye missile system, a shoulder-fired guided missile designed to arm small combat units against low altitude enemy aircraft, will be continued.

The surface-to-surface missile program continues the procurement of tactical missiles and ground equipment for the helicopter transportable Pershing to provide longer range nuclear fire support for the field army. Production will continue for the solid-fueled Sergeant missile, and the improved Honest John and Little John rockets to provide units from division to field army level with an effective atomic and nonatomic missile delivery capability. Antitank missiles will continue to be procured to provide an improved armor defeating capability in forward combat areas.

Mobility.—Effectiveness and survival on the atomic and nonatomic battlefield continues to be dependent upon the ability of ground forces to remain mobile. Combat power, a combination of mobility and firepower, will be enhanced by continuing the accelerated procurement of modern aluminum armored personnel and reconnaissance carriers. Tactical trucks and trailers for use in supply and support functions in combat and other areas are being procured in increasing amounts to meet the field army's need for mobility. The new tank recovery vehicle, the heavy equipment transporter, and an armored full-track wrecker will continue in production to provide a rapid and effective means to return combat-damaged tanks and heavy equipment to rear echelons for repair. Production of the new family of Goer vehicles will be initiated providing field forces with a means of transporting supplies over all terrains.

Aerial mobility continues to receive emphasis to meet the Army's need for battlefield surveillance, troop movement, medical evacuation, and rapid logistical support for combat forces. Aircraft programed for procurement

PROCUREMENT—Continued

Current authorizations—Continued

PROCUREMENT OF EQUIPMENT AND MISSILES, ARMY—Continued

total 582 and include the Caribou, a twin-engined transport aircraft to be used in resupply operations in the combat area, transportation of troops, and emergency aero-medical evacuation; Iroquois, a utility helicopter for the transportation of personnel, special teams, equipment, supplies and medical evacuation; the H-13/H-23 type helicopter, a single rotor observation helicopter with skid-type landing gear; and the medium transport helicopter, Chinook, designed to carry either 26 fully armed combat troops, 3 tons of normal cargo, or the Pershing missile.

Communications-electronics.—In the area of communications and electronics, the major effort is directed toward providing the Army with reliable, light, rugged, and mobile electronics and communications equipment to achieve the high degree of mobility and dispersion dictated by modern weapons.

For these purposes the 1963 program provides newly developed airborne target surveillance equipment and the modernization and increased inventory of combat radio, telephone, teletype communications and control equipment. In addition to this substantial increase in the combat capability of tactical units, provision is made for the procurement of strategic and command communications equipment and communications security equipment previously financed in Operation and maintenance, Army.

Logistics support.—Included in this category are items designed to improve the Army's capability to move over streams, beaches, and other obstacles as well as equipment to build and maintain the support roads and airfields which are directly related to the mobility of combat forces. The 1963 program provides for continued procurement of materials handling equipment, shipping containers, rolling fluid transporters, amphibious lighters, and other items to provide balanced support for combat forces. A variety of generators is planned for continued procurement to provide combat forces with electrical power to operate missile sites and radar stations, as well as for lighting and other uses where commercial power will not be available.

The industrial mobilization program will continue to provide facilities in support of current production programs. Arsenal modernization and machine tool replacement programs will continue, thereby providing improved techniques for the production of military materiel. Production engineering measures provided in this program will enable the Army to prepare production packages for industry use during competitive procurement negotiations for the production of Army materiel.

Total obligations.....	1,889,957	3,024,094	3,361,168

This appropriation finances the procurement of new aircraft, guided missiles, and supporting equipment for the Navy and Marine Corps. It also provides for necessary safety-of-flight and operational modifications to service aircraft as well as the procurement of drones and major flight and maintenance training simulators. The funds requested permit carrying out a program costing \$3,360 million during 1963 compared with \$2,908.3 million in 1962.

1. *Aircraft and related equipment.*—This activity finances procurement of 887 new aircraft together with their supporting components and spare parts; the cost of modernizing inservice aircraft including mandatory operational and safety-of-flight improvements; and related items such as aircraft production tools and training equipment. Procurement requirements for new aircraft are based on projected aircraft operating programs and replacement of losses caused by attrition and obsolescence. The 1963 procurement program consists of 14 aircraft models. The Navy's attack mission is supported by follow-on procurements of light and close-support jet attack models as well as a Marine vertical envelopment helicopter and a light assault support helicopter. Anti-air warfare requirements are being met in the aircraft field through follow-on procurements of one all-weather and one limited all-weather fighters. Provisions are also

made in this category for a buildup in the production of a carrier-based early warning and control aircraft. In the antisubmarine warfare field, Naval aviation's contribution includes procurement of an advanced helicopter, a carrier-based fixed wing and a land-based 4-engine turbo-prop model. A utility helicopter, navigational trainer, and two tactical reconnaissance versions of existing in-production aircraft complete the program for 1963.

2. *Missiles, drones, and related equipment.*—The procurement of all missiles for fleet outfitting, training, and operational evaluation is financed under this activity. The 1963 program provides for continued delivery of air-to-air Sidewinder and Sparrow missiles, air-to-surface Bullpup and associated training missiles, and introduction of air-to-surface Shrike missiles. It continues the integration of ship-launched Terrier, Tartar, and Talos missiles into the active fleet in consonance with the construction and conversion of vessels having guided missile capability. Procurement of the Subroc antisubmarine weapon, Polaris missiles for the fleet ballistic missile submarines, powered and unpowered target procurement, antisubmarine drone procurement, and missile industrial facilities are also financed under this activity. In addition, provision is made for the procurement of hardware items associated with the Transit navigation system.

This appropriation provides for the construction of ships and the conversion of existing ships, including all installed machinery, propulsion equipment, electronic and electrical equipment, guns, torpedo and missile launching systems, and communications systems. It also provides for the procurement of long-lead-time items for ships which are to be authorized in the 1964 program and for the incorporation of defense features into merchant marine ships.

This increment of the Navy's long range shipbuilding plan continues a modernization and replacement program designed to provide the fleets with modern balanced forces which can respond effectively to a wide variety of challenges in a cold war, a limited war, or a nuclear war.

In this budget, as in the last 2 years, the program represents the full cost to complete all ships including costs associated with changes in ship characteristics and design which can be expected to affect costs during the long building period.

1. *Polaris ships.*—The 1963 program provides for the construction of six additional nuclear-powered Polaris submarines. When these are completed 35 ballistic missile-firing submarines will be in the fleet. Additionally, provision is made for the construction and conversion of a tender and cargo ship to support Polaris submarines.

2. *Other warships.*—A new attack aircraft carrier will provide a significant increase in the Navy's limited and general war capability. This new carrier will be capable of carrying both ground support aircraft and large Navy jet bombers. Eight nuclear-powered attack submarines will be added to the Navy's undersea strength and provision is made for the first nuclear-powered frigate to be armed with the Typhon surface-to-air missile. Additionally, 24 destroyers will receive substantial modernization to extend the effective service life of these ships and provide them with modern weapons and electronics equipment.

3. *Amphibious ships.*—The amphibious capability of the Navy will be enhanced by the construction of four amphibious transports, each designed to carry helicopters and a large number of smaller landing craft for beach landing; and one amphibious assault ship which will carry helicopters to augment the vertical envelopment capability.

4. *Mine warfare and patrol ships.*—The antisubmarine warfare capabilities of the fleet will be strengthened by the construction of eight new escort ships, three of which will be armed with Tartar missiles for additional protection against aircraft. Mine warfare capabilities will be

enhanced by the modernization of one mine counter-measures support ship.

5. *Auxiliaries and craft.*—A modern fleet requires equally modern support ships to provide food, fuel and ammunition. Included in the 1963 program is the construction of an all-purpose, high speed supply ship, and the modernization of two fleet oilers and two ammunition resupply ships. One new cargo ship will be constructed for the Military Sea Transport Service; three new research ships will be constructed to provide the Navy with scientific data on sea conditions, and three existing ships converted for other research purposes. Two ships will be converted to provide the fleet with modern command and communications facilities.

6. *Other support.*—The 1963 budget provides for payment of the cost of incorporating military characteristics in commercial cargo vessels.

1. *Ships support equipment.*—This activity provides for procurement of ships support equipment for the active fleet, fleet support activities, and continental and harbor defense activities. Procurement of electronics equipment for modernization of the active fleet will continue. In addition, provision is made for the procurement of ship components, machine tools, and special shipboard mobile equipment.

2. *Weapons and support equipment.*—This activity provides for the procurement of ammunition, weapons, and technical support equipment for ordnance, aircraft and the shore establishment. Increased emphasis will be given to the procurement of the air-launched Zuni rocket, new antipersonnel bombs, high speed antisubmarine torpedoes, Asroc weapons system, and aircraft delivered antisubmarine mines. Antisubmarine capability will continue to be improved by the procurement of additional quantities of aircraft delivered submarine detection buoys. Shore establishment support includes ground communications and terminal navigation aids, aircraft launching and recovery equipment, and aircraft servicing and rework equipment.

3. *Command support equipment.*—This activity provides principally for the procurement of electronics and communication equipments for the shore-based elements of the naval communication system and equipment used by the Hydrographic Office for hydrographic and oceanographic surveys. The primary objective is to modernize the communication system by further improving the speed, reliability and security of communications for command control of operating forces and modern weapons systems. Provision is made for improving and modernizing facilities employed in electronics intelligence functions and for increasing the capability of Hydrographic Office to collect data in ocean areas of strategic importance.

4. *Civil engineering support equipment.*—This activity provides for procurement of passenger-carrying vehicles and general and special-purpose automotive equipment. The increased 1963 program provides for the accelerated replacement of over-age equipment to reduce maintenance costs. Construction and weight-handling equipments, amphibious vehicles, and material for fleet moorings will continue to be procured.

5. *Supply support equipment.*—Provides for the procurement of materials-handling equipment in support of supply operations.

6. *Personnel support equipment.*—Provision is made for procurement of training equipments, devices and training aids, for the Regular Navy, officer candidates, and the Naval Reserve. Continued emphasis will be given to the

procurement of specialized training equipment to support the Polaris submarine program.

PROCUREMENT, MARINE CORPS

For expenses necessary for the procurement, manufacture, and modification of missiles, armament, ammunition, military equipment, and vehicles for the Marine Corps, including purchase of not to exceed [three hundred and seventeen] *four hundred sixty-four* passenger motor vehicles which shall be for replacement only, [\$264,600,000] \$258,000,000, to remain available until expended. (5 U.S.C. 78; 10 U.S.C. 5031, 7201; 31 U.S.C. 718; Department of Defense Appropriation Act, 1962; authorizing legislation to be proposed.)

This appropriation provides the major items of equipment to support approved Marine Corps forces in achieving their assigned mission. The 1963 program will enable the Marine Corps to procure: the fourth increment of new lightweight 7.62 mm. weapons and ammunition; initial quantities of new type ammunition; ammunition items to augment reserve stocks; ammunition to replace that consumed during training programs; modifications and modernization of combat vehicles to improve over-the-beach and combat zone capabilities; Hawk missiles to provide an effective defense against low altitude aircraft and air-breathing missiles; Redeye missiles to provide combat troops with a means to destroy low altitude aircraft; radar and radio improvements to provide forces with an increased capability for the detection, direction, and control of aircraft and ground forces; and a variety of equipment items for replacement and modernization.

AIRCRAFT PROCUREMENT, AIR FORCE

For construction, procurement, and modification of aircraft, and equipment, including armor and armament, specialized ground handling equipment, and training devices, spare parts, and accessories therefor; specialized equipment; expansion of public and private plants, Government-owned equipment and installation thereof in such plants, erection of structures, and acquisition of land without regard to section 9774 of title 10, United States Code, for the foregoing purposes, and such land, and interests therein, may be acquired and construction prosecuted thereon prior to the approval of title by the Attorney General as required by section 355, Revised Statutes, as amended; reserve plant and equipment lay-away; and other expenses necessary for the foregoing purposes, including rents and transportation of things; **[\$3,199,614,000]** \$3,135,000,000, to remain available until expended, of which not less than \$514,500,000 shall be available only for the procurement of long-range bombers: *Provided*, That during the current fiscal year there may be merged with this appropriation not to exceed \$225,000,000 of the unobligated balances of appropriations previously granted for "Aircraft, missiles, and related procurement", and "Procurement other than aircraft and missiles": *Provided*, That effective July 1, 1962 (a) the unexpended balances of the appropriation for "Airlift modernization, Air Force" shall be merged with

this appropriation, and (b) restrictions on utilization of funds in this appropriation with respect to procurement of long-range bombers will no longer apply. (5 U.S.C. 55a; 10 U.S.C. 2271-79, 2353, 2386, 2663, 2672, 8012, 8062, 9501-02, 9505, 9531-32, 9441-42; 31 U.S.C. 649(c), 718; 40 U.S.C. 523; 50 U.S.C. 451-62; Department of Defense Appropriation Act, 1962; authorizing legislation to be proposed.)

Note.—Excludes \$67,600,000 for activities transferred in the estimates to "Research, development, test, and evaluation, Air Force." The amounts in the budget plan and obligated in 1961 and 1962 are shown in the schedule as comparative transfers.

[AIRLIFT MODERNIZATION, AIR FORCE]

[For development, construction, procurement, production, and modification of transport aircraft, including spare parts and accessories therefor; and procurement and installation of equipment, appliances, and machine tools in public or private plants; \$401,604,000, to remain available until expended: *Provided*, That no part of the funds provided in this paragraph shall be available for the procurement of aircraft for assignment to scheduled passenger service.] (5 U.S.C. 55a; 10 U.S.C. 174, 1584, 2271-79, 2352-54, 2386, 2663, 2672, 8012, 8062, 9501-05, 9531-32, 9741-42; 31 U.S.C. 649(c), 718; 40 U.S.C. 523; 50 U.S.C. 451-62; Department of Defense Appropriation Act, 1962.)

This appropriation provides for the procurement of aircraft, spares, components, industrial production facilities, supporting aerospace ground equipment, and modification of in-service aircraft of all types. Management of the overall aircraft program is facilitated by bringing together in a single appropriation all funds for the prime aircraft weapon system and related specialized ground handling and test equipment. The funds requested provide for a procurement program for 1963 of 931 aircraft compared to 744 aircraft for the 1962 program. Funding for development, test and evaluation of aircraft has been shifted from this appropriation in 1963 and amounts for this purpose in 1961 and 1962 are shown as comparative transfers. Funding of guided air-to-air rockets, previously included in this appropriation, has been shifted to the Missile procurement, Air Force appropriation for 1963.

1. *Combat aircraft.*—This activity provides for the procurement of aircraft to continue modernization of the combat forces. In the strategic forces, procurement of jet tankers is continued for support of the heavy and supersonic bombers and modernization of the tanker support for the tactical forces to improve their mobility and radius of action. In the tactical forces, provision is made for substantial increase in the procurement of fighter-bomber and reconnaissance aircraft including the introduction into the Air Force inventory of a new versatile tactical fighter. These improved tactical mission aircraft will be capable of being rapidly deployed to deliver conventional as well as nuclear munitions and will strengthen capabilities for close support of ground forces.

2. *Airlift aircraft.*—This activity provides for the procurement of aircraft to continue modernization of airlift forces and the initial production quantity of a long-range heavy cargo transport, specifically designed for the Military Air Transport Service mission. During 1961 and 1962, aircraft of this type were funded in a separate appropriation, Airlift modernization, Air Force. In order to improve management of the program, it is recombined with this appropriation but identified as a separate activity.

3. *Trainer aircraft.*—Provision is made in this activity for procurement of jet training aircraft to meet current training requirements for high performance supersonic combat aircraft.

4. *Other aircraft.* This activity provides for procurement of airplanes and helicopters to be utilized in support

roles such as reconnaissance, missile base support and rescue operations for the combat forces.

5. *Modifications of in-service aircraft.*—This activity provides for modifications of in-service aircraft necessary for safety-of-flight and changes incorporating technical improvements enabling the fleet to keep abreast of the latest state-of-the-art.

6. *Replenishment spares and spare parts.*—This activity provides for the procurement of follow-on spares and spare components required for maintenance support of the aircraft inventory and to provide the approved stockage objectives.

7. *Other support.*—This activity provides for industrial facilities, component improvements, common aerospace ground support equipment and other charges.

This appropriation provides for procurement of missiles, guided air rockets, and drones, launching and ground support equipment, installation and check-out of equipment preliminary to activation of operational squadrons, and expansion of industrial facilities.

1. *Ballistic missiles.*—This activity provides funds for intercontinental ballistic missile systems required for operational squadrons and training. The 1963 estimates complete procurement of the 13 squadron Atlas intercontinental ballistic missile program, complete procurement of the Titan I intercontinental ballistic missile program, substantially complete procurement of the Titan II intercontinental ballistic missile program, and commence the installation and check-out of the Minuteman intercontinental ballistic missile program.

2. *Other missiles.*—Procurement of the Skybolt weapon system is initiated. Sizable procurement of the Bullpup air-to-surface missile continues. Provision is also made for procurement of target drone missiles used in testing and training of weapon systems. Sidewinder air-to-air

missiles, which were previously procured under the aircraft procurement appropriation, are to be procured under this activity in 1963.

3. *Modification of inservice missiles.*—The principal amounts required in 1963 are for retrofit of the operational Atlas and Titan I ballistic missiles to incorporate changes determined in the testing program. Lesser amounts are required for other operational missiles involving safety of flight and inservice revealed deficiencies.

4. *Spares support.*—The amounts contained in 1963 provide for initial and replenishment spares support for Atlas, Titan, Minuteman, and other missiles.

5. *Other support.*—Funds are provided in this activity for minor facility expansion, nonrecurring maintenance, preparation for shipment of tools and equipment, and machine tool modernization for industrial facilities under Air Force cognizance. Also included are amounts for improvements to airborne and ground components used in missile systems, and for other projects.

1. *Munitions and associated equipment.*—The 1963 estimate provides for a variety of military munitions to increase the capability of the Air Force to meet air defense and tactical force requirements for both conventional and nuclear war. The major increase in 1962 and 1963 is for procurement of modern conventional ordnance to provide greater flexibility in coping with a range of threats to the free world. Procurement of the new antipersonnel/materiel bomb, accelerated in the 1962 program will be further accelerated in 1963. Other items planned for continued procurement in 1963 include: air-to-air rocket motors, atomic ordnance components (except for fissionable materials), small arms ammunition, targets, mines, and miscellaneous munitions components including supplies and materials.

2. *Vehicular equipment.*—The 1963 estimate provides for orderly replacement procurements for the vehicle fleet; for procurement of a new family of fire trucks to replace models which no longer meet operational requirements; for continued procurement of materials handling equipment to include support of programs associated with mechanized air cargo handling; and for supplies and materials and modification of equipment in support of operation of the vehicular fleet.

3. *Electronics and telecommunications equipment.*—The 1963 estimate provides for (1) continued support for the ballistic missile early warning system, the semi-automatic ground environment system, the semi-automatic back-up program, and the surveillance and passive detection radar programs for North American and overseas air defense; (2) procurement of newly developed data processing and display equipment for the command and control systems of the Strategic Air Command and North American Air Defense Command; (3) procurement of communications cable and ancillary equipments for operational ballistic missile sites; (4) augmentation of other weapon supporting systems including electromagnetic intelligence gathering, weather observation and forecast, ground navigational aids, the worldwide Defense Communication System, and the Defense Command Center; (5) cryptographic equipment including teletype and data encryption devices and voice security; and (6) spare parts and end-item modifications.

4. *Other base maintenance and support equipment.*—The 1963 estimate provides for procurement at normal support levels of common test and calibration equipments, including special calibration devices used at bases and air materiel areas and in mobile vans; personnel safety and rescue equipment; photographic and shop equipment; continuation of programs for airfield lighting, aircraft arresting barriers, auxiliary power units, and related airfield support equipment; and related supplies, materials and equipment modifications.

PROCUREMENT, DEFENSE AGENCIES—Continued

This appropriation provides for procurement of capital equipment for the Defense Communications Agency and other Defensewide agencies. The 1963 program includes electronics and communications equipment, materials handling equipment, and general and special purpose vehicular equipment. Funds were previously provided for these purposes in Procurement of equipment and missiles, Army, Operation and maintenance, Army, and Salaries and expenses, Secretary of Defense.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

The appropriations in this title provide the principal support for the research, development, test, and evaluation activities of the Department of Defense, including basic and applied research, general technical development, development of new weapons and equipment, fabrication and procurement of items under development for test and evaluation, and operation and maintenance of laboratories and test facilities engaged in the conduct of research, development, test, and evaluation. The additional amounts for development, test, and evaluation of Air Force aircraft and missiles which were carried in procurement appropriations in the past are now included in this title and account for a substantial portion of the apparent increase in new obligational authority. The appropriate adjustments have been made to place the schedules on a comparable basis. A new appropriation Research, development, test, and evaluation, Defense Agencies, combines, for the first time, the financing for the Advanced Research Projects Agency and certain

other activities not identifiable with any of the military services, such as the Defense Atomic Support Agency and the Defense Communications Agency which were formerly financed in the Army appropriation. Research and development related to civil defense responsibilities of the Department of Defense is carried in the new separate title, Civil defense, in this chapter.

The amounts provided in 1963 will further augment the present high levels of effort in basic research, applied research, and general technical development, and will maintain approximately the current level of operation of the laboratories and test installations of the Department of Defense. They will also carry forward the development of a wide variety of major weapons systems and other specific developments for which the annual requirements fluctuate depending on the status of development, the phasing of the effort, and the quantities and cost of the test articles required.

The budget plans and estimated obligations under the appropriations in this title for the Army, Navy, Air Force, the Defense Agencies, and the Emergency Fund are summarized below (in millions of dollars):

9. Emergency fund.....		99,500	150,000		99,500	150,000
Total.....	6,366,137	6,299,711	7,146,900	6,165,005	6,388,757	7,044,900

1. *Military sciences*.—This activity includes basic research in the life, physical, and social sciences to add to the store of fundamental scientific knowledge; applied scientific research of importance for military purposes; operations research; and the development of new materials, components, and techniques. Among the many and widely varied problems to be investigated under this activity in 1963 are materials with physical properties superior to those presently available, higher performance rocket fuels, thermoelectric materials, chemical and biological agents, neurosensory phenomena, radio astronomy, oceanography, high altitude phenomena, advanced radar and sonar techniques, and more reliable electronic components. In addition to the amounts in this activity, basic and applied research performed by industrial contractors within overhead arrangements on some procurement contracts is funded in the procurement accounts. The principal support of such organizations as the Naval Research Laboratory, the Air Force's Cambridge Research Laboratories and Rand Corporation, and the Army's Research Analysis Corporation and Human Resources Research Office is provided under this activity in addition to work performed by universities, nonprofit organizations, and industry.

2. *Aircraft and related equipment*.—This activity funds research, development, test, and evaluation related to airframes, engines, and other installed equipment. The 1963 program in this activity continues the development of a new high performance multipurpose fighter aircraft and a prototype vertical takeoff and landing transport

aircraft, and initiates development of a new aircraft for close support of ground forces. Each of these aircraft is intended to meet the needs of all military services. In addition, the program includes work on other aircraft to improve the mobility and reconnaissance capabilities of the ground forces. Development of the C-141 jet cargo transport for improved airlift capability and of the B-70 mach 3 bomber prototypes will continue. Research and test centers primarily funded under this activity include the Air Force's Air Proving Ground Center and Edwards Flight Test Center and the Naval Air Test Center.

3. *Missiles and related equipment*.—This activity provides for research, development, test, and evaluation of guided missiles of all types. A major research and development effort is being continued in 1963 in the field of defense against ballistic missiles, including development and test of the Nike-Zeus system and the development of improved missiles and radars. In addition, an extensive research effort on more advanced techniques is funded by the Advanced Research Projects Agency within the activity "Military sciences," above. In the strategic field, development will continue on the Minuteman solid propellant intercontinental ballistic missile which is now approaching the operational stage, and work will be initiated on an improved version. Substantial amounts are included for carrying forward development of the Skybolt air launched ballistic missile which is designed to improve the capabilities of our B-52 strategic bombers. Improvements in the Polaris system will also

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION—Continued

Current authorizations—Continued

be continued with a high priority. Development of a new solid propellant medium range ballistic missile system will be initiated; both mobile land based and sea based versions are under consideration. Other significant missile development projects on which work will be continued in 1963 include the Typhon for fleet air defense, the Subroc antisubmarine system, the Mauler tactical surface-to-air missile, and an improved division support missile for land combat. In addition to funding industrial participation in the missile research and development program, this activity is the principal source of funds for the operation of three national missile ranges: the Atlantic, Pacific, and White Sands Missile Ranges; the Arnold Engineering Development and Missile Development Centers of the Air Force; the Naval Ordnance Test Station and Applied Physics Laboratory of the Navy; and the research divisions under the Army Ordnance Missile Command at Huntsville, Ala.

4. *Military astronautics and related equipment.*—This activity provides for the conduct of programs directed at the improvement of space technology for military purposes, and the investigation and development of specific military applications of space vehicles. During 1963, work will continue on vehicle development programs, on the navigation satellite, on military communications satellite systems, and on the development of reconnaissance and early warning satellites. Investigation of problems of manned vehicles with orbital capabilities will continue. An improved multipurpose space booster system utilizing both solid and storable liquid propellants will be developed as a part of the national launch vehicle program. Research and development on very large solid rocket boosters will continue, as well as supporting research and development in such areas as secondary power, guidance, navigation components, and payload equipment for space and satellite systems. This activity also includes a proportionate share of the funds supporting development, test, and evaluation effort at Department of Defense installations including the Atlantic Missile Range, the Air Force Flight Test Center, the Arnold Engineering Development Center, and the Aerospace Medicine Division.

5. *Ships and small craft and related equipment.*—This activity provides for research, development, test, and evaluation related to ships and small craft, except that funds are included in the regular shipbuilding appropriation for the construction of ships of advanced design and ships employed in the development, test, and evaluation of new components and techniques. Funds in this activity will provide in 1963 for the development of advanced propulsion systems, hydrofoils, communica-

tions, sonar, radar, and catapults and arresting gear. A significant part of the research and development effort of the Naval Electronics Laboratory and David Taylor Model Basin is funded under this activity.

6. *Ordnance, combat vehicles, and related equipment.*—The Army's program includes improved artillery, rockets, mortars, antitank weapons, tank armament, and small arms. Vehicle development includes tactical carriers and high mobility logistic transporters. Development will be continued on more effective ammunition, mines, and grenades. Among the developments which will be emphasized in 1963 are new division and direct support weapons. The 1963 Navy program continues to emphasize antisubmarine weapons and includes a new torpedo, mines, depth charges, bombs, rockets, and other types of ammunition. Landing and amphibious vehicles and ground effect "air cushion" machines, for the Marine Corps are also provided for in this activity. This activity provides the principal support of the Naval Ordnance Laboratory and of research, development, test, and evaluation activities at several Army arsenals.

7. *Other equipment.*—This activity provides for research, development, test, and evaluation of equipment not separately provided under other activities. Examples of the types of equipment under development in 1963 are communications equipment in all three services; mine warfare, combat surveillance, and obstacle crossing equipment for the Army; detection and warning equipment, and amphibious warfare support equipment in the Navy; and photographic and personal equipment, and aircraft control and warning, missile detection, and other electronic systems in the Air Force. Much of the support of the research and development effort of the Lincoln Laboratories and the Signal Research and Development Laboratory is provided under this activity by the Air Force and Army, respectively.

8. *Programwide management and support.*—This activity provides for those costs of operation, management, and maintenance of research, development, and test facilities of the Department of Defense which are not distributed directly to the other budget activities, and for certain costs of central administration such as the headquarters of the Air Force Systems Command.

9. *Emergency fund.*—The emergency fund enables the Secretary of Defense to defray the cost of prompt exploitation of new developments and to provide for other unforeseen contingencies in the research, development, test, and evaluation programs.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, ARMY

For expenses necessary for basic and applied scientific research, development, test, and evaluation, including maintenance, rehabilitation, lease, and operation of facilities and equipment, as authorized by law, **[\$1,203,200,000]** \$1,329,000,000, to remain available until expended. (10 U.S.C. 2353; Department of Defense Appropriation Act, 1962.)

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, AIR FORCE

For expenses necessary for basic and applied scientific research, development, test, and evaluation, including maintenance, rehabilitation, lease, and operation of facilities and equipment, as authorized by law, [\$2,403,260,000] \$3,439,000,000, to remain available until expended [of which \$185,800,000 shall be available only for the Dyna-Soar program]. (5 U.S.C. 55a; 10 U.S.C. 174, 1581, 1584, 2271-2279, 2352-2354, 2386, 2663, 2672, 8012, 9503-9504, 9532; 31 U.S.C. 649(c), 718; 40 U.S.C. 523; 42 U.S.C. 1891-93; 50 U.S.C. App. 2093; Department of Defense Appropriation Act, 1962.)

Note.—Includes \$747,300,000 for activities previously carried under appropriations, as follows:

“Missile procurement,” Air Force.....	679,700,000
“Aircraft procurement,” Air Force.....	67,600,000

The amounts in the budget plan and obligated in 1961 and 1962 are shown in the schedule as comparative transfers.

EMERGENCY FUND, [DEPARTMENT OF] DEFENSE

For transfer by the Secretary of Defense, with the approval of the Bureau of the Budget, to any appropriation for military functions under the Department of Defense available for research, development, test, and evaluation, or procurement or production related thereto, to be merged with and to be available for the same purposes, and for the same time period, as the appropriation to which transferred, \$150,000,000, and, in addition, not to exceed \$150,000,000, to be used upon determination by the Secretary of Defense that such funds can be wisely, profitably, and practically used in the interest of national defense and to be derived by transfer from such appropriations available to the Department of Defense for obligation during the current fiscal year as the Secretary of Defense may designate: *Provided*, That any appropriations transferred shall not exceed 7 per centum of the appropriation from which transferred. (*Department of Defense Appropriation Act, 1962*)

MILITARY CONSTRUCTION

The military construction programs for the Armed Forces, both Regular and Reserve, shown in the individual schedules of this title are summarized in the following table (in thousands of dollars):

MILITARY CONSTRUCTION PROGRAM			
	1961 actual	1962 estimate	1963 estimate
Regular Forces.....	1,081,766	1,044,446	1,292,000
Reserve Forces.....	58,034	67,594	46,000
Interservice activities.....	40,890	11,505	63,000
Total.....	1,180,690	1,123,545	1,401,000

Most of the new appropriations for the military construction accounts are dependent on the enactment of new authorizing legislation. The details of this legislation have been completed and are being submitted to the Congress for early consideration.

1. *Major construction.*—This category provides for acquisition of land for and construction of military projects in the United States and overseas as authorized in currently effective military construction acts and the new authorization referred to above. These authorizations include construction projects as defined in Department of Defense Directive 7040.2 where the estimated cost of such construction is \$25 thousand or more per project. Under this category the major program elements proposed for 1963 are as follows:

Strategic retaliatory forces.—In line with our growing ballistic missile inventory, facilities are to be constructed for additional hardened Minuteman squadrons along with minor improvements and modifications of the Minuteman squadrons previously funded. In the case of the Polaris system, additional facilities are required in support of the Atlantic forces and a large initial increment for servicing this system in the Pacific is included in the 1963 program. Facilities to maintain and upgrade the readiness of the manned bombers, their weapons, and associated refueling aircraft are scheduled for construction, including the conversion of one additional airbase to receive B-52 aircraft. Funds are also included to finance the cost increases experienced in connection with the earlier ballistic missile systems, Atlas and Titan. Approximately 40% of total appropriations proposed for military construction are related directly to the general war offensive forces.

Continental air and missile defense forces.—Structures to receive improved radars for the Hercules air defense missile are proposed together with other projects for this system. Facilities to accommodate and maintain the interceptor aircraft, such as the F-101, F-102, and F-106, are provided in the estimates as well as facilities for the aircraft control and warning net. Additional facilities are proposed for the detection of submarines along our coastal regions. Construction is to be initiated on a system for the automatic detection and reporting of nuclear detonations.

General purpose forces.—Facilities for these elements will be constructed in the various oversea areas of assignment and in the United States at their home ports or bases. The facilities include runway extensions, hangars, maintenance shops, hardstands, ammunition storage, communication structures, troop housing, and other structures

peculiar to either the Army, Navy, Marine Corps, or Air Force units stationed at the particular installation.

Sealift and airlift forces.—Additional operational and maintenance facilities will be provided for the transport aircraft assigned to the Tactical Air Command and the Military Air Transport Command.

Reserve Forces.—The facilities required for the training of the Reserve Forces include: armories and training centers, nonarmory facilities such as maintenance shops and warehouses; and aviation facilities such as airfield pavements, maintenance shops, and training buildings.

Research and development.—The research and development projects include general laboratory structures which house many separate but associated activities such as the major laboratories proposed at Fort Monmouth, N.J., and the Naval Research Laboratory, Washington, D.C. Smaller laboratories are planned in such fields as polymers, materials, nuclear effects, and gas turbines for engineering equipment. A special hydroballistic test structure is proposed at the Naval Ordnance Laboratory, White Oak, Md., and an electro-gas dynamics facility is to be constructed at the Wright-Patterson Air Force Base, Ohio. Facilities are provided for the continued improvement of both the Atlantic and Pacific missile ranges which control and record our missile, satellite, and space shots. Also included is the second increment of the Atlantic Undersea Test and Evaluation Center.

General support.—Projects in this grouping cover operational and training facilities, maintenance and production facilities, supply facilities, hospital and medical facilities, administrative facilities, housing and community facilities, and utilities and ground improvements which, though important for the effective functioning of the armed services are not related directly to any one particular force or weapon system, and, in fact, serve as common support for any number of forces or systems.

Department of Defense agencies.—A composite appropriation is proposed to cover the construction needs of the following Defense agencies: Defense Atomic Support Agency, Defense Communications Agency, Defense Intelligence Agency, Defense Supply Agency, National Security Agency, and the Advanced Research Projects Agency. With the exception of construction for the Advanced Research Projects Agency which heretofore has been accomplished under a separate account, construction funds for these agencies or for similar activities have been included in prior years in the construction accounts of the military departments.

2. *Minor construction.*—Provision is made for construction of permanent and temporary projects that are not otherwise authorized by law but which are determined to be urgently required and do not exceed \$200 thousand per project for the Regular Forces, and \$50 thousand per project for the Reserve Forces. Provision is made in the applicable operation and maintenance appropriations for construction projects as defined in Department of Defense Directive 7040.2 where the estimated cost of such construction is less than \$25 thousand per project.

3. *Planning.*—This provides for necessary planning of military construction projects, including design, standards, criteria, studies, appraisals, and other related activities.

4. *Supporting activities.*—Provision is made for activities such as the defense access road program and minor land acquisitions.

Loran stations.—These funds are advanced to the Coast Guard for construction of loran stations in areas essential to the defense of the United States. Loran transmitting stations permit safe and effective operation of ships, submarines, and aircraft of the military services in all kinds of weather by an electronic system of navigation which provides continuous navigational positions by means of intersecting lines of position.

Construction, Alaska Communication System.—Since legislation to authorize the sale of this system is pending

in Congress, no new obligational authority is requested in 1963. Existing availability will be used only for projects which maintain the operational requirements of the system.

Current authorizations:

MILITARY CONSTRUCTION, ARMY

For acquisition, construction, installation, and equipment of temporary or permanent public works, military installations, and facilities for the Army as currently authorized in military public works or military construction Acts, in sections 2673 and 2675 of title 10, United States Code, to remain available until expended, **[\$157,934,000]** \$177,000,000. (*Military Construction Appropriation Act, 1962; authorizing legislation to be proposed.*)

MILITARY CONSTRUCTION, DEFENSE AGENCIES

For acquisition, construction, installation and equipment of temporary or permanent public works, installations and facilities for

activities and agencies of the Department of Defense (other than the military departments and the Office of Civil Defense), as currently authorized in military public works or military construction acts, in sections 2673 and 2675 of title 10, United States Code, to remain available until expended, \$41,000,000; and, in addition, not to exceed \$20,000,000 to be derived by transfer from the appropriation "Research, development, test, and evaluation, Defense Agencies" as determined by the Secretary of Defense: Provided, That the unexpended balances of the appropriation "Military Construction, Advanced Research Projects Agency, Department of Defense" shall be merged with this appropriation and accounted for as one fund effective July 1, 1962: Provided further, That such amounts of this appropriation as may be determined by the Secretary of Defense may be transferred to such appropriations of the Department of Defense available for military construction as he may designate.

[MILITARY CONSTRUCTION, DEPARTMENT OF DEFENSE]

[For transfer by the Secretary of Defense to appropriations available for military construction, to be used for the purposes of title V of Public Law 87-57, approved June 27, 1961, and to be merged with the appropriations to which transferred, \$27,000,000]. (75 Stat. 658; Military Construction Appropriation Act, 1962.)

MILITARY CONSTRUCTION, FOREIGN COUNTRIES, DEPARTMENT OF DEFENSE

The appropriation available to the Department of Defense for "Military Construction, Foreign Countries, Department of Defense", shall not be available for obligation after June 30, 1962. (68 Stat. 646, Military Public Works Appropriation Act, 1953.)

The Department of Defense is authorized (68 Stat. 1125, as amended by 70 Stat. 1017) to construct or otherwise acquire family housing for occupancy as public quarters and community facilities in foreign countries utilizing foreign currencies to a value not to exceed \$250 million. The foreign currencies are acquired pursuant to the provisions of the Agricultural Trade Development and Assistance Act of 1954 (68 Stat. 454) or through other commodity transactions of the Commodity Credit Corporation. In addition, the Department is authorized to use appropriated funds for not to exceed 25% of the total cost of each family housing and community facilities project as may be necessary to supplement the foreign currencies to obtain the required facilities.

The Department is required to reimburse the Commodity Credit Corporation in a dollar amount equivalent to the value of the foreign currencies utilized. For this purpose, the Department is authorized to utilize appropriations otherwise available for the payment of quarters allowances to personnel who occupy such housing. Amounts chargeable for the maintenance and operation of such housing are authorized (69 Stat. 350) to be deducted from the quarters allowances withheld for reimbursing the Commodity Credit Corporation.

Operating results.—The accompanying schedules indicate the indebtedness of the Department to the Commodity Credit Corporation and costs realized and antici-

pated through 1963 for the construction of housing and community facilities projects in foreign countries for use by Defense personnel.

CAPEHART HOUSING

The Secretary of Defense is authorized under title VIII of the National Housing Act (69 Stat. 646) to contract for the construction of family housing on military installations in the United States, its territories, and possessions, and assume mortgage indebtedness, not to exceed \$2.3 billion in principal obligations outstanding at any time, required to fund such construction. The Federal Housing Administration is authorized to insure such mortgages through the Armed Services Housing Mortgage Insurance Fund established for this purpose, for which insurance premiums are charged at the rate of $\frac{1}{4}$ of 1% per annum on the outstanding principal obligations of the mortgages. The authority to insure such mortgages expires October 1,

1962, except pursuant to a commitment to insure issued before this date (75 Stat. 111).

Mortgage funds are primarily provided through private investment; however, the Federal National Mortgage Association has provided a limited amount of funds under a special assistance fund authorization. The mortgages have a maturity date not to exceed 30 years and bear interest at a rate not to exceed $4\frac{1}{2}$ % per annum. No mortgage may involve a principal obligation which exceeds the least of: (a) the Federal Housing Administration estimate for replacement cost of the completed housing project; (b) an average of \$16,500 per family dwelling unit; or (c) the lowest acceptable of the bids submitted by eligible bidders seeking award of the construction contract.

Mortgage payments which provide for the reduction of the principal obligation, for interest expense, and for mortgage insurance premiums, are made from the appropriations for military pay and allowances. The amounts required for this purpose are included in the budget schedules for these appropriations. Such payments may not exceed an average of \$90 per month per housing unit and total payments for all such housing may not exceed \$21 million per month.

Funds are authorized (65 Stat. 365) to be appropriated to acquire land, prepare sites, and install off-site utilities for these projects. Expenditures incurred for this purpose may not exceed an average of \$1,500 per unit in any housing project nor more than an average of \$1,000 per unit in respect of all housing projects for which appropriations are made under this authorization. Costs incurred for architectural and engineering contracts and for inspection of construction are reimbursable from mortgage proceeds.

In accordance with 73 Stat. 323, mortgage proceeds may no longer be used to pay the costs of title search and title insurance. Where a military guarantee of title can be utilized, the cost of obtaining a title search to support such a guarantee is authorized (40 U.S.C. 255) to be paid from funds appropriated for military construction. Where a determination is made that necessary financing cannot be obtained unless commercial title insurance is provided, the cost of such insurance must be paid (73 Stat. 323) from the Wherry Revolving Fund (70 Stat. 1112).

OVERSEAS RENTAL GUARANTEE MILITARY FAMILY HOUSING

The Department of Defense is authorized (66 Stat. 622) to guarantee rental payments to private sponsors of family housing projects built in foreign countries for use by Defense personnel. The guarantee may not exceed 95% of the scheduled rentals the sponsors would receive from full occupancy of the housing by Defense personnel over periods ranging from 5 to 10 years depending upon the length of time Defense expects to occupy the housing and the prospect for its eventual use by native populations. The amount of such guarantees outstanding at any time may not exceed \$100 million. The housing is wholly owned by the private sponsors who build, operate and maintain it in accordance with the terms of the rental guarantee agreements. Commanders of the military installations served by the housing projects are responsible for maintaining occupancy by installation personnel at the guaranteed 95% level. Under this program 4,838 housing units have been built at 31 locations in France, and 700 housing units at 3 locations in Morocco. In 1962 the guarantee on 484 units in France will expire.

Operating results.—The following schedule indicates the extent to which the rental guarantee authority has been used and the estimated reduction of the Government's contingent liability under these guarantees through 1963.

1. *Warning and detection.*—This program covers measures for alerting and warning the population of impending attack and the detection of chemical, biological, and radiological hazards resulting from overt or covert enemy action. In 1962, an instantaneous home warning system is being tested and will be installed in selected areas. Funds are requested in 1963 to commence nationwide installation of this system, utilizing the existing network of commercial power lines. The system will provide a means for natural disaster warning as well as warning of enemy attack. The 1963 request also provides funds to

CIVIL DEFENSE—Continued

Current Authorizations—Continued

CIVIL DEFENSE, DEPARTMENT OF DEFENSE—Continued

OPERATION AND MAINTENANCE—continued

continue provision for the instrument requirements for a nationwide network of 150,000 stations for detecting and monitoring the density of radiological fallout from nuclear explosions.

2. *Emergency operations.*—This program covers the costs of developing, promoting, improving, and maintaining an adequate state of readiness for civil defense emergency operations with particular emphasis on improving the degree of preparedness at the local level. Areas covered include a vigorous public information program on modern warfare hazards and individual countermeasures, several national emergency communications networks, studies of damage resulting from varying attack patterns and survival measures, operation of civil defense schools and public educational and training programs.

3. *Financial assistance to States.*—This activity continues the Federal financial assistance available to the States and cities under Sections 201(i) and 205 of the Federal Civil Defense Act. This program was implemented in 1951 and, through 1962, a total of over \$126 million has been utilized. In 1963, emphasis will be given to the construction of emergency operating centers for State and local government use; and to strengthening State and local staff preparations for survival and recovery.

4. *Management.*—Included are management functions of direction, control, and administration of the Nation's civil defense program. Includes costs of personnel, travel, and supporting costs of the staff of the Office of Civil Defense as well as funds for reimbursement to other elements of the Defense Department for services provided in support of the civil defense program.

1. *Shelter incentives.*—The 1963 program represents the next step in the program approved for 1962 of an orderly acceleration of civil defense preparations, utilizing the resources of all levels of government, and building this effort into the normal peacetime programs of the Nation. In 1963, this program will be expanded by the use of Federal financial incentives for incorporation of shelter space in nonprofit institutions engaged in education, health, and welfare activities subject to congressional approval of authorizing legislation. The program is designed to stimulate participation of these institutions as well as State and local governmental agencies and private organizations in meeting shelter needs.

2. *Shelters in existing Federal buildings.*—Modification of suitable space in existing Federal buildings, including structures at military installations, will provide a considerable number of public shelter spaces. Such modification may improve the level of protection by providing additional shielding. Adding ventilation or other mechanical facilities can substantially increase shelter capability. Steps taken to provide such shelter in Federal buildings are intended to demonstrate to State and local governments the feasibility of providing adequate public shelter spaces in existing structures by moderate-cost modification.

3. *Shelter survey, marking, and stockage.*—Completion of the National Shelter Survey begun in 1962 is expected to identify and mark an additional 4 million public shelter spaces. In addition to stocking these spaces with food, water, medical and sanitation supplies and radiation measuring instruments, provision is made to similarly stock additional shelter spaces expected to be made available for use in 1963.

4. *Research and development.*—This activity covers the research effort to improve the effectiveness of the Nation's civil defense program, including all aspects of shelter design, construction, and use; studying and evaluating civil defense operating systems for preattack and emergency use in the attack and immediate postattack period; the development of systems and procedures for recovery techniques and the orderly transfer of recuperative actions from civil defense responsibility to normal governmental and private agency control; and the evaluation and integration of related research programs.

Appropriation (adjusted)		254,864	

The Office of Civil Defense was constituted on August 1, 1961, to carry out the civil defense responsibilities assigned to the Secretary of Defense by Executive Order No. 10952. These functions cover the Federal responsibilities assigned in the Federal Civil Defense Act of 1950, as amended, including the development and execution of a fallout shelter program and the associated actions for radiological, chemical and biological defense, warning and alerting the population, civil defense communications, damage assessment, donation of Federal surplus property, and assistance to State and local governments.

The 1962 program is being financed by an appropriation of \$207.6 million direct to the Department of Defense in August 1961, plus civil defense appropriations of \$48.3 million transferred from the Office of Emergency Planning, formerly the Office of Civil and Defense Mobilization.

The 1962 program is centered on the identification, marking and stocking of public shelter spaces immediately available in existing structures, in line with the objective of providing the most economical fallout shelter in the quickest possible time. This program is estimated to provide 50 million shelter spaces and is expected to be substantially completed by the end of 1962.

This fund finances the acquisition costs, mortgage payments and initial alteration, improvement, rehabilitation, and repair of certain family units of Wherry Act housing (70 Stat. 1111-1112).

Budget program.—The budget program contemplates acquisition of about 79,000 units of Wherry family housing by the end of 1963, at a total cost of \$697.2 million, which includes 4,100 units in 1962 and 3,000 units in 1963. Acquisition of Wherry Act housing is mandatory at installations where the construction of housing under the armed services housing mortgage insurance program (Capehart housing) has been approved by the Secretary of Defense and is permissive in all other cases. There is also provided approximately \$14 million in 1962 representing additional costs required to satisfy sponsors' equities in cases pending litigation.

Through 1963 it is planned to have rehabilitated approximately 77,400 of the acquired units of which about \$27 million will be funded in 1962 and \$19 million in 1963.

Financing the budget program.—This program has been funded from reappropriations, rentals, and, where the housing is assigned as public quarters, from payments from appropriations for pay and allowances of military personnel in amounts equal to the quarters allowances to which the occupants would otherwise be entitled. In 1963, income to the fund from rental and forfeitures of quarters allowances is proposed to be limited to amounts required for mandatory recurring payments. Mortgage indebtedness assumed in acquiring the housing is reflected in the schedules.

The cost of maintaining and operating the housing is not charged to the fund but financed from the military operation and maintenance appropriations.

Operating results and financial condition.—A net budget expenditure of \$25 million is expected for 1962 and \$24.5 million for 1963 since outlays for acquisition of sponsors' equities, mortgage payments, repairs, and other costs will continue to exceed the income from quarters allowances and rentals. Operating income is expected to exceed operating expenses paid from the fund by about \$40 million in 1962 and \$14 million in 1963.

The schedules do not reflect depreciation or operation and maintenance costs. Government investment is estimated at \$443 million at June 30, 1963, consisting of \$267 million in reappropriations and \$176 million in retained earnings.

DEFENSE PRODUCTION GUARANTEES

Guarantees are given on loans made by public and private financing institutions by the Army, Navy, and Air Force to facilitate performance of defense production contracts. When necessary, loans may be purchased by the Government. Administrative expenses are financed from guarantee fees and interest on loans receivable. Funds in excess of guaranteed loan program requirements may be transferred to miscellaneous receipts of the Treasury. Net earnings are retained to purchase loans when required under guarantee commitments and to cover possible future losses (50 U.S.C. app. 2091).

This fund finances the central procurement by the Federal Government of civil defense materials toward which contributions to the States are authorized on a matching fund basis. The fund is reimbursed for purchases from Office of Civil Defense appropriations and from funds provided by the States (65 Stat. 61).

Under the authority of Public Law 85-606, the personnel and administrative expenses program was implemented on January 1, 1961. This new authority, together with that already provided in Public Law 920 to make financial contributions to the States for civil defense materials and facilities, now makes it possible to proceed with a coordinated program for improving the civil defense capability of the Nation. This action, coupled with the emphasis placed on the need for an effective civil defense by the present administration, indicates that much greater civil defense activity on the part of the State and local governments may be expected in the coming years.

It is anticipated that during 1962 and 1963 much will be accomplished toward the establishment of emergency operating centers and a radiological defense capability at all levels of government. Central Federal procurement will assist in securing the necessary equipment and instruments at the most favorable prices. This estimate therefore reflects substantial increases under these activities.

This fund finances inventories of consumable supplies, minor items of equipment, and repair parts throughout the Army depot supply system and at certain stations in the Continental United States, and in most of the depots of the major overseas commands. Material is purchased and held at these locations for resale and for mobilization reserve (5 U.S.C. 172d).

Supply and financial operations of the fund are centrally directed and controlled by the Department of the Army. In the financial statements the 500,000 items under the fund are classified into 14 material categories, which are managed through the Army's seven technical services and the defense supply service. Among the 14 categories are five single manager assignments covering continental U.S. depot inventories of clothing, subsistence, general, construction and automotive supplies for all the military services which will be transferred in 1962 and 1963 to the new Defense stock fund of the newly created Defense Supply Agency.

During 1961, the number of items carried in inventory continued to decrease due to improved cataloging, standardization, elimination of obsolete items, and transfer of item management responsibility to the General Services Administration. The assumption of responsibility by

the Defense stock fund for all of the single manager material categories currently assigned to the Army will result in inventory transfers from the Army stock fund to the Defense stock fund of an estimated \$1,996 million. In the statements, these categories are reflected entirely in this fund in 1962, and entirely in the Defense stock fund in 1963. During 1963, the Army stock fund will be extended to include repair parts for aircraft and guided missiles, and the statements include estimates for these new stock fund items. Also in 1963, the management of station inventories through the U.S. Continental Army Command, currently in effect in the 3d Army, will be geographically extended to 33 additional stations. Management of inventories in the Pacific Command will be extended geographically to include inventories in Okinawa. These planned geographical extensions in 1963 are not reflected in the budget statements. The 1963 estimates do reflect a proposed realignment whereby the funding for initial procurement of all centrally controlled items of supplies, repair parts and minor equipment will be under the stock fund and the funding of all centrally controlled items of major equipment and high dollar value spare parts will be under the appropriation Procurement of equipment and missiles, Army.

The net change in capitalized inventories of \$112 million in 1961 was due principally to material returns from customers of \$103.7 million, and the transfer of general supplies inventories valued at \$87.6 million from other military services to the single manager for this material category, offset by other adjustments of \$79.3 million. The net change projected for 1962 is an increase of \$88 million, consisting of material returns from customers of \$63.6 million and the transfer of \$11.4 million of inventories from other military services to the new single manager for construction supplies, and other adjustments of \$13.0 million. The net decrease of \$1,769.7 million in 1963 reflects the decapitalization to the Defense stock fund of \$1,995.8 million, the net effect of \$384.9 million capitalization and \$212.8 million decapitalization due to the proposed realignment of procurement funding, and \$54 million of returns from customers and other adjustments. Changes by category are as follows (in thousands of dollars):

Budget program.—Obligations of \$2,230 million in 1961 are estimated to decrease by \$800 million to \$1,430 million

in 1963 as a result of the single manager material category transfers to the Defense stock fund. Total obligations include procurement for augmentation of mobilization reserves of \$40 million in 1961, \$160 million in 1962, and \$124 million in 1963. Continued emphasis on maximum utilization of long-supply stocks and on conservative procurement of material in relation to sales requirements has limited obligations for peacetime stock to 91% of sales in 1961, an estimated 95% in 1962, and 90% in 1963. The budget program provides for year-end inventories as follows (in millions of dollars):

	1960 actual	1961 actual	1962 estimate	1963 estimate

Excess or surplus stocks awaiting disposal.....	345.8	563.2	-----	-----
Total inventories.....	4,843.2	4,163.8	3,465.4	1,630.4

During the three fiscal years, inventories are expected to decrease \$3,212 million. Of this reduction, \$613 million results from estimated sale of peacetime stock without replacement and \$1,027 million from disposal of surplus material, in keeping with the Army's continued emphasis on a critical review of its stock retention policy and the elimination of unneeded stocks from the system. It is estimated that approximately \$90 million will be donated to the Military assistance program and \$43 million to education, public health, and civil defense activities as authorized by law. Other inventory reductions include inventory losses and transfers estimated at \$102 million and net decapitalization of \$1,569 million. Offsetting these reductions are estimated receipts of \$229 million from net mobilization reserve procurement, and changes in standard prices which will increase book value of inventory by \$4 million.

Beginning in 1961, the value of material declared excess and awaiting disposal which previously has been included in budget statements as stock fund assets will be transferred to a new property disposal account established to simplify accounting for property awaiting disposal. Proceeds from the sale of stock fund material will continue to be returned to the stock fund. The following table sets forth the estimated property disposal program (in thousands of dollars):

	1961 actual	1962 estimate	1963 estimate
Material awaiting disposal, beginning of period.....	345.8	563.2	621.4
Transferred for disposal.....	483.5	332.0	140.7

Net loss on disposals.....	248.9	255.8	267.0

Financing the budget program.—Funds for financing the budget program are derived from sales to authorized customers. The estimated sales decrease of \$942 million forecast from 1961 to 1963 reflects the anticipated impact of transferring the single manager material categories to the Defense stock fund. The \$265 million increase in the sales programs of the material categories remaining in the Army stock fund is attributable to the increases in Army strength and material readiness programs. Collections exceeded expenditures by \$208 million in 1961 and are expected to exceed expenditures by \$250 million in 1962 and \$37 million in 1963. These net negative budget expenditures reflect the continued emphasis on purification of inventories and the selling of existing inventory without replacement in kind.

Transfers of \$260 million in 1961 and \$240 million in 1962 were made to Military personnel, Army and an additional \$350 million is proposed for transfer to that account in 1963. Depending on the phasing of operations into the Defense stock fund and cash availability in the Army stock fund during 1963, a portion of the proposed 1963 transfer may, in fact, be made from the Defense stock fund. In addition, accounts receivable of \$124.2 million and accounts payable of \$50 million, respectively, are proposed to be moved in 1963 to the Defense stock fund along with

REVOLVING AND MANAGEMENT FUNDS—Con.

Intragovernmental funds—Continued

ARMY STOCK FUND—Continued

\$448.5 million of material on order, not reflected as a liability, and \$123 million of unfilled customers orders, not reflected as an asset.

Operating results and financial condition.—Net losses were \$555 million in 1961 and are estimated at \$512 million in 1962 with a gain of \$28 million anticipated in 1963. The 1961 and 1962 losses, reflecting principally the loss on disposal of surplus stocks and authorized donations, are reversed in 1963 as the material categories containing the bulk of disposable stocks are transferred to the Defense stock fund.

Government equity at June 30, 1963, is estimated at \$1,960 million including \$9,482 million in capitalized assets less a \$4,172 million deficit and less \$3,350 million of net transfers to other accounts.

This fund, initially established in 1893, finances the procurement and maintenance of inventories of common-use material and supplies for resale and for mobilization reserve (5 U.S.C. 172d). It includes items in all levels of shore-based inventories and in inventories of fleet issue ships and service force vessels afloat.

In 1961 inventories capitalized under the fund increased \$80 million, due principally to the continued implementation of single manager industrial supplies. In 1963 the anticipated impact of the Defense stock fund of the new Defense Supply Agency is indicated with a decapitalization to that fund of \$310 million of single manager medical and dental material, industrial supplies and petroleum products. The estimates reflect changes in the inventory capitalized under each major supply category of the fund as follows (in thousands of dollars):

	1961 actual	1962 estimate	1963 estimate

Budget program.—The \$10 million decrease in 1963 obligations from the 1961 level reflects an anticipated \$195 million impact of the new Defense stock fund offset by \$185 million of program increases related to Navy strength and force levels and to continued procurement of stocks of initial spare and repair parts for new Navy hardware and equipment. The budget program provides for year-end inventories as follows (in millions of dollars):

During 1961, total inventory decreased \$187 million, the net of \$89 million in increases and \$276 million in decreases. The decreases consisted of \$263 million in disposals of excess and surplus property, and \$13 million in inventory losses and adjustments. In 1961, \$80 million in inventory was capitalized, and standard price markups added \$9 million to book value of the inventory. During 1962 and 1963 a decrease in inventory of \$389 million is

forecast, the net of \$34 million in increases, and \$423 million in reductions. The increases reflect standard price markups of \$16 million, mobilization reserve stock procurement of \$10 million and increased operating inventory levels of \$8 million. The reductions reflect an estimated \$250 million of net inventory decapitalization, \$154 million of losses on disposal of surplus inventory, and \$19 million of net inventory losses and adjustments.

Financing the budget program.—Funds for financing the budget program are derived from sales of material to authorized customers. Sales in 1963 are estimated at \$15 million below the 1961 level. Cash receipts exceeded disbursements by \$66 million in 1961 and are expected to exceed disbursements by \$40 million in 1962. In 1963 disbursements will exceed collections by an estimated \$18.5 million.

Transfers of \$75 million in 1961 and \$35 million in 1962 were made to Military personnel, Navy, and an additional \$25 million is proposed for transfer to that account in 1963. Also proposed for transfer in 1963 is \$15 million to the Marine Corps stock fund. Depending on the phasing of operations into the Defense stock fund and cash availability in the Navy stock fund during 1963, a portion of the proposed 1963 transfer may, in fact, be made from the Defense stock fund. In addition, accounts receivable and accounts payable of \$20.4 million and \$17.2 million, respectively, are proposed to be moved in 1963 to the Defense stock fund along with \$33.3 million of material on order not reflected as a liability. These proposed transfers will contribute to the negative unobligated balances indicated at the end of 1962 and 1963. Under authority of Section 645 of the Department of Defense Appropriation Act of 1954 (67 Stat. 357) the Department of Defense stock funds are authorized to incur obligations in anticipation of future year business. Accordingly, the controlling factor on fund operations is current assets rather than unobligated balances. As indicated in the statements the current asset position at the end of both 1962 and 1963 will continue to provide adequate resources for normal operation of the fund.

Operating results and financial condition.—The statements show net losses of \$82 million in 1962 and \$34 million in 1963 compared with a loss of \$240 million in 1961. These losses are expected to result largely from disposal of excess and surplus inventories. The order and magnitude of the property disposal program is indicated in the following table (in thousands of dollars):

	1961 actual	1962 estimate	1963 estimate
Material awaiting disposal, beginning of period.....	47,141	106,923	77,583
Transferred for disposal.....	262,913	106,660	47,000
Total.....	310,054	213,583	124,583
Disposals:			
Sales of useable items.....	118,795	90,000	51,700
Authorized donations.....	34,367	18,000	10,000
Abandoned or destroyed.....	49,969	28,000	14,000
Subtotal.....	203,131	136,000	75,700
Material awaiting disposal, end of period.....	106,923	77,583	48,883
Recovery on disposals.....	8,652	5,500	3,000
Net loss on disposals.....	194,479	130,500	72,700

Net inventory losses, included in the net operating losses, are forecast at \$10 million in 1962 and \$9 million in 1963, as compared with \$11 million in 1961. These losses represent the net from discrepancies in shipments, pilferage, losses in storage, differences disclosed by physical inventories, and accounting adjustments.

Government equity at June 30, 1963, is estimated at \$1,555.2 million, consisting of net appropriations and reappropriations of \$258.5 million, net capitalized inventory of \$2,216.9 million, less net deficit of \$920.1 million.

Applicable receipts.....	113,084	123,500	126,800
Budget expenditures.....	-12,664	-300	9,000

This fund commenced operations on July 1, 1953, and finances the procurement and maintenance of inventory for resale and mobilization reserve (5 U.S.C. 172d). All inventories except individual clothing are in the United States.

The fund was extended in 1962 to include additional items of ordnance, communication, and general property. In 1962 and 1963, inventories are being transferred to the newly established single managers for automotive supplies, general supplies, construction supplies, and industrial supplies in Army and Navy. Otherwise, changes in capitalized inventories result from returns from users without credit. Estimates contemplate changes in capitalized inventory under each category as follows (in thousands of dollars):

	1961 actual	1962 estimate	1963 estimate
Ordnance-tank-automotive.....	-4,040	861	-13,105
Engineer supplies and construction materials.....	-940	-656	-1,037
Communications—electronic.....	6,356	3,110	560
General material.....	-5,571	-3,231	-1,308
Clothing and textiles.....	117	-300	200
Fuel.....	-215	973	
Subsistence—commissary.....	77		
Total inventories capitalized during year (net of decapitalizations).....	-4,216	757	-14,690
Increase or decrease (-) in undelivered purchases to be paid from other accounts.....	65	-220	-520
Net change in capitalized inventories.....	-4,150	537	-15,210

Budget program.—Obligations are estimated to increase by \$25.9 million from 1961 to 1963. The increase results from initial parts requirements for new items, increased sales, additional capitalizations, 1963 to 1965 repair program support, and mobilization reserve. The budget program provides for year-end inventories as follows (in millions of dollars):

	1960 actual	1961 actual	1962 estimate	1963 estimate
Ordnance-tank-automotive:				
Operating stocks.....	121.1	97.2	68.1	56.0

Mobilization reserve stocks.....	58.3	56.1	57.4	53.6
Excess and surplus stocks awaiting disposal.....	33.5			
Total inventories.....	393.2	256.8	214.5	186.1

During the 3 years shown herein, inventories are forecast to decrease \$207.1 million. Of this reduction, \$13.7 million results from the sale of peacetime stocks without replacement and \$112.5 million results from losses on disposal of surplus under the accelerated review of inactive and long supply stocks. \$18.1 million, net, of inventory will be decapitalized, the result of transfers of \$33.6 million to single managers, new capitalizations of \$5.3 million and other receipts of \$10.2 million. The remaining decreases include \$58.9 million in inventory losses and adjustments, and authorized donations of \$3.9 million.

Financing the budget program.—Funds for financing the budget program are derived from sales to authorized customers. Sales in 1963 are estimated to increase \$15.1 million or approximately 14% over 1961, largely in new items and in clothing and textiles, fuel, and subsistence—commissary. Cash receipts are expected to be above expenditures by \$300 thousand in 1962 and below by \$9 million in 1963. The decrease in negative net expenditures reflects the reduction in long supply stocks which can be sold without replacement, as a result of transfers to single managers. Transfers to "Military Personnel, Marine Corps" of \$500 thousand in 1961 and \$11 million in 1962 have been effected. In 1963 additional working capital of \$15 million is proposed to be transferred from the "Navy Stock Fund".

Operating results and financial condition.—Net losses of \$42.2 and \$21.3 million are forecast from 1962 and 1963 operations, respectively. These result largely from the disposal of excess and surplus material.

This fund, established July 1, 1950, finances, for 1963, the procurement of approximately 13,000 items for resale and maintenance of operating and war readiness stocks (5 U.S.C. 172d). These items are stocked and sold at approximately 1,000 outlets worldwide. The scope of operations decreases during this period due to the transfer of organizational clothing and medical-dental items to general fund financing in 1961, and the transfer, in all 3 years, of the majority of general material items to recently implemented single managers or to Air Force general fund financing. The effect of these changes in capitalized inventory is as follows (in thousands of dollars):

	1961 actual	1962 estimate	1963 estimate
Clothing.....	-20,384	1,039	1,300
Medical-dental.....	-29,445	-4,224	-----

Net change in capitalized inventories.....	-64,786	-10,439	-34,670

Budget program.—Obligations increase \$96 million in 1962 reflecting higher sales of aviation fuel and commissary items as well as increased inventory requirements to support the sales program. In 1963, obligations will decrease by \$3 million, due primarily to reduced requirements for fuel. Inventories of clothing, aviation fuel and commissary items increase in 1962 to support 1963 requirements. One category of general material, general supplies, will be completely phased out by end 1963, due to single manager transfers, the transfer of the large dollar activity items to a new category, propellants, and the transfer of remaining stock items to general fund financing. The budget program provides for year-end inventories as follows (in millions of dollars):

	1960 actual	1961 actual	1962 estimate	1963 estimate
Clothing:				
Operating stocks.....	25.2	12.6	15.7	15.5
Mobilization reserve stocks.....	4.6	-----	-----	-----

Excess or surplus stocks awaiting disposal.....	9.3	7.3	3.1	-----
Summary:				
Operating stocks.....	233.6	193.9	200.5	169.7
Mobilization reserve stocks.....	136.5	97.3	114.9	105.1
Excess or surplus stocks awaiting disposal.....	20.0	7.5	3.3	.2
Total inventories.....	390.1	298.7	318.7	275.0

The decrease of \$91 million inventory in 1961 reflects the decapitalization of organizational clothing, medical-dental, and some general material items, as well as a decrease in war readiness requirements for aviation fuel items. The \$20 million increase in 1962 represents higher operating stock requirements for aviation fuel and commissary items and increased war readiness requirements for aviation fuel. These are partially offset by the continuing drawdown of general material stocks and further transfers in that area. In 1963, the decrease of \$44 million reflects primarily the elimination of the one general material category and a decrease in commissary operating requirements.

Financing.—Funds for financing the budget program are derived from sales to authorized customers. The sales program increases \$28 million in 1962 due to higher demands for aviation fuel and commissary items, partially offset by the elimination of organizational clothing and medical-dental items. The increase of \$39 million in 1963 also reflects higher requirements for the aviation fuel and commissary categories, as well as increases in the clothing area related to increased sales of the new light-weight blue uniform. Transfers to "Military personnel, Air Force" of \$30 million and \$44 million are shown in 1961 and 1962, and an additional transfer of \$35 million is proposed to this account in 1963. Payments will exceed collections in 1962 by \$8 million due to procurement of operating and war readiness stocks. In 1963, collections

will exceed payments by \$5 million due primarily to reduced inventory procurement in the commissary and general material areas.

Operating results.—The net loss in 1961 resulted primarily from downward revisions of standard prices of aviation fuel items and the adjustment of prior year deferred charges in the commissary area. The loss in 1962 reflects further downward revision of aviation fuel standard prices and the disposal program of excess and surplus general material items as shown in the following table (in thousands of dollars):

	1961 actual	1962 estimate	1963 estimate
Excess and surplus inventory, start of year.....	20,033	7,510	3,397
Capitalization.....	7,587	2,350	800

Total available.....	32,372	12,508	6,637
Transferred to disposal.....	14,205	7,152	3,896
Donations.....	722	82	65
Decapitalizations.....	9,667	1,218	2,106
Other (reclassification, adjustments).....	268	659	320
Total expended.....	24,862	9,111	6,387
Excess and surplus inventory, end of year.....	7,510	3,397	250
Recovery on disposals.....	690	420	323
Net loss on disposals.....	13,515	6,732	3,573

This latter situation is also reflected in 1963, as well as the effect of additional costs for aviation fuel storage and transportation resulting from a change from common service to cross service support in the Department of Defense. The deficit of \$197 million at June 30, 1963, is largely attributable to downward revision of standard prices for items initially capitalized and losses sustained in the disposal of excess and surplus stocks. These unusual factors are not expected to continue and future operations should be basically on a break-even basis.

This new stock fund will be chartered and begin partial operation in 1962 and will phase into larger scale operation in 1963. It will finance the procurement and maintenance of wholesale inventories of common use material and supplies for resale and for mobilization reserve (5 U.S.C. 172d). The nine categories of material reflected in the statements include the four old-line single manager categories of food, fuel, clothing and medical material; the four new single manager categories of general, industrial, construction and automotive supplies; and the proposed new single manager for electrical and electronic material. Wholesale inventories will be maintained at selected military service supply outlets in the continental U.S. for resale to military service retail stock funds and to consuming appropriations. In order to present complete rather than partial year programs in 1962 the impact of the transfer of the existing single managers is reflected in the 1963 column of the statements and schedules of the Army, Navy, and Defense stock funds.

An estimated \$3.1 billion of inventory will be capitalized into the fund in 1963. The anticipated capitalization by material category is as follows (in thousands of dollars):

Changes in Capitalized Inventories (in thousands of dollars)

	1961 actual	1962 estimate	1963 estimate
Automotive supplies.....			648,200
Clothing and textiles.....			1,111,200

Summary:	
Operating stocks.....	1,710.2
Mobilization reserve stocks.....	936.1
Total inventories	2,646.3

The estimated June 30, 1963 inventory of \$2,646 million reflects the net capitalization of \$3,069 million plus \$4 million of standard price markup less \$426 million of reductions. The reductions are composed of \$272 million of material sold without replacement, \$125 million estimated loss on disposal of surplus material at less than standard price, \$16 million of authorized donations, and \$13 million of inventory losses and adjustments.

Financing the budget program.—Funds for financing the budget program will be derived from sales to authorized customers. Sales in 1963 are estimated at \$1,921 million. Cash receipts will exceed disbursements by an estimated \$200 million, and \$35 million of this net cash to be generated by fund operations is proposed for transfer to the Military personnel, Air Force appropriation. Additionally, some portion of the \$350 million proposed for transfer from the Army stock fund and the \$40 million proposed for transfer from the Navy stock fund in 1963 may, in fact, be derived from this account. As indicated in those respective stock fund statements the material categories capable of generating transferable cash tend to be the single manager material categories. The negative unobligated balance of \$103 million indicated at June 30, 1963 reflect principally the difference between the time required to fill customers orders from stock and the production lead time on material required to be procured. Under Section 645 of the Department of Defense Appropriation Act of 1954 (67 Stat. 357) the Department of Defense stock funds are authorized to incur obligations in anticipation of future year business. Thus, the controlling factor on fund operations is current assets rather than unobligated balances. As indicated in the statements, the current assets at June 30, 1963 will provide adequate resources for fund operations.

Operating results and financial condition.—The statements indicate net losses of \$205 million in 1963, resulting largely from disposal of excess and surplus inventories. These losses are expected to be reduced in future years

REVOLVING AND MANAGEMENT FUNDS—Con.

Intragovernmental funds—Continued

DEFENSE STOCK FUND—Continued

as the amount of surplus material in the supply system is reduced. Although generation of excess stocks is inevitable in supply operations, every effort will be made to minimize disposal losses and to provide for the recovery of such losses as do occur from operating appropriations in order to protect the integrity of the capital of the fund. Net inventory losses, representing the net from discrepancies in shipments, pilferage, losses in storage, differences disclosed by physical inventories, and accounting adjustments, are forecast at \$13 million.

Government equity at June 30, 1963, is estimated at \$2,907 million, consisting of net working capital transferred in of \$42 million, net capitalized inventory of \$3,069 million, less net deficit of \$205 million.

Applicable receipts.....	677,651	759,007	799,163
Budget expenditures.....	7,743	-----	-----

This fund finances industrial and commercial type activities on a reimbursable basis (5 U.S.C. 172d).

Budget program—Army pictorial center.—This installation produces, procures, processes, distributes and evaluates motion pictures, foreign language recordings, film strips, recordings, and television programs for use in military training, research, orientation, and education. Operations in 1962 and 1963 are expected to continue at about the 1961 level.

Depot manufacturing and maintenance divisions.—Activities under this program are organizational units of multiple mission installations. The maintenance divisions include two Quartermaster activities, two Engineer shops, a Signal shop, and a Transportation Corps railroad repair shop. These activities rebuild and restore unserviceable equipment. The manufacturing division manufactures clothing and other textile items. The slight program increases in 1962 and 1963 reflect greater workload in the railroad repair shop.

Ordnance arsenals.—These six installations are engaged in the research, development, engineering, pilot manufacturing, testing and evaluation of small arms and artillery-type weapons. The increased activity in 1962 and 1963 reflects the impact of improved readiness programs with greater emphasis on conventional weapons.

Ordnance missile command.—This activity finances research, development, engineering, and logistical support operations of Headquarters, Army Ordnance Missile Command, the Army Ballistic Agency, the Army Rocket and Guided Missile Agency and Redstone Arsenal. Support services are also furnished to the George C. Marshall Space Flight Center and to other National Aeronautics and Space Administration activities. Moderate program increases are anticipated in 1962 and 1963.

Ordnance proving ground and research.—This includes a laboratory specializing in work on fuzes and a proving ground engaged primarily in research, test and evaluation of ordnance weapons, materials and equipment. The program increases in 1962 and 1963 reflect the higher level of weapons procurement and production in those years.

Chemical arsenals.—These two arsenals are equipped for volume production and loading of chemical warfare material. An increase in production of components for ammunition, rockets and missiles is reflected in the program forecasts for 1962 and 1963.

Chemical proving grounds and research.—These three installations are engaged in the research and development of chemical and biological agents, delivery systems, and protective items. No significant change in program is anticipated in 1962 and 1963.

Transportation terminal commands.—These three commands plan, regulate, and control the export and import movement of personnel and cargo through Army terminals on the Atlantic, Pacific, and Gulf coasts. In addition, this program includes costs of auxiliary port services and support of tenants and satellites. Workload is expected to increase in 1962 and decline slightly in 1963. Estimated workload is (in thousands):

	1961 actual	1962 estimate	1963 estimate
Cargo in measurement tons.....	7,304	8,269	7,713
Passengers transhipped.....	506	547	564

Financing the budget program.—This program is financed from customer orders. These orders constitute valid obligations of customers' appropriations and authorize activities financed through the fund to purchase material and to begin production. Costs are charged initially to the working capital of the fund and are billed to customers as jobs are completed or periodically as work progresses. The estimates of orders to be received in 1962 and 1963 are based on the program guidance received from major customers. New orders in 1962 are estimated at \$30.8 million less, and in 1963 at \$95.7 million more, than in 1961. The increase in 1963 reflects principally the greater activity at Ordnance arsenals, proving grounds and research installations. The balance of unfilled orders is expected to be reduced from \$481.5 million at June 30, 1961 to \$407.5 million at June 30, 1963. Customer orders are accepted only to the extent of efficient production capacity within a reasonable time.

Operating results and financial condition.—The following table indicates 1961 net revenue and expense by activity (in thousands of dollars).

	Revenue	Expense	Gain or loss (—)
Army pictorial center.....	8,238	8,235	3
Depot manufacturing and maintenance divisions.....	26,437	26,303	134
Ordnance arsenals.....	288,346	287,524	822
Ordnance missile command.....	102,221	102,671	—450
Ordnance proving ground and research.....	68,228	68,112	116
Chemical arsenals.....	14,955	14,979	—24
Chemical proving grounds & research.....	72,941	72,964	—23
Transportation terminal commands.....	78,126	78,123	3
Total.....	659,492	658,911	581

The net gain of \$581 thousand reflects an operating variance resulting principally from the use of standard costs and the pricing of customer billings at predetermined rates. Revenue and expense are expected to be equal in 1962 and 1963, with the objective of avoiding either augmentation or overcharging of customer appropriations.

Expenditures exceeded collections by \$7.7 million in 1961, reflecting normal adjustments of working capital balances. Expenditures are expected to equal collections in both 1962 and 1963. The Government equity at the end of 1963 is estimated at \$121.4 million, composed of \$106.9 million in reappropriations and \$15.8 million in capitalized assets, less an accumulated operating loss of \$1.3 million. This investment is required to meet the working capital requirements of the activities currently financed through the fund.

Applicable receipts	1,649,357	1,727,000	1,708,200
Budget expenditures	-8,966	-8,000	

This fund finances 62 industrial and commercial type activities on a reimbursable basis (5 U.S.C. 172d).

Budget program—Printing.—This program covers 31 plants, including 6 overseas, which provide common printing services at the seat of Government and throughout the

field establishment. Costs increase in 1962 and 1963 due to an overall increase in workload and the financing of the headquarters organization through the fund which became effective February 1, 1961. Printing prices have been revised effective July 1, 1961, to align revenue more closely with operating costs.

Ordnance.—This program includes nine plants producing missile launchers, propellants, torpedoes, avionics equipment, guns and mounts, and other items of ordnance and ammunition. Costs decline in 1962 from 1961 by approximately \$5 million, the net change resulting from a \$29 million reduction due to the termination of industrial operations at the Naval Weapons Plant, Washington, D.C., and a \$24 million increase in workload at other activities related to the increased defense measures ordered in 1962. The 1963 estimates reflect the final closeout of this activity. Costs at the remaining activities are expected to approximate those of 1962.

Shipyards.—The estimates include 11 shipyards and 1 ship repair facility engaged in the construction, conversion, overhaul, repair, and alteration of active and reserve fleet vessels. Costs are expected to increase in 1962 over 1961 by \$22 million which results from increases in workload for construction and conversion of ships and the activation of vessels included as overhaul, repair, and renovation. The 1963 costs are expected to approximate 1962 except that construction and conversion of ships is expected to increase by \$34 million offset by decreases in overhaul, repair, and renovation work by \$31 million.

Military Sea Transportation Service.—This organization provides ocean transportation of dry cargo, passengers, and petroleum. Estimates reflect costs of operating Government-owned ships and procuring commercial transportation. Revenue is received from billings to customers on the basis of published tariff rates for point-to-point lift, on a per diem basis for use of ships, or on the basis of costs applied. In 1962 and 1963 costs are expected to increase over 1961 by \$46.3 million and \$34.3 million, respectively. The increase for 1962 relates to all types of transportation services but is primarily in the area of cargo and petroleum operations. Passenger operations for 1962 reflect the increased procurement of commercial sea transportation provided for in section 633 of the 1962 Department of Defense Appropriation Act. Operations for 1963 are expected to drop back from 1962 by \$12 million primarily due to reduced cargo lift offset by minor increases in the passenger, petroleum and project ship operations. The following is a summary of estimated workload and costs (dollars in thousands):

	1961 actual	1962 estimate	1963 estimate
Cargo ships:			
Measurement tons (cargo)	10,632,145	11,434,179	10,817,114
Per diem ship-days	3,902	4,309	4,309
Cost	\$206,142	\$243,000	\$220,000
Passenger ships:			
Cabin passengers	113,223	124,300	142,512
Troop passengers	249,885	262,319	276,059
Total passengers	363,108	386,619	418,571
Per diem ship-days	364	67	67
Cost	\$49,691	\$52,400	\$55,000
Petroleum ships:			
Long tons (petroleum)	15,898,314	15,281,700	14,490,352
Per diem ship-days	1,280	1,008	1,008
Cost	\$83,367	\$88,000	\$94,800
Project ships and miscellaneous:			
Per diem ship-days	3,359	4,911	5,383
Cost (reimbursable)	\$10,505	\$12,600	\$14,200
Total costs	\$349,705	\$396,000	\$384,000

REVOLVING AND MANAGEMENT FUNDS—Con.

Intragovernmental funds—Continued

NAVY INDUSTRIAL FUND—Continued

Marine clothing and equipment.—This factory in Philadelphia serves as a pilot production plant to test design specifications and production methods. It also manufactures some clothing and textile items, particularly production required on short notice or in small lots, and it establishes material usage allowances for clothing and equipment production. Workload during 1962 and 1963 is expected to approximate that of 1961. However, costs for 1962 and 1963 decline from 1961 as a result of higher productivity.

Research.—This includes the Naval Research Laboratory, the David Taylor Model Basin, both in Washington, D.C., and the Naval Ordnance Laboratory, Corona, Calif. The cost increases in 1962 and 1963 over 1961 relate primarily to increases at the David Taylor Model Basin due to transfer of management control of the underwater explosion research division to this activity, increased effort in the hydrofoil program, and a complete year's operation of the Langley testing facility; increases in workload at the Naval Ordnance Laboratory of approximately \$0.6 million and \$0.8 million respectively; and decreases of \$3.4 million and \$2.5 million, respectively, at the Naval Research Laboratory primarily for contractual services.

Base services.—This includes three public works centers providing utility, maintenance, custodial, and transportation services, and one transportation center providing transportation and vehicle repair for adjacent commands. Costs are expected to increase in 1962 and 1963 over 1961 by \$4 million due to increased workload resulting from the consolidation of public works functions at naval complexes with public works centers in the area. Although increases in program are shown, the consolidations have resulted in significant savings and economies to the Navy as a result of improved operations and more effective utilization of manpower and equipment.

Aircraft maintenance facilities.—This activity at the Quonset Point Naval Air Station reworks aircraft, missiles, and accessories, and manufactures aircraft parts and assemblies. Significant increases are reflected for 1962 and 1963 which result from increased workload required by the defense buildup. The acceleration of this program will lessen during 1963 as the number of aircraft in ready-for-issue condition increase. An additional aircraft maintenance activity, the overhaul and repair department at Alameda Naval Air Station, is expected to be converted to industrial fund financing in the latter part of 1962, as a continuation of the test of the appropriateness of industrial fund financing for these activities.

Financing the budget program.—This program is financed by orders received from customer appropriations which authorize industrial fund installations to incur costs in performing the work or services required. Orders are expected to increase by \$66.7 million in 1962 and \$88.7 million in 1963 as compared to the \$1,627 million received in 1961. Increases occur in all programs during 1962 and 1963 except for ordnance and Marine clothing and equipment. The decrease in ordnance for 1962 results primarily from the phasing out of industrial operations at the Naval Weapons Plant. Orders for ordnance in 1963 at

the remaining activities are expected to increase by approximately \$20 million. Increases in most programs relate to the build-up of defense activities and also from consolidation of public works functions at naval complexes plus the operation of additional facilities at research activities.

Operating results and financial condition.—The following table shows 1961 net revenue and expense by activity (in thousands of dollars):

	Revenue	Expense	Gain or loss (—)
Printing.....	14,062	13,766	296
Ordnance.....	187,195	186,602	593
Shipyards.....	922,592	921,484	1,108
Military Sea Transportation Service.....	351,779	349,705	2,074
Marine clothing and equipment.....	6,025	5,991	34
Research.....	86,442	86,970	—528
Base services.....	39,546	39,472	74
Aircraft maintenance.....	21,695	21,171	524
Total.....	1,629,336	1,625,161	4,175

Retained earnings increased \$4.3 million in 1961, the net of \$4.2 million operating gain for the year plus \$0.1 million in adjustments of prior year revenues, expenses and inventory. Revenue is expected to increase by \$99.7 million in 1962 and \$76.7 million in 1963 over the \$1,629.3 million in 1961. Significant increases in revenue occur in construction and conversion of ships between 1962 and 1963 by \$34 million, overhaul and repair of ships and aircraft from 1961 to 1962 by \$45.6 million and in transportation between 1961 and 1962 by \$46.9 million. Major decreases in revenue during 1963 as related to 1962 occur in manufacturing, overhaul and repair, and transportation. The increase in salaries and wages for 1962 and 1963 over 1961 reflect the employment trend for those years occasioned by the defense buildup. Budget expenditures for 1961 were \$9 million less than collections. This resulted primarily from more rapid collections of accounts receivable in 1961 over 1960. Collections for 1962 are expected to exceed expenditures by \$8 million and in 1963 are expected to approximate expenditures. The cash balance shown for 1962 and 1963 reflects the results of transfer of \$20 million to the appropriation Military personnel Navy. Government investment at June 30, 1962, and 1963 is expected to be \$275.1 million composed of \$283.1 million in reappropriations and \$26.8 million in retained earnings, less \$34.8 million representing the excess of liabilities assumed over assets capitalized. Of this total \$262.3 million is allocated to activities currently operating under the fund. The balance of \$20.8 million is available to finance additional activities under the fund.

Revenue, Expense, and Retained Earnings (in thousands of dollars)

	1961 actual	1962 estimate	1963 estimate
Revenue:			
Manufacturing and assembly.....	164,737	159,000	149,000

This fund finances industrial and commercial type activities on a reimbursable basis (5 U.S.C. 172d).

Budget program—Printing and duplicating service.—There are nine plants covered under this program. Production in 1961 was 2.2 billion printing units and is estimated to increase to 2.4 billion in 1962 and 2.5 billion in 1963. The increased production is due to increased productivity per press unit due to upgrading of equipment and increased requirements of consumer appropriations.

Laundry and dry cleaning service.—At June 30, 1961, there were 45 plants operating under this fund. Three plants will be activated and 2 plants will be deactivated leaving 46 plants operating on June 30, 1963. Total production in 1963 is estimated at approximately 101.7 million pieces of laundry and dry cleaning as compared with 99.7 million for 1962 and 101.5 million for 1961.

Military Air Transport Service.—The airlift service portion of the Military Air Transport Service was covered under this fund on July 1, 1958. The size of MATS and the extent and nature of its operations are keyed to approved military wartime airlift requirements. These requirements include (1) the hard-core requirements which, because of their nature or timing, must move in military operated aircraft and (2) civil eligible requirements for

which military airlift is used only to the extent that civil airlift capability is not available.

The airlift capability produced by exercising the airlift system in peacetime to maintain a proper state of readiness is used in the interest of economy in meeting peacetime airlift needs of the Department of Defense. Military aircraft are utilized to provide air evacuation of patients; special air missions; training of airborne troops; and, as augmented by commercial aircraft, common-user airlift of passengers, cargo, and mail. Airlift service resources and workload are as follows:

	1961 actual	1962 estimate	1963 estimate
Operating aircraft, average number:			
Common-user.....	420	480	510
Other.....	53	53	52
Total.....	473	533	562

[In millions of ton-miles]

	1961 actual	1962 estimate	1963 estimate
Airlift accomplished (common-user):			
Cargo.....	524.4	567.8	519.8
Passenger.....	389.8	358.4	408.1
Special assignment airlift.....	507.0	681.1	756.0
Common carriage mail.....	70.5	77.4	77.4

Financing the budget program.—This program is financed by customer orders for services. These orders constitute valid obligations of the ordering appropriations and authorize activities financed through the fund to provide services requested. Costs are charged initially to the working capital of the fund and are billed to customers on the basis of established tariff rates for services provided.

Operating results and financial condition.—For 1961 expenses exceeded revenues by \$2.9 million, mainly as a result of the operation of the airlift service. Retained earnings decreased \$0.3 million in 1961, the net result of \$2.9 million operating loss for the year offset by \$2.6 million in adjustments of prior year revenues and expenses. Revenue is expected to increase over the 1961 level in 1962 due to anticipated increases in requirements for airlift service, and decline slightly in 1963.

Collections exceeded expenditures by \$16.5 million in 1961, reflecting a decrease in accounts receivable and an increase in accounts payable. In 1962 it is estimated that collections will exceed expenditures by \$7 million, while in 1963 expenditures will equal collections.

Employee annual leave accruals, included in the statements as a current liability, were \$1.8 million at June 30, 1961. Government investment is estimated at \$61.7 million at June 30, 1963, consisting of \$61 million in reappropriations and transfers and \$1.5 million in retained earnings less \$0.8 million representing the excess of liabilities assumed over assets capitalized.

ARMY MANAGEMENT FUND—Continued

This fund was created to simplify operations which are financed by two or more appropriations (5 U.S.C. 172e). The corpus of the fund consists of \$1 million. Activities presently financed through the fund are as follows:

1. *Defense telephone service, Washington, D.C.*, finances the operations of the telephone service of the Department of Defense in Washington.

2. *Transportation services* provide for the payment centrally of transportation charges for Government bills of lading, transportation requests, meal tickets, and other charges incident to transportation costs by all agencies in the Army.

3. *Construction activity, Europe*, finances certain administrative and overhead expenses of the Department of Defense construction programs in Western Europe.

4. *Interchange fleet* will be operated under appropriations available to the Defense Supply Agency in 1963.

This fund was created to facilitate the financing of operations supported by two or more appropriations (5 U.S.C. 172e). The principal activity financed through the fund is the Polaris ballistic missile program. Reimbursable orders for the Polaris program are issued to the fund from Navy appropriations for Procurement, Operation and maintenance, and Research, development, test, and evaluation. Other operations financed are construction of the Army, Navy, and the Air Force bases and stations in Spain; transportation of the supplies, materials, and equipment of the Navy; the material inspection service; incentive award payments; and departmental telephone and maintenance services. Beginning in 1963, the Electronics Production Resources Agency which coordinates the production and allocation of electronics equipment for the Department of Defense and certain functions relating to inter- and intra-departmental activities will be financed under the appropriation "Operation and maintenance, Defense Agencies."

Total financing.....	5,381	5,860	

This fund was created to facilitate the financing of activities supported by two or more appropriations (5 U.S.C. 172e). The corpus of the fund is \$1 million.

The principal activity financed through the fund in 1961 and 1962 was the Armed Forces Supply Support Center which administered the defense standardization program, the interservice supply support program, the defense materiel utilization and excess screening program, and centralized operations for the Federal Catalog System. The Center also conducted management analyses regarding the administration of common supply functions among the military services. Through 1962, the activities of the Center were financed jointly by advances from the three military departments to this fund. Certain cataloging services were performed for the General Services Administration and the Federal Aviation Agency on a reimbursable basis.

The functions and activities of the Armed Forces Supply Support Center were transferred to the Defense Supply Agency on October 1, 1961. The 1962 program of \$5,860 thousand represents the current year requirement (July 1, 1961 through June 30, 1962) for those functions which had been the responsibility of the Center. In 1963, the activities of the Center, which were previously financed through this fund, will be financed by the Defense Supply Agency from an appropriation for that Agency. As a result, this fund will not be used to finance those activities in 1963.

The corpus of the fund will be retained to provide the means for financing appropriate activities in the future.

This fund accounts for advances received by the Navy for the cost of work or services not chargeable to Naval appropriations to be furnished foreign governments and private parties (31 U.S.C. 643). Private individuals and organizations involved advance amounts to cover the estimated costs to this fund which amounts are then used to reimburse the Operation and maintenance, Navy, appropriation for the costs involved. These activities relate primarily to (a) utilities, repairs, and maintenance furnished to morale, welfare, and recreation activities; (b) utilities furnished to tenants of Navy housing projects and (c) utilities, sale of material, equipment rental, and other services for contractors and other private parties, primarily in oversea locations. Advances received from foreign governments are principally for sales of material and miscellaneous services.

The military assistance program is designed to strengthen the mutual security of the free world by contributing to the development, maintenance, and training of modern military forces, to deter or resist external aggression, combat internal subversion, and protect valuable overseas military bases. Appropriations for 1963 were authorized in the Foreign Assistance Act of 1961.

More than 40 free-world countries are receiving grant aid under this program, and others are eligible to buy military equipment on cash or credit terms. Their combined military forces are numerically much greater than the U.S. Armed Forces, and provide free-world striking power, depth in reserves, and flexibility. Many of these countries have joined in regional defense pacts, such as NATO, SEATO, and CENTO, or in bilateral defense arrangements with the United States. Most of the U.S. contributions to these regional organizations are derived from military assistance program funds.

Most of the military equipment and supplies which the United States provides to its foreign allies are obtained by placing orders with the U.S. military services. Military assistance funds are reserved when the orders are placed, and the military services are paid when the items are delivered.

The kind of materiel supplied by the United States varies with our mutual security objectives in each area and the internal capabilities of the individual countries. In developed areas the emphasis is on newer weapons which are not yet fully within the production or financial capability of our allies. In less-developed areas, modernization of conventional equipment is emphasized. Whenever possible, materiel already on hand but excess to the needs of U.S. forces is supplied, at no charge to the

military assistance program except for the cost of rehabilitation and transportation.

Grant aid operations: Reservations for requirements ordered from U.S. military services—

1. *Aircraft.*—In 1962 and 1963, aircraft will be funded partly through reservations and partly by direct obligations as shown above. Emphasis is to be placed on more advanced aircraft in NATO and selected Far Eastern countries. At the same time, the air forces of many less-developed countries are replacing obsolete planes with later model aircraft, now becoming excess to the United States and NATO.

2. *Ships.*—New construction of patrol, mine-sweeping and other type vessels are included in the 1963 program. Reactivation and rehabilitation of ships from the U.S. "mothball" fleet continues to meet other naval requirements of our allies under authority of ship loan legislation, Public Laws 87-387; 86-482; 86-57; 85-532 (10 U.S.C. 7307).

3. *Tanks, other vehicles, and weapons.*—Included is combat and support equipment ranging from artillery, tanks, and other heavy vehicles to small arms and jeeps. Many of these items are supplied from existing U.S. stocks, and through a program of rebuilding vehicles which Far Eastern countries have returned to the military assistance program. The 1963 program includes continuing replacement of wornout or obsolete equipment in the forces of less-developed countries.

4. *Ammunition.*—Most of the ammunition to be supplied as grant aid in 1963 will be used for training allied troops.

5. *Missiles.*—Programing for modernization of forces with ballistic and other guided missiles, primarily in NATO, reached a peak in 1961, and continues at a decreased level in 1963. In addition, the 1963 program provides for maintenance of equipment previously furnished.

6. *Electronic equipment.*—The 1963 program continues the modernization of military communications systems in less-developed countries.

7. *Military public works.*—Materiel and equipment directly supplied by the United States for military assistance construction are procured through the military service supply systems. Other U.S. costs for this construction are met initially by the military assistance program and are cited in paragraph 14 below.

8. *Other.*—A variety of special purpose equipment, petroleum, medical, and other supplies, and repair and rehabilitation of used equipment not covered above are provided through orders placed with the U.S. services.

Because of the timelag inherent in a complex, worldwide supply operation, a large proportion of the items delivered by the U.S. services in any year result from orders placed in previous years.

The following table reflects the unfilled orders placed with the military services in prior years, the new items ordered and the deliveries and payments made (detail table appears at the end of this section).

	[In millions of dollars]		
	1961 actual	1962 estimate	1963 estimate
Unfilled orders at beginning of year.....	1,495.1	1,738.8	1,689.8
New items ordered.....	1,048.8	801.0	800.0
Deliveries.....	805.1	850.0	725.0
Unfilled orders at end of year.....	1,738.8	1,689.8	1,764.8
Payment for deliveries.....	886.5	775.0	725.0

MILITARY ASSISTANCE—Continued**Current authorizations—Continued**

MILITARY ASSISTANCE—Continued

Obligations for requirements other than through reservations—

9. *Offshore procurement.*—The reduction in the procurement of equipment and supplies abroad for the military assistance program reflects declining U.S. purchases in other industrial countries. U.S. overseas procurement in prior years helped these countries establish a defense production base, which they are now capable of maintaining as a source of supply for their own forces.

10. *Supply operations.*—The annual cost of packing, handling, storing, and transporting military assistance materiel varies in proportion to the types, volume, and destination of goods delivered.

11. *Training.*—Increased training programs in free-world countries are required to insure effective use of the new weapons and equipment supplied through the military assistance program, teach basic skills to forces of less-developed nations, and create favorable attitudes toward the United States and its policies.

12. *Administration.*—The administrative expenses of the program incurred by U.S. military assistance advisory groups, the unified commands overseas, and the departments are included.

13. *Contributions to international military headquarters and agencies.*—Included are the assessments levied against the United States in accordance with cost-sharing agreements for the administrative support of the military headquarters and agencies, including the Standing Group, of the North Atlantic Treaty Organization, Southeast

Asia Treaty Organization, and the Central Treaty Organization.

14. *Contributions to construction of facilities in other countries.*—Included are (a) construction of military and logistical facilities under the jointly financed NATO infrastructure program, and (b) contract costs, architect-engineering services and related overhead items for military assistance construction.

15. *Research and development.*—This program provides assistance to research and development of weapons and weapons systems of common interest undertaken by our allies in certain fields in which their facilities show promise of prompt success.

16. *Other activities.*—These include U.S. support for rapidly expanding programs of coordinated weapons production in Europe and integrated NATO procurement of spare parts.

Sales operations—

Military materiel is purchased in the United States by many countries, including some which do not receive grant aid. Most sales on a credit basis are initially financed by military assistance appropriations. Depending on the circumstances, repayment of credit sales may be in dollars, in local currency, or in materiel.

The following table shows the repayments and their reuse for new credit sales (in millions of dollars):

	1961 actual	1962 estimate	1963 estimate
Unused collections, beginning of year.....	27.2	43.8	4.5
Collection of credit sales.....	17.5	42.6	24.0
Collections reused.....	0.9	81.9	25.0
Unused collections, end of year.....	43.8	4.5	3.5

Local currency repayments may be used directly to finance additional sales or converted into dollars to finance additional credit sales. Such dollar conversions are included in the above table.

GENERAL PROVISIONS

Sec. 601. During the current fiscal year, the Secretary of Defense and the Secretaries of the Army, Navy, and Air Force, respectively, if they should deem it advantageous to the national defense, and if in their opinions the existing facilities of the Department of Defense are inadequate, are authorized to procure services in accordance with section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), under regulations prescribed by the Secretary of Defense, and to pay in connection therewith travel expenses of individuals, including actual transportation and per diem in lieu of subsistence while traveling from their homes or places of business to official duty station and return as may be authorized by law: *Provided*, That such contracts may be renewed annually.

Sec. 602. During the current fiscal year, provisions of law prohibiting the payment of compensation to, or employment of, any person not a citizen of the United States shall not apply to personnel of the Department of Defense.

Sec. 603. Appropriations contained in this Act shall be available for insurance of official motor vehicles in foreign countries, when required by laws of such countries; payments in advance of expenses determined by the investigating officer to be necessary and in accord with local custom for conducting investigations in foreign countries incident to matters relating to the activities of the department concerned; reimbursement of General Services Administration for security guard services for protection of confidential files; reimbursement of the Federal Bureau of Investigation for expenses in connection with investigation of defense contractor personnel; and all necessary expenses, at the seat of Government of the United States of America or elsewhere, in connection with communication and other services and supplies as may be necessary to carry out the purposes of this Act: *Provided*, That no appropriation contained in this Act, and no funds available from prior appropriations to component departments and agencies of the Department of Defense, shall be used to pay tuition or to make other payments to educational institutions in connection with the instruction or training of file clerks, stenographers, and typists receiving, or prospective file clerks, stenographers, and typists who will receive, compensation at a rate below the minimum rate of pay for positions allocated to grade GS-5 under the Classification Act of 1949, as amended.

Sec. 604. Any appropriation available to the Army, Navy, or the Air Force may, under such regulations as the Secretary concerned may prescribe, be used for expenses incident to the maintenance, pay, and allowances of prisoners of war, other persons in Army, Navy, or Air Force custody whose status is determined by the Secretary concerned to be similar to prisoners of war, and persons detained in such custody pursuant to Presidential proclamation.

Sec. 605. Appropriations available to the Department of Defense for the current fiscal year for maintenance or construction shall be available for acquisition of land as authorized by section 2672 of title 10, United States Code.

Sec. 606. Appropriations for the Department of Defense for the current fiscal year shall be available, (a) except as authorized by the Act of September 30, 1950 (20 U.S.C. 236-244), for primary and secondary schooling for minor dependents of military and civilian personnel of the Department of Defense residing on military or naval installations or stationed in foreign countries, as authorized for the Navy by section 7204 of title 10, United States Code, in amounts not exceeding an average of \$275, \$285 per student, when the Secretary of the Department concerned finds that schools, if any, available in the locality, are unable to provide adequately for the education of such dependents; (b) for expenses in connection with administration of occupied areas; (c) for payment of rewards as authorized for the Navy by section 7209(a) of title 10, United States Code, for information leading to the discovery of missing naval property or the recovery thereof; (d) for payment of deficiency judgments and interests thereon arising out of condemnation proceedings; (e) for payment of rentals for special purpose space at the seat of Government and, in administering the provisions of 13 U.S.C. 315q, rentals may be paid in advance.

Sec. 607. Appropriations for the Department of Defense for the current fiscal year shall be available for: (a) donations of not to exceed \$25 to each prisoner upon each release from confinement in military or contract prison [(except disciplinary barracks)] and to each person discharged for fraudulent enlistment; (b) authorized issues of articles to prisoners [(except those in disciplinary barracks)]; applicants for enlistment and persons in military custody; (c) subsistence of selective service registrants called for induction, applicants for enlistment [while held under observation], prisoners [(except those in disciplinary barracks)], [and] civilian employees as authorized by law, and supernumeraries when necessitated by emergent military circumstances; (d) reimbursement for subsistence of enlisted personnel while sick in hospitals; [and] (e) expenses of prisoners confined in nonmilitary facilities []; (f) military courts, boards, and commissions; (g) utility services for buildings

erected at private cost, as authorized by law, and buildings on military reservations authorized by regulations to be used for welfare and recreational purposes; (h) exchange fees, and losses in the accounts of disbursing officers or agents in accordance with law; and (i) expenses of Latin-American cooperation as authorized for the Navy by law (10 U.S.C. 7208): *Provided*, That section 212 of the Act of June 30, 1932 (5 U.S.C. 59a), shall not apply to retired military personnel on duty at the United States Soldiers' Home.

Sec. 608. Insofar as practicable, the Secretary of Defense shall assist American small business to participate equitably in the furnishing of commodities and services financed with funds appropriated under this Act by making available or causing to be made available to suppliers in the United States, and particularly to small independent enterprises, information, as far in advance as possible, with respect to purchases proposed to be financed with funds appropriated under this Act, and by making available or causing to be made available to purchasing and contracting agencies of the Department of Defense information as to commodities and services produced and furnished by small independent enterprises in the United States, and by otherwise helping to give small business an opportunity to participate in the furnishing of commodities and services financed with funds appropriated by this Act.

Sec. 609. No appropriation contained in this Act shall be available for expenses of operation of messes (other than organized messes the operating expenses of which are financed principally from non-appropriated funds) at which meals are sold to officers or civilians except under regulations approved by the Secretary of Defense, which shall (except under unusual or extraordinary circumstances) establish rates for such meals sufficient to provide reimbursement of operating expenses and food costs to the appropriations concerned: *Provided*, That officers and civilians in a travel status receiving a per diem allowance in lieu of subsistence shall be charged at the rate of not less than \$2.50 per day: *Provided further*, That for the purposes of this section payments for meals at the rates established hereunder may be made in cash or by deductions from the pay of civilian employees: *Provided further*, That members of organized nonprofit youth groups sponsored at either the national or local level, when extended the privilege of visiting a military installation and permitted to eat in the general mess by the commanding officer of the installation, shall pay the commuted ration cost of such meal or meals.

Sec. 610. No part of any appropriation contained in this Act shall be available until expended unless expressly so provided elsewhere in this or some other appropriation Act.

Sec. 611. Appropriations of the Department of Defense available for operation and maintenance, may be reimbursed during the current fiscal year for all expenses involved in the preparation for disposal and for the disposal of military supplies, equipment, and materiel, and for all expenses of production of lumber or timber products pursuant to section 2665 of title 10, United States Code, from amounts received as proceeds from the sale of any such property: *Provided*, That a report of receipts and disbursements under this limitation shall be made quarterly to the Committees on Appropriations of the Congress: *Provided further*, That no funds available to agencies of the Department of Defense shall be used for the operation, acquisition, or construction of new facilities or equipment for new facilities in the continental limits of the United States for metal scrap baling or shearing or for melting or sweating aluminum scrap unless the Secretary of Defense or an Assistant Secretary of Defense designated by him determines, with respect to each facility involved, that the operation of such facility is in the national interest.

Sec. 612. (a) During the current fiscal year, the President may exempt appropriations, funds, and contract authorizations, available for military functions under the Department of Defense, from the provisions of subsection (c) of section 3679 of the Revised Statutes, as amended, whenever he deems such action to be necessary in the interests of national defense.

(b) Upon determination by the President that such action is necessary, the Secretary of Defense is authorized to provide for the cost of an airborne alert as an excepted expense in accordance with the provisions of R.S. 3732 (41 U.S.C. 11).

(c) Upon determination by the President that it is necessary to increase the number of military personnel on active duty beyond the number for which funds are provided in this Act, the Secretary of Defense is authorized to provide for the cost of such increased military personnel, as an excepted expense in accordance with the provisions of Revised Statutes 3732 (41 U.S.C. 11).

Sec. 613. No appropriation contained in this Act shall be available in connection with the operation of commissary stores of the agencies of the Department of Defense for the cost of purchase (including commercial transportation in the United States to the place of sale but excluding all transportation outside the United States) and maintenance of operating equipment and supplies, and for the actual or estimated cost of utilities as may be furnished by the Government and of shrinkage, spoilage, and pilferage of merchandise

under the control of such commissary stores, except as authorized under regulations promulgated by the Secretaries of the military departments concerned, with the approval of the Secretary of Defense, which regulations shall provide for reimbursement therefor to the appropriations concerned and, notwithstanding any other provision of law, shall provide for the adjustment of the sales prices in such commissary stores to the extent necessary to furnish sufficient gross revenue from sales of commissary stores to make such reimbursement: *Provided*, That under such regulations as may be issued pursuant to this section all utilities may be furnished without cost to the commissary stores outside the continental United States and in Alaska; *Provided further*, That no appropriation contained in this Act shall be available in connection with the operation of commissary stores within the continental United States unless the Secretary of Defense has certified that items normally procured from commissary stores are not otherwise available at a reasonable distance and a reasonable price in satisfactory quality and quantity to the military and civilian employees of the Department of Defense.

Sec. 614. Notwithstanding any other provision of law, Executive order, or regulation, no part of the appropriations in this Act shall be available for any expenses of operating aircraft under the jurisdiction of the Armed Forces for the purpose of proficiency flying except in accordance with the regulations issued by the Secretaries of the Departments concerned and approved by the Secretary of Defense which shall establish proficiency standards and maximum and minimum flying hours for this purpose: *Provided*, That without regard to any provision of law or Executive order prescribing minimum flight requirements, such regulations may provide for the payment of flight pay at the rates prescribed in section 204(b) of the Career Compensation Act of 1949 (63 Stat. 802) as amended, to certain members of the Armed Forces otherwise entitled to receive flight pay during the current fiscal year (1) who have held aeronautical ratings or designations for not less than fifteen years, or (2) whose particular assignment outside the United States or in Alaska makes it impractical to participate in regular aerial flights.

Sec. 615. No part of any appropriation contained in this Act shall be available for expense of transportation, packing, crating, temporary storage, drayage, and unpacking of household goods and personal effects in excess of eleven thousand pounds net in any one shipment: *Provided*, That the limitations imposed herein shall not be applicable in the case of members transferred to or serving in stations outside the continental United States or in Alaska under orders relieving them from a duty station within the United States prior to July 10, 1952, and who are returned to the United States under orders relieving them from a duty station beyond the United States or in Alaska on or after July 1, 1953.

Sec. 616. Vessels under the jurisdiction of the Department of Commerce, the Department of the Army, the Department of the Air Force, or the Department of the Navy may be transferred or otherwise made available without reimbursement to any such agencies upon the request of the head of one agency and the approval of the agency having jurisdiction of the vessels concerned.

Sec. 617. None of the funds provided in this Act shall be available for training in any legal profession nor for the payment of tuition for training in such profession: *Provided*, That this limitation shall not apply to the off-duty training of military personnel as prescribed by section 621 of this Act.

Sec. 618. Not more than 20 per centum of the appropriations in this Act which are limited for obligation during the current fiscal year shall be obligated during the last two months of the fiscal year: *Provided*, That this section shall not apply to obligations for support of active duty training of civilian components or summer camp training of the Reserve Officers' Training Corps.

Sec. 619. During the current fiscal year the agencies of the Department of Defense may accept the use of real property from foreign countries for the United States in accordance with mutual defense agreements or occupational arrangements and may accept services furnished by foreign countries as reciprocal international courtesies or as services customarily made available without charge; and such agencies may use the same for the support of the United States forces in such areas without specific appropriation therefor.

In addition to the foregoing, agencies of the Department of Defense may accept real property, services, and commodities from foreign countries for the use of the United States in accordance with mutual defense agreements or occupational arrangements and such agencies may use the same for the support of the United States forces in such areas, without specific appropriation therefor: *Provided*, That within thirty days after the end of each quarter the Secretary of Defense shall render to the Committees on Appropriations of the Senate and the House of Representatives and to the Bureau of the Budget a full report of such property, supplies, and commodities received during such quarter.

Sec. 620. During the current fiscal year, appropriations available to the Department of Defense for research and development may be used for the purposes of section 2353 of title 10, United States Code,

and for purposes related to research and development for which expenditures are specifically authorized in other appropriations of the service concerned.

Sec. 621. No appropriation contained in this Act shall be available for the payment of more than 75 per centum of charges of educational institutions for tuition or expenses for off-duty training of military personnel, nor for the payment of any part of tuition or expenses for such training for commissioned personnel who do not agree to remain on active duty for two years after completion of such training.

Sec. 622. No part of the funds appropriated herein shall be expended for the support of any formally enrolled student in basic courses of the senior division, Reserve Officers' Training Corps, who has not executed a certificate of loyalty or loyalty oath in such form as shall be prescribed by the Secretary of Defense.

Sec. 623. No part of any appropriation contained in this Act shall be available for the procurement of any article of food, clothing, cotton, spun silk yarn for cartridge cloth, or wool (whether in the form of fiber or yarn or contained in fabrics, materials, or manufactured articles) not grown, reprocessed, reused, or produced in the United States or its possessions, except to the extent that the Secretary of the Department concerned shall determine that a satisfactory quality and sufficient quantity of any articles of food or clothing or any form of cotton, spun silk yarn for cartridge cloth, or wool grown, reprocessed, reused, or produced in the United States or its possessions cannot be procured as and when needed at United States market prices and except procurements outside the United States in support of combat operations, procurements by vessels in foreign waters and emergency procurements or procurements of perishable foods by establishments located outside the United States for the personnel attached thereto: *Provided*, That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its possessions: *Provided further*, That no funds herein appropriated shall be used for the payment of a price differential on contracts hereafter made for the purpose of relieving economic dislocations: *Provided further*, That none of the funds appropriated in this Act shall be used except that, so far as practicable, all contracts shall be awarded on a formally advertised competitive bid basis to the lowest responsible bidder.

Sec. 624. None of the funds appropriated in this Act shall be used for the construction, replacement, or reactivation of any bakery, laundry, or dry-cleaning facility in the United States, its Territories or possessions, as to which the Secretary of Defense does not certify in writing, giving his reasons therefor, that the services to be furnished by such facilities are not obtainable from commercial sources at reasonable rates.

Sec. 625. During the current fiscal year, appropriations of the Department of Defense shall be available for reimbursement to the Post Office Department for payment of costs of commercial air transportation of military mail between the United States and foreign countries.

Sec. 626. Appropriations of the Department of Defense available for the payment of rental allowances shall be available for the leasing of quarters in foreign countries constructed under the authority of section 302 of Public Law 534, approved July 14, 1952, for assignment as public quarters to military personnel of the Department of Defense.

Sec. 627. Appropriations contained in this Act shall be available for the purchase of household furnishings and automobiles from military and civilian personnel on duty outside the continental United States, for the purpose of resale at cost to incoming personnel, and for providing furnishings, without charge, in other than public quarters occupied by military or civilian personnel of the Department of Defense on duty outside the continental United States or in Alaska, upon a determination, under regulations approved by the Secretary of Defense, that such action is advantageous to the Government.

Sec. 628. During the current fiscal year appropriations available to the Department of Defense for pay of civilian employees shall be available for uniforms, or allowances therefor, as authorized by the Act of September 1, 1951, as amended (5 U.S.C. 2131).

Sec. 629. During the current fiscal year, the Secretary of Defense, shall, upon requisition of the National Board for the Promotion of Rifle Practice, and without reimbursement, transfer from agencies of the Department of Defense to the Board ammunition from stock or which has been procured for the purpose in such amounts as he may determine.

Such appropriations of the Department of Defense available for obligation during the current fiscal year as may be designated by the Secretary of Defense shall be available for the travel expenses of military and naval personnel, including the reserve components, and members of the Reserve Officers' Training Corps attending regional, national, or international rifle matches.

Sec. 630. Funds provided in this Act for congressional liaison activities of the Department of the Army, the Department of the Navy, the Department of the Air Force, and the Office of the Secre-

GENERAL PROVISIONS—Continued

tary of Defense shall not exceed \$950,000: *Provided*, That this amount shall be available for apportionment to the Department of the Army, the Department of the Navy, the Department of the Air Force, and the Office of the Secretary of Defense as determined by the Secretary of Defense.

Sec. 631. Of the funds made available by this Act for the services of the Military Air Transport Service, \$80,000,000 shall be available only for procurement of commercial air transportation service from carriers participating in the Civil Reserve Air Fleet program; and the Secretary of Defense shall utilize the services of such carriers which qualify as small businesses to the fullest extent found practicable: *Provided*, That the Secretary of Defense shall specify in such procurement, performance characteristics for aircraft to be used based upon modern aircraft operated by the civil aircraft.

Sec. 632. Not to exceed **[\$12,000,000]** \$11,600,000 of the funds made available in this Act for the purpose shall be available for the hire of motor vehicles: *Provided*, That the Secretary of Defense, under circumstances where the immediate movement of persons is imperative, may, if he deems it to be in the national interest, hire motor vehicles for such purpose without regard to this limitation.

Sec. 633. Not less than \$7,500,000 of the funds made available in this Act for travel expenses in connection with temporary duty and permanent change of station of civilian and military personnel of the Department of Defense shall be available only for the procurement of commercial passenger sea transportation service on American-flag vessels.

Sec. 634. During the current fiscal year, appropriations available to the Department of Defense for Operation and maintenance may be used for civilian clothing, not to exceed \$40 in cost for enlisted personnel: (1) discharged for misconduct, unfitness, unsuitability, or otherwise than honorably; (2) sentenced by a civil court to confinement in a civil prison or interned or discharged as an alien enemy; (3) discharged prior to completion of recruit training under honorable conditions for dependency, hardship, minority, disability, or for the convenience of the Government.

Sec. 635. During the current fiscal year, the Secretary of Defense, should he deem it advantageous to the national defense to accelerate any strategic or tactical missile or satellite program, may transfer under the authority and terms of the Emergency Fund, an additional \$150,000,000 for the acceleration of such missile or satellite program or programs: *Provided*, That the transfer authority made available under the terms of the Emergency Fund appropriation contained in this Act is hereby broadened to meet the requirements of this section: *Provided further*, That the Secretary of Defense shall notify the Appropriations Committees of the Congress promptly of all transfers made pursuant to this authority.

Sec. 636. No part of the funds appropriated herein shall be available for paying the costs of advertising by any defense contractor, except advertising for which payment is made from profits, and such advertising shall not be considered a part of any defense contract cost. The prohibition contained in this section shall not apply with respect to advertising conducted by any such contractor, in compliance with regulations which shall be promulgated by the Secretary of Defense, solely for (1) the recruitment by that contractor of personnel required for the performance by the contractor of obligations arising under a defense contract, (2) the procurement of scarce items required by the contractor for the performance of a defense contract, or (3) the disposal of scrap or surplus materials acquired by the contractor in the performance of a defense contract.

Sec. 637. Funds appropriated in this Act for maintenance and repair of facilities and installations shall not be available for acquisition of new facilities, or alteration, expansion, extension or addition of existing facilities, as defined in Department of Defense Directive 7010.2, dated January 18, 1961, in excess of \$25,000: *Provided*, That the Secretary of Defense may amend or change the said directive during the current fiscal year, consistent with the purpose of this section.

Sec. 638. During the current fiscal year, the Secretary of Defense may, if he deems it vital to the security of the United States and in the national interest to further improve the readiness of the Armed Forces, including the reserve components, transfer under the authority and terms of the Emergency Fund an additional \$200,000,000: *Provided*, That the transfer authority made available under the terms of the Emergency Fund Appropriation contained in this Act is hereby broadened to meet the requirements of this section: *Provided further*, That the Secretary of Defense shall notify the Appropriations Committees of the Congress promptly of all transfers made pursuant to this authority.

Sec. 639. (a) All payments of additional pay for foreign duty made prior to the date of enactment of this Act to enlisted members of the United States Air Force who served on any of the artificial

islands (known as Texas Towers) located off the coast of the United States on the outer continental shelf are hereby validated. Any such member or former member who has made repayment to the United States of any amount so paid to him as additional pay for foreign duty is entitled to have refunded to him the amount repaid.

[(b) The Comptroller General of the United States, or his designee, shall relieve disbursing officers, including special disbursing agents, of the United States from accountability or responsibility for any payments described in the first paragraph of this Section, and shall allow credits in the settlement of the accounts of those officers or agents for payments which are found to be free from fraud and collusion.]

[(c) Appropriations available to the United States Air Force for the pay and allowances of enlisted personnel shall be available for payments under this Section.]

Sec. 639. None of the funds appropriated in this Act may be used to make payments under contracts for any project in a foreign country unless the Secretary of Defense or his designee, after consultation with the Secretary of the Treasury or his designee, certifies to the Congress that the use, by purchase from the Treasury, of currencies of such country acquired pursuant to law is not feasible for the purpose, stating the reason therefor.

Sec. 640. Appropriations contained in this Act for carrying out civil defense activities shall not be available in excess of the limitations on appropriations contained in Section 408 of the Federal Civil Defense Act, as amended (50 U.S.C. App. 2260).

Sec. 641. Transfers from appropriations available during the fiscal year 1963 for pay and allowances to the revolving fund "Acquisition, Rehabilitation, and Rental of Wherry Act Housing" authorized pursuant to law (70 Stat. 1111) shall not exceed amounts necessary to make mortgage payments, including interest, principal, and mortgage insurance premiums, with respect to housing acquired under that fund.

GENERAL PROVISIONS—MILITARY CONSTRUCTION

Sec. 101. Funds appropriated to the military departments for construction in prior years are hereby made available for construction authorized for each such department by the authorizations enacted into law during the [first] second session of the Eighty-seventh Congress.

Sec. 102. None of the funds appropriated in this Act shall be expended for payments under a cost-plus-a-fixed-fee contract for work where cost estimates exceed \$25,000 to be performed within the United States, except Alaska, without the specific approval in writing of the Secretary of Defense setting forth the reasons therefor.

Sec. 103. None of the funds appropriated in this Act shall be expended for additional costs involved in expediting construction unless the Secretary of Defense certifies such costs to be necessary to protect the national interest and establishes a reasonable completion date for each project, taking into consideration the urgency of the requirement, the type and location of the project, the climatic and seasonal conditions affecting the construction and the application of economical construction practices.

Sec. 104. None of the funds appropriated in this Act shall be used for the construction, replacement, or reactivation of any bakery, laundry, or drycleaning facility in the United States, its Territories or possessions, as to which the Secretary of Defense does not certify, in writing, giving his reasons therefor, that the services to be furnished by such facilities are not obtainable from commercial sources at reasonable rates.

Sec. 105. Funds appropriated to the military departments for construction are hereby made available for: (1) hire of passenger motor vehicles, and (2) the construction, or acquisition by lease or otherwise, of family housing and community facilities projects in foreign countries as authorized by section 407(b) of the Act of September 1, 1951 (68 Stat. 1119), as amended.

Sec. 106. Appropriations to the military departments for construction may be charged for the cost of administration, supervision and inspection of family housing authorized pursuant to title IV of the Act of August 11, 1955 (Public Law 345), as amended, in an amount not to exceed 3½ per centum of the cost of each such project: *Provided*, That such appropriations shall be reimbursed from the proceeds of any mortgage executed on each such project.

Sec. 107. Funds appropriated to the military departments for construction may be used for advances to the Bureau of Public Roads, Department of Commerce, for the purposes of section 210 of title 23, United States Code, when projects authorized therein are certified as important to the national defense by the Secretary of Defense.

SEC. 108. None of the funds appropriated in this Act may be used to begin construction on new bases for which specific appropriations have not been made.

SEC. 109. During the current fiscal year, appropriations available for construction of family quarters for personnel shall not be obligated for such construction at a cost per family unit in excess of \$22,000 on housing units for generals or equivalent; \$19,800 on housing units for colonels or equivalent; \$17,600 on housing units for majors and lieutenant colonels, or equivalent; \$15,400 on housing units for second lieutenants, lieutenants, captains, and warrant officers, or equivalent; or \$13,200 on housing units for enlisted personnel, except that when such units are constructed outside the continental United States or in Alaska, the average cost per unit of all such units shall not exceed \$32,000 and in no event shall the individual cost exceed \$40,000.

SEC. 110. No part of the funds contained in this Act shall be used to incur obligations for the planning, design, or construction of facilities for an Air Force Academy the total cost of which will be in excess of \$140,986,000, except for construction pursuant to section 2674 of title 10, United States Code, as amended.

SEC. 111. No part of the funds provided in this Act shall be used for purchase of land or land easements in excess of 100 per centum of the value as determined by the Corps of Engineers or the Bureau of Yards and Docks, except: (a) where there is a determination of value by a Federal court, (b) purchases negotiated by the Attorney General or his designee, and (c) where the estimated value is less than \$25,000.

SEC. 112. None of the funds appropriated in this Act may be used to make payments under contracts for any project in a foreign country unless the Secretary of Defense or his designee, after consultation with the Secretary of the Treasury or his designee, certifies to the Congress that the use, by purchase from the Treasury, of currencies of such country acquired pursuant to law is not feasible for the purpose, stating the reason therefor.

SEC. 113. No part of the funds contained in this Act shall be used to incur obligations for the planning, design, or construction of facilities for the Naval Radio Research Station, Sugar Grove, West Virginia, the total cost for which will be in excess of \$135,000,000.

SALARIES AND EXPENSES

For necessary cemeterial expenses as authorized by law, including maintenance, operation, and improvement of national cemeteries, and purchase of headstones and markers for unmarked graves; purchase of ~~four~~ *one* passenger motor ~~vehicles~~, of which three shall be *vehicle* for replacement only; maintenance of that portion of Congressional Cemetery to which the United States has title, Confederate burial places under the jurisdiction of the Department of the Army, and graves used by the Army in commercial cemeteries; ~~[\$10,440,000]~~ *\$10,276,000*: *Provided*, That this appropriation shall not be used to repair more than a single approach road to any national cemetery: *Provided further*, That this appropriation shall not be obligated for construction of a superintendent's lodge or family quarters at a cost per unit in excess of \$17,000, but such limitation may be increased by such additional amounts as may be required to provide office space, public comfort rooms, or space for the storage of Government property within the same structure: *Provided further*, That reimbursement shall be made to the applicable military appropriation for the pay and allowances of any military personnel performing services primarily for the purposes of this appropriation. (24 U.S.C. 271, 273-276, 278-279, 279a-b, 282, 288, 290; Public Works Appropriation Act, 1962.)

Program and Financing (in thousands of dollars)

	1961 actual	1962 estimate	1963 estimate
Program by activities:			
1. Operation and maintenance.....	5,088	5,395	5,405
2. Construction.....	441	1,126	741
3. Headstone procurement.....	3,055	3,090	3,315
4. Administration.....	720	752	815
Total obligations.....	9,304	10,363	10,276
Financing:			
Advances and reimbursements from non-Federal sources.....	-8		
Unobligated balance lapsing.....	104	77	
New obligational authority (appropriation)	9,400	10,440	10,276

Note.—Reimbursements from non-Federal sources are derived from payments by commercial carriers for headstones damaged in shipment (31 U.S.C. 489a).

This appropriation finances operation and maintenance of the national cemetery system and provides free headstones and markers for graves of eligible persons buried in national and private cemeteries. The workload and program requirements continue to increase each year.

1. *Operation and maintenance.*—The national cemetery system consists of 118 activities located in 33 States, Puerto Rico and the District of Columbia. Included are 85 national cemeteries and 33 miscellaneous burial plots and monument sites. A total of 34,520 interments were made in 1961; 36,720 are estimated for 1962 and 39,290 projected for 1963. There will be 2,172 developed acres to be maintained in 1963. Funds are required for 728 man-years of cemetery labor, for contractual services for maintenance of cemetery installations, and for necessary operating supplies and equipment.

2. *Construction.*—Provision is made for 14 projects, including 4 gravesite development projects necessary to

provide space for interments. An amount is also included for engineering investigations and preparation of plans for future requirements.

3. *Headstone procurement.*—The basis of the 1963 program is a projected 5.7% increase in applications.

	1961 actual	1962 estimate	1963 estimate
Applications from prior year.....	14,971	12,167	12,369
New applications.....	126,428	133,202	140,652
Total applications.....	141,399	145,369	153,021
Applications carried to next year (—)....	12,167	12,369	13,021
Total procurement.....	129,232	133,000	140,000

4. *Administration.* Provision is made for 128 man-years required for processing applications and placing orders for headstones and markers, determining eligibility for interment, management of the national cemetery system, and administrative support.

CORPS OF ENGINEERS—CIVIL

The civil works program of the Corps of Engineers consists of a number of related activities for the control and development for beneficial use of water resources in the United States, Puerto Rico, and the Virgin Islands.

The total appropriation requested is \$1,022 million, an increase of \$48 million over the 1962 estimate and an increase of \$86 million over 1961.

DEPARTMENT OF THE ARMY—Continued

CORPS OF ENGINEERS—CIVIL—Continued

Current authorizations:

The following appropriations shall be expended under the direction of the Secretary of the Army and the supervision of the Chief of Engineers for authorized civil functions of the Department of the Army pertaining to rivers and harbors, flood control, beach erosion, and related purposes:

GENERAL INVESTIGATIONS

For expenses necessary for the collection and study of basic information pertaining to river and harbor, flood control, shore protection, and related projects, and when authorized by law, surveys and studies (including cooperative beach erosion studies as authorized in Public Law 520, approved July 3, 1930, as amended and supplemented), of projects prior to authorization for construction, **[\$15,877,000]** \$16,600,000, to remain available until expended: *Provided*, That **[\$55,000]** \$100,000 of this appropriation shall be transferred to the United States Fish and Wildlife Service for studies, investigations, and reports thereon as required by the Fish and Wildlife Coordination Act of 1958 (72 Stat. 563-565) to provide that wildlife conservation shall receive equal consideration and be coordinated with other features of water-resource development programs of the Department of the Army. (33 U.S.C. 426-426c, 540, 541, 701; Public Works Appropriation Act, 1962.)

Total selected resources.....	370	419	428	442

1. *Surveys.*—Navigation and flood control surveys are made to determine the need and economic justification for proposed developments of water and related land resources. Present and future requirements for navigation and flood control, and other related purposes such as water supply, irrigation, water quality control, power, recreation, and fish and wildlife conservation are considered.

Cooperative beach erosion control studies are conducted at specific localities to determine the need for shore-protection measures. The cost of these studies is shared equally by the Federal Government and by States or other local interests.

Special studies are undertaken to solve unique or especially complex problems, or to give broad and comprehensive consideration to the water and related land resources needs of river basins. All surveys and studies are made in cooperation with appropriate Federal, State and local agencies and interests.

The amount provided for special studies will increase from \$3.6 million in 1961 to \$4.2 million in 1962 and \$5.9 million in 1963 reflecting increased reliance on comprehensive river basin surveys for determination and evaluation of needed water resource improvements including those for navigation and flood control.

2. *Collection and study of basic data.*—Funds are made available to the Geological Survey for installation, operation and maintenance of stream gaging stations; to the Weather Bureau for hydrometeorological studies and precipitation stations; and to the Fish and Wildlife Service for preauthorization studies of the effects of proposed projects upon fish and wildlife. The Corps of Engineers participates on a number of engineering and control boards that study and control international streams mutually affecting the United States and Canada. Information on floods and potential flood damages and on general criteria for guidance in the use of flood plain areas is made available to States and responsible local governmental agencies upon their request.

3. *Research and development.*—General beach erosion development studies deal with physical phenomena, techniques, basic principles, and remedial or control measures related to shore protection and improvement. The results of these studies are disseminated to other interested Federal, State, and local agencies and individuals.

Hydrologic studies include investigations of storms, rainfall, streamflow, sedimentation, and other phenomena

to provide basic data used in the design, construction, and operation of water control structures.

Civil works investigations assist in the solution of engineering problems that are widely applicable to the design, construction, and operation and maintenance of civil works projects. This heading also provides for operation of the research center at the Waterways Experiment Station, Vicksburg, Miss.

Construction of the Mississippi basin model at the Waterways Experiment Station will continue. The Mississippi River comprehensive study will be carried out on completed portions of the basin model to improve operation of the reservoir system in the Mississippi River Basin and to study potential flood levels on the lower Mississippi River.

CONSTRUCTION, GENERAL

For the prosecution of river and harbor, flood control, shore protection, and related projects authorized by law; and detailed studies, and plans and specifications, of projects (including those for development with participation or under consideration for participation by States, local governments, or private groups) authorized or made eligible for selection by law (but such studies shall not constitute a commitment of the Government to construction); **[\$724,021,880]** \$775,706,000, to remain available until expended: *Provided*, That no part of this appropriation shall be used for projects not authorized by law or which are authorized by law limiting the amount to be appropriated therefor, except as may be within the limits of the amount now or hereafter authorized to be appropriated: *Provided further*, That none of the funds appropriated for "Construction, General", in this Act shall be used on the project "Missouri River, Kansas City to mouth", for any purpose other than bank stabilization work: *Provided further*, That appropriations under this head shall be available to the Chief of Engineers for the purposes authorized by section 6 of the Flood Control Act of 1946 as amended by the Civil Functions Appropriations Act of 1949: *Provided further*, That funds herein appropriated shall be available for expenditure, in addition to funds heretofore made available for the Garrison Dam project on the Missouri River, for cooperation with the North Dakota State Conservation Commission to the extent of one-half the cost of the replenishing and freshening Lake Wildwood, North Dakota, which has been interfered with by the construction of the Garrison Dam and Reservoir on the Missouri River: *Provided further*, That **[\$550,000]** \$600,000 of this appropriation shall be transferred to the United States Fish and Wildlife Service for studies, investigations, and reports thereon as required by the Fish and Wildlife Coordination Act of 1958 (72 Stat. 563-565) to provide that wildlife conservation shall receive equal consideration and be coordinated with other features of water-resource development programs of the Department of the Army. (16 U.S.C. 661-666, 756, 33 U.S.C. 511-523, 540, 701; 55 Stat. 633; 66 Stat. 635, 732; Public Works Appropriation Act, 1962.)

Unobligated balance transferred to "Construction, Bureau of Commercial Fisheries" (75 Stat. 254).....	-----	685	-----
Recovery of prior year obligations.....	-180	-----	-----
Unobligated balance carried forward.....	48,728	11,005	-----
New obligational authority (appropriation).....	706,842	724,022	775,706

The requested appropriation of \$776 million represents an increase of \$52 million compared with the amount appropriated for 1962, and an increase of \$69 million compared with 1961. About 67% of the requested appropriation will be applied to 41 major projects in amounts of \$5 million or more each.

The monetary authorization available for appropriation after 1963 for projects in this program amounts to \$3,867 million. The status of the overall construction program, excluding projects classified as inactive or deferred but including projects completed in prior years, is summarized in the following table:

DEPARTMENT OF THE ARMY—Continued

Current authorizations—Continued

CONSTRUCTION, GENERAL—continued

NUMBER AND ESTIMATED COST OF ACTIVE AUTHORIZED PROJECTS

Activity:	Number of authorized projects					Appropriations in millions			Balance to complete
	Total	Completed	Underway	Balance authorized	Total estimated cost	To June 30, 1961	1962	1963	
Navigation ¹	2,450	2,191	192	67	\$5,478.0	\$2,789.0	\$201.4	\$213.5	\$2,274.1
Alteration of bridges.....	19	10	7	2	49.1	32.2	.6	.5	15.8
Beach erosion control.....	81	28	14	39	38.3	7.5	1.2	1.6	28.0
Flood control.....	772	417	195	160	5,631.4	2,639.8	269.0	327.2	2,395.4
Multiple-purpose projects, including power.....	62	21	30	11	5,759.2	3,426.5	235.1	260.6	1,837.0
Total	3,384	2,667	438	279	16,956.0	8,895.0	707.3	2803.4	6,550.3

¹ Includes authorized modifications of original projects.² Program total, including undistributed reduction based on anticipated delays and savings: Actual appropriation request is \$743.4 million.

1. *Advance engineering and design.*—Design studies establish project features and cost estimates required for preparation of contract plans. The funds requested will bring designs and plans for a number of high priority projects to the stage where they will be ready for construction, and will permit continuation or initiation of planning on other needed projects, and the restudy of selected deferred projects. Following passage of the anticipated 1962 Omnibus Rivers and Harbors and Flood Control Bill additional appropriations will be requested to start planning on selected newly authorized projects.

2. *Navigation projects.*—This activity includes construction of locks, dams, and canals, and improvement of channels and harbors by dredging and by construction of breakwaters, jetties, and dikes. Provision is also made for the construction of small navigation projects not specifically authorized by Congress.

With the funds requested, work will be continued on 55 channel and harbor projects, of which 15 will be completed, and on 13 lock, dam, and canal projects, of which 3 will be completed in 1963. Construction will be initiated on 7 channel and harbor and one lock and dam projects or project modifications as follows:

CHANNEL AND HARBOR PROJECTS

1. Apalachicola River, Fla.
2. Miami Harbor, Fla.
3. Pocomoke River, Md.
4. Duluth-Superior Inner Harbor, Minn. and Wis.
5. Cleveland Harbor, Ohio (1958 act)
6. Fairport Harbor, Ohio
7. Houston Ship Channel, Tex. (Phase II—deepening to 40 feet)

LOCK AND DAM PROJECTS

1. Dam 4, Monongahela River, Pa.

[In thousands of dollars]

CONSTRUCTION, GENERAL—continued

3. *Alteration of bridges.*—Obstructive bridges over navigable waterways are altered under arrangements which provide for apportionment of the costs of alteration between the United States and the bridge owners. The funds requested will finance the Federal share of the cost of one new bridge alteration project in 1963.

[In thousands of dollars]

ALTERATION OF BRIDGES OVER NAVIGABLE WATERS	Costs to this appropriation					Analysis of 1963 financing

1 Advance engineering and design.

4. *Beach erosion control projects.*—The Federal Government assists in the construction of works for the restoration and protection against erosion by waves and currents of the shores of the United States and possessions. Federal contributions may not exceed one-third of the construction costs of such projects.

Reimbursements will be made to compensate local interests on 12 projects, including 5 projects for which initial reimbursements will be made. These 5 projects are:

1. Santa Cruz County, Calif.
2. Wessagussett Beach, Mass.
3. Barnegat Light, N.J.
4. Long Beach Island, N.J.
5. Ocean City, N.J.

[In thousands of dollars]

5. *Flood control projects.*—This activity includes local protection projects and flood control reservoirs without power installations. Local protection projects consist of channel improvements, levees, and floodwalls. Provision is made for emergency bank protection; for snagging and clearing work on navigable streams and tributaries when such work is necessary in the interest of flood control; and for the construction of small flood control projects not specifically authorized by Congress.

In 1963 the initial contribution will be made for the flood control benefits from Oroville Dam, now being constructed by the State of California. When conditions relating to authorization have been fulfilled, additional funds will be requested for a similar contribution for Comanche Dam on the Mokelumne River, Calif.

With the funds requested, work will be continued on 55 local protection projects, 7 of which will be completed,

and on 41 reservoir projects, 9 of which will be completed in 1963. Thirteen new local protection projects and six new reservoir projects will be initiated as follows:

LOCAL PROTECTION PROJECTS

1. Tucson Diversion Channel, Ariz.
2. Bear Creek, Calif.
3. Sacramento River-Chico Landing to Red Bluff, Calif.
4. Wailoa Stream, Hawaii
5. Levee Unit 5, Wabash River, Ind.
6. Corbin, Ky.
7. Chicopee Falls, Mass.
8. Saginaw River, Mich.
9. South Amsterdam, N.Y.
10. Lower Woonsocket, R.I.
11. Weber River, Utah
12. Sammamish River, Wash.
13. Eau Galle River, Wis.

RESERVOIR PROJECTS

1. Oroville Reservoir, Calif.
2. Hancock Brook Reservoir, Conn.
3. Shelbyville Reservoir, Ill.
4. Pine Creek Reservoir, Okla.
5. Bardwell Reservoir, Tex.
6. North Fork of Pound Reservoir, Va.

[In thousands of dollars]

	Costs to this appropriation					Analysis of 1963 financing				
	Total estimate	To June 30, 1960	1961 actual	1962 estimate	1963 estimate	Deduct selected resources and unobligated balance, start of year	Add selected resources and unobligated balance, end of year	Appropriation required for 1963	Appropriation required to complete	Percent cost complete through 1963
FLOOD CONTROL PROJECTS										
(a) Local protection:										
(1) Projects specifically authorized by Congress:										
(1) Paint Rock River, Ala.....	800	1 99	1 1	159	300	-----	50	350	191	69.9
(4) Tucson Diversion Channel, Ariz.....	4,830	1 111	1 84	1 150	350	-----	50	400	4,085	14.4
(5) Red River at Garland City, Ark.....	960	-----	18	227	150	-----	-----	150	565	90.7
(6) Red River levees and bank stabilization below Denison Dam, La., Tex. and Ark.....	10,100	8,090	735	295	300	-----	-----	300	680	93.3
(7) Bear Creek, Calif.....	2,790	1 23	1 81	1 67	350	-----	50	400	2,219	18.7
(9) Los Angeles County drainage area, California (exclusive of Whittier Narrows Reservoir).....	300,000	205,739	14,741	16,420	15,482	-----	501	15,000	47,117	84.1
(10) Lower San Joaquin River and tributaries, California.....	13,100	3,867	1,118	1,190	1,700	50	50	1,700	5,175	60.1

1 Advance engineering and design.

6 *Multiple-purpose projects, including power.*—With the funds requested, work will be continued on 19 multiple-purpose projects with power installations, 2 of which will be completed in 1963. Work will be initiated on 3 new multiple-purpose projects as follows:

1. Millers Ferry lock and dam, Alabama
2. Stockton Reservoir, Missouri

3. Little Goose lock and dam, Washington

[In thousands of dollars]

¹ Advance engineering and design.

7. *Recreation on completed projects.*—Additional public use facilities will be provided at 71 completed projects to accommodate a rapidly increasing number of visitors.

8. *Small authorized projects.*—The Federal Government assists in the construction of authorized channel and harbor, shore protection, and flood control projects, each of which has a total estimated Federal cost of \$400 thousand or less.

9. *Coordination act studies.*—This program provides for detailed studies and reports by the Fish and Wildlife Service to determine the effects on fish and wildlife

resources of water-control projects of the Corps of Engineers.

10. *Rehabilitation.*—Provision is made for the planning and the accomplishment of major rehabilitation projects, each of which has an estimated Federal cost of more than \$400 thousand, and for work on minor rehabilitation projects, each of which has an estimated Federal cost of \$400 thousand or less. The major rehabilitation work consists of the repair of breakwaters, revetments, and piers on 26 navigation projects.

Advances.....			2		
Total selected resources.....	10,419	-3	7,572	8,379	8,379

This appropriation finances operation and maintenance of existing projects and other related activities.

1. *Navigation projects.*—In 1963 operation and maintenance will be carried out on 226 channel and harbor projects and 32 locks, dams, and canals.

2. *Flood control projects.*—In 1963, 139 flood control reservoirs and 18 local flood protection projects will be operated and maintained. Other completed flood control projects will be inspected to determine the adequacy of maintenance by local interests.

3. *Multiple-purpose projects including power.*—By the end of 1963, 40 multiple-purpose projects with an installed

capacity of 8,008,400 kilowatts will be operated and maintained.

4. *Protection of navigation.*—Under laws for the protection and preservation of navigable waters, regulations are established and permits are granted for activities and structures affecting navigable waters.

5. *Emergency flood control activities.*—Expenses of flood emergency preparation, flood fighting and rescue operations, and emergency repair and restoration of flood control works are provided for under this heading.

6. *Niagara remedial works.*—The costs of operation and maintenance of works to preserve and enhance the scenic beauty of Niagara Falls are divided equally between the United States and Canada.

7. *National emergency activities.*—Preparedness planning and training are carried out to assure continuity of essential functions in event of national emergency. These activities are coordinated with related plans and programs for civil defense and defense mobilization.

A supplemental appropriation for wage-board increases for 1962 in the amount of \$2.2 million is anticipated for separate transmittal.

1. Executive direction and management.—The Office, Chief of Engineers, and 9 division offices supervise work decentralized in 37 district offices. Two division offices and the district offices are financed from other appropriations.

2. Review boards.—The River and Harbor Board reviews reports on proposed projects and makes advisory recommendations to the Chief of Engineers. The Beach Erosion Board, in cooperation with the States, studies the prevention of shore erosion, develops standards, and reviews reports.

3. Commercial statistics.—Data on water-borne commerce are collected, compiled, and published.

4. Special investigations.—Investigations are made and reports prepared pursuant to congressional and other special requests for current information pertaining to the civil works program.

The Corps of Engineers—Civil is responsible for the flood control program for the lower Mississippi Valley from Cape Girardeau, Mo., to the Gulf of Mexico, including the main alluvial stream, the basins of the St. Francis and White, Lower Arkansas, Yazoo, Texas, and Atchafalaya Rivers, and Bayou Lafourche, and the alluvial lands around Lake Pontchartrain. The adopted plan calls for raising and strengthening about 1,600 miles of existing levees along the main river, for enlarging or constructing some 1,700 miles of levees on tributaries and in side basins, for channel improvement and bank stabilization on the main river, for dredging of the main river to provide a navigation channel 12 feet deep and 300 feet wide from Baton Rouge, La., to Cairo, Ill., and for five flood-detention reservoirs on minor tributaries.

The following tabulation sets forth the program, in terms of costs, reconciled to fund requirements, for each activity (in thousands of dollars). Percentages of completion at the end of 1963 are shown for construction features.

1. *General investigations.*—Provision is made for completion of one navigation study, initiation of one flood control study, and collection of basic data which are subsequently used in planning and designing projects.

2. *Advance engineering and design.*—The funds requested will initiate and complete the engineering and design on one feature of the project on which construction is scheduled for initiation after 1963.

3. *Construction.*—The estimated total cost of flood control and related improvements in the lower Mississippi River and its alluvial valley is estimated at \$1,767 million, of which \$1,216 million has been appropriated through 1962. The funds requested will be applied to continuation of 14 features of the project.

4. *Maintenance.*—Provision is made for operation and ordinary maintenance of the major features of the project.

ADMINISTRATIVE PROVISIONS

Appropriations in this title shall be available for expenses of attendance by military personnel of meetings in the manner authorized by section 19(b) of the Act of July 7, 1958 (72 Stat. 336), uniforms, or allowances therefor, as authorized by the Act of September 1, 1951, as amended (5 U.S.C. 2131), and for printing, either during a recess or session of Congress, of survey reports authorized by law, and such survey reports as may be printed during a recess of Congress shall be printed, with illustrations, as documents of the

next succeeding session of Congress; and during the current fiscal year the revolving fund, Corps of Engineers, shall be available for purchase (not to exceed [one] two hundred and [sixty-six] sixteen, of which one hundred and [forty-eight] ninety shall be for replacement only) and hire of passenger motor vehicles. (*Public Works Appropriation Act, 1962.*)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are shown in the schedules of the parent appropriation as follows:

"Disaster relief," funds appropriated to the President.
 "Agency for International Development," funds appropriated to the President.
 "Salaries and expenses," National Science Foundation.
 "Construction of hospital and domiciliary facilities," Veterans Administration.
 "Limitation on operation and maintenance and capital outlay," United States Soldiers' Home.
 "Construction," Bureau of Indian Affairs.
 "Construction and rehabilitation," Bureau of Reclamation.
 "United States dollars advanced from foreign governments, United States educational exchange program," Department of State.
 "Passamaquoddy tidal power survey," Department of State.
 "Sanitary engineering," District of Columbia.
 "Construction," International Boundary and Water Commission.

Applicable receipts.....	249,747	254,622	256,550
Budget expenditures.....	-5,468	5,139	3,200

The fund provides for the acquisition, operation and maintenance of floating and land-based plant and equipment used in civil works functions; for temporary financing of services finally chargeable to civil works appropriations; and for the furnishing of facilities and services for the military functions of the Department of the Army and other governmental agencies and private persons (67 Stat. 199).

Budget program—Operating costs.—Operating costs are expected to remain at about the same level in 1962 and 1963.

Capital outlay.—Land and structures include replacement and improvement costs of buildings, facilities, and related land. Outlay for land and structures in 1961 includes \$37 thousand for replacement of buildings at the

DEPARTMENT OF THE ARMY—Continued

CORPS OF ENGINEERS—CIVIL—Continued

Intragovernmental funds—Continued

REVOLVING FUND, CORPS OF ENGINEERS—CIVIL—continued

Waterways Experiment Station, Vicksburg, Miss., which were destroyed by fire in October 1960. Remaining costs for this work are expected to amount to \$1.7 million. Dredges and other floating plant include the cost of replacement and improvement of dredges and dredging equipment and such other vessels as tugs, tenders, and towboats. Conversion costs for the dredges *Comber* and *Goethals* to direct pump-out, will amount to \$600 thousand in 1962 and \$2.5 million in 1963. Design costs for replacement of the hopper dredge *Mackenzie* will amount to \$100 thousand in 1962 and \$150 thousand in 1963. Construction of this replacement dredge is scheduled for 1964 and 1965 at an estimated cost of \$13 million. Land-based equipment includes the cost of replacement and improvement of transportation and construction equipment and fixed land equipment such as shop tools and fixed power driven equipment. Outlay for land-based equipment includes \$270 thousand in 1962 covering costs of adapting a type T-29B aircraft for use by the Chief of Engineers for expediting inspection and supervision of civil works projects. This aircraft was received by transfer as replacement and in exchange for a type DC-3 aircraft which had been in use since 1950. Outlay for other floating plant, land-based equipment and tools, office furniture and equipment are expected to remain at about the same level in 1962 and 1963.

Financing.—Operations are financed from reimbursement or advances from the appropriations or individuals who utilize the services or facilities, at rates to cover all operating costs.

Operating results and financial condition.—The decrease in net operating income in 1961 is attributed to adjustments in rates charged for goods and services furnished, resulting in a decrease in retained earnings from \$1.3 million to \$128 thousand. Retained earnings are expected to amount to about \$500 thousand in 1962 and remain at this level in 1963.

The initial capital of the fund was provided by assumption of the assets, liabilities, and obligations of the plant accounts, as carried on the records of the Corps of Engineers—Civil on June 30, 1953, and by an appropriation from the general fund of \$100. Capital of the fund amounted to \$119.6 million at June 30, 1961, and is limited to \$140 million (67 Stat. 199). In 1961 capital of the fund was decreased \$716 thousand by transfer of this amount to General Services Administration for operating costs for 1961 of the Murphy General Hospital, Waltham, Mass. This facility, occupied as headquarters by the New England division, was transferred to General Services Administration for operation, maintenance, and custody. Capital was increased \$3.9 million because of a net transfer of assets from other agencies and appropriations without reimbursement. In 1962, capital will be decreased by approximately \$76 thousand by assumption of liability for accrued annual leave of civilian employees of the Cold Regions Research and Engineering Laboratory.

The United States Soldiers' Home provides medical and domiciliary care and other authorized benefits for the relief and support of certain old, invalid, or disabled regular enlisted personnel of the Army and Air Force. Funds for operation and maintenance of the Home are appropriated from the Soldiers' Home Permanent Fund (trust fund) and not from the general funds of the Treasury.

1. *Medical care.*—A hospital operated as part of the Home cares for the daily average patient loads shown below. In addition, certain members will receive specialized care at other hospitals.

Proposed for separate transmittal:

LIMITATION ON OPERATION AND MAINTENANCE AND CAPITAL OUTLAY

Under existing legislation, 1962.—An increase in limitation of \$118 thousand is anticipated to cover the cost of wageboard salary increases which were approved subsequent to submission of the 1962 budget.

RYUKYU ISLANDS, ARMY

Current authorizations:

ADMINISTRATION

For expenses, not otherwise provided for, necessary to meet the responsibilities and obligations of the United States in connection with the government of the Ryukyu Islands, as authorized by the Act of July 12, 1960 (74 Stat. 461); services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), of individuals not to exceed ten in number; not to exceed **[\$3,500]** \$4,000 for contingencies for the High Commissioner, to be expended in his discretion; hire

of passenger motor vehicles and aircraft; purchase of four passenger motor vehicles for replacement only; and construction, repair, and maintenance of buildings, utilities, facilities, and appurtenances; **[\$7,089,000]** \$7,900,000, of which not to exceed **[\$1,722,000]** \$1,900,000 shall be available for administrative and information expenses: *Provided*, That expenditures from this appropriation may be made outside continental United States when necessary to carry out its purposes, without regard to sections 355 and 3648, Revised Statutes, as amended, section 4774(d) of title 10, United States Code, civil service or classification laws, or provisions of law prohibiting payment of any person not a citizen of the United States: *Provided further*, That funds appropriated hereunder may be used, insofar as practicable, and under such rules and regulations as may be prescribed by the Secretary of the Army to pay ocean transportation charges from United States ports, including territorial ports, to ports in the Ryukyus for the movement of supplies donated to, or purchased by, United States voluntary nonprofit relief agencies registered with and recommended by the Advisory Committee on Voluntary Foreign Aid or of relief packages consigned to individuals residing in such areas: *Provided further*, That the President may transfer to any other department or agency any function or functions provided for under this appropriation, and there shall be transferred to any such department or agency without reimbursement and without regard to the appropriation from which procured, such property as the Director of the Bureau of the Budget shall determine to relate primarily to any function or functions so transferred. (*Foreign Assistance and Related Agencies Appropriation Act, 1962.*)

Program and Financing (in thousands of dollars)

	1961 actual	1962 estimate	1963 estimate
Program by activities:			
1. Administration	1,719	1,722	1,900
2. Construction of administrative facilities	50		
3. Aid to Ryukyuan economy	4,299	5,367	6,000
Total obligations	6,068	7,089	7,900
Financing:			
Advances and reimbursements from non-Federal sources (63 Stat. 383)	-6		
Unobligated balance lapsing	27		
New obligational authority (appropriation)	6,089	7,089	7,900

This appropriation supports the objective of the act of July 12, 1960, to provide for the promotion of economic and social development in the Ryukyu Islands, and finances the administration of these islands by the United States, which exercises jurisdiction pursuant to the Treaty of Peace with Japan. Executive Order 10713 of June 5, 1957, establishes under the jurisdiction of the Secretary of Defense a civil administration of the Ryukyu Islands to execute the administrative, legislative, and jurisdictional powers reposed in the United States. To protect the security of the United States and of the free world, the United States will continue responsibility for the administration of the Ryukyu Islands as long as conditions of threat and tension in the Far East require the maintenance of military bases in these islands.

3. *Aid to Ryukyuan economy.*—Provision is made for observation and study of democratic procedures by Ryukyuan leaders through visits to the United States; advanced study by Ryukyuan students in the United States; vocational and technical training of Ryukyuan

in other Far East areas; technical assistance and education and development programs within the Ryukyu Islands; and transportation of donated welfare goods. Grants are made to supplement revenues of the local government in meeting costs of essential public safety and public health services and in constructing public facilities. Grants were \$3.9 million in 1961; \$5 million is estimated in 1962; and \$5.6 million is proposed in 1963.

Additional economic aid is furnished by the United States through other programs. In 1961 these programs included \$419 thousand from the military construction appropriation for resettlement of persons displaced from land taken for military purposes; approximately 29.4 million pounds of surplus foodstuffs furnished through voluntary relief organizations; and \$2 million for typhoon reconstruction, derived from prior-year allocations of foreign currency and surplus rice by the International Cooperation Administration without reimbursement. In 1962, 21.7 million pounds of relief foodstuffs are expected to be furnished and surplus commodity aid for relief purposes is expected to be continued in 1963.

In addition to this appropriation and other U.S. aid programs, the general fund of the civil administration is available for economic aid and social development in the Ryukyus. It receives income from business-type instrumentalities and from investments in financial and public utility organizations. Summary statements of assets and cash receipts and expenditures of the general fund follow (in thousands of dollars):

FINANCIAL CONDITION

	1961 actual	1962 estimate	1963 estimate
Assets:			
Current assets:			
Cash	1,874	1,704	1,654
Accrued interest receivable	15	15	15
Investments:			
Wholly owned corporations:			
Ryukyu Development Loan Corp.	29,172	32,324	36,188
Ryukyu Electric Power Corp.	11,665	12,793	13,769
Ryukyu Domestic Water Corp.	2,824	3,129	3,389
Okinawa Housing Corp.	1,341	1,128	1,018
Ryukyu Warehouse Corp.	1		
Partially owned corporation: Bank of the Ryukyus	127	127	127
Working capital: Petroleum distribution fund	802	152	132
Fixed assets:			
Petroleum facilities (at cost)	1,653	1,653	1,707
Refrigeration plant	991		
Net worth, U.S. civil administration	50,465	53,025	57,999

The investments in business enterprises represent the total net worth of these organizations except the bank in which the U.S. civil administration holds 51% of the outstanding stock. In this organization, the investment is stated at cost but has substantially higher actual value because of accumulated earnings and established earning capacity. The housing corporation operates at a loss and will be liquidated when feasible on reasonable terms. Investment in the refrigeration plant, presently leased for a nominal rental return, is planned to be liquidated in 1962.

Total expenditures.....	7,614	8,430	7,854
Net decrease (-) in cash balance.....	-1,099	-170	-50

Income from operations is derived primarily from the net earnings of the electric power, water, and development loan corporations, from the purchase and resale of petroleum products, and from interest, rent, and dividend receipts. Receipts from liquidation of investments include the transfer of cash which is surplus to the working capital requirements of the petroleum distribution fund and the Okinawa Housing Corporation, the sale of most of the assets of the warehouse corporation in 1961, and the sale of the refrigeration plant in 1962. Other receipts include primarily the proceeds of fines and forfeitures levied by the civil administration court.

The earnings of the electric power, water, and development loan corporations are reinvested within the respective corporations each year. The investment in the water corporation is being increased by additional facilities financed from a 1959 appropriation and in 1961 and 1962 from the general fund. The investment in the electric power corporation was increased by the cost of a completed power transmission system constructed from a 1958 appropriation from which an unobligated balance will be returned to the U.S. Treasury in 1962. In 1961 the Ryukyu Development Loan Corporation received additional capital from the general fund and further investments of \$1.5 million in 1962 and \$2 million in 1963 are planned to permit that corporation to extend loans for the development of economically sound projects. Special assistance is extended to municipalities for essential public facilities. The cash balance retained in the

fund is available to meet emergency requirements, including relief and reconstruction measures in the event of a typhoon, and other programs authorized under the provisions of Public Law 86-629. For example, disaster relief expenditures in fiscal year 1962 have been necessitated by typhoons occurring in October 1961. A grant of \$75 thousand from the general fund to the Government of the Ryukyu Islands is programed in 1962 to cover the cost of actuarial surveys required for a proposed retirement system for its teachers and public service personnel. Upon the development of a detailed program, it is anticipated that further U.S. assistance will be required.

The Government of the Ryukyu Islands was created by the United States on April 1, 1952. In addition to local revenue derived primarily from income and excise taxes, this government receives grants to cover expenses related to requirements of the U.S. forces and for assistance in development of public facilities and services. This government has not been authorized by the United States to incur deficits in its governmental fiscal operations or to borrow for any purpose, and it must, therefore, maintain a minimum working balance in its treasury. In the financial statement which follows, grants from U.S. appropriations are included as receipts in the fiscal year of expenditure. An estimated \$2,851 thousand of grants approved through 1962 will be recorded as receipts in subsequent years; \$3,836 thousand of the program grants through 1963 will be receipts of the Government of the Ryukyu Islands after 1963. A statement of its accounts follows:

1. *Construction of transmission line and substations.*—The additional substation providing the transmission of

power on the connecting line to Kawakami was completed in 1961.

2. *Loans to Ryukyu Electric Power Corporation.*—Obligations to be incurred in 1962 represent an agreement to loan \$14 million to the Ryukyu Electric Power Corporation by the Department of the Army, as partial financing of the construction of a power generating plant. Additional loans from the unobligated balance of the appropriation are expected to be required after 1963. The plant will consist of necessary housing for four 20,000-kilowatt generating units and ancillary facilities. The first two units are expected to be in operation in 1964, and other units will follow, as required, to meet the demand load. When all the units are installed and in operation, it will permit the retirement from the integrated power system of certain over-age units operating presently at relatively high cost.

The financing of this facility is being undertaken with \$18 million appropriated to the Army for a loan to the Ryukyu Electric Power Corporation and \$4.7 million from retained earnings of the Ryukyu Electric Power Corporation.

This appropriation provides for those functions in the Canal Zone which, in the United States, would be performed by State and local governments and civilian departments of the Federal Government, and for the operation of hospitals and clinics. All operating expenses, including depreciation and other nonfund expense, are recovered and paid into the Treasury as miscellaneous receipts. Such recoveries are derived from revenue from individuals and agencies served and the balance from the Panama Canal Company as follows (in thousands of dollars):

	1961 actual	1962 estimate	1963 estimate
Repayments to Treasury (including depreciation):			
Revenue:			
Hospitals and clinics.....	3,553	3,902	4,291

1. *Civil functions*—(a) *Customs and immigration*.—This provides for the activities usually incident to such functions (except that no collection of customs duties is involved) and in addition includes special activities relating to transiting vessels and the execution of certain treaty obligations to the Republic of Panama.

(b) *Postal service*.—The postal system serves the entire Canal Zone and operates under policies and regulations generally similar to those of the United States Post Office Department, including money order and postal savings services.

WORKLOAD (in thousands)

Airmail dispatched (pounds).....	211	238	248
Airmail received (pounds).....	394	400	440
Surface mail dispatched (pounds).....	376	375	375
Surface mail received (sacks).....	81	82	82

(c) *Police protection*.—This includes the usual police functions of preservation of the peace and enforcement of the law in the Canal Zone (not including military reservations), operation of prisons, and police guards for certain facilities.

(d) *Fire protection*.—All firefighting facilities in the Canal Zone except those required for aircraft crash fires and fires aboard naval vessels and ammunition depots are consolidated under the Canal Zone Government.

(e) *Judicial system*.—This includes the operation of two magistrate courts and the expenses of the district court (exclusive of salaries) which serves as both a State and Federal court.

(f) *Education*.—This provides for the operation of schools, kindergarten through junior college, for the dependents of Canal Zone residents and, on a space available basis, certain residents of Panama. There are two school systems; one for U.S. citizens, the other, which is conducted in the Spanish language, for Panamanians and other non-U.S. citizens. There also are specialized facilities for handicapped children.

Total.....	696.4	702.5	682.5

(b) *Other public health services.*—This provides for community-wide public health services, sanitation and quarantine work in the Canal Zone and for ships calling at its ports and transiting the Canal; inspection of food processing establishments, and facilities for animal care and quarantine.

3. *General Government expense*—(a) *Office of the Governor.*—This provides for the executive direction of all Canal Zone Government activities and includes the expenses of the office of the Governor and his residence, the office of the Executive Secretary, and provision for certain contingencies.

(b) *Other general government expense.*—This includes the Canal Zone Government's share of the cost of general and administrative expenses provided by the Panama Canal Company which the Canal Zone Government is without staff or facilities to perform or furnish; expenses of recruitment and repatriation, employees' home leave travel costs, and other general charges.

Unfunded adjustments to total operating costs.—This includes depreciation expense on facilities and equipment acquired under the capital outlay appropriation. Other costs include the undepreciated balance of such facilities and equipment which are retired, retirement expense and other minor amounts chargeable to operations which were previously funded as capital outlay expenditures.

CAPITAL OUTLAY

For acquisition of land and land under water and acquisition, construction, and replacement of improvements, facilities, structures, and equipment, as authorized by law [(2 C.Z. Code, secs. 3 and 16; 63 Stat. 600)] (2 C.Z. Code, Sec. 3; 2 C.Z. Code, Sec. 16, as added by 63 Stat. 600), including the purchase of not to exceed seven passenger motor vehicles for replacement only for police-type use without regard to the general purchase price limitation for the current fiscal year; and expenses incident to the retirement of such assets; [\$2,300,000] \$3,120,000, to remain available until expended: *Provided*, That notwithstanding the limitation under this head in the Second Supplemental Appropriation Act, 1961, appropriations for "capital outlay" may be used for expenses related to the construction of quarters for non-U.S. citizen employees at a unit cost not exceeding \$16,500. (2 C.Z. Code, Sec. 3; 2 C.Z. Code, Sec. 5 as amended by 64 Stat. 1038; 2 C.Z. Code, Sec. 16 as added by 63 Stat. 600; 31 U.S.C. 11; *General Government Matters, Department of Commerce, and Related Agencies Appropriation Act, 1962.*

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1960, \$833 thousand; 1961, \$4,195 thousand; 1962, \$2,878 thousand; 1963, \$1,378 thousand.

This provides for the acquisition by purchase, construction, or otherwise, of capital assets required by the Canal Zone Government. Major items to be initiated in 1963 are construction of a 12-classroom addition to the Balboa High School and construction of a 10-classroom elementary school at Pedro Miguel. While funds are also included for plans, specifications and construction of a 13-classroom junior college and a junior college dormitory actual construction will not commence until 1964.

¹ Selected resources as of June 30 are as follows: unpaid undelivered orders, 1960 \$11,618 thousand; 1961, \$10,349 thousand; 1962, \$804 thousand; 1963, \$0.

A \$750 thousand supplemental appropriation was enacted in 1958 and an appropriation of \$19,250 thousand was enacted in 1959 to provide for the \$20 million cost of constructing a high-level bridge across the Panama Canal at Balboa, Canal Zone, as authorized and directed by the Act of July 23, 1956 (Ch. 665, 70 Stat. 596). Construction of the bridge will fulfill the United States' commitment to the Republic of Panama under the terms of point 4 of the General Relations Agreement between the United States and Panama of May 18, 1942 (Executive Agreement Series 452), and of item 5 of the Memorandum of Understandings Reached, signed January 25, 1955. The design work on the bridge proper was completed in 1959 while construction work, which started in 1959, will be completed in fiscal year 1963.

Section 303 of the Act of August 3, 1961 (75 Stat. 279), prescribes that: "The Panama Canal Bridge presently

under construction as authorized by the Act of July 23, 1956 (Ch. 665, 70 Stat. 596), shall hereafter be designated the "Thatcher Ferry Bridge."

Public enterprise funds:

CORPORATION

The Panama Canal Company is hereby authorized to make such expenditures within the limits of funds and borrowing authority available to it and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended (31 U.S.C. 849), as may be necessary in carrying out the programs set forth in the budget for the current fiscal year for such corporation, except as hereinafter provided: (*General Government Matters, Department of Commerce, and Related Agencies Appropriation Act, 1962.*)

The Panama Canal Company is a wholly owned Government corporation chartered by the act of June 29, 1948 (62 Stat. 1076), as amended by the act of September 26, 1950 (64 Stat. 1041), for the primary purpose of maintaining and operating the interoceanic canal at the Isthmus of Panama. In furtherance of that mission, and in consideration of the international agreements under which the canal enterprise is operated, the Company conducts necessary supporting operations.

The administration of the Company is integrated with that of the Canal Zone Government, an independent agency financed by appropriations. The Governor of the Canal Zone is ex officio President of the Company. The Company is expected to be self-sustaining and is required to reimburse the United States Treasury for the net cost of the Canal Zone Government, the cost of interest on the net direct investment of the United States in the Company, and for annuity payments made by the United States to the Republic of Panama pursuant only to the Treaty of 1903 as amended in 1936.

Budget program—1. Transit operations.—Operation and maintenance of the canal proper is the primary mission of the Company, and it is toward the successful accomplishment of that task that the transit operations are directed. Current and projected operating results, including income from tolls, are reviewed and evaluated at least annually by the Company's Board of Directors.

The services performed by this activity and the funded cost of each are shown in the following table (in thousands of dollars):

	1961 actual	1962 estimate	1963 estimate
Maintenance of channels and harbors.....	2,456	3,153	2,796
Navigation service and control.....	8,200	9,039	9,804
Locks operations.....	9,285	9,164	12,438
General canal expense.....	1,405	1,946	1,648
Net funded costs.....	21,346	23,302	26,686

Major variations in the foregoing cost estimates reflect provision for increased locks overhauls, and the additional expense incident to handling actual and projected canal traffic volume as shown by the following data (dollars in thousands):

	1960 actual	1961 actual	1962 estimate	1963 estimate
Selected data on canal operations:				
Commercial vessel transits:				
Number of ships (over 300 net Panama Canal tons).....	10,793	10,866	11,900	12,450
Ships berthed.....	4,892	5,509	5,820	6,066
Tolls and toll credits at current rates.....	\$51,803	\$55,173	\$59,138	\$60,600
Other transit revenue.....	\$4,241	\$4,491	\$4,966	\$5,466

Capital outlay costs, funded, which will amount to \$11,494 thousand in 1963, include \$3,285 thousand for continuing the Canal capacity program, \$4,298 thousand toward replacement of locks towing locomotives and cranes, \$1,695 thousand for the \$2,280 thousand marine traffic control system, and \$558 thousand for plant required in connection with the 24-hour outage locks overhaul concept.

2. **Supporting services.**—These are the Company's auxiliary activities, individually described below, which provide services and materials essential to the accomplishment of the transit operations program.

(a) **Maritime services.**—This program provides for the operation of vessel repair and harbor terminal facilities. Funded costs, which are directly related to customer demand for services, are as follows (in thousands of dollars):

	1961 actual	1962 estimate	1963 estimate
Vessel repair.....	3,497	3,864	4,275
Harbor terminals.....	5,059	5,417	5,708
Total funded costs.....	8,556	9,281	9,983
Less intra-agency recoveries.....	3,134	3,466	3,917
Net funded costs.....	5,422	5,815	6,066

Capital outlay costs, funded, for 1963 amount to \$1,005 thousand of which the major item is \$229 thousand for replacements and additions of equipment.

(b) **Employee services.**—As shown below, these include housing and marketing operations for eligible employees against whom charges are made to reimburse the Company. Funded cost estimates, which are expected to remain relatively level, are as follows (in thousands of dollars):

	1961 actual	1962 estimate	1963 estimate
U.S. community housing.....	1,301	1,347	1,369
Latin-American community housing.....	600	619	619
Marketing operations.....	18,571	19,972	21,130
Total funded costs.....	20,472	21,938	23,118
Less intra-agency recoveries.....	959	1,026	1,055
Net funded costs.....	19,513	20,912	22,063

Capital outlay costs, funded, for 1963 are estimated at \$4,011 thousand and include \$1,931 thousand for continuation of a quarters replacement program for U.S. and non-U.S. citizens, \$702 thousand toward construction of a community center at Margarita, and \$300 thousand for improvements and additions to the retail store at Balboa.

(c) **Transportation and utilities services.**—The various types of service and the funded costs incident to each are as follows (in thousands of dollars):

	1961 actual	1962 estimate	1963 estimate
Railroad.....	1,744	1,740	1,745
Motor transportation.....	1,967	2,038	2,189
Water transportation.....	5,338	2,710	2,750
Power system.....	1,603	1,941	2,232
Communications system.....	592	595	615
Water system.....	1,090	1,150	1,225
Total funded costs.....	12,334	10,174	10,756
Less intra-agency recoveries.....	5,827	7,016	7,337
Net funded costs.....	6,507	3,158	3,419

Capital outlay costs, funded, total \$4,303 thousand for 1963 including \$2,100 thousand for additional generating capacity for the power system, \$620 thousand toward constructing a central air conditioning system on the

Public enterprise funds—Continued

PANAMA CANAL COMPANY—Continued

PANAMA CANAL COMPANY FUND—continued

Pacific side of the Isthmus, \$580 thousand for continuation of the project for replacement of railroad rolling stock, and \$285 thousand for motor vehicles.

(d) *Other supporting services.*—These consist chiefly of the Company's construction, maintenance and supply activities, with funded costs as follows (in thousands of dollars):

	1961 actual	1962 estimate	1963 estimate
Tivoli guest house.....	605	596	616
Printing plant.....	396	415	455
Grounds maintenance.....	1,080	1,165	1,268
Engineering and maintenance services.....	7,540	7,377	7,237
Supply operations.....	6,273	5,738	5,988
Total funded costs.....	15,894	15,291	15,564
Less intra-agency recoveries.....	13,201	13,031	13,383
Net funded costs.....	2,693	2,260	2,181

Capital outlay costs, funded, for 1962 are estimated at \$622 thousand, including \$351 thousand for the replacement and addition of equipment.

3. *General corporate expense.*—This includes payments to the Treasury for the net cost of Canal Zone Government, interest, general and administrative expenses under statutory limitation, and other general charges. The scope of general and administrative expenses under statutory limitation includes virtually all general charges other than interest on the investment of the United States, the net cost of the Canal Zone Government, and, starting in 1962, annuity payments to non-U.S. citizens formerly employed by the agency. Funded costs are as follows (in thousands of dollars):

	1961 actual	1962 estimate	1963 estimate
Net cost of Canal Zone Government.....	13,366	13,828	14,917
Interest expense.....	8,770	9,333	9,564
Other general corporate expense.....	10,561	9,890	9,988
Total general corporate expense, funded.....	32,697	33,051	34,469

Financing.—The Company is authorized to obtain appropriations for its capital needs and to cover losses sustained in the conduct of its activities. In addition, under Public Law 86-200 (73 Stat. 428), approved August 25, 1959 the Company may borrow, with interest, from the Treasury amounts not exceeding a total of \$10 million outstanding at any time. The latter authorization, along with available resources and anticipated revenues and receipts enables the Company to fund its program through 1963 without recourse to appropriations.

Operating results and financial condition.—There will be an increase in retained earnings in 1962 estimated at \$8,823 thousand of which (a) \$7,700 thousand is from operations, (b) \$582 thousand is from net credits to be gained through the final transfer of Panama Canal Company and Canal Zone Government properties to the Republic of Panama under the terms of the 1955 Treaty (71 Stat. 509) with the Republic of Panama, and (c) \$540 thousand credit in accordance with law (71 Stat. 509) for Canal Zone Government property transferred to the Federal Aviation Agency. The \$6,500 thousand increase

in retained earnings estimated for 1963 wholly represents net operating income for that year.

Note.—Contingent and other liabilities: The Company has outstanding, at all times, contingent and continuing liabilities in indeterminable amounts arising principally from monthly relief payments payable to retired alien employees; benefits payable under provisions of the Federal Employees Compensation Act; commitments for construction work, supplies and services; and pending suits and claims.

The annuity payments to be made to retired alien employees in fiscal year 1962 are estimated at \$1.9 million. Commitments under uncompleted construction contracts and unfilled purchase orders amounted to \$11.7 million at June 30, 1961. The maximum liability which could result from outstanding claims and lawsuits is estimated to be \$0.8 million.

¹ The changes in these items are reflected on the program and financing schedule.

LIMITATION ON GENERAL AND ADMINISTRATIVE EXPENSES, PANAMA CANAL COMPANY

Not to exceed **[\$7,824,000]** \$8,113,000 of the funds available to the Panama Canal Company shall be available during the current fiscal year for general and administrative expenses of the Company, which shall be computed on an accrual basis. Funds available to the Panama Canal Company for operating expenses shall be available for the purchase of not to exceed **[eighteen]** sixteen passenger motor vehicles [of which fourteen are] for replacement only, and for uniforms or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131). THE PANAMA CANAL—Continued

Public enterprise funds—Continued

GENERAL PROVISIONS—THE PANAMA CANAL

SEC. 301. The Governor of the Canal Zone is authorized to employ services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), in an amount not exceeding \$30,000: *Provided*, That the rates for individuals shall not exceed \$100 per diem.

【SEC. 302. The Canal Zone Government is authorized to transfer to the Federal Aviation Agency, without reimbursement, such facilities and improvements within the Cardenas townsite in the Canal Zone as may be mutually agreed upon by such agencies, and the value of the property so transferred shall be determined in accordance with section 246(b) of title 2 of the Canal Zone Code. Payments to the Treasury otherwise required by section 246(e) of title 2 of the Canal Zone Code shall be reduced by the amount of such value.】

【SEC. 303. The Panama Canal Bridge presently under construction as authorized by the Act of July 23, 1956 (Ch. 665, 70 Stat. 596) shall hereafter be designated the "Thatcher Ferry Bridge".】

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1960, \$1,312 thousand (1961 adjustments, -\$55 thousand); 1961, \$2,130 thousand; 1962, \$2,130 thousand; 1963, \$2,130 thousand.

The laws enforced hereunder are designed to protect consumers against adulterated and misbranded foods, drugs, cosmetics, therapeutic devices, and household products containing hazardous substances.

The budget provides for an overall expansion of 25% in staff resources to continue the program of strengthening the agency to cope with increasing responsibilities due to industrial, economic, technological, and population growth of the Nation.

1. *Field inspections, investigations, and laboratory analyses.*—Inspections of domestic plants, examinations of interstate and import shipments and special investigations are planned according to the relative incidence and seriousness of probable violations. About 100,000 establishments (manufacturing plants, warehouses, shippers) dealing in foods, drugs, devices or cosmetics are subject to inspection. Retail establishments dealing in products received in interstate commerce are also subject to the

prohibition against adulteration or misbranding. Samples are collected during inspections, and investigations and laboratory analyses are conducted to detect and identify adulteration.

2. *Research and methodology.*—Research is conducted to evaluate the components of foods, drugs, devices, cosmetics, and household products suspected of containing hazardous substances, and to appraise their efficacy, toxicity, and acute and long-range effects. Research is also performed to develop analytical methods for use in field analysis of inspectional samples and to develop food standards and pesticide, food additive and color additive tolerances.

3. *Compliance, consultation, and education.*—Voluntary compliance with the law is promoted wherever possible, but legal action is taken when necessary. Legal proceedings include citations, seizures of illegal products, injunctions and criminal prosecutions through the courts. Standards for foods, tolerances for poisonous substances in foods and other regulations are promulgated. A program of consumer education is conducted. Liaison is maintained with, and assistance is given to, State and local food and drug agencies.

4. *Medical evaluation.*—Applications for new drugs to be marketed, or for modification of previously approved drugs, are evaluated and approved. The medical aspects of research and enforcement activities are coordinated. Labels for drugs and household products containing hazardous substances are evaluated for honesty of claims, and sufficiency of information.

6. *Civil defense activities.*—The Food and Drug Administration conducts civil defense training programs for FDA officials, cooperating Federal, State and local officials, and industry in the techniques necessary to protect consumers of food, drugs, and cosmetics before and after radiological, biological and chemical attack. Research is also conducted to determine the vulnerability of foods and drugs to biological and chemical warfare agents and to develop methods of decontamination.

SALARIES AND EXPENSES, CERTIFICATION, INSPECTION, AND OTHER SERVICES

(Indefinite special fund)

For expenses necessary for the listing, certification or inspection of certain products, and for the establishment of tolerances for pesticides and color additives, in accordance with sections 406, 408, 504, 506, 507, 604, 702A, and 706 of the Federal Food, Drug, and Cosmetic Act, as amended (21 U.S.C. 346, 346a, 354, 356, 357, 364, 372a, and 376), the aggregate of the advance deposits during the current fiscal year to cover payments of fees for services in connection with such certifications, inspections, or establishment of tolerances, to remain available until expended. The total amount herein appropriated shall be available for purchase of chemicals, apparatus, and scientific equipment; expenses of advisory committees; and the refund of advance deposits for which no service has been rendered. (*Department of Health, Education, and Welfare Appropriation Act, 1962.*)

OFFICE OF EDUCATION

Current authorizations:

PROMOTION AND FURTHER DEVELOPMENT OF VOCATIONAL EDUCATION

For carrying out the provisions of [section 3] titles I and II of the Vocational Education Act of 1946, as amended [(20 U.S.C. 15j), and section 202 of said Act (20 U.S.C. 15bb)] (20 U.S.C. 15i-15m, 15o-15q, 15aa-15j), section 1 of the Act of March 3, 1931 (20 U.S.C. 30), the Act of March 18, 1950 (20 U.S.C. 31-33), and section 9 of the Act of August 1, 1956 (20 U.S.C. 34), [including \$4,000,000] \$34,672,000, of which \$5,000,000 shall be for [extension and improvement of] practical nurse training under such title II of the Vocational Education Act of 1946, as amended, [which sum shall be available under such title also for the expansion and improvement of programs of practical nurse training in effect prior to August 2, 1956,] and \$180,000 for vocational education in the fishery trades and industry including distributive occupations therein [\$33,672,000]: *Provided*, That the amount of allotment which States and Territories are not prepared to use may be reapportioned among other States and Territories applying therefor for use in the programs for which the funds were originally apportioned. (*Department of Health, Education, and Welfare Appropriation Act, 1962.*)

Grants are made to the States, Puerto Rico, Guam, and the Virgin Islands on a matching basis for the promotion and further development of public library service in rural areas. Each State and possession receives a minimum of \$40 thousand (\$10 thousand for the Virgin Islands and Guam), the balance being distributed on the basis of rural population.

PAYMENTS TO SCHOOL DISTRICTS

For payments to local educational agencies for the maintenance and operation of schools as authorized by the Act of September 30, 1950, as amended (20 U.S.C., ch. 13), **[\$85,700,000]** **\$232,293,000**: *Provided*, That this appropriation shall also be available for carrying out the provisions of section 6 of such Act.

For an additional amount for "Payments to School Districts", \$145,593,000: *Provided*, That this paragraph shall be effective only upon enactment into law of S. 2393, Eighty-seventh Congress, or similar legislation. (*Department of Health, Education, and Welfare Appropriation Act, 1962; Supplemental Appropriation Act, 1962.*)

Program and Financing (in thousands of dollars)

Program by activities:			
1. Payments to local educational agencies....	203,234	216,293	216,293
2. Payments to other Federal agencies.....	11,529	15,000	16,000
Total program costs—obligations.....	214,763	231,293	232,293
Financing:			
Unobligated balance lapsing.....	2,537	-----	-----
New obligational authority (appropriation)	217,300	231,293	232,293

Payments are made to assist in the maintenance and operation of schools in areas where enrollments are

affected by Federal activities. Such payments are made principally to school districts providing free public education for children residing on Federal property or residing with a parent employed on Federal property. Where local school districts cannot assume responsibility for educating children residing on Federal property, payments are made to other agencies for the provision of such education under Federal auspices. Also, under certain circumstances, the Commissioner of Education may make arrangements for the provision of free public education for children of members of the Armed Forces on active duty, not residing on Federal property.

In 1963, payments will be made to about 4,200 eligible school districts and Federal agencies on account of the approximate attendance of some 1.8 million federally connected children in all States, Puerto Rico, Virgin Islands, Guam, and Wake Island. This compares to some 4,000 eligible districts and Federal agencies, and about 1.7 million pupils in 1962. The 1963 estimate is expected to provide for payments of entitlements in the same cash amount as are authorized to be paid in 1962.

A modification of the statute, reflected under proposed legislation, would reduce appropriation requirements for this program.

Program by activities:			
Payments to local educational agencies (total program costs—obligations).....			-49,500
Financing:			
New obligational authority (proposed reduction of appropriation).....			-49,500

Under proposed legislation, 1963.—Legislation is recommended which would reduce the entitlements of local school districts under the existing law so as to more fairly compensate them for educational burdens imposed by tax-exempt Federal property on which public school children reside or their parents are employed. These recommendations would also take into account the assistance which would be made available to all school districts by the general proposals for aid to public elementary and secondary education. In total, the budget provides funds for payments to school districts sufficient to meet the requirements of the proposed legislative revisions.

ASSISTANCE FOR SCHOOL CONSTRUCTION

For an additional amount for providing school facilities and for grants to local educational agencies in federally affected areas, as authorized by the Act of September 23, 1950, as amended (20 U.S.C., ch. 19), including not to exceed **[\$810,000] \$800,000** for necessary expenses during the current fiscal year of technical services rendered by other agencies, **[\$24,850,000] \$55,045,000**, to remain available until expended: *Provided*, That no part of this appropriation shall be available for salaries or other direct expenses of the Department of Health, Education, and Welfare.

For an additional amount for "Assistance for School Construction", including not to exceed \$90,000 for necessary expenses during the current fiscal year of technical services rendered by other agencies, \$30,000,000, to remain available until expended: *Provided*, That this paragraph shall be effective only upon enactment into law of S. 2393, Eighty-seventh Congress. (Department of Health, Education, and Welfare Appropriation Act, 1962; Supplemental Appropriation Act, 1962.)

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders: 1960, \$7,023 thousand; 1961, \$8,793 thousand; 1962, \$8,793 thousand; 1963, \$3,793 thousand.

Payments are made to assist in construction of schools in areas where enrollments are affected by Federal activities. From 1951 through 1962, \$1,081 million has been appropriated for this program, aiding in the construction of an estimated 56,160 classrooms to house about 1.64 million pupils in the 50 States, Puerto Rico, Guam, and Wake Island.

Funds requested for 1963 will assist in providing approximately 2,861 classrooms for about 83,567 pupils.

A modification of the statute, reflected under proposed legislation, would reduce appropriation requirements for this program.

1. *Assistance to local educational agencies.*—Grants are made to local districts for school construction, principally on behalf of increased numbers of children residing on Federal property or residing with a parent employed on Federal property.

2. *Assistance for school construction on Federal properties.*—Where the local education agency is unable to provide school facilities for increased numbers of children living on Federal property, the Commissioner of Education is authorized to arrange for the construction of schools. Also, under certain circumstances, the Commissioner may arrange to provide, on a temporary basis, school facilities for children of members of the Armed Forces on active duty, not residing on Federal property.

3. *Payments for technical services.*—Technical services rendered by the Housing and Home Finance Agency are necessary in connection with the construction of school facilities now in process and proposed for 1963.

Program by activities:			
Assistance to local educational agencies (total program costs—obligations).....			-8,700
Financing:			
New obligational authority (proposed reduction in appropriation).....			-8,700

Under proposed legislation, 1963.—Legislation is recommended, similar to that for operation and maintenance payments, above, which would modify the existing law so as to more fairly compensate school districts for educational burdens imposed upon them by tax-exempt Federal property on which public school children reside or their parents are employed. These recommendations would also take into account the assistance which would be made available to all school districts by the general proposals for aid to public elementary and secondary education. In total, the budget provides funds for Assistance for school construction sufficient to meet the requirements of the proposed legislative revisions.

DEFENSE EDUCATIONAL ACTIVITIES

For grants, loans, and payments under the National Defense Education Act of 1958 (72 Stat. 1580-1605), [\$211,557,000] \$229,450,000, of which [\$75,145,000] \$91,370,000 shall be for capital contributions to student loan funds and loans for non-Federal capital contributions to student loan funds, of which not to exceed \$1,300,000 shall be for such loans for non-Federal capital contributions; \$54,000,000 shall be for grants to States and loans to nonprofit private schools for science, mathematics, or modern foreign language equipment and minor remodeling of facilities; \$3,750,000 shall be for grants to States for supervisory and other services; [\$12,800,000] \$15,000,000 shall be for grants to States for area vocational education programs; and \$15,000,000 shall be for grants to States for testing, guidance, and counseling: *Provided*, That no part of this appropriation shall be available for the purchase of science, mathematics, and modern language teaching equipment, or equipment suitable for use for teaching in such fields of education, which can be identified as originating in or having been exported from a Communist country, unless such equipment is unavailable from any other source: *Provided further*, That no part of this appropriation shall be available for graduate fellowships awarded initially under the provisions of the Act after the date of enactment of the Department of Health, Education, and Welfare Appropriation Act, 1962, which are not found by the Commissioner of Education to be consistent with the purpose of the Act as stated in section 101 thereof.

Loans and payments under the National Defense Education Act, next succeeding fiscal year: For making, after May 31 of the current fiscal year, loans and payments under title II of the National Defense Education Act, for the first quarter of the next succeeding fiscal year such sums as may be necessary, the obligations incurred and the expenditures made thereunder to be charged to the appropriation for the same purpose for that fiscal year: *Provided*, That the payments made pursuant to this paragraph shall not exceed the amount paid for the same purposes for the first quarter of the current fiscal year.

[For an additional amount for "Defense educational activities", \$70,000.] (Department of Health, Education, and Welfare Appropriation Act, 1962; Supplemental Appropriation Act, 1962.)

Unobligated balance lapsing.....	12,318	18,467	8,637
New obligational authority (appropriation)	187,480	211,627	229,450

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1960, \$10,387 thousand (1961 adjustments, -\$168 thousand); 1961, \$9,901 thousand; 1962, \$10,808 thousand; 1963, \$11,524 thousand.

Grants and payments are made to States and possessions, educational institutions, and individuals for the following purposes:

1. *Student loans.*—Funds are allotted among the States for payments to institutions of higher education to provide capital contributions to student loan funds. These payments must be matched at the rate of one dollar from institutional sources for each nine Federal dollars. In addition, loans are made to institutions which are unable to provide matching funds. In 1961, a total of 158 thousand loans were made by 1,400 institutions of higher education, and in 1962, 190 thousand students in 1,453 institutions are expected to borrow. A supplemental estimate for 1962 is anticipated for separate transmittal so that loans can be made in advance to incoming freshmen for the academic year 1962-63.

2. *Science, mathematics, and foreign language instruction.*—Grants are made to States on a matching basis for acquisition of equipment and minor remodeling of laboratory or other space; each appropriation for this purpose is available for 2 years. Loans are made to nonprofit private schools for similar uses. The demand for these loans has not been as great as the percentage of the appropriation required to be reserved for this purpose,

thus causing an obligated balance to be lapsed each year. Matching grants are also made to States for supervision and administration of the program.

3. *National defense fellowships.*—One-, two-, and three-year fellowships are awarded to individuals accepted for study in graduate programs, and grants are made to institutions where such individuals are enrolled. The objectives of the program are to expand graduate programs for training of college and university teachers and to promote broader geographical distribution of graduate training facilities.

	1960 actual	1961 actual	1962 estimate	1963 estimate
Number of fellowships awarded.....	1,500	1,500	1,500	1,500
Number of graduate programs.....	472	678	813	925

4. *Guidance, counseling, and testing.*—Grants are made to States on a matching basis to assist in establishing and maintaining programs of testing, guidance, and counseling, and contracts are made with institutions of higher education for operation of institutes for improved training of counseling personnel, including provision for stipends to public school personnel in attendance.

	1960 actual	1961 actual	1962 estimate	1963 estimate
Number of institute participants.....	3,632	3,128	2,610	2,310

5. *Advanced training in foreign areas and languages.*—Contracts are made with institutions of higher education for Federal payment of up to one-half the cost of operation of language and area study centers and full costs of institutes for advanced training of modern foreign language teachers. Stipends are paid to persons in attendance. Contracts are made for research and studies in the area of foreign language instruction.

	1960 actual	1961 actual	1962 estimate	1963 estimate
Number of language and area study centers.....	46	47	52	54
Number of individuals receiving stipends for language and area studies.....	474	769	1,088	977
Number of language institute participants.....	2,145	3,876	4,246	4,246
Research projects initiated.....	95	50	50	45

6. *Educational media research.*—Research and demonstrations, financed by grants and contracts, are conducted in the use of new media for educational purposes. It is estimated that 120 projects will be initiated in 1963, in comparison with 114 in 1960, 80 in 1961, and 95 in 1962.

7. *Grants to States for area vocational programs.*—Grants are made on a matching basis to States to provide for establishing technical and sub-professional training programs. It is estimated that 200 thousand students will participate in these programs in 1963, compared with 101 thousand in 1960, 120 thousand in 1961, and 160 thousand in 1962.

8. *Grants to States for statistical services.*—Grants are made on a matching basis to assist the States in improving educational statistics. Total payments to any State may not exceed \$50 thousand annually.

New obligational authority (appropriation).....	1,000	1,000	1,000

1. *Grants to institutions of higher education.*—Grants are made to assist in providing training of professional personnel in fields related to education of mentally retarded children. In 1961, about 68 fellowships, along with supporting grants to assist in covering the cost of training each fellow, were allocated to 20 institutions. During 1962 and in 1963 about 68 fellowships are expected to be allocated, along with supporting grants, and 4 grants will be made to stimulate development of new advanced graduate programs in geographic regions not currently served. In total, 288 fellowships will have been awarded in the years 1960 through 1963.

2. *Grants to States.*—Grants are made to State educational agencies to assist in establishing fellowships for personnel engaged or preparing to engage in employment as supervisors of educational programs for mentally retarded children. In 1961, about 96 fellowships with supporting grants were awarded. During 1962 and in 1963 it is estimated that 100 fellowships will be awarded, and grants will be made to assist institutions in meeting the cost of training each fellow. In total, 389 fellowships will have been awarded in the years 1960 through 1963.

OFFICE OF EDUCATION—Continued

Current authorizations—Continued

EXPANSION OF TEACHING IN EDUCATION OF THE DEAF

For grants to public or other nonprofit institutions of higher education for courses of study and scholarships for training teachers of the deaf, [and not to exceed \$75,000 for salaries and expenses in connection therewith, including services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), \$1,575,000] \$1,500,000. (Supplemental Appropriation Act, 1962.)

Program and Financing (in thousands of dollars)

	1961 actual	1962 estimate	1963 estimate
Program by activities:			
Grants to institutions of higher learning (total program costs—obligations) (object class 41).....		1,179	1,500
Financing:			
Comparative transfers to other accounts.....		59	
Unobligated balance lapsing.....		337	
New obligational authority (appropriation)		1,575	1,500

Grants are made to institutions of higher education to assist in providing and improving courses of training for teachers of the deaf. In 1962 and 1963, grants will be made to approximately 30 participating institutions. In 1962, 261 scholarships and fellowships will be awarded, with supporting grants to the institutions to assist in the cost of supporting each recipient of an award. In 1963, 360 awards will be made.

COOPERATIVE RESEARCH

For cooperative research, surveys, and demonstrations in education as authorized by the Act of July 26, 1954 (20 U.S.C. 331-332), [\$5,000,000] \$11,000,000, to remain available until expended. (Department of Health, Education, and Welfare Appropriation Act, 1962.)

Program and Financing (in thousands of dollars)

	1961 actual	1962 estimate	1963 estimate
Program by activities:			
Cooperative research (total program costs).....	2,865	4,024	6,218
Change in selected resources ¹	491	624	4,782

Financing:			
Comparative transfers from other accounts.....	-3,356		
Unobligated balance lapsing.....		352	
New obligational authority (appropriation)		5,000	11,000

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1960, \$1,392 thousand (1961 adjustments - \$2 thousand); 1961, \$1,881 thousand; 1962, \$2,505 thousand; 1963, \$7,287 thousand.

Research and demonstration projects are carried on in cooperation with colleges, universities, and State educational agencies. Projects are supported in such areas as the nature of the learning process; the nature of mental abilities; course content; the education of special groups; the reaction of the student to his academic environment; and various elements of school administration. In 1962, programed research projects are being initiated in the areas of teaching of English and identification and development of talented and able youth; in 1963, social studies

will be added to the areas of particular concern. From 1957, when the program began, through 1961, 342 projects have been supported, of which 132 have been completed.

The 1963 estimate provides for the full cost of new research projects that will be initiated in 1963 but extend into subsequent years.

SALARIES AND EXPENSES

For expenses necessary for the Office of Education, including surveys, studies, investigations, and reports regarding libraries; coordination of library service on the national level with other forms of adult education; development of library service throughout the country; purchase, distribution, and exchange of education documents, motion-picture films, and lantern slides; [\$11,594,000] \$12,741,000. (Department of Health, Education, and Welfare Appropriation Act, 1962.)

¹ Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1960, \$320 thousand; 1961, \$326 thousand; 1962, \$250 thousand; 1963, \$300 thousand.

1. *Statistics and research.*—Assistance is provided on planning research studies and major responsibility assumed for collection and analysis of basic educational statistics. Basic data and statistics on library resources are made available, and consultative services are rendered. The division administers grants to States for rural library services and makes studies and reports on this program. Educational media research grants, authorized by the National Defense Education Act, are administered, and advisory services in the area of educational media are provided. Motion picture films for the deaf are captioned and disseminated.

2. *Administration of school assistance in federally affected areas.*—Applications for school construction and operation aid to school districts affected by Federal activities are examined and acted upon.

3. *Vocational education.*—Information is developed and publications are issued. Advisory services are provided to Federal, State, and local agencies and to professional groups, and the States are given assistance in the appraisal and development of vocational educational programs. Grants to States are administered for vocational education under the George-Barden, Smith-Hughes, and National Defense Education Acts.

4. *Higher education.*—Advisory services are provided to Federal and State agencies, to professional groups, and to

higher educational institutions; information is developed and publications are issued. The division administers programs authorized by the National Defense Education Act which relate to higher education institutions, such as the student loan program, foreign language and area centers, institutes for training teachers of modern foreign languages, institutes for training counseling personnel, and the fellowship program.

5. *International education.*—Information is developed and disseminated on education in other countries and educational exchange programs are administered in cooperation with the Department of State and Agency for International Development.

6. *State and local school systems.*—Information is developed and publications are issued concerning elementary and secondary education and State and local school administration; advisory services are provided to Federal, State, and local agencies, and to professional groups. The division administers aid programs authorized by the National Defense Education Act, such as financial assistance to States for strengthening science, mathematics, and foreign language instruction; for guidance, counseling, and testing; and for improving statistical services. The division also administers grant programs to increase training of personnel who will engage in education of mentally retarded and deaf children as well as the program to encourage and assist in establishment of science clubs.

7. *Program direction and services.*—Central direction management and other services to the various programs of the Office are provided; legislative programs and studies and reports on Federal and State educational legislation are developed; and information services are made available to the public. A program of regional representation is also provided.

Land Grant College Aid (total program costs—obligations) (object class 41).....	2,225	3,775	
Financing:			
New obligational authority (appropriation)	2,225	3,775	

The Hawaii Omnibus Act (48 U.S.C. prec. 491 note) authorized an appropriation of \$6 million to the State of Hawaii in lieu of a land grant for the support of its college of agriculture and the mechanic arts. The funds must be invested to yield an income in accordance with those provisions of the Morrill Act of 1862 relating to use of land-grant funds held by similar institutions of higher education. An amount of \$2,225 thousand was paid to the State of Hawaii in 1961 and \$3,775 thousand was paid in 1962.
